A Word to Potential Investors

All investments involve risk

With these funds, as with most investments, future performance may differ from past performance. There is no guarantee that any fund will meet its objectives or achieve any particular level of performance.

Fund investments are not bank deposits. The value of your investment can go up and down, and you could lose some or all of your invested money. Levels of income could also go up or down (as a rate or in absolute terms). No fund in this Partial Prospectus for Switzerland is intended as a complete investment plan, nor are all funds appropriate for all investors.

Before investing in any fund, you should understand its risks, costs and terms of investment, and how well these characteristics align with your own financial circumstances and risk tolerance.

As a potential investor, it is your responsibility to know and follow all applicable laws and regulations, including any foreign exchange restrictions, and to be aware of potential tax consequences (for which the SICAV will under no circumstances be responsible for). We recommend that you consult an investment adviser, legal adviser and tax adviser before investing. Nothing in this document should be considered professional advice of any type.

Any difference among fund security currencies, fund base or share class currencies, and your home currency may expose you to currency risk. If your home currency is different from your share class currency, the performance you experience as an investor could be very different from that of the share class.

Who can invest in these funds

Distributing this Partial Prospectus for Switzerland, offering these shares for sale, or investing in these shares is legal only where the shares are registered for public sale or where sale is not prohibited by local law or regulation. Neither this Partial Prospectus for Switzerland nor any other document relating to the SICAV is an offer or solicitation in any jurisdiction, or to any investor, where not legally permitted or where the person making the offer or solicitation is not qualified to do so.

Neither these shares nor the SICAV are registered with the US Securities and Exchange Commission or any other US entity, federal or otherwise, or in any provincial or territorial jurisdiction in Canada. Therefore, unless the Management Company is satisfied that it would not constitute a violation of US or respectively Canadian securities laws, these shares are not sold in the USA or in Canada respectively and are not available to, or for the benefit of, US persons or Canadian residents respectively.

For more information on restrictions on share ownership, contact us (see below).

Which information to rely on

In deciding whether or not to invest in a fund, you should look at (and read completely) the most recent Partial Prospectus for Switzerland, as well as the relevant Key Information Documents (KIDs) and the most recent financial report(s), all of which are considered part of the Partial Prospectus for Switzerland. All of these documents are available online at **fidelityinternational.com**. By subscribing for shares in any of these funds, you are considered to accept the terms described in these documents.

Together, all these documents contain the only approved information about the funds and the SICAV. Anyone who offers any other information or representation, or who makes investment decisions based on the same, does so without authority and at their sole risk. Information in this Partial Prospectus for Switzerland, or any document about the SICAV or funds, may have changed since the publication date. In case of any inconsistency in translations of this Partial Prospectus for Switzerland, the articles of incorporation or the financial reports, other than differences arising through the need to comply with local regulations or directives, the English version will prevail, unless the Management Company or the depositary decide otherwise.

Fund Descriptions

All of the funds described in this Partial Prospectus for Switzerland are part of the SICAV, which functions as an umbrella structure for them. The SICAV exists to offer investors access to professional investment management through a range of funds, each taking its own investment approach while offering high liquidity of fund shares and practicing sound risk diversification.

By law, each fund is permitted to invest as described in "General Investment Powers and Restrictions", and equally is required to comply with the restrictions stated in that same section.

However, each fund also has its own investment policy, which is generally narrower than what is permitted by law. To a limited extent, a fund may use investments and techniques not described in its investment policy so long as it is consistent with law and regulation, and with the portfolio's investment objective.

Each fund may also temporarily depart from its investment policy to address unusual market conditions or large unpredictable event. Descriptions of the specific investment objectives, main investments, and other key characteristics of each fund begin on the next page.

The Management Company has overall responsibility for the SICAV's business operations and its investment activities, including the investment activities of all of the funds. The Management Company may delegate some of its functions to various service providers, such as investment management, distribution and central administration. The management company retains supervisory approval and control over its delegates.

More information about the SICAV, the management company and the service providers appear in the final section of this Partial Prospectus for Switzerland, "Management and Governance".

For information on fees and expenses you may have to pay in connection with your investment, consult the following:

- Maximum fees for buying, exchanging, and selling most shares: this section.
- Annual fees deducted from your investment: this section.
- Recent actual expenses: the applicable KID or the SICAV's most recent shareholder report.
- Fees for currency conversions, bank transactions, and investment advice: your financial advisor, the transfer agent, the distributor, or other service providers, as applicable.

TERMS WITH SPECIFIC MEANINGS

The terms below have the following meanings in this Partial Prospectus for Switzerland.

2010 Law The Luxembourg law of December 17, 2010 on Undertakings for Collective Investment, as amended.

the articles means the Articles of Incorporation of the SICAV.

article 8 product In SFDR, a fund that promotes environmental and/or social characteristics.

article 9 product In SFDR, a fund that has sustainable investing as its objective.

assets In the context of fund assets, means a fund's total net assets.

base currency The currency in which a fund does the accounting for its fund and maintains its primary NAV.

below investment grade (high yield) securities Shall mean securities with a rating of BB+ or less from Standard & Poor's or equivalent rating from an internationally recognised rating agency (in case of divergent ratings, the worst of the best two credit ratings applies, unless otherwise specified).

the Board The Board of Directors of the SICAV.

bond Any type of debt or debt-related security.

business day A day on which the banks in the relevant jurisdiction are normally open for business.

Climate Transition Benchmark exclusions Exclusions applied by funds in respect of Climate Transition Benchmarks as set out in article 12(1)(a) to (c) of Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020.

Connected Person 'Connected Person' of any investment adviser, Investment Manager, depositary or any Distributor means:

a) any person beneficially owning, directly or indirectly, 20% or more of the ordinary share capital of that company or able to exercise, directly or indirectly, 20% or more of the total votes in that company;

b) any person controlled by a person who meets one or both of the requirements set out in a) above;

c) any company 20% or more of whose ordinary share capital is beneficially owned, directly or indirectly, by any investment adviser, Investment Manager or Share Distributor taken together; and any company 20% or more of the total votes in which can be exercised, directly or indirectly by such investment adviser, Investment Manager or Share Distributor taken together; and

d) any director or officer of any investment adviser or Investment Manager or Share Distributor or of any Connected Person of that company, as defined in a), b) or c) above.

distressed securities Securities issued by a company, sovereign state or entity that are either in default or in high risk of default.

Distributor a FIL Group company named in the Partial Prospectus for Switzerland through which Shares in the Fund may be bought, sold or switched.

Efficient Portfolio Management refers to techniques and instruments which fulfil the following criteria:

a) they are economically appropriate in that they are realised in a cost effective way;

b) they are entered into for one or more of the following specific aims;

(i) reduction of risk

(ii) reduction of cost;

(iii) generation of additional capital or income for the funds with a level of risk which is consistent with the risk profile of the funds and the risk diversification rules of the funds

c) their risks are adequately captured by the risk management process of the Fund.

emerging markets generally defined as emerging or developing economies by the World Bank the United Nations or other authorities or included in the MSCI Emerging Markets Index or other comparable index.

ESG Environmental, social and governance.

ESG characteristics An indication of ESG characteristics based on Fidelity's assessments, proprietary ESG ratings and/or third-party data.

Equity includes equity and equity-linked instruments.

FIL Group or Fidelity International Ltd (FIL) and its affiliated companies.

financial reports The annual report of the SICAV, along with any semi- annual report that has been issued since the most recent annual report.

FIRST The term "FIRST" stands for "Fidelity Research Strategy". Where the term "FIRST" is included as part of a fund's name, this means that the fund adopts the FIRST investment process. The FIRST investment process employs quantitative methods to capture the highest conviction (i.e. most favoured) ideas generated by the Investment Manager's research analysts whilst also seeking consistency and repeatability of the investment outcomes. Qualitative judgement is then applied to ensure that only stocks that meet the portfolio management team's criteria are included in the fund's portfolio and stock selection is the primary driver of both risk and return. For the avoidance of doubt, the usage of the term "FIRST" is not indicative of the fund's performance or returns.

TERMS WITH SPECIFIC MEANINGS *Continued.*

fund Except where indicated otherwise, any fund for which the SICAV serves as an umbrella UCITS.

Fund Fidelity Funds SICAV.

General Distributor FIL Distributors

government Any government, government agency, supranational or public international entity, local authority or government-sponsored organisation.

intermediary Any intermediary, distribution agent or other intermediary with whom the distributor has an agreement to distribute shares.

invest in "Fund Descriptions" means both direct and indirect exposure to assets.

Institutional reserved Funds means Institutional Global Focus Fund Institutional Emerging Markets Equity Fund.

KID Key Information Document.

listed Listed or traded on a Regulated Market.

NAV Net asset value per share; the value of one share of a fund.

Paris Aligned Benchmark exclusions Exclusions applied by funds in respect of administrators of Paris Aligned Benchmarks as set out in article 12(1)(a) to (g) of Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020.

the Partial Prospectus for Switzerland This document.

regulated market A market within the meaning of directive 2014/65/EC of 15 May 2014 (as amended from time to time) or any other market which is regulated, operates regularly and is recognised and open to the public.

research fees Fees payable by the relevant fund to third parties in respect of investment research and related advisory services relating to equities and equity related securities. Further information in respect of the Research Fees, including the maximum amount that may be charged to a fund and details of the collection methodology, is available at the registered office of the Fund. For the avoidance of doubt, no such fees are currently being charged.

REIT Real Estate Investment Trust or REIT is a closed-ended entity which is listed on a regulated market that is dedicated to owning, and in most cases, managing real estate. REITs classify as transferable securities and are eligible investments for UCITS under 2010 Law.

RMB is a colloquial reference to the Chinese Renminbi, which is also known internationally as the Chinese Yuan ('CNY'). Whilst the CNY is traded both onshore in China and offshore (primarily in Hong Kong), it is the same currency although currently traded at different rates. The offshore rate for trading CNY is generally referred to as 'CNH'. The CNH rate will be used when determining the value of the Shares of a fund, as well as for hedging purposes.

SFDR The Regulation (EU) 2019/2088 on the sustainability-related disclosures in the financial services sector.

SFTR Regulation Regulation (EU) 2015/2365 on transparency of securities financing transactions.

sustainable investment is an investment in an economic activity that contributes to an environmental or social objective, provided that such investment does not significantly harm any other environmental or social objectives and that the investee companies follow good governance practices.

Sustainability Annex is the annex prepared for each fund which is subject to the requirements of article 8 or article 9 of the SFDR containing pre-contractual disclosures in accordance with the SFDR.

Sustainability Risks are an environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment, as defined under the SFDR.

the SICAV Fidelity Funds.

UCITS An Undertaking for Collective Investment in Transferable Securities governed by the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities.

US person Any of the following, as defined in the US laws or regulations indicated:

a "United States person" per section 7701(a)(30) of the Internal Revenue Code of 1986

a "U.S. person" per Regulation S of the 1933 Act

a person that is "in the United States" per Rule 202(a)(30)-1 under the Investment Advisers Act of 1940

a person that does not qualify as a "Non-United States Person" as per Commodities Futures Trading Commission Rule 4.7.

Valuation Day each weekday (any Monday to Friday inclusive) excluding 25 December ('Christmas Day') and 1 January ('New Year's Day') as well as any other day which the Directors have determined, in the best interests of the shareholders, as non-Valuation Days for specific funds. Non-Valuation Days may for example be any day observed as a holiday on a stock exchange which is the principal market for a significant portion of the investments attributable to a fund, or any day which is a holiday elsewhere so as to impede the calculation of fair market value of the investments attributable to a given fund, which may also include any day immediately preceding such relevant market closure where the dealing cut-off time of the relevant fund occurs at a time when the relevant underlying main market is already closed to trading and the following days are a period of consecutive market closure days.

The list of expected non-Valuation Days is available on **https://fidelityinternational.com/non-valuation-days/** and is updated in advance on a semi-annual basis. However, the list may be further updated from time to time in advance as is reasonably practicable in exceptional circumstances where the Directors believe that it is in the best interests of the shareholders.

Other interpretation

- in the absence of further specification in "Fund Descriptions", references to an issuer or company's geographic area means either that the issuer is listed, incorporated, headquartered, or derives most, or a significant part, of its revenues in that geographic area.
- no index provider sponsors, endorses, sells, or promotes these funds or makes any warranty, representation or judgment about the SICAV, the management company, the investment manager or the use of any index.

Fidelity Funds –

Absolute Return Global Equity Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide an absolute return over the medium to long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies anywhere in the world, including emerging markets, as well as cash and money market instruments.

The fund may invest in the following assets according to the percentages indicated:

- China A and B shares (directly and/or indirectly): less than 30% (in aggregate)

The fund typically has between -30% and 30% net equity exposure.

The fund may also seek exposure to REITs.

The Investment Manager aims to outperform the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines qualitative and quantitative market analysis into a disciplined portfolio construction process to allocate investments across various securities.

The fund may take long positions in securities that are deemed to be undervalued and may short those deemed to be overvalued. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions.

Derivatives may be used to create market exposures through equity, currency, volatility or index related derivatives and include over-the-counter and/or exchange traded options, futures, contracts for difference (CFD), equity linked notes, warrants, forward contracts, swaps, and/or a combination of the above. The long and short active currency positions implemented by the fund may not be correlated with the underlying securities positions held by the fund.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 200%; maximum 400%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) Secured Overnight Financing Rate (SOFR). Used for: performance comparison, outperformance, and performance fee calculation.

The fund is not benchmark-constrained and its performance over any period may or may not deviate significantly from that of the benchmark.

BASE CURRENCY USD.

- Equities
- Hedging
- Investment fund
- Leverage
- Liquidity
- Market
- Operational
- Russia
- Short position
- Real estate

RISK MANAGEMENT METHOD Absolute VaR Approach, limited to 9.5%. Expected leverage: 400% (may be higher or lower but not expected to exceed 650%).

Planning Your Investment

INVESTOR PROFILE This product may appeal to investors

- with a basic knowledge of and no or limited experience of investing in funds;
- who plan to hold their investment for a recommended holding period of at least 3 years;
- who seek capital growth over the recommended holding period; and
- who understand the risk of losing some or all of the capital invested.

ORDER PROCESSING Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement normally occurs within 3 business day

Main Share Classes

	Minimum Investment (USD)[1]		Maximum Dealing Fees	Maximum Annual Fees		
Class	Initial and holding	Subsequent	Entry	Management	Distribution	Performance
A	2,500	1,000	5.25%	1.50%	—	15%
A	2,500	1,000	5.25%	1.80%	—	—
E	2,500	1,000	—	1.50%	0.75%	15%
I	10 million	100,000	—	1.05%	—	—
I	10 million	100,000	—	0.80%	—	15%
W/Y	2,500	1,000	—	0.80%	—	15%

Where Class B shares are available the annual management fee of those Shares will be the same as that of the Class A Shares. For a current and complete list of available share classes, including currency hedged, please see section "Investing in Funds". See section "Fund Fees and Costs" for detailed explanation of above fees.

[1] Or equivalent in any other freely convertible currency. The performance fee is paid if the relevant class exceeds its high water mark, which is adjusted for the return of the relevant cash index. Accrued daily, with accruals written back in case of underperformance, and paid to the Investment Manager annually.

Fidelity Funds –

FIRST All Country World Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies in developed and emerging markets anywhere in the world. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. Investments are usually focused on the highest conviction stock recommendations identified by FIL Group research analysts, other than in extreme market conditions or where required to meet the investment objective of the fund.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Dividend Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term and provide income.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in income producing equities of companies from anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The Investment Manager aims to provide income in excess of the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager focuses on investments which it believes offer attractive dividend yields in addition to price appreciation.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

Global Defensive Equity Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth and income over the long term while seeking to preserve capital relative to the benchmark.

INVESTMENT POLICY The fund will invest at least 70% of its assets, in income producing equities of companies from anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager will target investments which it believes offer attractive dividend yields in addition to price appreciation.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Founders Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets.

The fund aims to invest in companies in which a founder, their family or foundation exerts significant influence by virtue of management or board representation or has an economic interest in the share capital, or where the subsequent management are considered by the investment manager to demonstrate the same managerial qualities.

The fund may also invest in money market instruments on an ancillary basis. The fund may invest in the following assets according to the percentages of assets indicated:

- China A and B shares (directly and/or indirectly): less than 10% (in aggregate)

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the fund may take into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio better than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

Fidelity Funds –

Global Innovators Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets.

The fund aims to invest in companies that have the potential to be on the leading edge of innovation. These are companies expected to benefit from, or contribute to, the development and adoption of innovative technologies, products, services, or business models. The fund aims to identify businesses positioned to drive or benefit from structural change and long-term trends across industries.

The fund may invest in the following assets according to the percentages of assets indicated:

- China A and B shares (directly and/or indirectly): less than 10% (in aggregate)
- Eligible commodity exposure: up to 10%
- Emerging markets (including China): up to 30%
- Money market instruments: up to 20%
- REITS: up to 10%
- SPACs: less than 5%

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry economic conditions, and other factors and does not integrate Sustainability Risks in its investment process.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund may use TRS.

TRS usage Expected 0%; maximum 5%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%

BENCHMARK(S) NASDAQ Composite Index, a broad market index. Used for: risk management and performance comparison.

* The initial subscription period for the share class shall start at the inception (the "Launch Date") or such earlier or later date as the Management Company may determine and shall end at 4:00 PM CET on [31 March 2027] or such earlier or later date as the Management Company may determine. The initial subscription price for Classes T shares in the fund shall be 10 USD, after which subscriptions will be executed at the prevailing NAV. After the end of the initial subscription period, the share class will be closed to subscriptions to Class T shares for a period of three years that will end after the dealing cut-off on [31 March 2030] or such earlier or later date as the Management Company may determine. Existing shareholders in Class T Shares may subscribe for additional Class T Shares following the end of the three year period.

** A contingent deferred sales charge applies to this share class, please refer to the section "Investing in the Funds" for additional information.

Fidelity Funds –

Global Industrials Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are involved in the research, development, manufacture, distribution, supply or sale of materials, products or services that relate to cyclical and natural resource industries. These investments may be from anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI AC World Industrials + Materials + Energy Index. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Thematic Opportunities Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets. It will seek exposure to long-term market themes that benefit from long-term (structural and not cyclical) economic or social trends, such as disruptive technologies that modify consumer behaviour, demographics (population growth, ageing and middle class growth) and climate change. Secular changes generally last for ten years or more and can lead to structural changes.

Disruptive technologies are innovations that meaningfully change consumer, industry or company behavior. Demographic trends are long-term dynamics including those related to ageing population (including companies relating to healthcare and retirement consumption), growth of the middle class (companies exposed to increased consumption, increasing financial services and urbanization), and population growth (including companies exposed to scarcity of resources and need for improving productivity and automation). The Investment Manager has the discretion on the choice of themes the fund invests in.

The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China A and B shares (directly and/or indirectly): less than 30% (in aggregate)
- REITS: up to 20%
- SPACs: less than 5%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – Multi Asset ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and for efficient portfolio management.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

Fidelity Funds –

Global Consumer Brands Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets, and linked to the theme of consumer brands, such as companies with intellectual property, pricing power and a strong track record of growth. Investments will be made in companies involved in the designing, manufacturing, marketing and/or selling of branded consumer goods and/or services. The fund may also invest in money market instruments on an ancillary basis.

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A or B shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Climate Solutions Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term by investing in sustainable investments.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies anywhere in the world, including emerging markets.

The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more United Nations Sustainable Development Goals ("SDGs"). The fund may (on an ancillary basis and up to 20% of its assets) hold cash, money market instruments, or other investments used for hedging and efficient portfolio management purposes.

The fund aims to invest in companies which contribute to climate change mitigation and adaptation. This includes companies enabling decarbonisation via technologies and solutions which materially reduce greenhouse gas emissions or which contribute to decarbonisation through clean energy solutions and other low-carbon technologies, as well as companies that develop products, services, or infrastructure which aim to enhance resilience to climate change impact, such as water management solutions, fire protection and cooling systems.

The fund may invest, less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing the ESG profile and SDG alignment fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The Investment Manager aims to be an active owner and engage with companies held within the fund to influence positive change.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers based on their ESG characteristics.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 9 (has a sustainable investment objective) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. **Used for:** risk monitoring, investment selection and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Demographics Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets in equities of companies from anywhere in the world. The fund aims to invest in companies that are able to benefit from demographics changes. Investments will include, but are not limited to, health care and consumer industries companies that stand to benefit from the effects of rising life expectancy, expanding middle class and population growth. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest less than 30% of its assets in emerging markets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

Fidelity Funds –

Technology Opportunities Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets.

The fund aims to invest in companies that develop or intend to develop products, processes or services supporting, providing or benefiting from technological advances or improvements across information technology and communications related sectors.

The fund may also invest in money market instruments on an ancillary basis.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

The fund's largest ten holdings may account for 50% of its assets, resulting in portfolio concentration.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other financial measures, as well as company management, industry, economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Fidelity Funds –

Global Dividend Plus Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve income with potential for capital growth over time.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world including emerging markets.

The fund may invest less than 30% of Its assets (directly and/or indirectly) in China A and B shares (in aggregate).

The Investment Manager aims to provide income in excess of the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics. The Investment Manager focuses on investments which it believes offer attractive dividend yields in addition to price appreciation. It considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics.

Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS. The fund will use a covered call strategy (writing call options on equities or equity indices) in order to generate additional income.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. **Used for:** performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Structural Growth Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets in equities of companies from anywhere in the world, including emerging markets. The fund aims to seek exposure to structural growth opportunities, economic or social trends which drive capital growth over the long term.

The fund may invest in the following assets according to the percentages indicated:

- collateralised and securitised debt securities (including ABS and MBS) and collateralised loan obligations: up to 20% (in aggregate)
- China A and B shares and listed onshore bonds (directly and/or indirectly) including urban investment bonds and China offshore bonds (including dim sum bonds): less than 40% (in aggregate)
- emerging markets: up to 50%
- REITS: up to 20%
- SPACs: less than 5%
- eligible commodity exposure: up to 10%
- money market instruments: up to 20%
- investment grade and/or below investment grade or unrated bonds: up to 30% (in aggregate)

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – Multi Asset ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 30%.

Fidelity Funds –

Sustainable Global Equity Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term by investing in Sustainable Investments.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets.

The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more United Nations Sustainable Development Goals ("SDGs"). The fund may (on an ancillary basis and up to 20% of its assets) hold cash, money market instruments, or other investments used for hedging and efficient portfolio management purposes.

The fund may invest in the following assets according to the percentages of assets indicated:

- China A and B shares (directly and/or indirectly): less than 30% (in aggregate)
- Equity-linked securities: up to 10%
- Emerging markets: less than 30%
- European equities: less than 50%
- REITs: up to 10%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing ESG profile and SDG alignment fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

The Investment Manager aims to be an active owner and engage with companies held within the fund to influence positive change.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 9 (has a sustainable investment objective) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and for investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring, and performance comparison.
The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Equity Income ESG Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

The fund aims to have a lower carbon footprint than that of the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG factors when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, performance comparison and carbon footprint comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Healthcare Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets in equities of companies from anywhere in the world.

The fund aims to make investments in companies that are involved in design, manufacture or sale of products and services in connection with health care, medicine or biotechnology.

The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

A minimum of 80% of the fund's investments are used to meet the environmental or social characteristics promoted by the fund, as described in the fund's investment policy. In addition, the Investment Manager may consider ESG ratings and other ESG criteria when assessing investment risks and opportunities and may invest in securities of issuers with low but improving ESG profiles.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and for efficient portfolio management.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 15%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI AC World Health Care Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Smaller Companies Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets in equities of small companies from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages of assets indicated:

- Emerging markets (including China): up to 25%
- REITs: up to 15%
- Money market instruments: up to 10%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry economic conditions, and other factors and does not integrate Sustainability Risks in its investment process.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 40%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI ACWI Small Cap Index, a broad market index that does not take into account ESG characteristics. **Used for:** performance comparison only.

Fidelity Funds –

Water & Waste Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies from anywhere in the world, including emerging markets.

The fund aims to make investments in companies that are involved in the design, manufacture, or sale of products and services used in connection with the water and waste themes. The water theme includes those companies involved in water production, treatment, purification, transport and dispatching of water, the use of water for power generation, as well as solutions helping to reduce water needs. The waste theme includes those companies involved in the collection, recovery, sorting, disposal and recycling of waste as well as businesses helping to improve efficiency and reduce waste production. The waste theme also includes those companies specialising in the treatment of wastewater, sewage, solid, liquid and chemical waste and any consulting or engineering services in connection with these activities.

The fund may also invest in money market instruments on an ancillary basis.

The fund may invest less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

A minimum of 80% of the fund's investments are used to meet the environmental or social characteristics promoted by the fund, as described in the fund's investment policy. In addition, the Investment Manager may consider ESG ratings and other ESG criteria when assessing investment risks and opportunities and may invest in securities of issuers with low but improving ESG profiles.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers based on their ESG characteristics.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Fidelity Funds –

European Dividend Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term and provide income.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in income producing equities of companies that are headquartered, or do most of their business, in Europe. The fund may also invest in money market instruments on an ancillary basis.

The Investment Manager aims to provide income in excess of the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager will target investments which it believes offer attractive dividend yields in addition to price appreciation.

The Investment Manager considers ESG factors when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Fidelity Funds –

European Dynamic Growth Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are headquartered, or do most of their business, in Europe. The fund may also invest in money market instruments on an ancillary basis.

The fund typically has a bias towards medium sized companies with a market capitalisation of between 1 and 10 billion Euro.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI Europe Index, a broad market index that does not take into account ESG characteristics. **Used for:** performance comparison.

Fidelity Funds –

European Growth Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies listed on European stock exchanges. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and for efficient portfolio management.

TRS usage None.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI Europe Index, a broad market index that does not take into account ESG characteristics. Used for: risk monitoring, investment selection and performance comparison.

The fund invests in securities of the benchmark, however, management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

European Value Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business in Europe. The fund aims to invest in companies that the Investment Manager considers to be undervalued. The fund may also invest in money market instruments.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

Fidelity Funds –

Euro 50 Index Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term, by tracking the performance of the benchmark (before fees and expenses).

INVESTMENT POLICY The fund invests, including through the use of derivatives, in equities of companies in the benchmark.

To manage its cash position, the fund may invest in collective investment schemes (such as liquidity funds), including those managed by FIL Group, in addition to money market instruments, cash and term deposits.

INVESTMENT PROCESS In passively managing the fund, the Investment Manager seeks to replicate (track) the composition of the benchmark and minimise the difference between the return of the portfolio and that of the benchmark.

The Investment Manager does not integrate Sustainability Risks in its investment process. The fund's ESG characteristics are essentially similar to those of the benchmark.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and for efficient portfolio management.

TRS usage None.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) Solactive Euro 50 Index NTR. Used for: tracking only. For more information, see "Further Information on Fidelity Funds - Euro 50 Index Fund" and **https://www.solactive.com/indices.**

For reasons such as liquidity or excessive cost, it may not always be practical for the fund to invest in every constituent of the benchmark or at its weighting within the benchmark. As the case may be, the fund may also invest in securities that are not constituents of the benchmark.

Fidelity Funds –

European Smaller Companies Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of small and medium sized companies that are listed, headquartered, or do most of their business in Europe. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

Fidelity Funds –

Italy Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of Italian companies. The fund shall invest at least 70% in companies not engaged in real estate business, which are resident in Italy or in another EU or EEA Member State with a permanent establishment in Italy.

The fund cannot invest more than 10% of its assets in financial instruments issued by, or entered into with the same company, or companies belonging to the same group, or in cash deposits.

The fund cannot invest in financial instruments issued by, or entered into with, companies which are not resident in countries that allow an adequate exchange of information with Italy.

Piano Individuale di Risparmio a lungo termine (PIR) Eligibility: Without prejudice to the investment restrictions set out in General Investment Powers and Restrictions and in accordance with the Italian Law No. 232 of 11 December 2016 (as amended), at least 17.5% of the fund's assets shall be securities issued by companies which are not listed in the FTSE MIB index or in any equivalent indices, and at least 3.5% of the fund's assets shall be securities issued by companies which are not listed in the FTSE MIB index, FTSE Mid Cap index or in any equivalent indices.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

Fidelity Funds –

Europe Equity ESG Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business in Europe. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI Europe Index, a broad market index that does not take into account ESG characteristics. Used for: investment selection, risk monitoring and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

See section "Fund Fees and Costs" for detailed explanation of above fees.

[1] Or equivalent in any other freely convertible currency.

Fidelity Funds –

Sustainable Eurozone Equity Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term by investing in sustainable investments.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business in the Economic and Monetary Union (EMU) and denominated in Euro.

The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more United Nations Sustainable Development Goals ("SDGs"). The fund may (on an ancillary basis and up to 20% of its assets) hold cash, money market instruments, or other investments used for hedging and efficient portfolio management purposes. The fund aims to have lower carbon and hazardous waste footprints compared to those of the benchmark.

The Investment Manager will exclude investment in issuers with an MSCI ESG rating below 'BB'.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing the ESG profile, carbon emissions alignment and fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The investment manager aims to be an active owner and engage with companies held within the fund to influence positive change.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 30% due to the exclusion of issuers on the basis of their ESG characteristics.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 9 (has a sustainable investment objective) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI EMU Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring and performance and carbon footprint comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Switzerland Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are listed, headquartered, or do most of their business in Switzerland. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other financial measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Securities lending Expected 15%; maximum 30%.

Fidelity Funds –

UK Special Situations Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business in the UK. The fund seeks to invest in special situations equities (equities that are undervalued and whose recovery potential is not recognised by the market). The fund will have a mixture of investments in larger, medium, and smaller sized companies. The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other financial measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager will focus on companies it believes to be undervalued and whose recovery potential (i.e. potential recovery of share prices reflecting improving business fundamentals) is not recognised by the market (i.e. special situations). The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 40%; maximum 100%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

Fidelity Funds –
ASEAN Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are listed or traded in the South East Asian Nations (ASEAN) region, including countries such as Singapore, Malaysia, Thailand, the Philippines and Indonesia, as well as other emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- SPACs: less than 5%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

Fidelity Funds –

Australian Diversified Equity Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies of any capitalisation that are listed, headquartered, or do most of their business in Australia. The fund may also invest in Australian corporate hybrid and debt securities if the Investment Manager believes they offer better investment opportunities than the related equity. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- below investment grade bonds: up to 20%
- corporate bonds of any credit quality listed in the Australian stock exchange: up to 30%
- collateralised and securitised debt instruments: up to 20%
- hybrids and contingent convertible bonds (CoCos): less than 30%, with less than 20% in CoCos

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration. The fund will have a mixture of investments in larger, medium and smaller sized companies.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

As well as investing directly in equity and fixed income securities, the fund will also achieve exposure indirectly through the use of derivatives. To enhance the income of the fund, derivatives (such as options) may be used to generate additional income. The types of financial derivative instrument that will be used include index, basket or single name futures, options and contracts for difference referencing equities or bonds. Options used will include put and call options including covered call options. The generation of additional income for example, through covered call options may impact the fund's potential for capital growth, particularly in periods of rapidly rising markets where capital gains may be lower when compared with an equivalent uncovered portfolio.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 10%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) S&P ASX 200 Index. Used for: investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Asia Pacific Dividend Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term and provide income.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in income producing equity securities of companies that are headquartered or do most of their business in the Asia Pacific region, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund will invest less than 30% of its assets (directly and/or indirectly) in China A and B Shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company revenues, return on capital, cash flows and other financial measures, as well as industry and economic conditions, among other factors. The Investment Manager will select investments which it believes offer attractive dividend yields in addition to price appreciation.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

Fidelity Funds –

Asia Pacific Opportunities Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are headquartered or do most of their business in the Asia Pacific (excluding Japan) region including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in a limited number of securities, resulting in portfolio concentration.

The fund may invest in the following assets according to the percentages indicated:

- SPACs: less than 5%.
- less than 30% of its assets (directly and/or indirectly) in China A and B shares (in aggregate).

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

Fidelity Funds –

Asian Smaller Companies Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of smaller companies that are headquartered, or do most of their business, in Asia Pacific (excluding Japan), including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund will invest less than 30% of its assets (directly and/or indirectly) in China A and B Shares (in aggregate).

Smaller companies are defined as having market capitalisation range of less than USD 8,000 million in terms of the company's full market capitalisation. The fund may invest in companies outside this range.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. More particularly, the fund is managed with a quality and value bias within the Asian smaller companies' space.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Fidelity Funds –

Asian Special Situations Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth long term.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities of companies that are listed, headquartered or do most of their business in Asia (excluding Japan) including emerging markets. The fund will have a mixture of investments in larger, medium and smaller sized companies. The fund will seek opportunities in special situations equities which are shares in companies that generally have attractive valuations in relation to net assets or earning potential and/or companies which are undervalued and whose recovery potential is not recognised by the market.

The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China A and B shares (directly and/or indirectly): less than 30% (in aggregate)
- SPACs: less than 5%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers the durability of long-term growth prospects that are not fully reflected in current valuations. This includes a focus on special situations such as merger, acquisition and internal restructuring activity, that may affect company's valuations in the short-term. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and for efficient portfolio management.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 5%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI AC Asia ex Japan Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark and, its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Asia Equity ESG Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business in Asia (excluding Japan). This region includes countries that are considered as emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- less than 30% of its assets (directly and/or indirectly) in China A or B shares (in aggregate)
- SPACs: less than 5%

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe, after excluding 20% of securities with the lowest ESG ratings.

Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging and efficient portfolio management.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 0%; maximum 5%.

Securities lending Expected 15%; maximum 30%.

Fidelity Funds –

China Innovation Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business, in the Greater China Region, including China, Hong Kong, Macau and Taiwan. These investments are considered innovative in technology (such as artificial intelligence, digitisation, robotics and future mobility), lifestyle (such as health, education and wealth) and ecology (such as clean energy, environmental protection and circular economy). These investments may be from emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China A and B shares (directly and/or indirectly): up to 100% (in aggregate)
- China A shares listed on the ChiNext market or STAR board: up to 100%
- China A shares via QFI status: less than 70%

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI China All Share Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Emerging Markets Ex China Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% in equities of, and related instruments providing exposure to, companies of Latin America, Asia (excluding mainland China), Africa, Eastern Europe (including Russia) and the Middle East. The fund may also invest in money market instruments on an ancillary basis.

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other characteristics.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark.

Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information see "Sustainable Investing and ESG Integration".

SFDR product category Article 8 (promotes environmental and/or social characteristics) - ESG Tilt.

Fidelity Funds –

Emerging Markets Equity ESG Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% of its assets, in equities of companies that are listed, headquartered, or do most of their business, in developing markets including, countries in Latin America, Asia, Africa, Eastern Europe (including Russia) and the Middle East. The fund may also invest in money market instruments on an ancillary basis.

The fund will invest less than 30% of its assets (directly and/or indirectly) in China A and B Shares (in aggregate).

The fund invests in a limited number of securities (generally between 20 to 80 under normal market conditions).

The Investment Manager aims to outperform the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after exclusion of 20% of securities with the lowest ESG ratings.

The fund may invest in issuers with low but improving ESG characteristics. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 15%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) MSCI Emerging Markets Index a broad market index that does not take into account ESG characteristics. **Used for:** outperformance, performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Thailand Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in equities listed or traded on the stock exchange in Thailand. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- SPACs: less than 5%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers growth, valuation metrics, company financials, return on capital, cash flows and other financial measures, as well as company management, industry, economic conditions, and other factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

Fidelity Funds –

Absolute Return Global Fixed Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide a positive absolute return over the medium to long term.

INVESTMENT POLICY The fund invests at least 70% of its assets in below-investment grade and investment grade debt securities, currency instruments, cash and money market instruments, these investments may be from anywhere in the world, including emerging markets and be denominated in any currency.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore bonds, including urban investment bonds (directly and/or indirectly): less than 30% (in aggregate)
- credit-linked securities: less than 30%
- collateralised and securitised debt instruments: less than 20%
- equity-linked securities: less than 10%
- hybrids and contingent convertible (CoCo) bonds): less than 30%, with less than 20% in CoCos

The fund may also invest in other subordinated financial debt and preference shares.

The fund's largest ten holdings may account for 50% or more of its assets, resulting in portfolio concentration.

The fund's exposure to distressed securities is limited to 10% of its assets.

The Investment Manager aims to outperform the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across issuers, sectors, geographies and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions.

The fund uses derivatives, including complex derivative instruments or strategies, to meet the investment objectives of the fund. The types of derivatives that will be used include, futures, forwards, swaps (such as interest rate, credit default, inflation index, and total return swaps), options, swaptions, and credit and equity linked notes. Derivatives are used to achieve indirect exposure to the main assets listed above, to generate additional capital in line with the fund's risk profile or with the aim of risk or cost reduction.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 200%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) Secured Overnight Financial Rate (SOFR) USD. **Used for**: performance comparison and outperformance.

The fund is not benchmark-constrained and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Euro Ultra Short Duration Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide income whilst maintaining an average duration of investments not exceeding one year.

INVESTMENT POLICY The fund invests at least 70% of its assets in euro-denominated debt securities. This includes investment grade corporate bonds, government bonds, securitised investments, certificates of deposit, commercial paper and floating rate notes, cash and cash equivalents and money market instruments.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. Whilst the fund has an average duration of investments of not exceeding one year, the fund may invest in securities of duration which on individual basis may exceed two years.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its universe. Through the investment management process, the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

Fidelity Funds –

Global Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide a high level of income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in debt securities from anywhere in the world, including emerging markets. Investments may include investment grade and below investment grade debt securities of varying maturities and high yield bonds and emerging market debt denominated in various currencies. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- investment grade debt securities: at least 50%
- below investment grade bonds: up to 50%
- Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

[1] Or equivalent in any other freely convertible currency.

Fidelity Funds –

Global Inflation-linked Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide an attractive level of real income and capital growth over time.

INVESTMENT POLICY The fund invests at least 70% of its assets in investment grade and below investment grade inflation-linked bonds, nominal bonds issued by governments, agencies, supranational entities, corporations, and banks from anywhere in the world, including emerging markets. Investments include below investment grade and investment grade securities. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- money market instruments and term deposits: less than 30%
- convertible bonds: up to 25%
- equities and other participations rights: up to 10%.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager will utilize a range of strategies such as active yield curve strategies, sector rotation, security selection, relative value management and duration management from within the global-inflation linked, interest rate and credit markets. The Investment Manager considers ESG factors when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee issuers and countries follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions.

The fund uses derivatives, including complex derivative instruments or strategies, to meet the investment objectives of the fund with a level of risk which is consistent with the risk profile of the fund. Derivatives may be used to create economic exposure to an asset akin to a physical holding of that asset. The fund will use (i) interest rate swaps and futures to actively manage the level of interest rate risk, (ii) inflation swaps to eliminate unwanted, or pursue desired, inflation risks and (iii) currency derivatives to hedge or gain exposure to currencies or replicate currency exposure of the underlying securities of a bond index. The long and short active currency positions implemented by the fund may not be correlated with the underlying securities positions held by the fund.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) Bloomberg World Government Inflation-Linked 1 to 10 Year Index, a broad market index that does not take into account ESG factors. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Global Short Duration Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide income whilst maintaining an average duration of investments not exceeding three years.

INVESTMENT POLICY The fund invests at least 70% of its assets, in debt securities including investment grade corporate bonds and government bonds of varying maturities, below investment grade and emerging market bonds, from anywhere in the world and denominated in various currencies. The fund may also invest in money market instruments and/or other short term debt instruments including certificates of deposit, commercial paper and floating rate notes, cash and cash equivalents.

The fund may invest in the following assets according to the percentages indicated:

- below investment grade debt securities: up to 50%
- investment grade debt securities: at least 50%
- Listed China onshore debt securities (directly and/or indirectly): less than 30% (in aggregate).

The portfolio seeks to maintain an overall average credit rating of investment grade.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

Fidelity Funds –

Climate Transition Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in investment grade corporate debt securities anywhere in the world, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund focuses on supporting the climate transition by investing in bonds or bonds of issuers that; (i) contribute to climate objectives aligned with one or more of the United Nations Sustainable Development Goals; (ii) use bond proceeds to finance projects benefiting environmental or climate-related sustainability; (iii) aim to improve management of climate-related risks and opportunities.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore bonds (directly and /or indirectly) up to 30% (in aggregate) with direct exposure up to 10%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in subordinated debt and preference shares.

The fund will aim to have a lower carbon footprint compared to that of the broader market.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

A minimum of 80% of the fund's investments are used to meet the environmental or social characteristics promoted by the fund, as described in the fund's investment policy. In addition, the Investment Manager may consider ESG ratings and other ESG criteria when assessing investment risks and opportunities and may invest in securities of issuers with low but improving ESG profiles.

Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) - ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.
In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Fidelity Funds –

Strategic Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in debt securities which may include government, inflation linked, investment grade and below investment grade corporate debt securities and money market instruments. These investments may be from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions.

The fund uses derivatives including complex derivative instruments or strategies, to meet the investment objectives of the fund with a level of risk which is consistent with the risk profile of the fund. Derivatives may be used to create economic exposure to the underlying asset, this may include futures, forwards, options, and swaps. The fund will use (i) index, basket or single credit default and total return swaps to gain exposure or reduce credit risk of issuers, (ii) interest rate futures, swaps or options to actively manage the level of interest rate risk and (iii) currency derivatives to hedge or gain exposure to currencies. The long and short active currency positions implemented by the fund may not be correlated with the underlying securities positions held by the fund.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 40%; maximum 200%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 15%; maximum 30%.

BENCHMARK(S) Bloomberg Global Aggregate Bond Index, a broad market index that does not take into account ESG characteristics. **Used for:** performance comparison only.

Fidelity Funds –

US Convertible Securities Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets in convertible securities, including investment grade or below investment grade, convertible bonds, hybrids and preference shares issued by companies that are listed, headquartered or do most of their business in the US. The fund may also invest in UCITS/UCIs, cash and term deposits and may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China offshore bonds (including dim sum bonds): less than 10%
- SPACs: less than 5%

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers suitable opportunities across bond issuers, preferred stocks, and other securities across sectors, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations as well as an assessment of growth and valuation metrics, company financials, return on capital, cash flows and other measures, as well as company management, industry, economic conditions and other factors. The Investment Manager does not integrate Sustainability Risks in its investment process.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund may use TRS

TRS usage Expected 0%; maximum 5%.

Securities lending Expected 0%; maximum 30%.

Fidelity Funds –

US Dollar Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) of its assets, in US dollar denominated debt securities.

The fund may also invest in money market instruments on an ancillary basis.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS

TRS usage Expected 10%; maximum 50%.

Fidelity Funds –

US High Yield Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide a high level of income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in high yielding below investment grade debt securities of issuers that do most of their business in the United States These securities will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

TRS usage Expected 10%; maximum 40%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) ICE BofA US High Yield Constrained Index, a broad market index that does not take into account ESG characteristics. Used for: performance comparison.

Fidelity Funds –

European High Yield Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide a high level of income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in high-yielding below investment grade debt securities of issuers that are headquartered, or do most of their business, in Western, Central and Eastern Europe (including Russia), including emerging markets. These securities will be subject to high risk, will not be required to meet a minimum rating standard, although, most, but not all, will be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%

The fund may invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. Fidelity Funds –

Euro Short Term Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in euro-denominated debt securities, focusing its investments in investment grade European fixed rate debt securities with less than five years to effective maturity. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- non-euro denominated securities: less than 30%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos

The average duration of the fund's investments will not exceed 3 years.

Exposure to non-euro investments may be hedged back to EUR.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

Fidelity Funds –

Structured Credit Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the medium to longer term and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in fixed and floating rate securitised investments issued by government, quasi-government, and corporate issuers from anywhere in the world, including emerging markets. Fixed and floating rate securitized investments may include, but are not limited to, asset-backed securities (ABS), collateralised loan obligations (CLOs), commercial mortgage-backed securities (CMBS), residential mortgage-backed securities (RMBS), as well as securitisations of other receivables and investment grade and below investment grade debt securities. Underlying assets of the asset-backed securities may include credit card receivables, consumer loans, small-to-medium business loans and commercial and residential real estate mortgage loans. To achieve its investment goals, for treasury purposes or in the event of unfavourable market conditions, the fund may also invest in money market instruments and term deposits.

The fund may invest in the following assets according to the percentages indicated:

- below investment grade securities: less than 30% collateralised and securitised debt securities: ABS 0-30%, collateralized loan obligations 40-80%, CMBS up to 30%. RMBS up to 30%.
- REITs and infrastructure securities: up to 5%.

The fund's exposure to distressed securities is limited to 10% of its assets.

The fund's investments are not currency constrained.

The Investment Manager aims to outperform the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager applies a bottom-up approach whereby the selection of securities will be based on fundamental analysis of each securitised investment and underlying collateral and a review of their structural features. This analysis involves a thorough review of each individual securitized investment, its risk retention, its deal structure, as well as the underlying collateral.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by the Investment Manager or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) European Short-term rate (€STR) cash Index, a broad market index that does not take into account ESG characteristics. **Used for:** outperformance.

The fund is not benchmark-constrained and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

Asian High Yield Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide a high level of income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in high-yielding below investment grade debt securities of issuers, or in high-yielding debt securities of below investment grade issuers, that do most of their business in the Asian region, including emerging markets. These securities will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate).
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager takes into account Sustainability Risks in its investment process. Fidelity Funds –

Asia Pacific Strategic Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in investment grade debt securities of issuers that are headquartered, or do most of their business in Asia Pacific, including emerging markets. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- Asia Pacific local currency bonds: up to 80%
- below investment grade bonds: up to 30%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%
- Listed China onshore bonds including urban investment bonds, asset-backed securities and below investment grade, or unrated bonds (directly and/or indirectly): up to 50% (in aggregate)
- China offshore bonds (including dim sum bonds): up to 50%
- emerging market bonds: up to 100%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations. The fund will actively allocate among below investment grade and emerging market bonds. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) None.

Fidelity Funds –

Asia Pacific Bond ESG Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets in debt securities issued by governments, quasi governments and corporate entities that do most of their business in the Asia Pacific region, including emerging markets. Some of these investments may be below investment grade. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- Below investment grade bonds: up to 30%
- Listed China onshore corporate and government bonds including urban investment bonds, asset-backed securities (less than 20%) and below investment grade, or unrated bonds (directly and/or indirectly): less than 30% (in aggregate)
- China offshore bonds (including dim sum bonds): less than 70%
- hybrids and contingent convertible (CoCo) bonds: less than 30% with CoCos less than 20%
- Credit-linked notes: up to 10%
- Emerging markets: up to 100%.

The fund may also invest in subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

The fund aims to have a lower carbon footprint than that of the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark after the exclusion of 20% of securities with the lowest ESG ratings.

The fund may invest in issuers with low but improving ESG characteristics. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Target.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) JACI Asia Pacific Index, a broad market index that does not take into account ESG characteristics. **Used for:** risk monitoring, investment selection, performance comparison and carbon footprint comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

China High Yield Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide a high level of income over time.

INVESTMENT POLICY The fund invests at least 70% of its assets, in below investment grade or unrated debt securities of issuers that are headquartered or do most of their business in the Greater China region, including China, Hong Kong, Macau and Taiwan. These securities will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China offshore bonds (including dim sum bonds): up to 100%
- Listed China onshore corporate and government bonds including urban investment bonds, asset-backed securities and below investment grade, or unrated bonds (directly and/or indirectly): up to 60% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

Investments of the fund are not currency constrained.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of a bond issuers' creditworthiness, macroeconomic factors, and valuations. The Investment Manager takes into account Sustainability Risks in its investment process.

Fidelity Funds –

China RMB Bond Fund

Investment Objective and Policy

OBJECTIVE The fund aims to maximise total return over the long term.

INVESTMENT POLICY The fund aims to achieve its investment objective through exposure to RMB denominated debt, money market instruments, cash and cash equivalents (including term deposits). The fund invests at least 70% of its assets, in investment grade debt securities denominated in RMB, investment grade securities of issuers that do most of their business in the Asia Pacific region, securities denominated in RMB of investment grade issuers, or in securities of investment grade issuers that do most of their business in the Asia Pacific region, including emerging markets.

The fund may invest, directly or indirectly, in the following assets according to the percentages indicated:

- Listed China onshore bonds (directly and/or indirectly): up to 100%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

Exposure to non-RMB investments may be hedged to maintain the currency exposure to RMB.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager considers issuer financials, such as revenue and profit growth, cash flows and credit analysis, as well as market and macroeconomic factors.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 10%; maximum 50%.

Securities lending Expected 15%; maximum 30%.

Fidelity Funds –

Emerging Market Corporate Debt Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in investment grade and below investment grade corporate debt securities from emerging markets that are denominated in globally traded major currencies ('hard currencies'). The fund may also invest in emerging market debt securities denominated in local currency and on an ancillary basis in money market instruments.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore corporate and government bonds including urban investment bonds, asset-backed securities and below investment grade, or unrated bonds (directly and/or indirectly): less than 30% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%
- sovereign bonds of emerging market issuers: up to 25%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG factors when assessing investment risks and opportunities. In determining ESG factors, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

Fidelity Funds –

Emerging Market Total Return Debt Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over time and provide income.

INVESTMENT POLICY The fund invests at least 70% of its assets, in government and corporate debt securities from emerging markets, including those that are denominated in local or globally traded major currencies ('hard currencies'), nominal and inflation linked debt securities. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

The fund is unconstrained in the amount it may invest in below investment grade securities or issuers.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers' creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG factors when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee issuers and countries follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on currency, interest rates, equities and volatility). The fund may use long or short positions.

The fund uses derivatives to meet its investment objective and with the aim of risk or cost reduction or to generate additional capital or income, and this may result in leverage and increased volatility. These instruments include but are not limited to futures, options, forwards, swaps, credit linked instruments, and other fixed income, currency and credit derivatives (including but not limited to total return swaps, foreign exchange forward contracts, non-deliverable forwards, single name credit default swaps and indices of credit default swaps. Indices of credit default swaps include but are not limited to iTraxx and CDX).

The underlying exposures of derivatives include instruments such as (but not limited to) government bonds, agency bonds, money market instruments, interest-rates, inflation, currencies, corporate bonds and structured bonds. The fund will hold sufficient liquid assets (including, if applicable, sufficiently liquid long positions) to cover at all times the fund's obligations arising from its credit derivative positions (including short positions). In such situations, performance may rise or fall more than it would have done otherwise, reflecting such additional exposures. Under certain market conditions assets may be more difficult to sell.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 40%; maximum 200%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) 50% JPMorgan Government Bond Index-Emerging Markets Global Diversified + 25% JPMorgan Corporate Emerging Markets Bond Index-Broad Diversified + 25% JPMorgan Emerging Markets Bond Index-Global Diversified, broad market indices that do not take into account ESG characteristics. **Used for:** risk monitoring only.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds –

European Multi Asset Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide income over time.

INVESTMENT POLICY The fund invests at least 70% of its assets in equities and debt securities of issuers that are listed, headquartered, or do most of their business in Europe, and European governments.

The fund may invest in the following assets according to the percentages indicated:

- European investment grade bonds: up to 70%
- European below investment grade bonds: up to 50%
- European equities: up to 50%
- European government bonds: up to 50%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 10% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- alternative investments, such as infrastructure securities and REITs: up to 20%
- non-European investments (including equities, government bonds, investment or below Investment grade bonds, emerging market debt or eligible alternative investments): up to 20%
- money market instruments: up to 25%
- SPACs: less than 5%

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas based on their potential to generate income. It considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

Fidelity Funds –

Global Multi Asset Growth & Income Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the medium to long term and provide income.

INVESTMENT POLICY The fund invests in a range of asset classes including corporate and government debt securities, equities, real estate, infrastructure and commodities, from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- below investment grade or unrated bonds: up to 75%
- equities: up to 80%, with up to 60% in emerging market equities
- emerging market bonds: up to 60%
- China A and B shares and listed onshore bonds (directly and/or indirectly) including urban investment bonds: less than 30% (in aggregate)
- China offshore bonds (including dim sum bonds): up to 30%
- convertible securities (hybrids and contingent convertible (CoCo) bonds): less than 30%, with less than 20% in CoCos
- REITs, infrastructure securities and commodities: less than 30% (in each of the asset classes)
- investment grade bonds: up to 100%
- money market instruments: up to 30%
- SPACs: less than 5%

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas based on their potential to generate capital growth and income within the portfolio. The fund's income is mainly generated by dividend payments of equities and coupon payments of bonds and payments out of capital.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria.

Fidelity Funds –

Global Multiple Opportunities Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests in a range of asset classes, including debt securities, equities, real estate, infrastructure, commodities and cash from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- debt securities of any type: up to 60%
- below investment grade debt securities: up to 50%
- emerging market debt securities and equities: up to 30%
- equities: up to 90%
- government debt securities: up to 60%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 20% (in aggregate)
- REITS: up to 20%
- China offshore bonds (including dim sum bonds): less than 10%
- equity-linked securities: up to 10%
- eligible commodity exposure: up to 20%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- money market instruments: up to 25%
- collateralised and securitised debt instruments: up to 20%

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to dynamically allocate investments across asset classes and geographic areas. The Investment Manager will allocate investments across asset classes and geographic areas based on their potential to generate capital growth or reduce overall risk. The fund adopts a multi asset approach which affords significant potential for diversification. To achieve its objective the fund adopts a tactical asset allocation strategy where the fund's investments may be actively balanced and adjusted. As part of the fundamental company analysis, the Investment Manager considers various factors, including growth and valuation metrics, company financials, return on capital, cash flows, company management, industry, and economic conditions.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

Fidelity Funds –

Global Multi Asset Defensive Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth while seeking to preserve capital over the long term.

INVESTMENT POLICY The fund invests, in a range of asset classes, including equities, corporate and government investment grade and below investment grade bonds, money market instruments, REITs and eligible commodity exposure, from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- below investment grade bonds: less than 30%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 20% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- SPACs: less than 5%

The fund may also Invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager will allocate investments across asset classes and geographic areas based on their potential to generate growth or reduce overall risk. The fund adopts a multi asset approach which affords significant potential for diversification.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – Multi Asset ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on credit, interest rates and currency). The fund may use long or short positions.

The fund uses derivatives, including complex derivative instruments or strategies, to meet the investment objectives of the fund. Derivative instruments may be used to create economic exposure to an asset akin to a physical holding of that asset. The types of derivatives that will be used include index, basket or single name futures, options and contracts for difference referencing equities or bonds. Options used will include put and call options including covered call options. The fund will use index, basket or single credit default and total return swaps to gain exposure or reduce credit risk of issuers, interest rate swaps to actively manage the level of interest rate risk and currency derivatives to hedge or gain exposure to currencies or replicate currency exposure of the underlying securities of an equity index. The long and short active currency positions implemented by the fund may not be correlated with the underlying securities positions held by the fund

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 65%; maximum 200%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) A composite of 80% Bloomberg Global Aggregate Index (EUR Hedged) Index + 20% MSCI ACWI (Net) EUR Index. Used for: risk monitoring only (the fund aims to achieve a better downside profile than that of the benchmark on a 3 -year rolling basis). The fund does not use a benchmark against which the performance of the fund may be assessed.

Fidelity Funds –

Absolute Return Multi Strategy Fund

Investment Objective and Policy

OBJECTIVE The fund aims to provide an absolute positive return with low correlations to traditional asset classes over the medium to long term.

INVESTMENT POLICY The fund uses a combination of diverse investment strategies in order to achieve its objective, include arbitrage, equity hedge, fixed income and macro strategies. The strategies will be primarily implemented by taking long and short exposure to a range of asset classes such as equities, corporate and government investment grade and below investment grade bonds, infrastructure, property, commodities, money market instruments and currencies from anywhere in the world, including emerging markets. These investments may be denominated in any currency.

The fund may invest in the following assets according to the percentages indicated:

- China A and B shares and listed onshore bonds (including urban investment bonds) (directly and/or indirectly): less than 30% (in aggregate)
- collateralised and securitised debt instruments: less than 20%
- eligible commodity exposure: up to 10%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- SPACs: less than 5%.

The fund may also invest in China offshore bonds (including dim sum bonds).

The fund's exposure to distressed securities is limited to 10% of its assets.

The Investment Manager aims to outperform the benchmark.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines qualitative and quantitative market analysis into a disciplined portfolio construction process to allocate investments across various strategies, such as long- short equity, arbitrage, fixed income and macro.

Arbitrage strategies aim to profit from the price difference between instruments that are related and judged to be mispriced. This may involve the simultaneous purchase and sale of related financial instruments.

Equity hedge strategies aim to profit from identifying undervalued stocks and either selling overvalued stocks or hedging the market risk associated with the undervalued stocks.

Fixed Income and Macro strategies are grouped together as strategies can cross both disciplines. Fixed Income strategies aim to produce consistent returns either within fixed income markets or through relative value strategies within markets such as corporate and emerging market bonds. Macro strategies traditionally use a top-down approach which studies macro-economic and political factors to invest in different asset classes across global markets.

The Investment Manager takes into account Sustainability Risks in its investment process. For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may use long or short positions. The fund will take long positions in securities that are deemed to be undervalued and short those deemed to be overvalued. Short exposure will only be achieved through the use of derivatives.

The types of derivatives that will be used include, but are not limited to, futures (index, basket or single name), forwards, swaps (such as interest rate, credit default, inflation index, and total return swaps), options, swaptions, and contracts for difference. Derivatives are used to achieve indirect exposure to the main assets listed above, to generate additional capital or income in line with the fund's risk profile or with the aim of risk or cost reduction.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 200%; maximum 400%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) Secured Overnight Financing Rate (SOFR). Used for: performance comparison, outperformance and performance fee calculation.

The fund is not benchmark-constrained and its performance over any period may or may not deviate significantly from that of the benchmark.

Where Class B shares are available the annual management fee of those Shares will be the same as that of the Class A Shares. For a current and complete list of available share classes, including currency hedged, please see section ''Investing in Funds''. See section "Fund Fees and Costs" for detailed explanation of above fees.
[1] Or equivalent in any other freely convertible currency. The performance fee is paid if the relevant class exceeds its high water mark, which is adjusted for the return of the relevant cash index. Accrued daily, with accruals written back in case of underperformance, and paid to the Investment Manager annually.

Fidelity Funds –

Global Multi Asset Dynamic Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests in a range of asset classes including equities, corporate and government bonds, commodities, money market instruments and REITs from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- bonds of any type: up to 100%
- investment grade bonds: up to 50%
- below investment grade and unrated bonds: up to 75%
- emerging markets bonds: up to 75%
- emerging markets equities: up to 75%
- equities: up to 100%
- Russian securities: up to 15%
- eligible commodity exposure: up to 50%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- REITs: up to 30%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- SPACs: less than 5%

The fund may also invest in other subordinated financial debt and preference shares.

The fund's exposure to distressed securities is limited to 10% of its assets.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager will tactically allocate investments across asset classes and geographic areas (including emerging markets) based on their potential to generate capital growth or reduce overall risk. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 50%; maximum 150%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) 75% MSCI ACWI Index; 25% Bloomberg Global Aggregate Index, indices that do not take into account ESG characteristics. **Used for:** performance comparison only.

INVESTOR PROFILE This product may appeal to investors

- with a basic knowledge of and no or limited experience of investing in funds;
- who plan to hold their investment for a recommended holding period of at least 3 years;
- who seek capital growth over the recommended holding period; and
- who understand the risk of losing some or all of the capital invested.

ORDER PROCESSING Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement normally occurs within 3 business days.

Main Share Classes

	Minimum Investment (USD)[1]		Maximum Dealing Fees	Maximum Annual Fees	
Class	Initial and holding	Subsequent	Entry	Management	Distribution
A	2,500	1,500	5.25%	1.25%	—
E	2,500	1,000	—	1.25%	0.60%
I	10 million	100,000	—	0.63%	—
W/Y	2,500	1,000	—	0.63%	—

Where Class B shares are available the annual management fee of those Shares will be the same as that of the Class A Shares. For a current and complete list of available share classes, including currency hedged, please see section "Investing in Funds". See section "Fund Fees and Costs" for detailed explanation of above fees.

[1] Or equivalent in any other freely convertible currency.

Fidelity Funds –

Multi Asset Dynamic Inflation Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term.

INVESTMENT POLICY The fund invests, in a range of asset classes, including investment grade and below investment grade corporate and government bonds, money market instruments, inflation-linked securities, equities, foreign exchange, real estate, commodities from anywhere in the world, including emerging markets.

The fund may invest in the following asset classes according to the percentages indicated:

- below investment grade bonds: up to 40%
- China A and B shares (directly and/or indirectly): less than 30% (in aggregate)
- equities: up to 80%
- REITS, infrastructure securities and eligible commodity exposure: up to 80% (in aggregate)
- government, corporate, inflation linked and emerging market bonds: up to 100%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- Collateralised and securitised debt securities: up to 15%.
- SPACs: less than 5%
- money market instruments: up to 30%
- distressed securities: up to 10%

The fund may also invest in other subordinated financial debt and preference shares.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas.

The investment manager aims to identify investment opportunities that will benefit from varying inflationary regimes such as deflation, disinflation, stagflation and inflation that result from changes over time in global economic and social environments. Examples of such investments may include, but are not limited to, sectors and regions that are able to defend against economic and inflation shocks, currencies that may benefit from different inflation regimes, and companies whose business model benefits from shifting inflation.

The Investment Manager takes into account Sustainability Risks in its investment process.

For more information see "Sustainable Investing and ESG Integration".

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes (including derivatives which focus on equities, credit, interest rates and currency). The fund may use long or short positions.

The fund uses derivatives, including complex derivative instruments or strategies, to meet the investment objectives of the fund with a level of risk which is consistent with the risk profile of the fund. Derivatives may be used to create economic exposure to an asset akin to a physical holding of that asset. The types of derivatives that will be used include index, basket or single name futures options and contracts for difference. Options used will include put and call options including covered call options. The fund will use index, basket or single credit default and total return swaps to gain exposure or reduce credit risk of issuers, interest rate swaps to actively manage the level of interest rate risk and currency derivatives to hedge or gain exposure to currencies or replicate currency exposure of the underlying securities of an equity index. The total return swaps can be used to gain exposure to the equity, fixed-income and commodity positions of the portfolio.

The long and short active currency positions implemented by the fund may not be correlated with the underlying securities positions held by the fund.

TRS usage Expected 80%; maximum 300%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

BENCHMARK(S) None.

Fidelity Funds –

Fidelity Target™ 2025 Fund

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term for investors planning to withdraw substantial portions of their investment in the year 2025.

INVESTMENT POLICY The fund invests in a range of asset classes such as bonds, equities, interest bearing and money market instruments as well as eligible exposure to commodities from anywhere in the world, including emerging markets. These investments may be denominated in any currency and some of them may be below investment grade or unrated. The proportion of assets allocated to each asset class varies over time and the fund will increasingly favour lower risk investments as it approaches its target date, shifting to an increasingly conservative asset allocation.

The fund may invest in the following assets according to the percentages indicated:

- collateralised and securitised debt instruments: up to 20%
- SPACs: less than 5%

The fund will not terminate at the target date but will continue to be managed in accordance with its investment objective and policy.

INVESTMENT PROCESS The fund is actively managed and references a blend of market indices (each a "Market Index") in order to set internal guidelines around the weightings allocated to different asset classes. The fund is managed to offer an optimized asset allocation between asset classes with different risk and return characteristics. The asset allocation has been designed to de-risk portfolio by migrating from a growth to a defensive asset allocation up to the fund's target date.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – Multi Asset ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 50%; maximum 150%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

Investment Objective and Policy

OBJECTIVE The fund aims to achieve capital growth over the long term for investors planning to withdraw substantial portions of their investment in the year 2050.

INVESTMENT POLICY The fund invests in a range of asset classes such as bonds, equities, interest bearing and money market instruments as well as eligible exposure to commodities from anywhere in the world, including emerging markets. These investments may be denominated in any currency and some of them may be below investment grade or unrated. The proportion of assets allocated to each asset class varies over time and the fund will increasingly favour lower risk investments as it approaches its target date, shifting to an increasingly conservative asset allocation.

The fund may invest in the following assets according to the percentages indicated:

- collateralised and securitised debt instruments: up to 20%
- SPACs: less than 5%

The fund will not terminate at the target date but will continue to be managed in accordance with its investment objective and policy.

INVESTMENT PROCESS The fund is actively managed and references a blend of market indices (each a "Market Index") in order to set internal guidelines around the weightings allocated to different asset classes. The fund is managed to offer an optimized asset allocation between asset classes with different risk and return characteristics. The asset allocation has been designed to de-risk portfolio by migrating from a growth to a defensive asset allocation up to the fund's target date.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

A minimum of 70% of the fund's assets will adhere to specific multi asset ESG criteria. For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – Multi Asset ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see "How the Funds Use Instruments and Techniques"), the fund intends to use TRS.

TRS usage Expected 50%; maximum 150%.

Securities lending Expected 15%; maximum 30%.

Repos/reverse repos Expected 0%; maximum 30%.

Fidelity Funds –

Euro Cash Fund

Investment Objective and Policy

OBJECTIVE The fund aims to offer returns in line with money market rates over the recommended holding period.

INVESTMENT POLICY The fund invests at least 70% (and normally 75%) in euro denominated money market instruments such as reverse repurchase agreements and deposits.

The fund qualifies as a short-term VNAV money market fund and it is rated Aaa-mf by Moody's Investor Services, Inc.

INVESTMENT PROCESS In actively managing the fund, the Investment Manager uses fundamental and relative analysis to select issuers and short term securities whilst constructing a high quality portfolio with a focus on liquidity and risk management.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see "Sustainable Investing and ESG Integration" and the Sustainability Annex.

SFDR product category Article 8 (promotes environmental and/or social characteristics) – ESG Tilt.

DERIVATIVES AND TECHNIQUES The fund may use derivatives only for the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the fund.

TRS usage None.

Sustainable Investing and ESG Integration

European Framework on Sustainable Investing

The EU Sustainable Finance Disclosure Regulation ("**SFDR**") sets out sustainability disclosure obligations and aims to help investors understand the sustainability profile of financial products. SFDR focuses on the disclosure of environmental, social and governance considerations by firms and within the investment process. SFDR establishes requirements for pre-contractual and ongoing disclosures to investors including on the integration of Sustainability Risks, the consideration of adverse sustainability impacts, on sustainable investment objectives, or on the promotion of environmental or social characteristics, in investment decision-making. The main provisions (Level 1) of SFDR came into effect in 2021 and were complemented by enhanced disclosure requirements applicable to ESG-focused products (Level 2) in 2023.

The EU Taxonomy regulation accompanies the SFDR and aims to create consistent standards through enhanced transparency and providing an objective point of comparison to end investors on the proportion of investments that fund environmentally sustainable economic activities.

Fidelity International and Sustainable Investing

General approach to Sustainable Investing

Fidelity's Sustainable Investing approach may be found on **Sustainable investing framework (fidelityinternational.com)** The Sustainable Investing Principles document sets out details of Fidelity's approach to sustainable investing, including Fidelity's expectations of investee issuers, ESG integration and implementation, approach to engagement and voting, exclusion and divestment policy and focus on collaboration and policy governance.

- FIDELITY'S SUSTAINABLE INVESTING FRAMEWORK

Fidelity's sustainable investing framework has created three high-level categories of products:

1. **ESG Unconstrained**: this category includes products that aim to generate financial returns and may, or may not, integrate ESG risks and opportunities into the investment process. Those products are not SFDR Article 8 or 9.
2. **ESG Tilt**: this category includes products that aim to generate financial returns and promote environmental and social characteristics through a tilt towards issuers with stronger ESG performance than the product's benchmark or investment universe and, for multi-assets products, a minimum proportion of assets which meet the Multi Asset ESG criteria (described below under ESG methodologies for Multi-Asset funds).
3. **ESG Target**: this category includes products that aim to generate financial returns and have ESG or sustainability as a key investment focus or objective, such as investing in ESG leaders (issuers with higher ESG ratings), sustainable investments, a sustainable theme or meeting impact investing standards and, for multi-asset products, a minimum proportion of assets which meet the Multi Asset ESG criteria.

ESG Tilt and ESG Target are further described under the heading "ESG and Sustainable Investing approaches".

- EXCLUSIONS

Fidelity considers the exclusion of issuers from the investment universe based on specific ESG criteria, and has established an exclusion framework that includes three levels of exclusions which are linked to the above-mentioned high-level categories:

- All funds managed by the Investment Manager are subject to controversial weapons exclusions, which include, but are not limited to, biological, chemical, incendiary weapons, non-detectable fragments, blinding lasers, cluster munitions, landmines and nuclear weapons for non-signatories of the Treaty on the Non-Proliferation of Nuclear Weapons.
- ESG Tilt funds adhere to further exclusions such as tobacco production, thermal coal (subject to transition criteria), norms-based exclusions as well as exclusions relating to sovereign issuers on the Financial Action Task Force (FATF) blacklist.
- ESG Target funds apply further exclusions in addition to those mentioned above through additional negative screening (altogether referred to as the "**ESG Target exclusions**"). The additional negative screening includes issuers which have exposure, or ties, to:
  - controversial weapons (depleted uranium and nuclear weapons);
  - production of conventional weapons (a weapon of warfare which is not nuclear, chemical or biological in nature);
  - production and distribution of semi-automatic weapons intended for sale to civilians;
  - tobacco-related activities;
  - thermal coal extraction and power generation subject to additional transition criteria;
  - extraction of oil sands;
  - extraction of arctic oil and gas;
  - sovereign exclusions in addition to those on the Financial Action Task Force (FATF) blacklist.

Negative screening of sovereign issuers as per the ESG Tilt exclusions and ESG Target exclusions is based on the Investment Manager's internal sovereign exclusion framework which concentrates on three principles relating to governance, respect for human rights and foreign policy. Sovereigns failing to meet the standards of the framework are identified based on a proprietary assessment. To support this assessment, the Investment Manager makes reference to international recognised indicators such as the FATF blacklist, the World Bank's Worldwide Governance Indicators and UN Security Council sanctions for ESG Target exclusions.
In addition to the exclusions list described above which are applied by funds depending on their ESG categories, the Investment Manager may apply revenue thresholds for more refined screens and has the discretion to implement additional sustainable requirements and exclusions. Revenue screens and additional exclusions applied to each fund are set out at **Sustainable investing framework (fidelityinternational.com)** and may be updated from time to time.

SUSTAINABILITY RISK

Fidelity considers Sustainability Risks across all asset classes and funds, unless otherwise stated. Sustainability Risks refer to an environmental (E), social (S) or governance (G) (collectively, "ESG") event, or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

Fidelity's approach to Sustainability Risk integration seeks to identify and assess the ESG risks at an individual issuer level. Sustainability Risks which may be considered by Fidelity's investment teams include, but are not limited to:

- environmental risks: the ability of companies to mitigate and adapt to climate change and the potential for higher carbon prices, exposure to increasing water scarcity and potential for higher water prices, waste management challenges, and impact on global and local ecosystems;
- social risks: product safety, supply chain management and labour standards, health and safety and human rights, employee welfare, data & privacy concerns and increasing technological regulation; and
- governance risks: board composition and effectiveness, management incentives, management quality and alignment of management with shareholders.

Fidelity's portfolio managers and analysts supplement the study of financial results of potential investments with additional qualitative and quantitative non-financial analysis including Sustainability Risks and will factor them into investment decision making and risk monitoring to the extent they represent potential or actual material risks and/or opportunities to maximise long-term risk-adjusted returns. This systematic integration of Sustainability Risks in investment analysis and decision-making relies on: "qualitative assessments", which will be by reference, but not limited, to case studies, environmental, social and governance impacts associated with issuers, product safety documents, customer reviews, company visits or data from proprietary models and local intelligence; and "quantitative assessments", which will be by reference to ESG ratings which may be an internal rating assigned by the Investment Manager primarily using Fidelity ESG Rating(s) (described below) or from external providers, including but not limited to MSCI, relevant data in third-party certificates or labels, assessment reports on carbon footprints, or percentage of economic activities of issuers generated from ESG-relevant activities.

FIDELITY ESG RATINGS

Fidelity ESG Ratings are a proprietary ESG rating system developed by Fidelity's research analysts to assess individual issuers. The ratings score issuers on an A-E scale on sector-specific factors, which include relevant principal adverse impact indicators, and a trajectory forecast based on an assessment of expected change of an issuer's sustainability characteristics over time. The ratings are based on fundamental bottom-up research and assessment using criteria specific to the industry of each issuer relevant to material ESG issues. Any material differences between Fidelity ESG Ratings and third-party ESG ratings may contribute to analysis and discussion within Fidelity's investment teams as part of the assessment of the investment opportunity and its related Sustainability Risks. ESG ratings and associated ESG data are maintained on a research platform operated by the Investment Manager. The provision and sourcing of ESG data is reviewed on a regular basis to ensure its continuing suitability, adequacy, and effectiveness for the ongoing assessment of Sustainability Risks.
The Fidelity ESG ratings methodology takes into account environmental, social and governance factors. Environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management, biodiversity, while social characteristics include product safety, supply chain, health and safety and human rights.

When assessing investment in third-party managed UCITS or UCIs and internal investment strategies separately managed by Fidelity, Fidelity's Multi Asset Research team aims to understand an individual manager's approach to ESG by evaluating how far ESG considerations, which include principal adverse impact indicators, are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. Fidelity's Multi Asset Research team consults a range of data sources, including Fidelity ESG Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies. This assessment may result in assigning a Fidelity Multi Asset Manager Research ESG rating, scoring strategies on an A-E scale.

ESG PORTFOLIO SCORES

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and benchmark or investment universe.

Where a fund's investment policy states that the fund aims to achieve an ESG score of its portfolio greater than that of its benchmark or investment universe, this is a target only against which ESG performance is measured. Further, the fund is neither constrained by, nor aims to achieve a financial return relative to that benchmark or investment universe, unless otherwise stated.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark or investment universe using a weighted average or equal weighted method of calculation. The investment manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis.

ESG ratings may not cover all of the holdings from time to time, and if so these holdings would be excluded from the ESG scores.

Further details on the above calculation methodology are set out at **Sustainable investing framework (fidelityinternational.com)** and may be updated from time to time.

EU TAXONOMY

Where a fund is not identified (in its investment objective and policy) as subject to the disclosure requirements of article 8 or article 9 of the SFDR, the fund is subject to Article 7 of the EU Taxonomy Regulation (EU) 2020/852 and the investments underlying such a fund do not take into account the EU criteria for environmentally sustainable economic activities.

SHAREHOLDER ENGAGEMENT

As part of Fidelity's commitment to sustainable investing and enacting Fidelity's fiduciary responsibility, as shareholders Fidelity engages with the companies in which it invests to encourage sustainable and responsible corporate behaviour.

PRINCIPAL ADVERSE IMPACTS

Fidelity International considers that principal adverse impacts on sustainability factors are those impacts of our investment decisions that result in material negative impacts on environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters such as environment degradation, poor labour practice, and unethical corporate behaviour for example bribery and corruption. Analysis of relevant principal adverse impacts is integrated in our investment process as described below.

Principal adverse impacts ("PAIs") on sustainability factors are considered by those funds that comply with the disclosure requirements of SFDR Article 8 and 9.

For those funds that consider PAIs, information on PAIs on sustainability factors is available in the specific fund's Sustainability Annex and in the annual report of the funds.

In the case of funds which are not identified as subject to the disclosure requirements of SFDR Article 8 or 9, the PAIs on sustainability factors are not considered as this is not part of the strategy or investment restrictions of these funds.

Delegation to sub-investment managers

Where the Investment Manager has sub-delegated investment management activities to Fidelity Management & Research Company LLC, FIAM LLC or FMR Investment Management (UK) Limited, such sub-delegate avails of the expertise of its own ESG team for the provision of fundamental analysis with sector relative ESG ratings information to determine ESG characteristics and identify and assess Sustainability Risks.

Where the Investment Manager has sub-delegated investment management activities to Geode Capital Management, LLC, such sub-delegate implements its own ESG programme through proxy voting and participation in collective company engagement initiatives and may seek to invest assets of the fund in holdings or instruments which provide passive exposure to an index incorporating ESG exclusionary criteria within its index methodology.

Fidelity considers Sustainability Risks across all asset classes and funds, unless otherwise stated in the Partial Prospectus for Switzerland of the Sub-Fund.

ESG and Sustainable Investing approaches

Funds which promote among other characteristics, environmental and/or social characteristics (SFDR Article 8) or which have sustainable investment as their investment objective (SFDR Article 9), integrate ESG considerations into their investment processes and are subject to stricter sustainability and enhanced disclosure requirements, as described below.

Funds which comply with the disclosure requirements of SFDR Article 9 must make sustainable investments and funds which comply with the disclosure requirements of SFDR Article 8 may make sustainable investments.

Fidelity determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

  (i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy;

  or

  (ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("**SDGs**");

(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided that such investments do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

Further details on the methodology applied are set out at **Sustainable investing framework (fidelityinternational.com)** and may be updated from time to time.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals. Environmentally focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Socially focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

When investing in UCITS and UCIs managed by a third party asset manager, the investment manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the exclusions applicable to Fidelity Multi Asset Article 8 funds may not apply.

Where a Fidelity SFDR Article 8 fund or a Fidelity SFDR Article 9 fund uses an ESG related term in their name, at least 80% of the fund's investments will be used to meet the environmental or social characteristics of the fund.

Funds using "sustainable", "ESG" or an environmental term in their name will apply the Paris Aligned Benchmark exclusions. Funds using social, governance or transition related terms (including an environmental term in combination with a transition related term) in their name apply the Climate Transition Benchmark exclusion criteria. Funds using transition related terms in their name are also monitored to ensure they are on a clear and measurable path to social or environmental transition.

Further details on the ESG methodology applied are set out in each fund's Sustainability Annex (for Fidelity SFDR Article 8 and 9 funds) and in the Sustainable Investing Principles document available at **Sustainable investing framework (fidelityinternational.com)** which may be updated from time to time.

FUNDS WHICH DO NOT PROMOTE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS [ESG UNCONSTRAINED]

ESG Unconstrained funds aim to generate financial returns and may, or may not, integrate ESG risks and opportunities into the investment process. Products in this category adopt Fidelity's ESG Unconstrained exclusions but do not promote environmental or social characteristics.

FUNDS WHICH PROMOTE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS (SFDR ARTICLE 8)

Fidelity SFDR Article 8 funds seek to achieve their investment objectives while promoting, among other characteristics, environmental or social characteristics, or a combination of those characteristics. In addition, for all Fidelity SFDR Article 8 funds, through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

Fidelity SFDR Article 8 funds utilise a range of different approaches to promoting environmental or social characteristics, as set out below.

FIDELITY SFDR ARTICLE 8 FUNDS (EXCEPT FOR MULTI ASSET FUNDS)

1. ESG criteria applied by Fidelity SFDR Article 8 funds which aim at beating the ESG score of the benchmark or investment universe [ESG TILT]

Methodologies	Description
ESG methodology	The fund aims to achieve an ESG score of its portfolio greater than the ESG score of the benchmark or investment universe.
Exclusions	ESG Tilt exclusions.

2. ESG criteria applied by Fidelity SFDR Article 8 funds which have ESG or sustainability as a key investment focus or objective [ESG TARGET]

Methodologies	Description
ESG methodologies	These Fidelity SFDR Article 8 funds use one of the following ESG methodologies: (i) A minimum of 80% of a fund's assets are invested in securities with high ESG ratings. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition maybe updated from time to time and updates are available at Sustainable investing framework (fidelityinternational.com). (ii) The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark or investment universe after the exclusion of 20% of the securities with the lowest ESG ratings. The fund may invest in issuers with low but improving ESG characteristics. (iii) Thematic funds which invest across sectors relating to a common theme with a long-term investment horizon by aiming to address sustainability challenges. A minimum of 80% of a fund's investments are used to meet the environmental or social characteristics promoted by that fund, as described in its investment policy. These funds may invest in issuers with low but

	improving ESG characteristics. These Fidelity SFDR Article 8 funds may invest in issuers with low but improving ESG characteristics (as set out in each fund's investment policy). These issuers may be on an improving trajectory or demonstrate potential for improvement through the implementation and execution of a formal engagement plan. The criteria used to determine improvement may change over time and will be updated at Sustainable investing framework (fidelityinternational.com).
Exclusions	ESG Target exclusions.

MULTI ASSET FIDELITY SFDR ARTICLE 8 FUNDS

3. ESG criteria applied by Fidelity Multi Asset SFDR Article 8 funds of which at least 70% of their assets comply with the Multi Asset ESG criteria [Multi Asset ESG TILT]

Methodologies	Description
ESG methodologies	A minimum of 70% of the fund's assets will comprise: (i) Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above); (ii) Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet the ESG Tilt or ESG Target criteria set out above; (iii) Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; or (iv) Sovereign issuers that have been subject to negative screening by the Investment Manager (together referred to as the "**Multi Asset ESG criteria**"). For the avoidance of doubt for target date funds, the minimum sustainable investment limits cease to apply with effect from 6 months prior to their target date.
Exclusions	ESG Tilt exclusions.

4. ESG criteria applied by Fidelity Multi Asset SFDR Article 8 funds of which at least 90% of their assets comply with the Multi Asset ESG criteria [Multi Asset ESG TARGET]

Methodologies	Description
ESG methodology	A minimum of 90% of the fund's assets will comply with the Multi Asset ESG criteria.
Exclusions	ESG Target exclusions.

FUNDS WHICH HAVE SUSTAINABLE INVESTMENT AS THEIR OBJECTIVE (SFDR ARTICLE 9) [ESG TARGET]

Methodologies	Description
ESG methodology	The Fidelity SFDR Article 9 funds are required to pursue a sustainable investment objective. (i) The funds make sustainable investments. (ii) Sustainable investments are determined in line with the criteria set out above, under the heading "ESG and Sustainable Investing approaches". (iii) The funds may, on an ancillary basis, invest in investments, including cash, for hedging or liquidity purposes or for efficient portfolio management and where required to do so under sector specific rules, provided that such investments do not affect delivery of the sustainable investment objective. Through the investment management process, the Investment Manager ensures that investee companies follow good governance practices.
Exclusions	ESG Target exclusions. All investments in the fund are also screened for activities causing principal adverse impact on environmental or social objectives and governance controversies.

Mauritian subsidiary

Fidelity Funds may invest in the Indian securities market directly or through a wholly-owned Mauritian subsidiary (the 'Subsidiary'). The Subsidiary is incorporated as a private company limited by shares under the laws of Mauritius, under the name of FIL Investments (Mauritius) Limited (formerly Fid Funds (Mauritius) Limited). On 1 January 2014, FIL Investment Management (Singapore) Limited has entered into an Investment Management Agreement with the Subsidiary. Pursuant to this agreement, FIL Investment Management (Singapore) Limited provides investment advisory and management services to the Subsidiary. FIL Investments (Mauritius) Limited has renewed on 25 February 2019, its approval from the Securities and Exchange Board of India ('SEBI') to invest in India as a Foreign Portfolio Investor ("FPI") under Indian law. FIL Investments (Mauritius) Limited is registered under the registration number INMUFP037316 and has been granted approval to invest in Indian securities.

The Subsidiary's board of directors is as follows: Arshad Goodur, Imtiyaz Khodabacksh, Christopher Brealey and Jon Skillman.

The auditor of the Subsidiary is Deloitte Mauritius.

As at the date of this visa-stamped Partial Prospectus for Switzerland, the holdings held through the Subsidiary are less than 1% of any fund's assets, this percentage is to decrease in the next 3 years and all the new investments of any fund will not be done through the Subsidiary.

DESIGNATED BANK – MAURITIUS

Under the terms set forth by the Financial Services Commission of Mauritius, the Subsidiary must make all investments held outside of Mauritius through a bank account maintained in Mauritius. The Subsidiary holds a bank account for this purpose with HSBC Bank (Mauritius) Limited, Offshore Banking Unit, Mauritius.

DESIGNATED BANK – INDIA

Under Indian law, the Subsidiary, as a non-Indian foreign investor, must use a designated remitting bank in India for all cash transfers into and out of India. This remitting bank may have certain reporting requirements to the RBI with regard to the handling of such transactions. The Subsidiary has appointed Citibank N.A. as its remitting bank in India.

This structure shall not prevent the Depositary from carrying out its legal duties.

LOCAL MAURITIAN ADMINISTRATOR

The Subsidiary has appointed IQ EQ Services (Mauritius) Ltd to act as administrator, secretary and registrar to the Subsidiary.

In respect of the SICAV's audited annual and unaudited semi-annual reports, the financial results of the Subsidiary are consolidated with the financial results of the SICAV. For the purpose of the investment restrictions set forth in the Partial Prospectus for Switzerland, the consolidated investments of the SICAV and the Subsidiary are considered.

The Subsidiary incurs and pays certain fees and expenses relating to its investment activity in Indian securities. These fees and expenses include brokerage costs and commissions, transaction costs associated with converting currency to and from Indian Rupee from and to US Dollars, fees incurred by its standing proxy, corporate and registration fees and taxes associated with the establishment and operation of the Subsidiary.

Benchmark Policies

BENCHMARK USAGES

The usages stated in "Fund Descriptions" have the following meanings:

- **Risk monitoring** For monitoring the fund's risks and, in case of relative value-at-risk funds, calculating maximum relative underperformance. See "Management and monitoring of global risk" and "Relative Value-at-Risk (Relative VaR)"
- **Investment selection** For defining the fund's investment universe and selecting securities.
- **Performance comparison** For assessing the fund's financial or ESG performance against the benchmark.
- **Carbon footprint** For assessing the fund's carbon footprint against the benchmark.
- **Outperformance** For measuring whether a fund that has an objective to outperform its benchmark is doing so.
- **Performance fee calculation** For calculating the fund's outperformance. See "Fund Fees and Costs".
- **Tracking** For replicating the composition of the benchmark and measuring performance differences (passive investment strategies only).

For currency hedged share classes, an appropriate hedged or corresponding currency benchmark or index, where available, is used. For the purpose of performance comparison, other variants of a benchmark may be considered, where appropriate.

BENCHMARK REGULATION

Under the benchmark regulation (EU regulation 2016/1011), any benchmarks the funds use, including elements of composite benchmarks, must be appropriately registered with the European Securities and Markets Authority (ESMA).

For index providers based in the EU, or in a non-EU country recognised as equivalent for registration purposes, registration must be at the provider level. Index providers in other countries must register individual indices. Those who are not yet registered are indicated in the Fund Descriptions.

The SICAV maintains written contingency plans for how it would address situations where a benchmark ceases to be offered or to be covered by registration, or where, either through changes in a benchmark or a fund, an existing benchmark ceases to be appropriate. In some cases, the response may involve a change to a fund's strategy or investment policy, or the merger or termination of the fund. Details are available free of charge upon request at the registered office of the SICAV.

Fidelity Funds – Euro 50 Index Fund

This section provides additional information on the fund and the Solactive Euro 50 Index NTR (the "Index").

The Index intends to track the performance of the 50 largest companies from the Eurozone.

Constituents are selected based on full security market capitalization and weighted by free-float market capitalization subject to the weight constraints postulated in the UCITS directive ("5/10/40-rule").

The Index universe is comprised of all financial instruments which fulfil the below requirements:

First, all companies that are part of the GBS INDEX UNIVERSE of the Solactive GBS Developed Markets Eurozone Large & Mid Cap USD Index PR (ISIN: DE000SLA40T0), on a SELECTION DAY/IPO REVIEW DAY as published on the Solactive website: **https://www.solactive.com** are eligible for inclusion.

Second, eligible companies need to fulfil the following additional criteria:

Only companies trading in EUR are eligible for inclusion.

Only one share class of each company is eligible for inclusion in the Index universe. To avoid frequent changes between two share-classes of a company, Solactive AG applies a liquidity buffer rule:

If the company is currently included in the Index: The share class currently included in the Index will be eligible for the Index universe if its AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is at least 75% of the AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period of any other share class of the company.

If the company is currently not included in the Index: The share class with the highest AVERAGE DAILY VALUE TRADED over the preceding 1-month and 6-month period is included in the Index Universe.

The determination of the Index universe is fully rule-based and Solactive AG cannot make any discretionary decisions.

Investors may obtain the latest Index information (including the Index constituents and their respective weightings), detailed information on the Index methodology (including the calculation formula), and other important news of the Index at the website of the index provider, Solactive AG. The Investment Manager is independent of the Index provider, Solactive AG. Investors should note that the composition of the Index may change from time to time and current constituent securities of the Index may be delisted and other securities added to form part of the Index. The accuracy and completeness of the calculation of the Index may be affected if there is any problem with the system for the computation and/or compilation of the Index.

Subject to the investment restrictions applicable to the fund as described in the fund description, the objective of the fund is to track the performance of the Index thereby seeking to achieve long term capital growth. However, there is no assurance that the performance of the fund will be the same as the performance of the Index. The fund aims to use a replication strategy and hold all securities that represent the Index but as the breakdown of the Index will vary according to movements of the stock market, the fund may not be able to fully track the Index at all times and this may result in tracking error. The anticipated tracking error in normal market conditions is not expected to exceed 0.93% p.a..Tracking error may also result due to fees and charges and volatility of the constituent securities. To minimise tracking error and reduce transaction costs, the fund will invest in futures on the Index subject to the restrictions set forth in "General Investment Powers and Restrictions". Given the nature and objective of the fund, it may not be able to adapt to market changes and any fall in the Index is expected to result in a corresponding fall in the value of the fund. In the event that the Index ceases to be operated or is not available, the Directors will consider whether the fund should maintain its current structure until such time as the Index is made available again or change its objective to track another index with similar characteristics of the Index.

Solactive and its Licensors have no relationship to Fidelity Funds, other than the licensing of Solactive Euro 50 Index NTR and the related trademarks for use in connection with Fidelity Funds – Euro 50 Index Fund.

Solactive and its Licensors do not:

- Sponsor, endorse, sell or promote the fund.
- Recommend that any person invest in the fund or any other securities.
- Have any responsibility or liability for or make any decisions about the timing, amount or pricing of the fund.
- Have any responsibility or liability for the administration, management or marketing of the fund.

- Consider the needs of the fund or the owners of the fund in determining, composing or calculating the (relevant index) or have any obligation to do so.

Credit Policies

The Investment Manager assesses credit quality according to the references and methods described below.

For bonds, credit ratings are considered at the security or issuer level and at the time of securities' purchases. The funds may hold unrated securities (where provided in their investment policies) or securities that have been downgraded.

For bonds and money market instruments, the Management Company typically uses ratings of credit agencies established and registered in the EU. The Management Company does its own credit analysis and does not solely rely on agency credit ratings. China onshore bonds may be rated by China onshore credit rating agencies as opposed to international credit rating agencies.

INVESTMENT GRADE BONDS (AAA/AAA TO BBB-/BAA3) AND BELOW INVESTMENT GRADE BONDS (BB+/BA1 OR LOWER)

Unless otherwise specified, these securities are rated by Standard & Poor's or another internationally recognised rating agency. If ratings disagree, we use the second-highest rating.

ASSETS HELD BY MONEY MARKET FUNDS

When assessing money market instruments, securitisations and asset-backed commercial papers for money market funds (as defined and regulated by Regulation (EU) 2017/1131) to determine whether their credit quality receives a favourable assessment, the Management Company reviews agency credit ratings and also applies its own internal credit quality assessment procedure using up-to-date quality information from other reliable sources.

This procedure is based on prudent, systematic and continuous assessment methodologies that take into account the characteristics of both issuer and instrument and has been validated by experience and empirical evidence, including back-testing.

The procedure includes criteria to analyse financial data, identify trends, and track key determinants of credit risk. The Management Company supervises the application of the procedure by a team of credit research analysts and regularly monitors the procedure for accuracy, adequacy and proper execution, making adjustments to the relative importance of the assessment criteria from time to time. The procedure complies with articles 19.4 and 20.2 of Regulation (EU) 2017/1131 and is approved by the management company's conducting officers and subsequently by the management company's managers.

The internal assessment procedure relies on numerous indicators. Examples of quantitative criteria include pricing of money market instruments and credit default swaps; monitoring of relevant financial indices covering geographical, sector, and asset class; and industry-specific financial and default information. Examples of qualitative criteria include the competitive position, governance risk, financial situation and liquidity sources of the issuer; the issuer's ability to react to future events; the strength of the issuer's sector within the economy and relative to economic trends; and the class, structure, short- term characteristics, underlying assets, liquidity profile, relevant markets, and potential operational and counterparty risks of the instrument. According to article 21 of Regulation (EU) 2017/1131, the Management Company documents its internal credit quality assessment procedure and credit quality assessments.

Risk Descriptions

All investments involve risk. The risks of some of these funds may be comparatively high.

The risk descriptions below correspond to the main risk factors listed for each fund. A fund could potentially be affected by risks beyond those listed for it or described here, nor are these risk descriptions themselves intended as exhaustive. Each risk is described as for an individual fund.

Any of these risks could cause a fund to lose money, to perform less well than similar investments or a benchmark, to experience high volatility (ups and downs in NAV), or to fail to meet its objective over any period of time.

ACTIVE MANAGEMENT RISK The investment managers could be wrong in their analysis of market or economic trends, their choice or design of any software models they use, their allocation of assets, or in other investment decisions.

Investment management practices that have worked well in the past, or are accepted ways of addressing certain conditions, could prove ineffective.

ASSET ALLOCATION RISK The fund is subject to the risks of all asset classes included in its asset allocation. To the extent that patterns of correlation or non-correlation among asset classes do not behave as expected, the fund may experience greater volatility or losses than it otherwise would have.

BENCHMARK ORIENTATION RISK The aim of an index tracking fund is to match the performance of an index as closely as possible. However, there is the risk that an index tracking fund's performance may not track that of the underlying index exactly. The Investment Manager will monitor and seek to manage such risk in minimising tracking difference. There can be no assurance of exact or identical replication at any time of the performance of the index

Market indexes, which are typically used as benchmarks, are calculated by independent entities without consideration for how they may affect fund performance. The index providers make no guarantee that their index calculations are accurate and assume no liability for any losses of investors in any investment that tracks any of their indexes. If a provider ceases to maintain an index or loses or fails to gain its ESMA registration as a benchmark provider, the fund may be liquidated if no suitable replacement can be found.

CHINA RISK The legal rights of investors in mainland China are uncertain, government intervention is common and unpredictable, some of the major trading and custody systems are unproven, and all types of investments are likely to have comparatively high volatility and greater liquidity and counterparty risks.

In mainland China, it is uncertain whether a court would protect the fund's right to securities it may purchase via Stock Connect programs, China Interbank Bond Market or other methods whose regulations are untested and subject to change. The structure of these schemes does not require full accountability of some of its component entities and leaves investors such as the fund with relatively little standing to take legal action in mainland China.

In addition, Chinese security exchanges or authorities may tax or limit short-swing profits, recall eligible stocks, set or change quotas (maximum trading volumes, either at the investor level or at the market level) or otherwise block, limit, restrict or delay trading, hampering or preventing a fund from implementing its intended strategies.

Funds that are specifically allowed by their investment objective or are permitted by country specific requirements under 'Additional voluntary requirements' to make investments in China A Shares and/or onshore China fixed income securities, such investments may be made through the Qualified Foreign Investor (QFI) status of FIL Investment Management (Hong Kong) Limited, the Stock Connect, the China Interbank Bond Market (CIBM) direct access scheme, the Bond Connect and/or any permissible means available to the funds under prevailing laws and regulations

Investments in domestic securities of the PRC denominated in CNY are made through the QFI status or through the Hong Kong Stock Connect Programs, which are subject to daily and aggregate quotas.

Funds may indirectly invest In China A Shares through China A share access products including, but not limited to, equity linked notes, participation notes, credit-linked notes or funds investing in China A Shares.

QFI status. Unless otherwise stated in the investment objective of a fund, a fund may invest less than 70% in China securities using the license of a qualified foreign institutional investor under the QFI program. Investing through a QFI license has risks. For example, the QFI status could be suspended, reduced or revoked,

which may affect the fund's ability to invest in eligible securities or require the fund to dispose of such securities and this could have an adverse effect on the fund's performance. QFI Regulations impose strict restrictions on investments (including rules on investment restrictions, minimum holding period and repatriation of capital or profits) that are applicable to the Investment Manager as well as to the investments made by the fund. It is uncertain whether a court would protect the fund's right to securities held for it by a licensed QFI if the QFI came under legal, financial or political pressure.

Shanghai and Shenzhen Hong Kong Stock Connect programs. Stock Connect is a joint project of the Hong Kong Exchanges and Clearing Limited (HKEC), China Securities Depository and Clearing Corporation Limited (ChinaClear), the Shanghai Stock Exchange and the Shenzhen Stock Exchange. Hong Kong Securities Clearing Company Limited (HKSCC), a clearing house that in turn is operated by HKEC, acts as nominee for investors accessing Stock Connect Securities.

Creditors of the nominee or custodian could assert that the assets in accounts held for the funds are actually assets of the nominee or custodian. If a court should uphold this assertion, creditors of the nominee or custodian could seek payment from the assets of the relevant fund. HKSCC, as nominee, does not guarantee the title to Stock Connect securities held through it and is under no obligation to enforce title or other rights associated with ownership on behalf of beneficial owners (such as the funds). Consequently, title to such securities, or the rights associated with them (such as participation in corporate actions or shareholder meetings), cannot be assured.

Should the SICAV or any fund suffer losses resulting from the performance or insolvency of HKSCC, the SICAV would have no direct legal recourse against HKSCC, because Chinese law does not recognise any direct legal relationship between HKSCC and either the SICAV or the depositary.

Should ChinaClear default, HKSCC's contractual liabilities will be limited to assisting participants with claims. A fund's attempts to recover lost assets could involve considerable delays and expenses and may not be successful.

China Interbank Bond Market CIBM and Bond Connect. These markets provide a way for outside investors (such as the fund) to buy Chinese bonds. The CIBM may have low trading volumes, which may cause liquidity risk and may cause the fund to miss out on investment opportunities. Although Bond Connect removes the CIBM's investment quota and the need for a bond settlement agent, some bonds may still have low trading volumes, investments made through either channel may have high price volatility and there may be large spreads between bid and offer prices, limiting the ability to make profitable investments.

ChiNext Market and Shanghai Stock Exchange Science & Technology Innovation Board (STAR board). Certain funds may have exposure to stocks listed on ChiNext market of the SZSE and/or the STAR board of the SSE. *Higher fluctuation on stock prices and liquidity risk* - ChiNext market and/or STAR board are usually emerging in nature with smaller operating scale. In particular, listed companies on ChiNext market and/or STAR board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors, may have limited liquidity compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main boards of the SZSE and/or the SSE. *Overvaluation risk* -, ChiNext market and/or STAR board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares. *Differences in regulation* - the rules and regulations regarding companies listed on ChiNext market and STAR board are less stringent in terms of profitability and share capital than those in the main boards of the SZSE and/or the SSE. *Delisting risk* - it may be more common and faster for companies listed on the ChiNext market and/or STAR board to delist. In particular, ChiNext market and STAR board have stricter criteria for delisting compared to other boards. This may have an adverse impact on the relevant fund if the companies that it invests in are delisted. *Concentration risk* - the STAR board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in the STAR board may be concentrated in a small number of stocks and subject the relevant fund to higher concentration risk. Investments in the, ChiNext market and/or STAR board may result in significant losses for the relevant fund and its investors

Dim Sum bonds. Some funds may invest in "Dim Sum" bonds (i.e. bonds issued outside of mainland China but denominated in RMB). The "Dim Sum" bond market is a relatively small market. As with some global fixed income markets, it may be more susceptible to volatility and illiquidity, and should there be any new rules which limit or restrict the ability of issuers to raise RMB (offshore CNH) funding by way of bond issuance and/or reversal or suspension of the liberalization of the CNH market by the relevant regulator(s), the operation of the "Dim Sum" bond market and new issuances could be disrupted and potentially cause a fall in the Net Asset Value of the relevant funds

Onshore and offshore renminbi. In mainland China, the government maintains two separate currencies: onshore renminbi (CNY), which must remain within mainland China and generally cannot be owned by foreigners, and offshore renminbi (CNH), which can be owned by any investor. The exchange rate between the two, and the extent to which currency exchanges involving CNH are allowed, are managed by the government, based on a combination of market and policy considerations.

Credit ratings. A fund may invest in securities the credit ratings of which are assigned by mainland China local credit rating agencies. However, the rating criteria and methodology used by such agencies may be different from those adopted by most of the established international credit rating agencies. Therefore, such rating system may not provide an equivalent standard for comparison with securities rated by international credit rating agencies.

Urban Investment Bonds Risks of Urban Investment Bonds, which are issued by Local Government Financing Vehicles (LGFVs) to raise financing for public welfare investment or infrastructure projects include the risk of financial difficulties of the underlying operations.

PRC tax provision. The Management Company reserves the right to provide for appropriate Chinese tax on gains of any fund that invests in PRC securities thus impacting the valuation of the fund. With the uncertainty over whether and how certain gains on PRC securities are to be taxed, coupled with the possibility of the laws, regulations and practice in the PRC changing, and also the possibility of taxes being applied retrospectively, any provision for taxation made by the Management Company may be excessive or inadequate to meet final PRC tax liabilities on gains derived from the disposal of PRC securities. Consequently, investors may be advantaged or disadvantaged depending upon the final outcome of how such gains will be taxed, the level of provision and when they subscribed and/or redeemed their shares in the funds.

This effectively creates currency risk within a single nation's currency, as well as liquidity risk, since the conversion of CNY to CNH, and of CNH to other currencies, can be restricted, as can the removal of any currency from mainland China or Hong Kong.

COCO BONDS RISK Contingent convertible securities (CoCo bonds) are comparatively untested, more vulnerable to losses than equities, carry extension risk, can be highly volatile, and their issuers can cancel or modify scheduled income payments at will.

A CoCo bond can be junior not only to other debt obligations but to equity holders as well. It can also lose some or all of its value instantaneously in case of a write-down or if a trigger event occurs; for example, the trigger could be activated either through a loss of capital (numerator) or an increase in risk-weighted assets (denominator). Because CoCo bonds are in effect perpetual loans, the principal amount may be paid off on the call date, anytime afterward, or never. CoCo bonds can also have liquidity risk and can be difficult to value.

How CoCo bonds will behave in various market situations is unknown, but there is a risk that volatility or price collapses could spread across issuers and that the bonds could become illiquid. This risk could be worse to the extent that CoCo bond issues may be concentrated in certain industries rather than being evenly distributed across many industries and could also be worse depending on the level of underlying instrument arbitrage.

In case of conversion into equity, the Investment Manager would be forced to sell any new equity shares if the fund's investment policy does not permit equities; this could involve liquidity risk. While CoCo bonds tend to offer attractive yields, any assessment of their risk must include not only their credit ratings (which may be below investment grade) but also the

other risks associated with CoCo bonds, such as the risk of conversion, coupon cancellation, and liquidity risk. It also remains unclear whether investors have accurately assessed the risks of CoCo bonds, meaning that a widespread market event affecting CoCo bonds could permanently depress the overall market for CoCo bonds.

COMMODITIES RISK Commodities tend to be highly volatile, and may be disproportionately affected by political, economic, weather, trade, agricultural and terrorist-related events, and by changes in energy and transportation costs.

Because they respond to specific factors, commodity prices may behave differently from each other and from equities, bonds, and other common investments.

CONCENTRATION RISK To the extent that the fund invests a large portion of its assets in a limited number of industries, sectors, or issuers, or within a limited geographical area, it can be more risky than a fund that invests more broadly.

Focusing on any company, industry, sector, country, region, type of stock, type of economy, etc. makes the fund more sensitive to the factors that determine market value for the area of focus. These factors may include economic, financial or market conditions as well as social, political, economic, environmental, or other conditions. The result can be both higher volatility and a greater risk of loss.

CONVERTIBLE SECURITIES RISK Because convertible securities are structured as bonds that typically can, or must, be repaid with a predetermined quantity of equity shares, rather than cash, they carry both equity risk and the credit and default risks typical of bonds.

COUNTERPARTY AND COLLATERAL RISK Any entity with which the fund does business, including the depository, could become unwilling or unable to meet its obligations to the fund.

Agreements with counterparties, such as through the use of securities lending, can involve liquidity risk and operational risk, either of which could cause losses and could limit the fund's ability to meet redemption requests, meet other payment obligations or invest the assets in question.

Under any of the following circumstances, the fund could lose some or all of its money, or could experience delays in getting back securities or cash that are held by the counterparty (which could also cause losses):

- a depository, sub-custodian, broker, or other counterparty becomes bankrupt or defaults on obligations; in some cases, the depository may not be able to remedy, or have liability for, the actions of a sub-custodian it has appointed
- a serious natural or human-caused disaster, terrorist act, civil unrest, war or other "force majeure" event occurs (since in such cases counterparties typically are not liable for losses)
- in some jurisdictions, collateral agreements (even those using industry-standard language) could prove difficult or impossible to enforce

Under any of the following circumstances, the value of collateral might not cover the full value of a transaction, or any fees or returns owed to the fund:

- the collateral declines in value; this risk is greatest when there is a material delay in the return of assets by the counterparty, but during times of market volatility it can occur even during the short lag between when the placement and settlement of a collateral-related transaction, or between when the need for collateral is calculated and when the fund receives the collateral
- the collateral yields less income than anticipated
- the fund or a counterparty has mispriced the collateral
- collateral that is used to cover a counterparty's default may take time to liquidate

For any cash collateral the fund invests, the circumstances immediately above could also create leverage (and consequently volatility) or expose the fund to assets inconsistent with its objective.

CREDIT RISK A bond or money market instrument could fall in price, and become more volatile and less liquid, if the credit quality of the issuer or the security declines, or the market believes it might. In extreme cases a debt investment could go into default, meaning its issuer could become unable to make timely payments to the fund.

Adverse effects of environmental issues, such as climate change and natural disasters, may erode the financial health of a bond issuer.

CURRENCY RISK To the extent that the fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses, in some cases significantly.

Exchange rates can change rapidly and unpredictably, and it may be difficult for the fund to unwind its exposure to a given currency in time to avoid losses.

Changes in exchange rates can be influenced by such factors as export-import balances, economic and political trends, governmental intervention, and investor speculation.

In addition, shareholders may experience currency risk if the currency in which they subscribe or redeem is different to the base currency of the fund. Changes in currency exchange rates between the base currency and the share class currency can reduce investment gains or income, or increase investment losses, in some cases significantly.

Intervention by a central bank, such as aggressive buying or selling of currencies, changes in interest rates, restrictions on capital movements or a "de-pegging" of one currency to another, could cause abrupt or long-term changes in relative currency values.

DERIVATIVES RISK The value of derivatives can be volatile. Small movements in the value of an underlying asset can create large changes in the value of a derivative and expose the fund to losses that could be greater than the cost of the derivative itself.

A fund may use derivatives for various reasons, such as hedging, efficient portfolio management and other investment purposes. Derivatives are specialized instruments that require investment techniques and risk analyses different from those associated with traditional securities.

Derivatives are subject to the risks of the underlying asset(s) – typically in modified and greatly amplified form – as well as carrying their own risks. Some of the main risks of derivatives are:

- the pricing and volatility of some derivatives, in particular credit default swaps and collateralised debt obligations, may diverge from the pricing or volatility of their underlying reference(s), sometimes greatly and unpredictably
- in difficult market conditions, it may be impossible or unfeasible to place orders that would limit or offset the market exposure or financial losses created by some derivatives
- derivatives involve costs that the fund would not otherwise incur
- it can be difficult to predict how a derivative may behave in certain market conditions; this risk is greater for newer or more complex types of derivatives
- changes in tax, accounting, or securities laws or standards could cause the value of a derivative to fall or could force the fund to terminate a derivative position under disadvantageous circumstances
- some derivatives, in particular futures, options, total return swaps, and contracts for difference may involve margin borrowing, meaning that the fund could be forced to choose between liquidating securities to meet a margin call or taking a loss on a position that might, if held longer, have yielded a smaller loss or a gain

Exchange-traded derivatives. Trading in these derivatives or their underlying assets could be suspended or subject to limits. There is also a risk that settlement of these derivatives through a transfer system may not happen when or as expected.

OTC derivatives – non-cleared. Because OTC derivatives are in essence private agreements between a fund and one or more counterparties, they are less highly regulated than market-traded securities. They also carry greater counterparty and liquidity risks, and their pricing is more subjective. If a counterparty ceases to offer a derivative that a fund had been planning on using, the fund may not be able to find a comparable derivative elsewhere and may miss an opportunity for gain or find itself unexpectedly exposed to risks

or losses, including losses from a derivative position for which it was unable to buy an offsetting derivative.

Because it is generally impractical for the SICAV to divide its OTC derivative transactions among a wide variety of counterparties, a decline in the financial health of any one counterparty could cause significant losses. Conversely, if any fund experiences any financial weakness or fails to meet an obligation, counterparties could become unwilling to do business with the SICAV, which could leave the SICAV unable to operate efficiently and competitively.

OTC derivatives – cleared. Because these derivatives are cleared on a trading platform, their liquidity risks are similar to those for exchange-traded derivatives. However, they still carry counterparty risk that is similar to non-cleared OTC derivatives.

DISTRESSED SECURITIES RISK Some of the funds may hold distressed securities or, may, in accordance with their respective investment policies, invest in distressed securities. Distressed securities involve significant risk. Such investments are highly volatile and are made when the Investment Manager believes that such investments will yield an attractive return based on the level of discount on price compared to perceived fair value of the security, or where there is a prospect of the issuer making a favourable exchange offer or plan of reorganisation. There can be no assurances that an exchange offer or reorganisation will occur or that any securities or other assets received will not have a lower value or income potential than anticipated at the time of investment. In addition, a significant period may pass between the time at which the investment in Distressed Securities is made and the time that any such exchange, offer or plan of reorganisation is completed. distressed securities may frequently not produce income while they are outstanding and there will be significant uncertainty as to whether fair value will be achieved or whether any exchange offer or plan of reorganisation will be completed. There may be a requirement for a fund to bear certain expenses which are incurred to protect and recover its investment in distressed securities, or which arise in the course of negotiations surrounding any potential exchange or plan of reorganisation. Furthermore, constraints on investment decisions and actions with respect to distressed securities due to tax considerations may affect the return realised on distressed securities. A fund's investments in distressed securities may include issuers with substantial capital needs or negative net worth or issuers that are, have been, or may become, involved in bankruptcy or reorganisation proceedings. A fund may be required to sell its investment at a loss or hold its investment pending bankruptcy proceedings.

EMERGING MARKETS RISK Emerging markets are less established, and more volatile, than developed markets. They involve higher risks, particularly market, credit, illiquid security, legal, custody, valuation, and currency risks, and are more likely to experience risks that in developed markets are associated with unusual market conditions.

Reasons for this higher level of risk include:

- political, economic, or social instability
- economies that are heavily reliant on particular industries, commodities or trading partners
- uncontrolled inflation
- high or capricious tariffs or other forms of protectionism
- quotas, regulations, laws, restrictions on repatriation of monies, or other practices that place outside investors (such as the fund) at a disadvantage
- changes in laws or failure to enforce laws or regulations, to provide fair or functioning mechanisms for resolving disputes or pursuing recourse, or to otherwise recognise the rights of investors as understood in developed markets
- excessive fees or trading costs, or outright seizure of assets
- excessive taxation or non-standard, poorly defined, frequently changing or capriciously enforced tax laws and practices
- inadequate reserves to cover issuer or counterparty defaults
- incomplete, misleading, or inaccurate information about securities and issuers
- non-standard or sub-standard accounting, auditing, or financial reporting practices
- markets that are small and have low trading volumes, and consequently can be vulnerable to liquidity risk and to manipulation of market prices
- arbitrary delays and market closures
- less developed market infrastructure that is unable to handle peak trading volumes
- fraud, corruption and error

In certain countries, securities markets may also suffer from impaired efficiency and liquidity, which may worsen price volatility and market disruptions.

To the extent that emerging markets are in different time zones from Luxembourg, the fund might not be able to react in a timely fashion to price movements that occur during hours when the fund is not open for business.

For purposes of risk, the category of emerging markets includes markets that are less developed, such as most countries in Asia, Africa, South America and Eastern Europe, as well as countries such as China, Russia and India that have successful economies but may not offer the highest levels of investor protection.

EQUITIES RISK Equities can lose value rapidly, and typically involve higher (often significantly higher) market risks than bonds or money market instruments.

If a company goes through bankruptcy or a similar financial restructuring, its equities may lose most or all of their value.

The price of an equity varies according to supply and demand and the market expectations about the company's future profitability, which may be driven by factors such as consumer demand, product innovation, actions of competitors, and how or whether a company chooses to address environmental, social and governance (ESG) factors.

Examples of ESG practices include mitigating the effects of extreme weather events, reducing environmental impacts, improving labour conditions, promoting workplace non- discrimination and establishing strong and transparent governance.

HEDGING RISK Any attempts to reduce or eliminate certain risks may not work as intended, and to the extent that they do work, they will generally eliminate potentials for gain along with risks of loss.

The fund may use hedging within its portfolio, and, with respect to any designated share classes, to hedge the currency exposure of the class. Hedging involves costs, which reduce investment performance. Therefore, with any share class that involves hedging both at the fund level and the share class level, there can be two levels of hedging, some of which may yield no benefit (for example, at the fund level, a fund may hedge SGD-denominated assets to EUR, while an SGD-hedged share class of this fund would then reverse that hedge).

Risks related to share class currency hedging (such as counterparty risk) could affect investors of other share classes. For a list of funds with share classes that could experience contagion risk, go to **fidelityinternational.com.**

HIGH YIELD RISK The values of high yield securities are speculative. Compared to investment grade bonds, high yield securities are more volatile, more sensitive to economic events, less liquid and carry greater default risk.

Foreign high yield securities generally include risks associated with international investing, such as currency risk due to differences in currencies.

INTEREST RATE RISK When interest rates rise, bond values generally fall. This risk is generally greater the longer a bond investment's duration.

For bank deposits and for money market instruments and other short-maturity investments, interest rate risk works in the opposite direction. Falling interest rates can be expected to cause investment yields to fall.

INVESTMENT FUND RISK As with any investment fund, investing in the fund involves certain risks an investor would not face if investing in markets directly:

- the actions of other investors, in particular sudden large outflows of cash, could interfere with orderly management of the fund and cause its NAV to fall
- the investor cannot direct or influence how money is invested while it is in the fund
- to the extent that a fund uses its own valuation estimates (fair value) for securities, any error in valuation could affect NAV
- to the extent that a fund shifts non-cash assets into cash or money market instruments as a defensive move, the fund will miss out on any positive performance in the non-cash assets
- the fund is subject to various investment laws and regulations that limit the use of certain securities and investment techniques that might improve performance; to the extent that the fund decides to register in jurisdictions that impose investment requirements, this decision could further limit its investment flexibility and scope
- changes in regulations worldwide and increased regulator scrutiny of financial services could lead to new regulations or other changes that could limit opportunities or increase costs for the SICAV
- because fund shares are not publicly traded, the only option for liquidation of shares is generally redemption, which the fund can suspend for any of the reasons described in "Rights We Reserve" under "Investing in the Funds"
- the fund's buying and selling of investments may not be optimal for the tax efficiency of any given investor
- it may be impractical or impossible for different share classes to completely isolate their costs and risks from other share classes, including the risk that creditors of one share class of a fund may attempt to seize assets of another class to settle an obligation
- to the extent the SICAV conducts business with affiliates of FIL Investment Management (Luxembourg) S.à r.l. and these affiliates (and affiliates of other service providers) do business with each other on behalf of the SICAV, conflicts of interest may be created; to mitigate these, all such dealings must be conducted at arm's length, and all entities, and the individuals associated with them, are subject to strict fair dealing policies that prohibit profiting from inside information or showing favouritism
- to the extent that the fund invests in other UCITS or in UCIs, it could incur a second layer of fees (which will further erode any investment gains), could face liquidity risk in trying to unwind its investment in a UCITS/UCI, and is subject to all the risks listed above, making shareholders indirectly subject to them as well
- to the extent that the fund invests in cash or cash equivalents beyond its investment allocation (such as for defensive investing) the fund is not pursuing its goal and may not fully participate in positive market movements.

Where a fund invests in another UCITS or a UCI, these risks apply to the fund, and in turn indirectly to shareholders.

LEVERAGE RISK The fund's high net exposure to certain investments could make its share price more volatile.

To the extent that the fund uses derivatives or Securities lending to increase its net exposure to any market, rate, basket of securities or other financial reference source, fluctuations in the price of the reference source will be amplified.

This may lead to increased volatility and potentially large financial losses for a fund. Leverage also creates the effect that the fund will have greater exposure to certain risks that are associated with the use of derivatives or securities lending transaction.

LIQUIDITY RISK Any security could temporarily become hard to value or to sell at a desired time and price.

Liquidity risk could affect the fund's value and its ability to pay redemption proceeds or to repay, for example, repurchase agreement proceeds by the agreed deadline.

MARKET RISK Prices and yields of many securities can change frequently — sometimes with significant volatility — and can fall, based on a wide variety of factors.

Examples of these factors include:

- political and economic news
- government policy
- changes in technology and business practices
- changes in demographics, cultures and populations
- natural or human-caused disasters
- weather and climate patterns
- scientific or investigative discoveries
- costs and availability of energy, commodities and natural resources

The effects of market risk can be immediate or gradual, short-term or long-term, narrow or broad.

OPERATIONAL RISK In any country, but especially in emerging markets, the fund could suffer losses due to errors, service disruptions or other failures, as well as fraud, corruption, cyber crime, instability, terrorism or other irregular events.

Operational risks may subject the fund to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, custody and trading, among other things. Operational risks may go undetected for long periods of time, and even if they are detected it may prove impractical to recover prompt or adequate compensation from those responsible.

REAL ESTATE RISK Real estate investment trusts (REITs) invest directly in physical real estate or related businesses, tend to have above-average volatility, and can be hurt by mortgage-related risks or by any factor that makes an area or individual property less valuable.

Specifically, investments in real estate holdings or related businesses or securities (including interests in mortgages) can be hurt by natural disasters, physical degradation, economic declines, overbuilding, zoning changes, tax increases, population or lifestyle trends, failures of management, difficulty attracting tenants or collecting payments, environmental contamination and other factors that may affect the market value or cash flow of the investment, including the failure of a REIT to qualify for tax-free pass-through of income.

Equity REITs are most directly affected by real estate factors, while mortgage REITs are more vulnerable to interest rate risk and credit risk (such as declines in the creditworthiness of the mortgage holders).

Many REITs are in effect small corporations and carry small- and mid-cap equity risk. Some are highly leveraged, which increases volatility. The value of real estate-related securities does not necessarily track the value of the underlying assets.

RUSSIA RISK In Russia and the Commonwealth of Independent States, risks associated with custody and counterparties are higher than in developed countries.

Russian custodial institutions observe their own rules, have significantly less responsibility and accountability to investors, are poorly regulated and are susceptible to fraud, negligence or error.

The securities markets in these countries may suffer from impaired liquidity, pervasive criminal activity and market manipulation, all of which may worsen price volatility and market disruptions.

It is understood that under the current Luxembourg regulation a fund may invest not more than 10% of its net assets in unlisted securities not dealt on a Regulated Market. Some investments in Russian securities may be considered as falling under such limit.

SECURITISATION RISK Mortgage-backed and asset-backed securities (MBS and ABS), and other types of collateralised debt security, typically carry prepayment and extension risk and can carry above-average liquidity risk.

MBS (a category that includes collateralised mortgage obligations, or CMOs) and ABS (a category that includes collateral debt obligations, or CDOs) represent an interest in a pool of debt, such as credit card receivables, auto loans, student loans, equipment leases, home mortgages and home equity loans.

MBS and ABS also tend to be of lower credit quality than many other types of debt securities. To the extent that the debts underlying an MBS or ABS go into default or become noncollectable, the securities based on those debts will lose some or all of their value.

Any unexpected behaviour in interest rates could hurt the performance of ABS/MBS and other callable debt securities (securities whose issuers have the right to pay off the security's principal before the maturity date).

When interest rates fall, issuers tend to pay off these securities and re-issue new ones at lower interest rates. When this happens, the fund may have no alternative but to reinvest the money from these prepaid securities at a lower rate of interest (prepayment risk).

In contrast, when interest rates rise, borrowers tend not to prepay their low-interest mortgages. This can lock in the fund to receiving below-market yields until interest rates fall or the securities mature (extension risk). It can also mean that the fund must either sell the securities at a loss or forgo the opportunity to make other investments that might have performed better.

The prices and yields of callable securities typically reflect the assumption that they will be paid off at a certain point before maturity. If this prepayment happens when expected, the fund generally will not suffer any adverse effects. However, if it happens substantially earlier or later than expected, it can mean that the fund effectively overpaid for the securities.

These factors can also affect the fund's duration, increasing or decreasing sensitivity to interest rates. In some circumstances, the failure of rates to rise or fall when anticipated could cause prepayment or extension risks as well.

SHORT POSITION RISK Taking a short position (a position whose value moves in the opposite direction from the value of the security itself) through derivatives creates losses when the underlying security's value rises. The use of short positions may increase the risk of both loss and volatility.

Potential losses from using short position are theoretically unlimited as there is no restriction on the price to which a security may rise, whereas the loss from a cash investment in the security cannot exceed the amount invested.

The short selling of investments may be subject to changes in regulations, which could create losses or the inability to continue using short positions as intended or at all.

SMALL AND MID CAP EQUITY RISK Equities of small and mid capitalisation companies can be more volatile and less liquid than those of larger companies.

Small and mid capitalisation companies often have fewer financial resources, shorter operating histories and less diverse business lines, and as a result can be at greater risk of long-term or permanent business setbacks. Initial public offerings (IPOs) can be highly volatile and can be hard to evaluate because of a lack of trading history and relative lack of public information.

SOVEREIGN DEBT RISK Debt issued by governments and government-owned or -controlled entities can be subject to many risks, especially in cases where the government is reliant on payments or extensions of credit from external sources, is unable to institute necessary systemic reforms or to control domestic sentiment, or is vulnerable to changes in geopolitical or economic sentiment.

Even if a government issuer is financially able to pay off its debt, investors may have little recourse should it decide to delay, discount or cancel its obligations, as the main avenue to pursue payment is typically the sovereign issuer's own courts.

Investment in sovereign debt exposes a fund to direct or indirect consequences of, inter alia, political, social and economic changes.

SPECIAL PURPOSE ACQUISITION COMPANIES RISK Where provided in their investment policies some of the funds may invest in stock, warrants, and other securities of special purpose acquisition companies ("SPACs") or similar entities that pool funds to seek potential acquisition opportunities. A SPAC generally invests its assets in government securities, money market fund securities and cash, which is returned to shareholders in the event that the assets are not used to complete an acquisition within a specified period of time. SPACs and similar entities are listed shell companies without an operating history or ongoing business, other than seeking acquisitions, therefore the value of their securities is dependent on the ability of the entity's management to identify and complete an acquisition.

SUSTAINABLE INVESTING RISK To the extent the fund weighs ESG or sustainability criteria in choosing investments, it may underperform the market or other funds that invest in similar assets but do not apply sustainability criteria.

While the fund, in selecting investments, may use a proprietary ESG scoring process that is based partially on third party data, such data may be incomplete or inaccurate.

For funds managed by Fidelity, in making its proxy voting decisions consistent with ESG criteria, exclusionary criteria, the fund may not always be consistent with maximising an issuer's short-term performance. For information about Fidelity's ESG voting policy, go to Our policies and reports.

TARGET DATE FUND RISK As the fund's asset allocation becomes more conservative, its potential for growth diminishes, and thus also its ability to recoup any existing or future losses. You might not get all of your original investment back on the target date.

Certain funds may periodically change their allocation across asset classes and therefore may incur greater transaction costs than a fund with a static allocation strategy.

TAX RISK Some countries tax interest, dividends or capital gains on certain investments in their country. Any country could change its tax laws or treaties in ways that affect the fund or its shareholders.

Tax changes potentially could be retroactive and could affect investors with no direct investment in the country. For example, if China were to change its tax classification of the SICAV or a related entity, modify or cease honouring a tax treaty or eliminate tax incentives, it could increase the taxes due on Chinese investments or even result in a tax of 10% (or greater) on the income the SICAV receives from all sources worldwide, including in those funds that do not hold any Chinese investments.

The SICAV cannot guarantee that it will be exempt from FATCA or other withholding requirements or that it will provide all necessary information for shareholders to comply with their tax reporting requirements. Any fines associated with the discovery of a US investor as a shareholder in any fund would be paid out of shareholder assets, costs the SICAV is unlikely to be able to recover.

TECHNOLOGY AND INNOVATION RISK Technology and innovation companies tend to have above-average volatility. The success or failure of a product or company can change rapidly with new developments in technology, consumer preference and regulation as well as the outcome of lawsuits, mergers and changes in personnel or strategy.

Technology and innovation companies are vulnerable to supply chain disruptions, high employee turnover and workplace welfare issues. The technology sector has above-average cyber security risk because of its disproportionately large online presence.

USE OF LIQUIDITY MANAGEMENT TOOLS RISK As outlined in "Selected Liquidity Management Tools", the Board or the Management Company has the ability to activate various LMTs in order to manage the liquidity risk of each fund and to protect the interests of Shareholders, particularly in periods of market stress or other exceptional circumstances.

The use of LMTs is intended to ensure the fair treatment of Shareholders and the orderly management of each fund's assets and liabilities. However, the activation of one or more LMTs may have a material impact on Shareholders and involves certain risks, including but not limited to the following:

Restriction or Delay of Redemptions: The use of LMTs such as redemption gates, or temporary suspension of redemptions may restrict or delay a Shareholder's ability to redeem their Shares. Shareholders may not be able to access their investment within the expected timeframe, which could adversely affect their liquidity position.

Uncertainty and Market Impact: The activation of LMTs may create uncertainty regarding the timing and amount of redemptions or subscriptions, and may affect the market value or liquidity of the Shares.

Discretion and Fair Treatment: The Board and Management Company have discretion in the activation, calibration and deactivation of LMTs, subject to applicable law. While LMTs are applied with the aim of ensuring fair treatment of Shareholders, there can be no assurance that all Shareholders will be affected equally or that the use of LMTs will not negatively impact certain Shareholders in particular circumstances.

Investors should carefully consider the risks associated with the use of LMTs and the potential impact on their ability to redeem or access their investment, as well as the possibility of incurring additional costs or receiving assets in kind.

General Investment Powers and Restrictions

Each fund, and the SICAV itself, must comply with all applicable EU and Luxembourg laws and regulations, as well as certain circulars, guidelines and other requirements. This section presents, in tabular form, the fund management requirements of the 2010 law (the main law governing the operation of a UCITS) as well as the requirements set by the European Securities and Markets Authority (ESMA) for money market funds and for risk monitoring and management. In case of any discrepancy, law itself, in the original French, would prevail over either the articles of incorporation or the Partial Prospectus for Switzerland (with the articles of incorporation taking precedence over the Partial Prospectus for Switzerland).

If any violation of the 2010 law or the money market fund regulation by a fund is detected, the Investment Manager must make compliance with the relevant policies a priority in its securities trades and investment management decisions, while also taking due account of the interests of shareholders. Any violation that arises incidentally must be resolved as soon as possible, consistent with the normal course of fund operations.

Except where otherwise noted, all percentages and restrictions apply to each fund individually, and all asset percentages are measured as a percentage of its assets (including cash).

Permitted assets, techniques and transactions

The table on the following page describes what is allowable to any UCITS. The funds may set limits that are more restrictive in one way or another, based on their investment objectives and policies. A fund's usage of any asset, technique or transaction must be consistent with its investment policies and restrictions.

No fund can acquire assets that come with unlimited liability attached, underwrite securities of other issuers (other than if it may be considered to do so in the course of disposing of fund securities), or issue warrants or other rights to subscribe for their shares.

Unless specified in their respective information funds are actively managed and do not seek to replicate or track the performance of any index. However, as part of the funds' active allocation policy, the Investment Manager may invest a portion of their assets from time to time in holdings and instruments which provide passive exposure, such as ETFs, futures, total return swaps, and swaps/options on an index.

Where appropriate to implement their investment objective, the investments for all Bond funds may be made in bonds issued in currencies other than the fund's Base Currency. The Investment Manager may choose to hedge currency exposures through the use of instruments such as forward foreign exchange contracts.

Unless otherwise specified in its Investment objective or policy, securitised and/or collateralised securities (e.g. asset-backed securities and mortgage-backed securities) will not exceed 20% of the assets of a fund, provided that such limit will not apply to investments in such securities issued or guaranteed by the United States government or United States government sponsored entities. Equity funds are not expected to have any material exposure to securitised and/or collateralised securities.

Unless otherwise specified in its investment objective or policy, below investment grade or high yielding securities will not exceed 20% of the assets of a fund. Each fund may invest up to 10% of its net assets in UCITS and UCIs, unless otherwise specified in its investment objective.

Funds are not expected to have any material exposure to distressed securities, unless otherwise specified in their investment objectives or policies. Funds authorized to invest in fixed income securities may invest in bonds that can have conversion or subscription rights to other assets attached to them and can invest up to 100% of their assets in investment grade bonds, unless otherwise specified in their investment objectives. The Investment Manager is unconstrained in the amount it may invest in any country or region, unless otherwise specified in the fund's investment objective or policy.

Co-Management of Assets

For the purpose of effective management the Board may choose that the assets of certain funds within the Fidelity Funds range be co-managed. In such cases, assets of different funds will be managed in common. Co-managed assets are referred to as a 'pool', notwithstanding the fact that such pools are used solely for internal management purposes. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed funds shall be allocated its specific assets.

Where the assets of more than one fund are pooled, the assets attributable to each participating fund will initially be determined by reference to its initial allocation of assets to such a pool and will change in the event of additional allocations or withdrawals.

The entitlement of each participating fund to the co-managed assets applies to each and every line of investments of such pool.

Additional investments made on behalf of the co-managed funds shall be allotted to such funds in accordance with their entitlements whereas assets sold shall be levied similarly on the assets attributable to each participating fund.

TERMS USED IN THIS SECTION

The terms below are used mainly or exclusively in this "General Investment Powers and Restrictions" section and have the following meanings.

ABCP Asset-backed commercial paper.

amortised cost A valuation method in which acquisition cost is adjusted for amortisation of premiums or discounts up through maturity.

CNAV A public debt constant net asset value money market fund.

eligible state Any state that the Board considers to be consistent with a given portfolio's investment objective.

EU-level issuers The EU, a central authority or central bank of a European member state, the European Central Bank, the European Investment Bank, the European Stability Mechanism or the European Financial Stability Facility.

EU and international issuers All EU-level issuers, plus any regional or local authority of a European state, any sovereign nation or member state of a federation, and any relevant international body to which a European state belongs, such as the International Monetary Fund, International Bank for Reconstruction and Development, Council of Europe Development Bank, European Bank for Reconstruction and Development, or Bank for International Settlements.

mark-to-market A valuation method based on independent, readily available liquidation prices, such as prices from exchanges, screen prices, or quotes from multiple reputable independent brokers.

mark-to-model A valuation method that is benchmarked, extrapolated or otherwise calculated from one or more market inputs.

member state A member state of the EU or of the European Economic Area.

MMF A money market fund.

money market instruments Transferable instruments normally dealt in on the money market, such as treasury and local authority bills, certificates of deposits, commercial paper, bankers' acceptances, and medium- or short-term notes.

LVNAV A low volatility net asset value money market fund.

short-term MMF An MMF that invests in eligible money market instruments referred to in article 10.1 of Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds (the "MMF Regulation") and is subject to the portfolio rules set out in article 24 of the MMF Regulation.

standard MMF An MMF that invests in eligible money market instruments referred to in article 10.1 and 10.2 and is subject to the portfolio rules set out in article 25 of the MMF Regulation.

VNAV A variable net asset value money market fund.

weighted average life (WAL) The average asset-weighted time to legal maturity of an MMF's total asset exposures; a measure of credit and liquidity risk.

weighted average maturity (WAM) The average asset-weighted time to legal maturity or the next interest rate reset, whichever is shorter, of an MMF's total asset exposures; a measure of sensitivity to interest rate risk.

Non-money market funds	Money market funds	Usage by funds
1. Transferable securities and money market instruments		
Must be listed or traded on an official stock exchange in an eligible state, or on a regulated market in an eligible state (a market that operates regularly, is recognised and is open to the public). Recently issued securities must include in their terms of issue a commitment to apply for official listing on a regulated market and such admission must be received within 12 months of issue.	Must be listed or traded on a money market in an eligible state. For eligible states outside the EU, the money market must be approved by the competent authorities, provided for in law, or identified in the fund's rules or instruments of incorporation.	Widely used. Material usage is described in "Fund Descriptions".
2. Money market instruments that do not meet the requirements in row 1		
Must be subject (at the securities or issuer level) to regulation aimed at protecting investors and savings and must meet one of the following: • be issued or guaranteed by a central, regional or local authority, or a central bank of an EU member state, the European Central Bank, the European Investment Bank, the EU, a public international body to which at least one EU member state belongs, a sovereign nation, or a member state of a federation • be issued by an undertaking of any securities that qualify under row 1 (with exception of recently issued securities) • be issued or guaranteed by an institution that is subject to, and complies with, EU prudential supervision rules or other rules the CSSF considers to be at least as stringent Can also qualify if the issuer belongs to a category approved by the CSSF, is subject to investor protections that are equivalent to those described above, and meets one of the following criteria: • is issued by a company with at least EUR 10 million in capital and reserves that publishes annual accounts consistent with Directive 2013/34/EU • is issued by an entity dedicated to financing a group of companies at least one of which is publicly listed • is issued by an entity dedicated to financing securitisation vehicles that benefit from a banking liquidity line	Must have a remaining or effective maturity or reset date of 397 days or less (with floating- or fixed-rate instruments hedged by swaps that reset to a money market rate or index) and must also meet all of the following that apply: • be issued or guaranteed by one or more EU-level issuers • be issued or guaranteed by one or more EU and international issuers, with both issue and issuer receiving favourable internal credit assessments • if it is a securitisation or ABCP, it must be sufficiently liquid, have a favourable internal credit assessment, have a legal maturity of 2 years or less, and meet one of the following: it is a securitisation referred to in article 13 of Commission Delegated Regulation (EU) 2015/61; **Short-Term MMF**: also must be an amortising instrument with a WAL of 2 years or less it is not (and does not include, even on a look-through basis) a re-securitisation or synthetic securitisation, and it is fully supported by the issuing regulated credit institution as to liquidity and credit risks, material dilution risks, ongoing transaction and program costs, and any necessary investor guarantees of full payment; **Short-Term MMF**: legal maturity at issuance must be 397 days or less it is a simple, transparent, standardised (STS) securitisation or ABCP; **Short-Term MMF**: must be amortising instruments, have a WAL of 2 years or less, and have had a legal maturity at issuance of 397 days or less	Widely used. Material usage is described in "Fund Descriptions".
3. Transferable securities and money market instruments that do not meet the requirements in rows 1 and 2		
Limited to 10% of fund assets.	Permitted as to money market instruments. No such ratio is applicable to money market funds.	Any usage likely to create material risk is described in "Fund Descriptions".
4. Shares of UCITS or other UCIs that are not linked to the SICAV*		
Must be limited by constitutional documents to investing up to 10% of assets in other UCITS or other UCIs. If the target investment is an "other UCI", it must do all of the following: • invest in UCITS-allowable investments • be authorised by an EU member state or by a state the CSSF considers to have equivalent laws on supervision, with adequate cooperation between authorities sufficiently ensured • issue annual and semi-annual reports that enable an assessment of assets, liabilities, income and operations over the reporting period • offer investor protections that are equivalent to those of a UCITS, in particular as to the rules on asset segregation, borrowing, lending and uncovered sales	The target MMF must be limited to investing up to 10% of assets in other MMFs, and those MMFs must be authorised under these same rules as those listed in the left column. An acquiring MMF must invest up to 17.5% of assets in other MMFs and up to 5% of assets in any one MMF. By derogation to this rule the acquiring MMF can invest up to 20% of assets in other MMFs with a maximum of 30% in aggregate of assets in targeted MMF which are not UCITS in accordance with Article 55 of the UCITS directive provided that the eligible MMFs are marketed solely through an employee savings scheme, have only natural persons as investors, are governed by national law, and under that law can permit redemptions only in non-market-related circumstances. An MMF that invests 10% or more of assets in other MMFs must disclose in its Partial Prospectus for Switzerland the maximum allowable management fees payable by both the target and acquiring MMFs, and in its annual report the amounts actually paid. The target fund cannot invest, in turn, in the acquiring fund (reciprocal ownership). The underlying investments held by the targeted MMF in which a fund invests do not need to be considered for the purposes of the diversification limits set forth in the Diversification requirements for Money Market Funds table. The acquiring MMF surrenders all voting rights in shares of the target MMF it acquires. A short-term MMF can only invest in other short-term MMFs.	Any usage that is over 10% of fund assets is disclosed in "Fund Descriptions". Total annual management fees of funds and underlying UCITS/ other UCIs may be up to 3%.

* May include ETFs. A UCITS or other UCI is considered to be linked to the SICAV if both are managed or controlled by the same Management Company or another affiliated management company.

Non-money market funds	Money market funds	Usage by funds
5. Shares of UCITS or other UCIs that are linked to the SICAV*		
Must meet all non-money market fund requirements in row 4. The SICAV's annual report must state the total annual management and advisory fees charged both to the fund and to the UCITS/other UCIs in which the fund has invested during the relevant period. The UCITS/other UCI cannot charge a fund any fees for subscribing for or redeeming shares.	Same as row 4. If the acquiring MMF and Target MMF are managed or controlled by the same Management Company or another affiliated management company, the Management Company or that other company is prohibited from charging subscription or redemption fees.	Non-MMF usage same as row 4, plus funds pay no annual management or advisory fees to any linked UCITS/ other UCI.
6. Shares of other funds of the SICAV		
Must meet all non-money market fund requirements in rows 4 and 5. The target fund cannot invest, in turn, in the acquiring fund (reciprocal ownership). The acquiring fund surrenders all voting rights in shares of the target fund it acquires. When measuring whether a fund meets the minimum required asset level, the value of investment in target funds is not included.	Same as row 4.	Non-MMF usage same as row 4, plus funds pay no annual management or advisory fees to any other funds.
7. Real estate and commodities, including precious metals		
Direct ownership of commodities, or certificates representing them, is prohibited. Investment exposure is allowed only indirectly, through assets, techniques and transactions allowed under the 2010 Law. The financial indices used to obtain exposure to commodities through financial derivatives instruments comply with the requirements set out in the article 9 of the Grand-Ducal Regulation of 8 February 2008. Direct ownership of real estate and other tangible property is prohibited except for any used by the SICAV itself for its operations.	Exposure not permitted in any form.	Usage likely to create material risk is described in "Fund Descriptions". Direct purchases of real or tangible property are unlikely.
8. Deposits with credit institutions		
Must be repayable or withdrawable on demand, and any maturity date must be up to 12 months in the future. The credit institutions either must have a registered office in an EU member state or, if not, be subject to prudential supervision rules the CSSF considers to be at least as stringent as EU rules.	Same as for non-money market funds.	Any usage will be described in "Fund Descriptions".
9. Ancillary liquid assets		
Limited to 20% of the portfolio net assets under normal market circumstances. Only bank deposits at sight, such as cash held in current accounts with a bank accessible at any time. Must be held only for treasury purposes or a period of time necessary in case of unfavourable market conditions. On a temporary basis, if justified by exceptionally unfavourable market conditions and where in the best interests of the shareholders, ancillary liquid assets may represent more than 20% of the portfolio net assets.	Limited to 20% of the portfolio net assets. Only bank deposits at sight, such as cash held in current accounts with a bank accessible at any time.	**Commonly used by all funds, and may be used extensively for temporary defensive purposes.**
10. Derivatives and equivalent cash-settled instruments See also "How the Funds Use Instruments and Techniques" on page 171.		
Underlying assets must be those described in rows 1, 2, 4, 5, 6 and 8 or must be financial indices (compliant with article 9 of the Grand-Ducal Regulation of 8 February 2008), interest rates, foreign exchange rates or currencies consistent with fund investment objectives and policies. All usage must be adequately captured by the risk management process described in "Management and monitoring of global risk" below. OTC derivatives must meet all of the following criteria: • be subject to reliable and verifiable independent daily valuations • be able to be sold, liquidated or closed by an offsetting transaction at their fair value at any time at the SICAV's initiative • be with counterparties that are institutions subject to prudential supervision and that belong to categories approved by the CSSF	Must be dealt in on a regulated market as referred to in row 1 or OTC and all of the following conditions are fulfilled: • the underlying of the derivative instrument consists of interest rates, foreign exchange rates, currencies or indices representing one of those categories; • the derivative instrument serves only the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the Fund; • the counterparties to OTC derivative transactions are institutions subject to prudential regulation and supervision and belonging to the categories approved by the competent authority of the Fund; • the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Fund's initiative	Material usage is described in "Fund Descriptions".

* May include ETFs. A UCITS or other UCI is considered to be linked to the SICAV if both are managed or controlled by the same Management Company or another affiliated management company.

Non-money market funds	Money market funds	Usage by funds
11. Securities lending, repurchase/reverse repurchase agreements See also "How the Funds Use Instruments and Techniques" on page 171.		
Must be used for efficient portfolio management only. The volume of transactions must not interfere with a fund's pursuit of its investment policy or its ability to meet redemptions. With loans of securities and with repurchase transactions, the fund must ensure that it has sufficient assets to settle the transaction. All counterparties must be subject to EU prudential supervision rules or to rules the CSSF considers to be at least as stringent. For each transaction, the fund must receive and hold collateral that is at least equivalent, at all times during the lifetime of the transactions, to the full current value of the securities lent. During the life of a repurchase contract, the fund cannot sell the securities that are the object of the contract, either before the right to repurchase these securities has been exercised by the counterparty, or the repurchase term has expired. A fund may lend securities: • directly to a counterparty • through a lending system organised by a financial institution that specialises in this type of transaction • through a standardised lending system organised by a recognised clearing institution The SICAV cannot grant or guarantee any other type of loan to a third party. The fund must have the right to terminate any securities lending, repurchase or reverse repurchase transaction and to recall the securities that have been lent or are subject to the repurchase agreement.	Securities lending is not permitted. The MMF must have the right to terminate a repurchase or reverse repurchase agreement with up to two working days' notice; for reverse repurchase agreements, the MMF must receive back the full amount of cash (on either an accrued or mark-to-market basis; if the latter, that value must be used in calculating NAV). Repurchase agreements must meet all of the following criteria: • be no longer than 7 working days • be used only to manage temporary liquidity • the counterparty cannot sell, invest, pledge or otherwise transfer assets provided as collateral without the fund's prior consent • the cash received must not exceed 10% of MMF assets and must be placed in deposits or invested in assets that are issued or guaranteed by one or more EU-level issuers or a central authority or central bank of a third country and that have received, for both issuer and issue, favourable internal credit assessments Assets received through reverse repurchase agreements must meet all of the following: • market value must at all times at least equal cash paid out • they are money market instruments as described in row 2 above • they are issued by an entity that is independent from the counterparty and not expected display high correlation with it • the MMF cannot sell, invest, pledge or otherwise transfer assets provided as collateral without the counterparty's prior consent • they do not create more than 15% exposure to any one issuer except an EU and international issuer Assets received through reverse repurchase agreements in accordance with the exceptions column of row A in the "Diversification requirements" table below.	Material usage is described in "Fund Descriptions". For securities lending, the funds require higher collateral than regulations specify.
12. Borrowing		
The SICAV is not allowed to borrow in principle except if it on a temporary basis and represents up to 10% of fund assets. The SICAV may however acquire foreign currency via back-to-back loans.	Not permitted in any form.	No funds currently intend to borrow from banks.
13. Short exposure		
Direct short sales are prohibited. Short positions may be acquired only indirectly, through derivatives.	Exposure not permitted in any form.	Any usage likely to create material risk is described in "Fund Descriptions".

Master - Feeder funds

The SICAV can create funds, that qualify as a master fund or a feeder fund. It can also convert existing funds into feeder funds, or switch any feeder fund to a different master fund. The rules below apply to any sub-fund that is a feeder fund.

Security	Investment requirements	Other terms and requirements
Units of the master fund	• At least 85% of assets	
Derivatives and ancillary liquid assets	• Up to 15% of assets	Derivatives must only be used for hedging. Movable and immovable property must be essential for the direct pursuit of the feeder fund's business. In measuring derivatives exposure, the fund must combine its own direct exposure with the exposure created by the master fund.

Additional voluntary requirements

Certain funds have voluntarily agreed to manage their portfolios to comply with certain requirements where doing so will allow them to distribute the funds in the countries indicated below, and in some cases to offer tax benefits to investors in those countries. This table lists only requirements that concern portfolio investment and that exceed those otherwise applicable to a fund (including the fund's own limits as stated in this Partial Prospectus for Switzerland).

Jurisdiction	Requirements	Applies to
France	• Must invest at least 75% of its assets in securities issued in the EU, Norway or Iceland.	Funds stating an intention to be eligible under the French Plan d'Epargne en Actions Tax Act (PEA) in "Fund Descriptions".
Germany	• Must invest more than 50% of its assets in instruments qualifying as "equity participation" in order to be treated as "Equity Fund" for GITA purposes (at least 25% for "Mixed Fund").	Funds stating an intention to be eligible under the German Investment Tax Act (GITA) in Germany specific supplement of this Partial Prospectus for Switzerland.

Jurisdiction	Requirements	Applies to
Hong Kong	• Must invest up to 10% of its Net Asset Value in securities issued or guaranteed by government, public/local authorities in any one country with a credit rating below investment grade unless otherwise disclosed in the investment objective of the fund. • Net derivative exposure must not exceed 50% of the fund's Net Asset Value, except for Fidelity Funds – Emerging Market Debt Fund and Fidelity Funds - Global Inflation-linked Bond Fund (up to 100%) and Fidelity Funds - Strategic Bond Fund (above 100%). • The management company, the Investment Manager and the investment advisers or anyone acting on behalf of the Fund, the Management Company, the Investment Manager and the investment advisers (as applicable), when investing for the Fund in units/shares of UCITS and/or other UCIs, may not obtain, for their own account, any rebate on any fees or charges levied by such UCITS and/or other UCIs or their management companies, if any or any quantifiable monetary benefits in connection with investments in any of such UCITS and/or other UCIs. • Unless otherwise specified in a fund's investment objective, those funds authorized for sale in Hong Kong (other than the Cash funds and Equity funds) may invest in instruments with loss-absorption features which may include instruments classified as Additional Tier 1/Tier 2 capital instruments, CoCos, non-preferred senior bonds which may also be known as Tier 3 bonds and other instruments eligible to count as loss-absorbing capacity under the resolution regime for financial institution Such investment will at all times remain below 50% of the funds' Net Asset Value. Notwithstanding the aforesaid, Fidelity Funds – Australian Diversified Equity Fund may invest less than 30% of its total net assets in such instruments with loss-absorption features. • For funds that have not stated in their investment objectives that they may have direct access to Onshore Chinese Securities, it is currently intended that each such fund will not directly or indirectly invest more than 10% of its Net Asset Value in Onshore Chinese Securities on an aggregated basis." • Unless otherwise stated in the investment objective of a fund, a fund may invest less than 70% in Chinese bonds via CIBM or less than 70% in Chinese bonds via Bond Connect. • Each of the Cash funds must maintain an average portfolio maturity not exceeding 90 days and must not purchase an instrument with a remaining maturity of more than one year, or two years in the case of government and other public securities. The aggregate value of investments by a Cash fund in deposits, Transferable Securities and Money Market Instruments issued by or placed with the same issuing body may not exceed 10% of the net assets of the Cash fund except: (a) in the case of deposits, where the issuer is a substantial financial institution (as such term is defined under the Hong Kong Securities and Futures Commission's Code on Unit Trust and Mutual Funds) and the total amount does not exceed 10% of the issuer's issued capital and published reserves, in which case the limit may be increased to 25% of the net assets of the Cash fund; and (b) in the case of Transferable Securities or Money Market Instruments which are issued or guaranteed by a Member State, its local authorities, a non-member State of the EU accepted by the CSSF or by public international bodies of which one or more Member States of the EU are members, this limit is increased to 100% provided that the Cash fund holds securities from at least six different issues and securities from one issue do not account for more than 30% of the net assets of the Cash fund. The debt securities which the Cash funds invest in are monitored on an ongoing basis, including as regards credit quality. Credit research of the debt securities involve qualitative and quantitative analysis as well as peer group comparison.	Funds registered in Hong Kong.
Italy	• Must invest up to 17.5% of its assets in securities in the FTSE MIB index or any equivalent index. • Must invest up to 3.5% of its assets in securities in the FTSE MIB index, FTSE Mid Cap index or any equivalent index.	Funds stating an intention to be eligible under the Italian Piano Individuale di Risparmio a lungo termine (PIR) in "Fund Descriptions".
Japan	• May not invest in Exchange-Traded Notes (ETNs) or take long positions in foreign exchange forwards. • May not take outright short positions in derivatives except for the sole purpose of hedging. • The notional amount of long derivative positions must be fully covered by uninvested cash and/or cash equivalents and will not exceed the amount of such cash held by the fund.	Funds stating an intention to be eligible under the Japan NISA (Nippon Individual Savings Account) scheme in "Fund Description".
South Korea	• A fund's securities shall be issued for the unidentified public, and 10% or more of the Shares issued by the fund shall be sold outside Korea. • 60% or more of a fund's net assets shall be invested or otherwise managed in non-Korean Won - denominated securities. • A fund shall not invest more than 35% of its assets in transferable securities and money market instruments issued or guaranteed by the government of any member states of G20 (which is not a member state of either the EU or OECD) or Singapore • Each fund registered in Korea under FSCMA may not invest more than 30% of its total assets in collective investment vehicles other than collective investment vehicles as defined in Article 229, Item 1 of FSCMA • A policy to prevent conflicts of interest from constituting or giving rise to a material risk of damage to the interests of shareholders is in place, to the effect that "A foreign collective investment business entity or its affiliated company, any executive or significant shareholder (referring to a shareholder who holds more than 10% of the outstanding stocks in their own name or any other person's name) of any of the afore-mentioned companies, or the spouse of such executive or shareholder shall not conduct any transaction with the collective investment property for their own interest, except where conflicts of interest are not likely to occur in trading with the foreign collective investment scheme, such as transactions through an open market.", which is the restriction on transactions with interested persons under the laws and regulations of Korea.	Funds registered in Korea.
South Africa	• Must use derivative instruments only for the purposes of efficient portfolio management. Derivatives can be exchange traded or traded OTC. • Must not invest in a fund of funds or a feeder fund.	Funds registered in South Africa.
Taiwan	• The total value of each fund's non-offset position in derivatives for efficient portfolio management shall not exceed 40% of the Net Asset Value of the fund (or such other percentage stipulated by the FSC from time to time), and the total value of each fund's non-offset position in derivatives for hedging purposes shall not, at any time, exceed the total market value of the relevant securities held by the fund; • A fund's investment in Mainland China is limited to the securities listed or traded on Mainland China exchanges or Mainland China interbank bond market. Unless otherwise specified by the FSC, a fund's direct and indirect exposure to the abovementioned Mainland China securities shall not, at any time,	Funds registered in Taiwan except those for which the Taiwan Financial Supervisory Commission has granted an exemption.

Jurisdiction	Requirements	Applies to
	exceed 20% (or such other percentage stipulated by the FSC from time to time) of the fund's Net Asset Value." • The securities market of Taiwan may not constitute the primary investment region in the portfolio of each fund. The investment amount of each Fund in the securities market of Taiwan shall not exceed a certain percentage stipulated by the FSC from time to time.	

Diversification requirements

To ensure diversification, a fund cannot invest more than a certain amount of its assets in one issuer, as defined below. These diversification rules do not apply during the first 6 months of a fund's operation, but the fund must observe the principle of risk spreading.

For purposes of this table, companies that share consolidated accounts (whether in accordance with Directive 83/349/EEC or with recognised international rules) are considered to be a single issuer. The percentage limits indicated by the vertical brackets in the center of the table indicate the maximum aggregate investment in any single issuer for all bracketed rows.

Maximum investment/exposure, as a % of fund assets

Category of securities	In any one issuer	In aggregate	Other	Exceptions
NON-MONEY MARKET FUNDS				
A. Transferable securities and money market instruments issued or guaranteed by a sovereign nation, any EU public local authority, or any public international body to which one or more EU member states belongs.	35%			A fund may invest up to 100% of its assets in a single issuer, if it is investing in accordance with the principle of risk spreading and meets all of the following criteria: • it invests in at least 6 different issues • it invests up to 30% in any one issue • the securities are issued by an EU member state, its local authorities or agencies, a member state of the OECD or of the G20, Singapore or by a public international bodies of which one or more EU member state belongs The exception described for row C applies to this row as well.
B. Bonds issued by a credit institution whose registered office is in an EU member state and which is subject by law to special public supervision designed to protect bondholders*.	25%	35%	80% in any issuers in whose bonds a fund has invested more than 5% of assets.	
C. Any transferable securities and money market instruments other than those described in rows A and B above.	10%	20%	20% in transferable securities and money market instruments within the same group. 40% in all issuers in which a fund has invested more than 5% of assets (does not include deposits and counterparty exposure for OTC derivative contracts).	For index-tracking funds, the 10% increases to 20% in the case of a published, sufficiently diversified index that is adequate as a benchmark for its market and is recognised by the CSSF. This 20% increases to 35% (but for one issuer only) when a security is highly dominant in the Regulated Market in which it trades.
D. Deposits with credit institutions.	20%			
E. OTC derivatives with a counterparty that is a credit institution as defined in row 8 above (first table in section).	10% max risk exposure (OTC derivatives and efficient portfolio management techniques combined)			Derivatives on eligible indices do not count for purposes of complying with rows A - D and row G (i.e. there is no look through to the securities comprising the index).
F. OTC derivatives with any other counterparty.	5% max risk exposure			
G. Shares of UCITS or UCIs as defined in rows 4 and 5 above (first table in section).	With no specific statement in the fund's objective and policies, 10% in one or more UCITS or other UCIs With a specific statement: • 20% in any one UCITS or UCI • 30% in aggregate in all UCIs other than UCITS • 100% in aggregate in all UCITS		Target funds of an umbrella structure whose assets and liabilities are segregated are considered as a separate UCITS or other UCI. Assets held by the UCITS or other UCIs do not count for purposes of complying with rows A - F of this table.	

* These bonds also must invest all sums deriving from their issuance in assets that, for the life of the bonds, are capable of covering all claims attaching to the bonds and in case of issuer bankruptcy would be used, on a priority basis, to reimburse principal and accrued interest.

Maximum investment/exposure, as a % of fund assets

Category of securities	In any one issuer	In aggregate	Other	Exceptions
MONEY MARKET FUNDS				
H. Money market instruments	5%	5%		With regulator approval, and with disclosure in constitutional and marketing documents that includes a list of issuers in which 5% or more of assets may be invested, a fund may invest in as few as six issues that are issued by an EU member state, its local authorities or agencies, a member state of the OECD or of the G20, Singapore or by a public international bodies of which one or more EU member state belongs, up to 100% net exposure, if it is investing in accordance with the principle of risk spreading and invests up to 30% in any one issue.
I. Money market instruments, securitisations and ABCPs issued by the same body	5%			Derogation: a VNAV MMF fund may invest up to 10 % provided that the total value of such money market instruments, securitisations and ABCPs held in each issuing bodies in each of which it invests more than 5% of its assets does not exceed 40% of the value of its assets. Aggregate exposure to securitisations and ABCP up to 20% (15% for non STS ones).
J. Bonds issued by a credit institution whose registered office is in a European state and which is subject by law to special public supervision designed to protect bondholders.	10%	15%	40% in aggregate in all issuers in whose bonds a fund has invested more than 5% of assets.	Sums deriving from the issue of these bonds must be invested in assets which, during the whole period of validity of such bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.
K. Bonds issues by a single credit institutional where the requirements set out in point (f) of Article 10(1) or point (c) of Article 11 (1) of the Delegated Regulation (EU) 2015/61 are met.	20%			When a fund invests more than 5% of its assets in such bonds issued by a single issuer, the total value of those investments shall not exceed 60% of the value of the assets of the fund.
L. Deposits with credit institutions.	10%			Increases to 15% (and the aggregate limit of 15% on row H through L exposures increases to 20%) if there are not enough viable credit institutions in the MMF's jurisdiction to allow it to meet the diversification requirement and it is not economically feasible to make deposits in another member state. With local regulator approval, increases to 100% for instruments issued or guaranteed by EU and international issuers.
M. OTC derivatives.	5% exposure to any one counterparty			
N. Reverse repurchase agreements.	15% in cash to any one counterparty			Received assets: exposure to a given issuer up to 15%, except where those assets take the form of money market instruments that fulfil the requirements of the 100% derogation under row 1.

Limits on concentration of ownership

These limits are intended to prevent the SICAV or a fund from the risks that could arise (for itself or an issuer) if it were to own a significant percentage of a given security or issuer. For purposes of this table and the diversification table below, companies that share consolidated accounts (whether in accordance with Directive 83/349/EEC or with recognised international rules) are considered to be a single issuer. A fund does not need to comply with the investment limits described below when exercising subscription rights attaching to portfolio assets, so long as any resulting violations of the investment restrictions are corrected as described in the introduction to "General Investment Powers and Restrictions".

Category of securities	Maximum ownership, as a % of the total value of the securities issued		
NON-MONEY MARKET FUNDS			
Securities carrying voting rights	Less than would enable the SICAV to exercise significant influence over the management of an issuer	These limits can be disregarded at purchase if at that time the gross amount of bonds or money market instruments, or the net amount of the instruments in issue, cannot be calculated.	These rules do not apply to: • securities described in row 1 of the table above • shares of a non-EU company that invests mainly in its home country and represents the only way for a portfolio to invest in that country under the 2010 Law • purchases or repurchases of shares of subsidiaries that provide only management, advice or marketing in their country, when done as a way of effecting transactions for SICAV shareholders in accordance with the 2010 law
Non-voting securities of any one issuer	10%		
Debt securities of any one issuer	10%		
Money market securities of any one issuer	10%		
Shares of any sub-fund of an umbrella UCITS or UCI	25%		
MONEY MARKET FUNDS			
Money market instruments, securitisations and ABCPs of any one issuer	10%	Does not apply to money market instruments issued or guaranteed by EU and international issuers.	

Management and monitoring of global risk

The Management Company has implemented a risk management process, approved and supervised by its board, to monitor and measure at any time the overall risk profile of each fund from direct investment, derivatives, techniques, collateral and all other sources. Further information about the risk management process is available upon request from the Management Company.

Global exposure assessments are calculated every trading day (whether or not the fund calculates a NAV for that day), and encompass numerous factors, including coverage for contingent liabilities created by derivative positions, counterparty risk, foreseeable market movements and the time available to liquidate positions.

Any derivatives embedded in transferable securities or money market instruments count as derivatives held by the fund, and any exposure to transferable securities or money market instruments gained through derivatives (except certain index-based derivatives) counts as investment in those securities or instruments.

RISK MONITORING APPROACHES There are 3 main risk measurement approaches: the commitment approach and the 2 forms of value at risk (VaR), absolute VaR and relative VaR. These approaches are described below, and the approach each fund uses is identified in "Fund Descriptions". The Management Company chooses the approach a fund will use based on its investment policy and strategy.

Approach	Description
Absolute Value-at-Risk (Absolute VaR)	The fund seeks to estimate the maximum potential loss due to market risk it could experience in a month (20 trading days) under normal market conditions. The estimate is based on the previous 12 months (250 business days) of the fund's performance, and requires that 99% of the time, the fund's worst outcome is no worse than a 20% decline in net asset value.
Relative Value-at-Risk (Relative VaR)	The relative VaR of the fund is expressed as a multiple of a benchmark or reference portfolio. The fund seeks to estimate the potential loss due to market risk it could experience within one month (20 trading days) under normal market conditions. The estimate is based on the previous 12 months (250 Business Days) of the fund's performance, and requires that 99% of the time, the fund's worst outcome cannot exceed 200% of the VaR of the relevant benchmark or reference portfolio.
Commitment	The fund calculates its global exposure by taking into account either the market value of an equivalent position in the underlying asset or the derivative's notional value, as appropriate. This allows the fund to reduce its global exposure by taking into account the effects of any hedging or offsetting positions. Certain types of risk-free transactions, leverage-free transactions and non-leveraged swaps are therefore not included in the calculation. A fund using this approach must ensure that its overall market exposure does not exceed 210% of its assets (100% from direct investment, 100% from derivatives and 10% from borrowings).

GROSS LEVERAGE Any fund that uses a VaR approach must also calculate its expected level of gross leverage, which is stated in "Fund Descriptions". A fund's expected leverage is a general indication, not a regulatory limit; the actual leverage may exceed the expected level from time to time. However, a fund's use of derivatives will remain consistent with its investment objective, investment policies and risk profile, and will comply with its VaR limit.

Gross leverage is a measure of the leverage created by total derivative usage and by any instruments or techniques used for efficient portfolio management. It is calculated as the "sum of the notionals" (the exposure of all derivatives, without treating opposing positions as cancelling each other out). Since this calculation does not consider sensitivity to market movements or whether a derivative is increasing or decreasing a fund's overall risk, it may not be representative of a fund's actual level of investment risk.

How the Funds Use Instruments and Techniques

Purpose and regulatory framework

A fund may use the instruments and techniques described below for efficient fund management, which is defined as reducing risks or costs or generating additional capital or income, to gain exposure to certain investments or markets and for hedging against various types of risk. All usage must be consistent with the fund's risk profile, objective and investment strategy as defined in this Partial Prospectus for Switzerland, and with the 2010 Law, the UCITS Directive, Grand Ducal regulation of 8 February 2008, CSSF Circulars 08/356 and 14/592, ESMA guidelines 14/937, the Securities Financing Transactions (SFT) regulation (EU) 2015/2365 and any other applicable law and regulation.

The risks associated with instruments and techniques are described in "Risk Descriptions".

Derivatives the Funds can use

A derivative is a financial contract whose value depends on the performance of one of more reference assets (such as a security or basket of securities, an index or an interest rate). Derivatives may be over-the-counter ("OTC") and/or exchange traded instruments.

Always consistent with its investment policy, each fund may invest in any type of financial derivative instrument. (for MMF funds, refer to "Rules related to funds".) These may include the following types currently making up the most common derivatives:

- financial futures (contracts that deliver payments based on future values), such as futures on securities, interest rates, indices or currencies
- options (contracts that confer the right, or the obligation, to buy or sell an asset during a stated period of time), such as options on equities, interest rates, indices (including commodity indices), bonds, currencies or swaps (swaptions), and on futures
- warrants (contracts that confer the right to buy or sell an equity or other security at a certain price during a stated period of time
- forwards (contracts to buy or sell an asset at a specified price on a future date), such as foreign exchange contracts
- swaps (contracts where two parties exchange the returns from two different reference assets, such as foreign exchange, index, inflation rate or interest rate swaps, and swaps on volatility or baskets of equities, but NOT including total return, credit default or variance swaps, which are listed separately
- credit derivatives, such as credit default swaps, or CDSs (contracts where one party receives a fee from the counterparty in exchange for agreeing that, in the event of a bankruptcy, default or other "credit event", it will make payments to the counterparty designed to cover the latter's losses)
- structured derivatives, such as credit-linked and equity-linked securities
- contracts for difference (contracts whose value is based on the difference between two reference measurements such as a basket of securities)
- total return swaps or other derivatives with similar characteristics (TRS) (transaction in which one counterparty makes payments based on a fixed or variable rate to the other counterparty, who transfers the total economic performance, including income from interest and fees, gains and losses from price movements, and credit losses, of a reference obligation, such as an equity, bond or index); TRS can be funded or unfunded (with or without a required up-front payment. TRS transaction will be undertaken on single name equity and fixed income instruments or financial indices. The Funds intend to use TRS (including CFDs) in accordance with the provisions on the use of financial derivative instruments and within the maximum and expected levels disclosed in the Fund Descriptions.

Futures are generally exchange-traded. All other types of derivatives are generally OTC.

For any index-linked derivatives, the index provider determines the rebalancing frequency and the effects of the cost to the relevant fund will depend on the rebalancing frequency.

What the funds can use derivatives for

A fund may use derivatives for any of the following purposes, consistent with its objective and policies as described in "Fund Descriptions".

Hedging Hedging is taking a market position that is in the opposite direction from – and is no greater than – the position created by other fund investments, for the purpose of reducing or canceling out exposure to price fluctuations or certain factors that contribute to them.

- **Credit hedging** Typically done using credit default swaps. The goal is to hedge against credit risk. This includes purchasing or selling protection against the risks of specific assets or issuers as well as proxy hedging (taking an opposite position in a different investment that is likely to behave similarly to the position being hedged).
- **Currency hedging** Typically done using currency forwards. The goal is to hedge against currency risk. This can be done at the fund level and, with H shares, at the share class level. All currency hedging must involve currencies that are within the applicable fund's benchmark or are consistent with its objectives and policies. When a fund holds assets denominated in multiple currencies, it might not hedge against currencies that represent small portions of assets or for which a hedge is uneconomical or unavailable. A fund may engage in:
  direct hedging (same currency, opposite position)
  cross-hedging (reducing exposure to one currency while increasing exposure to another, the net exposure to the base currency being left unchanged), when it provides an efficient way of gaining the desired exposures
  proxy hedging (taking an opposite position in a different currency that is considered likely to behave similarly to the base currency)
  anticipatory hedging (taking a hedge position in anticipation of an exposure that is anticipated to arise as the result of a planned investment or other event).
- **Duration hedging** Typically done using interest rate swaps, swaptions and futures. The goal is to seek to reduce the exposure to rate shifts for longer-maturity bonds. Duration hedging can be done only at the fund level.
- **Price hedging** Typically done using options on indices (specifically, by selling a call or buying a put). Usage is generally limited to situations where there is sufficient correlation between the composition or performance of the index and that of the fund. The goal is to hedge against fluctuations in the market value of a position.
- **Interest rate hedging** Typically done using interest rate futures, interest rate swaps, writing call options on interest rates or buying put options on interest rates. The goal is to manage interest rate risk.

Investment exposure A fund can use any allowable derivative to gain exposure to permissible assets, in particular when direct investment is economically inefficient or impracticable.

Leverage A fund can use any allowable derivative to increase its total investment exposure beyond what would be possible through direct investment. Leverage typically increases fund volatility.

Index replication derivatives may be used to replicate the performance of a security or asset class (e.g. commodity indexes or property). Other strategies may include positions that benefit from a decline in value or that give exposure to certain elements of returns of a particular issuer or asset in order to provide returns that are unrelated to those of the

general market or positions that would not have been available without the use of derivatives.

Cash funds may use financial derivative instruments only for the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the relevant Cash funds.

All funds may use derivatives to manage risks, generate income or capital growth associated with the asset classes in which they invest, provided (a) they are economically appropriate in that they are realised in a cost-effective way, (b) they are entered into for one or more of (i) reduction of risk, (ii) reduction of cost and (iii) generation of additional capital or income with a level of risk which is consistent with the risk profile of the relevant fund(s) and the risk diversification rules of the funds; and (c) their risks are adequately captured by the risk management process of the SICAV.

Derivatives referencing underlying fixed income assets or components thereof may be used by the funds to (i) increase or reduce exposure to interest rate risk (including inflation) through the use of interest rate or bond futures, options and interest rate, total return or inflation swaps, (ii) buy or sell part or all of the credit risk relating to single issuer, or multiple issuers referenced in a basket or index through the use of bond futures, options, credit default and total return swaps and (iii) hedge, reduce or increase exposure to currencies through the use of forwards, including non-deliverable forwards and currency swaps.

Instruments and techniques the funds can use

A fund can use the following instruments and techniques with respect to any and all securities it holds, but only for efficient portfolio management (as described above).

Securities lending

The Funds intends to engage in securities lending transactions on stocks, other equity securities instruments, and bonds for the purpose of efficient portfolio management and in accordance with the expected and maximum levels disclosed in the fund information. None of the funds enter into margin lending transactions as at the date of this Partial Prospectus for Switzerland.

Securities lending transactions will be entered into depending on market opportunities, in particular, on the market demand for the securities held in each fund's portfolio and the expected revenues of the transaction compared to the market conditions on the investment side.

Securities lending transactions to be entered into exclusively aim to generate additional value consistent with the fund's investment objective and its risk profile. As such, there is no restriction on the frequency under which a fund may engage into such type of transactions. Under no circumstances shall the above-mentioned operations cause a fund to diverge from its investment objective as laid down in the Partial Prospectus for Switzerland or result in additional risk higher than its profile as described in the Partial Prospectus for Switzerland.

The Management Company shall maintain the volume of these transactions at a level such that is able, at all times, to meet redemption requests.

Counterparties: The counterparties to such securities lending must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law and specialised in this type of transaction. The counterparties to such transactions will generally be financial institutions based in an OECD member state and having an investment grade credit rating. The selected counterparties comply with Article 3 of the SFTR Regulation.

Revenues paid to the funds: With regard to the securities lending transactions, at least 87.5% of the gross revenue arising from such transactions are returned to the funds, while a maximum 12.5% fee is paid to the Lending Agent (which is not an affiliate of the Investment Manager). Any operational costs (whether direct or indirect) borne by the Lending Agent from such securities lending activities are covered out of its fee. Further details on the actual return are published in the SICAV's annual reports and accounts.

Lending agent, collateral agent and collateral manager: The SICAV has appointed National Financial Services LLC, a Delaware limited liability company with an office in Boston, Massachusetts and Citibank N.A., London Branch (both a "Lending Agent") to carry out the securities lending transactions and the management of the collateral. Neither Lending Agent is an affiliate of the Investment Manager.

Repurchase and reverse repurchase agreement transactions

Repurchase transactions are governed by an agreement whereby the owner of the asset agrees to sell a security to another party in exchange for cash collateral and agrees to repurchase it on a specified date for a specified (higher) price. A Reverse Repurchase transaction is the opposite transaction whereby the cash holder agrees to sell the cash to another party in exchange for security collateral and agrees to repurchase the cash on a specified date for a specified (higher) value.

The Funds intend to engage in repurchase and reverse repurchase transactions for the purpose of Efficient Portfolio Management and in accordance with the expected and maximum levels disclosed in fund modules.

The Funds may only enter into reverse repurchase agreement and/or repurchase agreement transactions provided that it is able at any time (a) to recall the full amount of cash in a reverse repurchase agreement or any securities subject to a repurchase agreement, or (b) to terminate the agreement in accordance with applicable regulations and subject to prevailing repurchase agreement market rates. In this context, fixed-term transactions that do not exceed seven days should be considered as arrangements on terms that allow the assets to be recalled at any time by the SICAV.

Repurchase agreement transactions and reverse repurchase agreement transactions will be entered into opportunistically and on a temporary basis, in circumstances where the Investment Manager considers that the market rates will allow the relevant fund to benefit from more efficient cash management or improved portfolio returns when entering into any of these transactions.

Counterparties: The counterparties to such transactions must be subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law and specialised in this type of transaction. The counterparties to such transactions will generally be financial institutions based in an OECD member state and having an investment grade credit rating. The selected counterparties comply with Article 3 of the SFTR Regulation.

Revenues paid to the funds: 100% of the revenues (or losses) generated by their execution of repurchase transactions or reverse repurchase transactions are allocated to the funds. The Investment Manager do not charge any additional costs or fees or receive any additional revenues in connection with these transactions. Further details on the actual return are published in the Fund's annual reports and accounts.

Where usage and fees are disclosed

The following are disclosed in "Fund Descriptions" for any fund that currently uses them:

- for total return swaps, contracts for difference and similar derivatives: the maximum and expected exposure expressed as a percentage of net asset value
- for repurchase and reverse repurchase agreement transactions: the maximum and expected limits expressed as a percentage of net asset value
- for securities lending: the maximum and expected limits expressed as a percentage of net asset value

The following are disclosed in financial reports:

- the usage of all instruments and techniques used for efficient fund management
- in connection with this usage, the revenues received, and the direct and indirect operational costs and fees incurred by each fund

- who received payment for the above costs and fees and any relationship a recipient might have with any affiliates of FIL Group or the depositary
- information on the nature, use, reuse, and safekeeping of collateral
- the counterparties the SICAV has used during the period covered by the report, including the major counterparties for collateral

Fees paid to the lending agent are not included in ongoing charges because they are deducted before the revenues are paid to the Fund.

Counterparties to derivatives and techniques

The Management Company adopts a counterparty risk management framework which measures, monitors and manages counterparty credit risk. In addition to the requirements stated in rows 10 and 11 in "General Investment Powers and Restrictions" table, a counterparty will be assessed on the following criteria:

- regulatory status
- protection provided by local legislation
- operational processes
- creditworthiness analysis including review of available credit spreads or external credit ratings; for CDSs and variance swaps, the counterparty must be a first-rate financial institution
- degree of experience and specialisation in the particular type of derivative or technique concerned

Legal status and country of origin or domicile are not in themselves directly considered as selection criteria.

Unless otherwise stated in this Partial Prospectus for Switzerland or with the consent of Directors, no counterparty to a fund derivative can serve as an Investment Manager of a fund or otherwise have any control or approval over the composition or management of a fund's investments or transactions or over the assets underlying a derivative.

The lending agent will continuously assess the ability and willingness of each securities borrower to meet its obligations, and the SICAV retains the right to rule out any borrower or to terminate any loan at any time. The generally low levels of counterparty risk and market risk associated with Securities lending are further mitigated by counterparty default protection from the lending agent and the receipt of collateral.

Selected Liquidity Management Tools

Directive 2024/927/EU was implemented in 2026 to harmonise liquidity management tools and their use by the managers of open-ended funds, and to enable a more effective response to liquidity pressures in times of market stress and better protection of investors. Having assessed the suitability of all available liquidity management tools ("**LMTs**") in the context of the SICAV and each fund's investment strategy, liquidity profile, redemption policy, investor base, market conditions and the nature of the assets held by the SICAV, the Board, in consultation with the Management Company has determined that, where justified in the interests of Shareholders, the following mechanisms are available for use for the purposes of effective liquidity risk management, subject to the requirements of the CSSF:

1. *Temporary Suspensions*:

The Board may, in exceptional circumstances and where justified in the interests of Shareholders, temporarily suspend or restrict subscriptions, switches and/or redemptions, at its own initiative and/or upon and for so long as directed, required or otherwise instructed by any competent authority having jurisdiction over the SICAV and/or the Management Company (including, without limitation, the CSSF, and, where applicable, ESMA) in accordance with CSSF Regulations.

Where used as a liquidity management tool in the circumstances provided for under this section, the Board shall not suspend redemptions without simultaneously suspending subscriptions.

Any suspension or restriction implemented shall: (i) be effected in the manner and for the duration specified by the relevant competent authority (or, where no duration is specified, for such period as the Board or the Management Company considers necessary having regard to the terms of the direction or requirement and in the interests of Shareholders); (ii) be applied fairly and proportionately across affected Shareholders and Classes, and be consistent with the liquidity risk management framework applicable to the SICAV and the requirements of the articles of incorporation, this Partial Prospectus for Switzerland and the CSSF; and (iii) be lifted promptly upon the cessation, withdrawal or expiry of the relevant direction or requirement, or earlier where permitted and where the Board or the Management Company determines that the circumstances justifying such suspension or restriction no longer prevail.

2. *Redemption Gate*:

Aggregate redemptions on a dealing day may be limited, to allow for the orderly disposal of assets in order to realise the proceeds required to meet such requests, with unmet requests deferred to the next dealing day on a pro rata basis. If on any Valuation Day redemption requests and switching requests relate to more than 10% of the net asset value of the relevant fund, the Directors may declare that all or part of such requests for redemption or switching will be deferred on a pro rata basis for a period that the Directors consider to be in the best interests of the SICAV. A deferred redemption request will be applied uniformly to all affected Shareholders in the relevant fund in accordance with Articles of Incorporation and CSSF requirements, on the same terms and for the same period.

3. *Swing Pricing*:

The Board or Management Company may apply swing pricing by adjusting the NAV of the relevant fund using a swing factor, in order to allocate estimated liquidity costs arising from net subscriptions or net redemptions to transacting Shareholders and to reduce dilution of remaining Shareholders ("**Swing Pricing**"). Swing Pricing may be used where provided for in the Articles of Incorporation, the relevant fund rules and this Partial Prospectus for Switzerland and where the Board or the Management Company considers it appropriate having regard to the fund's investment strategy, liquidity profile, redemption policy, investor base, market conditions and the interests of Shareholders.

Swing Pricing may operate on a full or partial basis. Under full swing, the NAV is adjusted on any dealing day on which there is net subscription or redemption activity; under partial swing, the adjustment is made only where net subscription or redemption activity exceeds a predetermined swing threshold. The method, any threshold, maximum swing factor or swing factor range, cost inputs and review frequency will be determined and reviewed by the Board or the Management Company in accordance with its liquidity risk management policies and applicable law.

The price adjustment, based on both normal net dealings and market volatility, will not exceed 2% of the original NAV. The actual level of adjustment will be set periodically by a dedicated committee, to which the Board has delegated specific powers. However, whilst the price adjustment is normally not expected to exceed 2%, the Board and/or the Management Company may decide to increase this adjustment limit in exceptional circumstances (such as high net dealings or high market volatility) to protect Shareholders' interests. As any such price adjustment will be dependent on aggregate net transactions in Shares, it is not possible to accurately predict whether it will occur at any future point in time and consequently how frequently it will need to be made. Shareholders will be notified of such a decision to increase this adjustment limit via notice on **fidelityinternational.com.**

The swing factor will reflect estimated explicit transaction costs and, where appropriate to the fund's investment strategy, estimated implicit transaction costs, including bid-ask spreads and any significant market impact of asset purchases or sales. Swing Pricing may increase the subscription price or reduce the redemption proceeds and does not guarantee that dilution, or liquidity stress will be eliminated.

4. *Side pockets*

The Board may in exceptional circumstances and where justified in the interests of Shareholders, activate side pockets to separate certain assets whose economic or legal features have changed significantly or become uncertain.

Exceptional circumstances which may require the activation of suspensions or side pockets include: (a) significant valuation uncertainty and/or illiquidity of a specific portion of the portfolio of a Fund for which there is no active market and/or for which trading is prohibited (e.g. due to sanctions) and/or for which fair valuation is temporarily unavailable with the view of segregating it from the rest of the Fund (to enable this part to remain open for investors); and (b) fraud, financial crisis or war affecting a particular sector or region.

Upon activation, affected assets (and, where relevant, related liabilities) are segregated into a distinct Class of the relevant Fund (a "**Side Pocket Class**") or fund ("**Side Pocket Fund**"). No new subscriptions into the Side Pocket Class or Side Pocket Fund are permitted and redemptions are suspended.

Side-pocketed assets are valued using fair valuation methodologies consistent with the SICAV's valuation policy, enhanced where necessary to address the specific uncertainties. Where valuation cannot be reliably determined, valuations may be maintained at zero or a conservative estimate until reliability is restored.

Any fees charged to the Side Pocket Class or Side Pocket Fund will reflect only the reasonable costs of managing, valuing, administering and realising the side-pocketed assets and will be disclosed.

The Side Pocket Class or Side Pocket Fund will be liquidated, and assets realised such that proceeds are distributed, when the exceptional circumstances no longer exist and doing so is in the best interests of Shareholders. Liquidation may occur in stages (partial releases) where appropriate.

Existing Shareholders receive pro rata interests in the Side Pocket Class or Side Pocket Fund corresponding to their holdings at the time of activation. Shareholders subscribing thereafter will have exposure only to the Fund or relevant ordinary class.

Collateral policies

These policies apply to assets received from counterparties in connection with transactions in securities lending, reverse repurchase transactions and OTC derivatives.

ACCEPTABLE COLLATERAL All securities accepted as collateral must be high quality. Collateral must be in form of:

a) liquid assets (i.e. cash and short term bank certificates, money market instruments as defined in Council Directive 2007/16/EC of 19 March 2007) and their equivalent (including letters of credit and a guarantee at first-demand given by a first class credit institution not affiliated to the counterparty);

b) bonds issued or guaranteed by a Member State of the OECD or their local authorities or by supranational institutions and undertakings with EU, regional or world-wide scope;

c) shares or units issued by Money Market Funds calculating a net asset value on a daily basis and assigned a rating of AAA or its equivalent;

d) shares or units issued by UCITS investing mainly in bonds/shares satisfying the conditions under (c);

e) bonds issued or guaranteed by first class issuers offering an adequate liquidity, or

f) shares admitted to or deal in on a regulated market or on a stock exchange of a member state of the OECD, provided that these shares are included in a main index

Securities that are the subject of purchase with a repurchase option or that may be purchased in reverse purchase agreements are limited to the type of securities mentioned under items (a), (b), (c), (e) and (f).

Non-cash collateral must be traded on a regulated market or multilateral trading facility with transparent pricing and must be able to be sold quickly for close to its pre-sale valuation.

To ensure that collateral is suitably independent from the counterparty as far as both credit risk and investment correlation risk, collateral issued by the counterparty or its group is not accepted. The collateral is not expected to display a high correlation with the performance of the counterparty.

Counterparty credit exposure is monitored against credit limits. All collateral should be capable of being fully enforced by the fund at any time without reference to, or approval from, the counterparty.

Collateral received from a counterparty in any transaction may be used to offset the overall exposure to that counterparty.

To avoid having to handle small collateral amounts, the SICAV may set a minimum collateral amount (amount below which it will not require collateral) or a threshold (incremental amount above which it will not require additional collateral).

DIVERSIFICATION All collateral held by the SICAV must be diversified by country, market and issuer, with exposure to any issuer no greater than 20% of a fund's net assets. If stated in the fund description, a fund could be fully collateralised by different transferable securities and money market instruments issued or guaranteed by a member state, one or more of its local authorities, a third country, or a public international body to which one or more member states belong. In this case, the fund should receive collateral from at least 6 different issues, with no issue exceeding 30% of the fund's assets.

REUSE AND REINVESTMENT OF COLLATERAL In the event cash collateral is reinvested by a fund it will either be placed on deposit or invested in high-quality government bonds, reverse repurchase transactions or short-term money market funds (as defined in the Guidelines on a Common Definition of European Money Market Funds) that calculate a daily net asset value and are rated AAA or equivalent. Such reinvestment will be taken into account for the calculation of each concerned fund's global exposure relating to derivative instruments, in particular if it creates a leverage effect. All investments must meet diversification requirements disclosed above.

If a fund invests collateral from Securities lending in reverse repurchase transactions, the limits that apply to Securities lending will extend to reverse repurchase transactions.

Non-cash collateral will not be sold, reinvested or pledged.

CUSTODY OF COLLATERAL Collateral (as well as other securities that can be held in custody) transferred by title to a fund will be held by the depositary or a sub-custodian. With other types of collateral arrangements, such as a pledge agreement, collateral can be held by a third-party custodian that is subject to prudential supervision and is unrelated to the collateral provider.

VALUATION AND HAIRCUTS All collateral is marked to market (valued daily using available market prices), taking into account any applicable haircut (a discount to the value of collateral intended to protect against any decline in collateral value or liquidity). A fund may demand additional collateral (variation margin) from the counterparty to ensure that the collateral value at least equals the corresponding counterparty exposure.

The haircut rates currently applied by the funds are shown below.

The rates take account of the factors likely to affect volatility and risk of loss (such as credit quality, maturity and liquidity), as well as the results of any stress tests which may be performed from time to time. Haircuts will not be applied to cash collateral. The Management Company may adjust these rates at any time, without advance notice, but incorporating any changes into an updated version of the Partial Prospectus for Switzerland.

The value of collateral received should, during the duration of the contract, be at least equal to 105% of the global valuation of the securities lent in the case of equities and at least 102% of the total value of the securities lent in the case of bonds. Repurchase agreement and reverse repurchase agreements will generally be collateralised, at any time during the lifetime of the agreement, at a minimum of 100% of their notional amount.

	Allowable as collateral	Haircut
OTC Financial Derivative transactions	Cash (USD, EUR, GBP, AUD or JPY)	0%
Securities Lending transactions - Equity	Government bonds issued by G10 sovereigns Cash (USD, EUR or GBP)	5%
Securities Lending transactions - Bond	Government bonds issued by G10 sovereigns Cash (USD, EUR or GBP)	2%
Reverse repurchase transactions	Specified sovereign debt or exposure to certain non-government public - sector entities (in certain currency denominations) as agreed on a fund/counterparty basis	Up to 2.818% (as applicable by regulation and residual maturity)

Money Market Fund Regulation

LEGAL AND REGULATORY FRAMEWORK The money market fund regulation (officially Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds) applies to all money market funds domiciled or offered in the EU. The regulation seeks to make money market funds more resilient and to ensure that they are able to maintain liquidity during stressed market situations and substantial or sudden redemptions.

TYPES OF MONEY MARKET FUNDS The regulation permits funds in the following categories:

Type of fund	Short-term	Standard
Public debt constant NAV	●	–
Low volatility NAV	●	–
Variable NAV	●	●

PORTFOLIO RULES

Since each of the Cash funds qualifies as a Short-Term Variable Net Asset Value Money Market Funds, it shall also comply on an ongoing basis with all of the following requirements:

- its portfolio is to have a WAM of no more than 60 days; and
- its portfolio is to have a WAL of no more than 120 days.
- at least 7,5 % of the total net assets of a Cash Fund are to be comprised of daily maturing assets, reverse repurchase agreements which are able to be terminated by giving prior notice of one working day, or cash which is able to be withdrawn by giving prior notice of one working day.
- at least 15 % of its total net assets of a Cash fund are to be comprised of weekly maturing assets, reverse repurchase agreements which are able to be terminated by giving prior notice of five working days, or cash which is able to be withdrawn by giving prior notice of five working days. For the purpose of such calculation, money market instruments or units or shares of other Money Market Funds may be included within the weekly maturing assets of the relevant Cash fund up to a limit of 7,5 % of its total net assets provided they are able to be redeemed and settled within five working days.

If the limits referred to under this paragraph are exceeded for reasons beyond the control of the relevant Cash fund, or as a result of the exercise of subscription or redemption rights, that fund shall adopt as a priority objective the correction of that situation, taking due account of the interests of the shareholders.

CREDIT AND STRESS TESTING PROCEDURES

Description of the procedure

Consistent with the MMF Regulation and the relevant delegated acts supplementing it, the Management Company will ensure that a customised internal credit quality assessment procedure based on prudent, systematic and continuous assessment methodologies for systematically determining the credit quality of the funds that qualify as money market funds, is established, implemented and consistently applied. The Management Company has approved four separate credit quality assessment procedures (i) sovereign issuers, (ii) government related issuers, (iii) financial corporate issuers and (iv) non-financial corporate issuers.

The oversight of the internal credit quality assessment procedures will lie with the Management Company which will be assisted by the Fixed Income Investment Risk Committee (the "FIIRC"), which is an independent committee responsible for fixed income risk oversight. FIIRC and ultimately the Management Company is responsible for ensuring that data used in the credit quality assessments is of sufficient quality, up-to-date and from reliable sources.

A credit assessment for all issuer and guarantors on the approved list will be produced, in accordance with the regulations at least annually by the assigned analyst. FIIRC is responsible and ultimately the Management Company for ensuring that the annual frequency requirement is met. FIIRC and ultimately the Management Company will be responsible for deciding whether a material change has occurred and analysts will need to prepare a new credit assessment for affected issuers or guarantors.

When determining the credit quality of an issuer and of an instrument, the Management Company will ensure that there is no mechanistic over-reliance on external ratings.

The appropriateness of the credit quality assessment procedures will be assessed annually (or more often if necessary) and changes thereto will be approved by senior management and/or the Management Company. In case there is a material change, within the meaning of the Money Market Fund Regulation that could have an impact on the existing assessment of an instrument, a new credit quality assessment will be performed. In addition, the internal credit quality assessment procedure is monitored on an ongoing basis.

Description of the methodology

A list of eligible issuers (known as "Approved List") is maintained and the money market funds are only allowed to invest into instruments from issuers that are on this list. Each of the issuer on the list is assigned to an analyst in the credit research team.

An effective process has been established by the Management Company to ensure that relevant information on the issuer and instrument's characteristics are obtained and kept up-to-date.

Determination of credit risk of an issuer or guarantor and its instruments will be solely made by the assigned analyst under the responsibility of the Management Company and will be based on an independent analysis of the issuer's or guarantor's ability to repay its debt obligations. This determination follows a systematic four step process designed in accordance with Chapter 3 of the delegated regulation 2018/990 and paragraph 1 of Article 20 of the Regulation. An issuer or guarantor and its instruments must pass each of the four steps. These steps may include the following elements, where applicable:

i. Quantitative factors: issuers must meet or exceed pre-determined thresholds on quantitative metrics such as financial ratios and macro-economic performance (such as but not limited to capitalisation, liquidity, asset quality, profitability, leverage, adjusted EBITDA/interest, liquidity sources, GDP per capita, unemployment rate, world bank government effectiveness score, bank non-performing loan ratio, government interest expense to government revenues.
ii. External and market based factors: issuers must pass thresholds relating to bond or CDS spreads of relevant instruments as well as having an external credit rating of at least A3 or A- with Moody's and/or Standard & Poors.
iii. Qualitative factors: assigned analyst considers qualitative factors (such as but not limited to governance, business model, risk profile, macro backdrop, diversification, government stability, government plans, currency strength), that deem to be necessary for a comprehensive and prudent credit quality assessment of the issuer or guarantor.
iv. Instrument specific factors: assigned analyst considers instrument specific factors (such as but not limited to whether

the instrument is a direct and unconditional payment obligation, the degree of flexibility over the timing of interest and principal payments, the payment rank of the instrument, and its liquidity profile), that deem to be necessary for instrument to be considered of high credit quality and liquidity.

For government related issuers and guarantors a different approach is used. The main driver of the credit quality for government related issuers or guarantor is the strength of the link between the government related issuer or guarantor and the sovereign. Therefore, the assessment focus on the strength of this link (such as ownership, explicit or implicit guarantees, barriers to support, client relationships, exposure to common risks, economic importance, classification by rating agencies, etc.) and a favourable assessment is given if the probability or default of the government related issuer deems to be closely linked to the sovereign.

Only if an issuer or guarantor and its instruments passes all stages of the procedure it will receive a favourable assessment and will be on the approved counterparty list.

A credit assessment for all issuers or guarantors on the approved counterparty risk will be conducted at least annually and made available to the senior management and/or the Management Company at least annually.

Data used in the credit quality assessment are all from reliable sources, including (but not exhaustively) from Bloomberg, credit rating agencies, Haver Analytics, the international monetary fund (the "IMF"), and directly from official company reports. Furthermore, the methodologies used are validated with a comprehensive back-test using Moody's default data to ensure the criteria used to assess credit quality remain robust.

PROHIBITION ON EXTERNAL SUPPORT No fund that is an MMF receives any direct or indirect support from a third party, including the sponsor of the MMF. This extends to cash injections, the purchase of portfolio assets at an inflated price, the issuing of a guarantee, or any other action whose intention or effect would be to guarantee the liquidity of the MMF or the stability of its NAV.

OTHER REQUIREMENTS Other requirements of the money market fund regulation are described in the section "General Investment Powers and Restrictions".

Investing in the Funds

Share Classes

Within each fund, the SICAV can create and issue share classes. All share classes within a fund invest commonly in the same portfolio of securities and confer the same rights of ownership and exposure to investment results, but some share classes may have different fees, investor eligibility requirements and other characteristics, to accommodate the needs of different investors. Investors will be asked to document their eligibility to invest in a given share class, such as proof of institutional investor or non-US person status, before making an initial investment.

Each share class is identified first by one of the base share class labels (described in the table below) and then by any applicable supplemental labels (described in the following table). For example, "A CDIST(G) GBP" would indicate Class A shares that intend to make an annual distribution from gross income and capital and are denominated in UK pounds sterling.

The maximum fees and minimum investment amounts for all classes are shown in the table below. Maximum fees for specific share classes of each fund are shown in the information for each fund.

Not all share classes may be available in a given jurisdiction. For a current and complete list of share classes available in your jurisdiction, go to **fidelityinternational.com** or your Distributor or intermediary.

Share class characteristics See notes below table

			Min. Investment (USD)[1]		Max. Dealing Fees			Max. Annual Fees		
Class	**Available to**	**Asset Class**	**Initial**	**Subsequent**	**Entry**	**CDSC**	**Exit**	**Manage-ment**	**Distri-bution[6]**	**Adminis-tration**
A	All investors[2,4]	Asset Allocation	6,000	1,500	5.25%	–	–	1.50%	–	0.35%
		Bond	2,500	1,000	3.5%	–	–	1.50%	–	0.35%
		Cash	2,500	1,000	–	–	–	1.50%	–	0.35%
		Reserved	500,000	100,000	–	–	–	1.50%	–	0.35%
		Systematic Multi Asset	6,000	1,500	5.25%	–	–	1.50%	–	0.35%
		Absolute Return, Multi Asset, Target Date	2,500	1,000	5.25%	–	–	1.80%	–	0.35%
		Other funds	2,500	1,000	5.25%	–	–	1.80%	–	0.35%
B[5]	All investors	All	2,500	1,000	–	3%	–	1.80%	1.00%	0.35%
C	All investors	All	2,500	1,000	–	–	–	1.50%	1.00%	0.35%
D	Institutions in certain countries Investors permitted by the Board, the management company, or their respective delegates	Equity	2,500	1,000	4%	–	–	1.50%	0.50%	0.35%
		Multi Asset	2,500	1,000	4%	–	–	1.50%	0.50%	0.35%
		Bond	2,500	1,000	3%	–	–	1.50%	0.50%	0.35%
		Cash	2,500	1,000	–	–	–	1.50%	–	0.35%
		Target Date	2,500	1,000	–	–	–	1.50%	0.00%	0.35%
E	All investors	All	2,500	1,000	–	–	–	1.80%	0.75%	0.35%
I[7]	Institutional investors that meet the requirements set by the general distributor	Other funds	10 million	100,000	–	–	–	0.80%	–	0.05%

NOTES

[1] **Min. Investment (USD)** Or equivalent in any other freely convertible currency.

[2] **Exception:** Retail share classes of Fidelity Funds – Global Hybrids Bond Fund have a minimum investment amount of USD 10,000.

[4] **Exception**: Class Fidelity Rentenanlage Klassik A-Euro (hedged) of Fidelity Funds - Strategic Bond Fund has an initial charge of up to 2.50% of the Net Asset Value per Share.

[5] **a contingent deferred sales charge** is levied on B shares set at a maximum 3% if redeemed within the first year of purchase, 2% if redeemed within the second year, 1% if redeemed within the third year. Within the maximum CDSC values referred to above, different Class B Shares denominated as B1, B2, B# etc. may be issued for distribution in different countries or through different channels. Details of such Class B Shares may be found at https://www.fidelity.lu/funds/legal-documents. The annual management fee of Class B Shares of a fund is the same as that of Class A of the same fund. See section 2.2.1 "How to Buy Shares" for further details.

[6] This fee is accrued daily and payable monthly to the General Distributor.

[7] The Board may, in its absolute discretion, delay the acceptance of any subscription/purchase for class I Shares until such date as it has received sufficient evidence of the qualification of the investor as an Institutional Investor. If it appears at any time that a holder of class I Shares is not an Institutional Investor, the Board will switch such Shares into class A Shares in the relevant fund (or in another fund with a similar investment policy if the relevant fund does not issue class A Shares) and notify the relevant shareholder of such switch.

[8] Class SE Shares will be closed for new investors when the total net assets of the relevant fund reach USD 300 million or at the nearest possible time above USD 300 million to the discretion of the Management Company.

[9] Except as otherwise designated class SR shares are distributing classes.

[10] A management fee, is levied and collected by the Management Company or a Connected Person directly from clients of Fidelity International who enter into specific agreement with the Management Company or a Connected Person. No management fee is payable in respect of Class X Shares out of the net assets of the relevant fund. Class X Shares will bear their pro-rata share of the fees payable to the depositary as well as of other charges and expenses as further described in "Fund fees and costs".

[11] **Exception:** Class Y Shares of Fidelity Funds – Global Hybrids Bond Fund have a minimum investment amount of USD 10,000.

[12] An entry fee of up to 5.25% will apply after a period of three years following the day immediately after the expiry of the initial subscription period of Global Innovators Fund.

[13] For Global Innovators Fund a contingent deferred sales charge is levied on T shares set at a maximum 2.25% if redeemed within the first year of purchase, 1.5% if redeemed within the second year, 0.75% if redeemed within the third year, and 0% thereafter.

[14] Class T Shares are subject to an annual distribution fee of up to 0.75% of the Net Asset Value. For Global Innovators Fund this fee will only apply during the first three years after the expiry of the initial subscription period.

Supplemental labels

Suffixes are added after the base share class designation to indicate certain characteristics and may be used in combination with each other. For more about ACC and DIST shares, see "Distribution Policy" below.

ACC Indicates that the shares accumulate all interest and other income earned.

DIST Indicates that the shares are distributing shares. The Board expects to recommend distribution of substantially all of the net income (or gross income where the suffix G is used) of the share class. The Board may also determine to what extent distribution will be made from capital, when applicable. For distributions out of capital, investors should refer to the Risk Factors section "Distribution out of capital risk".

Type of distribution

- **C** distributions may include both substantially all of the net income and to some extent capital, with the expectation of achieving a higher distribution rate than an INCOME class. Such distributions are not fixed and are reviewed periodically by the Board according to economic and other circumstances.
- **G, (G)** gross income.
- **H** suffix used in respect of distributing hedged shares. Such distributions may include a premium when the interest rate of the hedged currency is higher than the fund's reference currency interest rate. Consequently, when the interest rate of the hedged currency is lower than the fund's reference currency interest rate, the dividend may be discounted.
- **INCOME** The Board expects to recommend distribution of substantially all of the net income of the share class and, to the extent the Board considers appropriate, of the capital, in order to maintain, so far as reasonable, a stable dividend. Such distributions are not fixed and are reviewed periodically by the Board according to economic and other circumstances and the ability of the funds to support the distribution having regard to capital over the long-term.

(hedged) These shares seek to cancel out most of the effect of exchange rate fluctuations between the share class currency and either the currency(ies) represented in an index or the currency(ies) to which a major portion of the portfolio's holdings are exposed (in some cases, this is limited by the number of freely exchangeable currencies involved).

([currency 1/currency 2]) hedged) These shares seek to cancel out most of the effect of exchange rate fluctuations between the share class currency and the base currency of the fund. These shares may have a higher level of leverage than shares without this type of hedging.

For more on currency hedging, see "How the Funds Use Instruments and Techniques".

If neither of the above suffixes appear, the shares are not currency hedged in any way and the investor is exposed to any fluctuations in exchange rates between the share class currency, fund base currency, and portfolio currencies.

PF Indicates that the shares are subject to a performance fee.

Frequency of distribution

- **M** monthly, dividends are declared on the first business day of each month
- **Q** quarterly, dividends are declared on the first business day of February, May, August, and November

If the suffixes M or Q are not used, the dividends are declared annually, normally on the first business day of August.

Dividend payment exceptions for certain share classes

- Semi-annually, on the first business day of February and August: Asia Pacific Dividend A-USD, European Dividend A-Euro, US Dollar Bond A-USD, Emerging Market Total Return Debt R-GDIST-GBP (GBP/USD hedged), Emerging Market Total Return Debt W-GDIST-GBP (GBP/USD hedged), Global Multi Asset Defensive Fund I – CDIST(G)-EUR.
- Quarterly, on the first business day of February, May, August, and November: Global Defensive Equity I-USD, Global Defensive Equity W-GBP, Asian High Yield A-RMB (hedged), Euro Ultra Short Duration Bond A-GBP, Euro Ultra Short Duration Bond Y-GBP, Euro Ultra Short Duration Bond Y-EUR, Euro Ultra Short Duration Bond Y-USD (USD/EUR hedged).

See "Distribution policy" below.

CURRENCY CODES Each share class that is not denominated in the fund's base currency carries a 3-letter code for the currency in which it is denominated. If no such code appears, the share class currency is the same as the fund base currency.

REST Indicates that a share class is restricted to certain investors.

Dividends

ACCUMULATION SHARES These shares retain income in the fund.

DISTRIBUTING SHARES These shares make periodic distributions to shareholders.

Dividends (if any) are normally paid within 5 business days of declaration or as soon as practicable thereafter.

Dividends paid may include capital, which will be attributable to the relevant class of Shares and will reduce capital appreciation for the holders of such Shares. To the extent that net income attributable to these Shares exceeds the amount declared payable, the excess amount will be reflected in the respective Net Asset Value of such Shares. Alternatively, the amount of dividend may exceed the aggregate amount of net investment income and net capital gain. Accordingly, the level of dividend does not necessarily indicate the total return of the fund. In order to assess the total return of the fund, both the Net Asset Value movement (including dividend) and the dividend distribution should be considered. Where share classes seek to maintain stable dividends, the funds are managed in line with the stated investment objectives and are not managed to maintain a stable payment per Share on any particular Share class. The Board may also determine if and to what extent dividends may include distributions from realized and unrealized capital gains as well as from capital.

In the event of distribution of gross investment income, charges will be deducted from the assets of the relevant class of shares. This will enhance income returns but may constrain capital growth.

Where the payment of the dividend amount per class of shares accrued between the launch date and the first scheduled distribution date would not be economically efficient, the Board may defer this payment to the next distribution date.

Dividends are paid only on shares that were owned as of the declaration date.

Options for receiving distributions Investors have two options:

- Automatic reinvestment in the same class of shares, with no entry fee, at the NAV for the dividend declaration date (or if not a Valuation Day, for the next day that is). Shares are calculated to two decimal places, with any remainder added to the next distribution.
- Upon your request, by electronic transfer to your bank account on file, in the Principal Dealing Currency of the relevant share class net of bank charges. Note that any dividend payments of less than USD 50 (or equivalent in another currency) will be reinvested in further shares unless this is prohibited by applicable local regulations, or otherwise decided by the Board.

No interest is paid on unclaimed dividend payments, and after 5 years unclaimed dividends will be forfeited and returned to

the fund. No fund will make a dividend payment if the assets of the SICAV are below the minimum capital requirement, or if paying the dividend would cause that situation to occur.

INCOME EQUALISATION For both accumulation and distribution shares, each fund applies equalisation to help ensure that income allocations per share are not affected by changes in the number of shares in issue. It is expected that the equalisation amount will not be taxable as an income receipt of the shareholder but should be applied to reduce the base acquisition cost of the Shares for the purpose of computing capital gains. The tax treatment of equalisation amounts may, however, differ in certain jurisdictions. Further information on the equalisation amount received as a part of a distribution, may be obtained by contacting the Distributor or the Management Company.

Issuance and ownership

FORMS IN WHICH SHARES ARE ISSUED We issue shares in registered form. With these shares, the owner's name is recorded in the SICAV's register of shareholders and the owner receives a confirmation of subscription. Ownership can only be transferred by notifying the transfer agent of a change of ownership. Forms for this purpose are available by contacting your distributor or the management company.

Documentation of ownership of shares is available on request and will be sent out approximately 4 weeks after we receive a request and all applicable monies and shareholder documentation have been received. We do not issue bearer shares or share certificates.

INVESTING THROUGH A NOMINEE VS. DIRECTLY WITH THE SICAV If you invest through an entity that holds your shares under its own name (a nominee account), that entity is recorded as the owner in the SICAV's register of shareholders and, so far as the SICAV is concerned, is entitled to all rights of ownership, including voting rights. If you invest in a fund through a nominee account, your rights to indemnification in the event of error or non-compliance with the investment rules applicable to a fund may be impacted and only exercisable indirectly. Unless otherwise provided by local law, any investor holding shares in a nominee account with a distribution agent has the right to claim, at any time, direct title to shares subscribed through the nominee. The nominee maintains its own records and provides each investor it serves with information as to the holdings and transactions in fund shares associated with that investor.

Other policies

Shares are issued to one one-hundredth of a share (2 decimal places). Fractional shares receive their pro rata portion of any dividends, reinvestments and liquidation proceeds, but do not carry voting rights.

Shares carry no preferential or preemptive rights. No fund is required to give existing shareholders any special rights or terms for subscribing for new shares. All shares must be fully paid up.

Fund Fees and Costs

Except for entry, exit and exchange fees, the fees and expenses described below are deducted from fund assets. Fee rates are presented in "Fund Descriptions" or in the tables in "Share Classes" above.

Management fee

This fee is accrued daily and paid each month in arrears, normally in USD.

The management fee may be increased in respect of any one or more funds or share classes from time to time, provided the fees do not exceed an annual rate of 2.00% of the net asset value of the fund. Any increase above 2.00% is subject to not less than three months' notice being given to shareholders in the same manner as notices of meetings. The Management fee may be waived in whole or part in respect of any fund or Share Class. The management fee may be used to remunerate the Management Company, the Investment Manager, Connected Persons, intermediaries, and any other entity to which has been sub-delegated investment management activities for services performed by them for the SICAV.

Depositary and Administration fees

The SICAV pays a fee to the depositary. The depositary fee will typically range from 0.003% and 0.35% of the SICAV's net assets (varying depending on the markets in which the SICAV is invested) excluding transaction charges and reasonable disbursements and out-of-pocket expenses.

The SICAV has appointed FIL Investment Management (Luxembourg) S.à r.l. as the Management Company of the SICAV, under a Management Company Services Agreement dated 1 June 2012. The Management Company and the SICAV have appointed FIL Limited, under a services agreement dated 1 June 2012, to provide services in relation to the investments of the funds including valuation, statistical, technical, reporting and other assistance. The Management Company and/or FIL Limited has outsourced certain administration services to other Fidelity group entities.

The SICAV pays an administration fee for the services noted in the Management Company Services Agreement and the Services Agreement at commercial rates agreed from time to time between the parties plus reasonable out-of-pocket expenses. The maximum administration fee paid for these services by the SICAV will be 0.35% of the net assets (excluding reasonable out-of-pocket expenses).

Entry and exit fees

These fees are described either in "Fund Descriptions" or in the tables above and are paid to the general distributor for sales activities and ongoing client service and as a source of funds for the general distributor to cover the sales and client service fees of other distributors, including financial intermediaries or institutions. The initial sales charge may be shared by the general distributor with distributors, Intermediaries and other agents.

Switch fee

This fee is described on page 185 and is paid to the general distributor, who may decide to remit it to the fund(s) in question to cancel or reduce any effects of exchanges on the remaining shareholders.

Distribution fee

The Management Company has appointed the general distributor to assist in the promotion of the SICAV. A Distribution fee on certain Shares Classes, is paid to the general distributor at the rate indicated in the "Main Share Class" section for each fund, for providing distribution-related services to the SICAV and shareholders. This fee is accrued daily and paid monthly to the general distributor.

The general distributor passes on some or all of the distribution fee to distributors, intermediaries and other agents as commission for their services.

Performance fee

The performance fee calculation methodology is described below; any market index (benchmark) or hurdle rate information is described in "Fund Descriptions".

Performance fees are set by the Board and are calculated for each applicable share class and fund. Because of different cost structures and other reasons, fee amounts will often vary from class to class. The Investment Manager may at its discretion waive any or all its fees in respect of any fund.

During periods of market volatility, there may be times when performance fee accruals cause a NAV to rise even though portfolio asset values fell, and vice versa.

Shares purchased when a NAV is less than its adjusted high water mark will not accrue any performance fee on any NAV increases up to the adjusted high water mark.

PERFORMANCE FEE TERMS

Accrual The accrual of daily performance fee adjustments (positive or negative) throughout the financial year. Any fee accrual that exists on the last valuation day of the financial year is paid to the management company.

Crystallisation The point at which accrual ceases and any accrued performance fee becomes payable (and non-refundable). Crystallisation occurs:

- on the last valuation day of the financial year (provided that a Share Class has been in existence for the whole of the financial year or if a Share Class is launched during the financial year, the crystallisation will occur on the last valuation day of the Share's first full financial year)
- upon any liquidation or merger of an affected fund or Share Class (subject to the best interest of investors of both the merging and the receiving fund or Share Class)
- upon orders for switching out or redemption (applied to those shares only)

High water mark A mechanism designed to ensure that shareholders are not charged a performance fee until any previous losses are recovered. There is no mechanism to lower the high water mark. The adjustment of the high water mark may not be below the initial value. This model is used for funds with cash benchmarks identified as such in Fund Descriptions.

Hurdle rate A mechanism designed to ensure that a performance fee will only be paid when shares outperform their benchmark. If the share has been launched part way through the financial year, the hurdle rate will be calculated in proportion to the length of the period.

Performance period The period over which a performance fee accrues). This is normally the same as the SICAV's financial year, but in certain circumstances may begin at another time (such as when a new fund or share class is launched) or end at another time (such as when a fund or share class is liquidated).

PERFORMANCE FEE CALCULATION

Using the formula described below, we calculate performance fee accruals for each applicable share class each day that is a valuation day for that fund. No share class's performance fee can exceed 10% of its daily average NAV over the SICAV's financial year. The number of days in the year is 366 for leap years, 365 for all other years. Note that because the high water mark is measured against the fund's NAV (per share) on one particular day in the past, it may not capture the highest level that the NAV has ever reached.

assets of the share class
\+ any dividends paid since last performance fee payment (or launch)
\+ any accrued performance fee (not yet paid)
\- any swing pricing adjustment
÷ number of shares

= adjusted NAV

cumulative market index return for valuation day
x cumulative market index rate for business day)^n where n = number of calendar days since previous business day
÷ number of calendar days in the year

= cumulative market index return

adjusted NAV as at last performance fee payment (or launch)
\+ cumulative market index return

= high water mark adjustment

adjustment > 0: high water mark is increased by adjustment amount
adjustment < 0: high water mark remains unchanged

hurdle rate
x number of calendar days since the last performance fee payment (or launch)
÷ number of calendar days in the year

= cumulative hurdle rate (rounded to 6 decimal places)

hurdle rate
x number of calendar days since previous business day
÷ number of calendar days in the year

= daily hurdle rate (rounded to 6 decimal places)

Performance fee accrues when
adjusted NAV >
adjusted high water mark
+ cumulative hurdle rate

Performance fee amount is:
performance fee rate
x (daily rate of return - daily market index rate of return
\- daily hurdle rate) x adjusted NAV of the previous valuation day
taking account of net subscriptions and redemptions in respect of the adjusted NAV

PERFORMANCE FEE EXAMPLES

The below examples illustrate hypothetical crystallisation scenarios, assuming a calculation period of a financial year.

Scenario	Cumulative share class performance	Cumulative Index performance	Cumulative share class excess return over Index	Performance Fee crystallisation	Performance Fee
1.	+10%	+5%	+5%	Yes	0.75%
2.	+2%	+5%	-3%	No	0%
3.	-2%	-5%	+3%	No	0%
4.	-10%	-5%	-5%	No	0%

Charges and Expenses The following costs and expenses may be charged to the SICAV, any of which may be permanently or temporarily waived or borne by the Investment Manager.

- fees of the Management Company, remuneration of any employees or officers of the SICAV, the Investment Manager, any paying agent, the Hong Kong representative and of representatives in other jurisdictions where the Shares are qualified for sale, and of all other agents employed on behalf of the SICAV; such remuneration may be based on the net assets of the SICAV or on a transaction basis or may be a fixed sum;
- Fund formation expenses;
- the cost of preparing, printing and publishing in such languages as are necessary, and distributing offering information or documents concerning the SICAV, annual and semi-annual reports and such other reports or documents as may be desirable or required under laws or regulations applicable to the SICAV or the offering of Shares;
- the cost of printing certificates and proxies;
- the cost of preparing and filing the Articles of Incorporation and all other documents concerning the SICAV, including registration statements and offering circulars with all authorities (including local securities dealers' associations) having jurisdiction over the SICAV or the offering of Shares;
- the cost of qualifying the SICAV or the sale of Shares in any jurisdiction or of a listing on any exchange;
- the cost of accounting and bookkeeping;
- the cost of calculating the Net Asset Value of Shares of each fund;
- the cost of preparing, printing, publishing and distributing or sending public notices and other communications (including electronic or conventional contract notes) to the shareholders;
- legal and auditing fees;
- registrar's fees;
- all other charges and expense similar to the above;
- costs associated with the required collection, reporting and publication of data about the SICAV, its investments and shareholders;
- costs of publishing fund performance data;
- financial index licensing fees;
- fees for operating hedged share classes;
- duties, taxes and transaction costs associated with buying and selling fund assets;
- brokerage fees and commissions;
- custody, depositary and safekeeping charges;
- valuation, statistical, technical, reporting and other assistance under a services agreement with FIL Limited upon commercial rates agreed from time to time that will not exceed 0.35% of a fund's net assets, plus reasonable out-of-pocket expenses;
- transaction charges, reasonable disbursements and out-of-pocket expenses of the depositary;
- costs of any sub-custodians;
- interest on borrowing and bank charges incurred in negotiating borrowing;
- fees of non-affiliated Board members and incidental expenses of all Board members;
- litigation or tax reclaim expenses;
- any extraordinary expenses or other unforeseen charges.

Administrative and other expenses of a regular or recurring nature may be calculated on an estimated basis for yearly or other periods in advance, and the same may be accrued in equal proportions over any such period.

Costs, charges and expenses which may be attributed to a fund will be borne by that fund, otherwise they will be allocated in US Dollars pro rata to the Net Asset Value of all, or all appropriate, funds on such basis as the Board considers reasonable.

In so far as a fund invests in other UCITS or UCIs which are administered directly or by delegation by the Management Company or another company to which the Management Company is linked by common management or control or by a substantial direct or indirect holding or which is managed by a company in the FIL Group, the fund shall not be charged a subscription fee or a redemption fee.

The Management Company and/or FIL Limited has outsourced certain administration services to other Fidelity group entities.

A portion of commissions paid to selected brokers for certain portfolio transactions may, where permitted by regulation, be repaid to the funds which generated the commissions with these brokers and may be used to offset expenses.

Except as described in the Partial Prospectus for Switzerland, no commissions, discounts, brokerage or other special terms have been granted by the SICAV or the Management Company in relation to Shares issued or to be issued by the SICAV; on any issue or sale of Shares a Distributor (including the General Distributor) may, out of its own pocket or out of the initial charges, if any, pay commissions or other fees and charges on applications received through brokers and other professional agents or grant discounts.

Foreign exchange transactions for investors or the SICAV may be effected on an arm's length basis by or through FIL Group companies from which a benefit may be derived by such companies. Further details on the Foreign Exchange Service can be found at **www.fidelityinternational.com/foreignexchangeservice**.

All expenses that are paid from shareholder assets are reflected in NAV calculations, and the actual amounts paid are documented in the SICAV's annual reports.

Recurring expenses will be charged first against current income, then against realised capital gains, and lastly against capital.

Each fund and class pays all costs it incurs directly and also pays its pro rata share (based on net asset value) of costs not attributable to a specific fund or class. For each share class whose currency is different from the base currency of the fund, all costs associated with maintaining the separate share class currency (such as currency hedging and foreign exchange costs) will be charged solely to that share class to the extent practicable.

Expenses are calculated each business day for each fund and class and paid monthly in arrears.

Buying, Exchanging and Selling Shares

Information that applies to all transactions except transfers

OPTIONS FOR SUBMITTING INVESTMENT REQUESTS

- By contacting your financial advisor, intermediary or distributor
- Via a pre-established electronic platform
- By fax or mail to the Management Company: FIL Investment Management (Luxembourg) S.à r.l. Skypark Business Center, 1, Avenue de l'Aéroport, L-1110 Senningerberg, Luxembourg[2]

PLACING ORDERS You can submit orders to buy, switch or sell (redeem) shares at any time, by approved electronic means, or by fax or letter to the Management Company, Distributor, intermediary or transfer agent.

When placing an order, you must include all necessary identifying information, including the account number, and instructions as to the fund, share class, reference currency, and size and type of transaction (buying, switching, or selling).

[2] Until 12 October 2026: 2a Rue Albert Borschette, BP 2174, L-1246 Luxembourg.

Normally, the Management Company and/or the relevant Distributor do not accept from, or make payments to, persons other than the registered shareholder or any of the joint shareholders.

In case of joint holding, and unless specifically stated in writing at the time of application, any one of the registered joint shareholders is authorised to sign any documents or to give instructions in connection with that holding on behalf of the other joint shareholders. Such authorisation shall remain in force unless notice of its termination is received under separate cover by the Distributor.

No request will be accepted or processed in any way that is inconsistent with this Partial Prospectus for Switzerland.

CUT-OFF TIMES AND PROCESSING SCHEDULE Any application to buy, switch or sell shares must be received before the cut-off time shown for each fund in "Fund Descriptions"

Orders that arrive after the cut-off time will only be accepted as of the next cut-off time.

Note that the NAV at which any request is processed cannot be known at the time a request is placed.

A confirmation notice will be issued as follows:

- for purchases, usually within 24 hours of the shares being allocated
- for switches and sales, at the time the applicable NAV is calculated

See "Fund Descriptions" for settlement schedules.

Other dealing cut-off times may be agreed with local Distributors and/or sub-transfer agent(s).

PRICING Shares are priced at the NAV for the relevant share class. All requests to buy, exchange or sell shares are processed at that price, adjusted for any charges. Each NAV is calculated in the fund's base currency, then converted, at current market rates, into any currencies of share class denomination. Except for initial offering periods, during which the price is the initial offer price, the share price for a transaction will be the NAV calculated for the day on which the transaction request is processed.

CURRENCIES You may place orders in any of the major freely convertible currencies as well as the principal dealing currency of the funds or share classes. Distributors may publish details of other acceptable currencies. Foreign exchange transactions required to handle client purchases/redemptions may be aggregated and will be carried out on an arm's length basis through certain FIL Group companies from which a benefit may be derived by such companies. Settlement must be made in the currency in which the order was placed. Further details on the Foreign Exchange Service can be found at **www.fidelityinternational.com/foreignexchangeservice**.

Investors subscribing for Shares direct through the Management Company may only settle in one of the Principal Dealing Currencies of the applicable fund or class.

In case of compulsory redemption of Shares by the SICAV, subject to the conditions set out in the Articles of Incorporation, the relevant investment will be automatically redeemed in the Principal Dealing Currency (unless otherwise specifically decided by the Board or instructed by the relevant shareholder) free from any redemption charge at the Net Asset Value per Share calculated, and the proceeds will be returned to the relevant shareholder's bank account.

IN KIND SUBSCRIPTION OR REDEMPTION The purchase price, excluding any sales commission, may be paid by contributing to the relevant fund securities consistent with the investment policy and investment restrictions of the relevant fund. This is subject to approval of the Board and all applicable laws and regulations, notably with respect to the issuance of a special report from the approved statutory auditor of the SICAV, if applicable, which may also be specifically requested by the Board.

The specific costs for such purchase in kind, in particular the costs of the special report, as applicable, will normally be borne by the purchaser, or a third party.

The SICAV and/or the Management Company shall have the right, if the Board and/or the Management Company so determines, to satisfy payment of the redemption price to any shareholder requesting redemption of any of their Shares in kind (but subject to the consent of the shareholder in the case of Shares valued at less than USD 100,000) by allocating to the holder investments from the pool of assets set up in connection with such class or classes of Shares equal in value (calculated in the manner described in Article 22 of the Articles of Incorporation) as of the Valuation Date on which the redemption price is calculated to the value of the Shares to be redeemed. The nature and type of assets to be transferred in such case shall be determined on a fair and reasonable basis and without prejudicing the interests of the other holders of Shares of the relevant class or classes of Shares and the valuation used shall be confirmed by a special report of the auditor to the extent required by law or regulation or by the Board. The costs of any such transfers shall normally be borne by the transferee.

LATE OR MISSING PAYMENTS TO SHAREHOLDERS The payment of a dividend or sale proceeds to any shareholder may be delayed for reasons of fund liquidity, and may be delayed, reduced, or withheld if required by foreign exchange rules, other rules imposed by the shareholder's home jurisdiction, or for other external reasons. In such cases we cannot accept responsibility, nor do we pay interest on amounts withheld.

INVESTING THROUGH REGULAR INVESTMENT PLANS If you are investing through a regular investment plan offered by a distributor, platform or other intermediary who we have approved, you must follow the general terms and conditions set by the plan in addition to all applicable terms and conditions in this Partial Prospectus for Switzerland. Your investment plan provider is required to provide you with their terms and conditions.

CHANGES TO ACCOUNT INFORMATION You must promptly inform us of any changes in personal or bank information, particularly any information that might affect eligibility for any share class. We will require adequate proof of authenticity for any request to change the bank account associated with your fund investment.

Buying shares

Also see "Information that Applies to All Transactions Except Transfers" above.

For optimal processing of investments, send money via bank transfer (net of any bank charges) in the currency denomination of the shares you want to buy. To make purchases in another currency, contact your Distributor or intermediary in advance.

Investors buying Shares for the first time must complete an application form. The instructions for subsequent purchases should contain full details of registration, the name of the fund(s), class(es) of Shares, settlement currency(ies) and the value of Shares to be bought. Purchase instructions will normally only be settled on banker's notification of receipt of all necessary documentation as well as cleared monies.

The Management Company or Distributors may delay the processing of the applications until receipt of all the documents it may request to comply with the applicable laws and regulations.

If we do not receive full payment for your shares within the time indicated for settlement, we will cancel your transaction and return the payment to you, less any costs incurred in seeking to process your request.

The Management Company and Distributors reserve the right to reject any request to buy shares, whether for initial or additional investment, for any reason.

Note that some intermediaries may have their own account opening and payment requirements.

On certain share classes an initial sales charge is levied. Details of such charges are shown in the Fund Descriptions.

CONTINGENT DEFERRED SALES CHARGE On certain share classes there may be a Contingent Deferred Sales Charge ('CDSC') levied on Shares that are redeemed within a certain amount of time after purchase The following table shows how the rate is calculated for each Share Class that levies this charge.

Share Class	CDSC
Class B	Maximum 3% if redeemed within the first year of purchase, 2% if redeemed within the second year, 1% if redeemed within the third year.
Class T	Maximum 3% if redeemed within the first year of purchase, 2% if redeemed within the second year, 1% if redeemed within the third year and 0% thereafter.

Shareholders should note that for the purpose of determining the number of years Shares have been held:

- the anniversary of the date of subscription or the day immediately following the expiry of any initial subscription period, whichever is the later, shall be used
- the Shares held the longest period are redeemed first
- the Shares which a shareholder receives upon conversion carry the holding period which corresponds to the holding period of the Shares which were converted.
- when a shareholder switches Shares which have been subscribed at different times to Shares of another fund, the Registrar and Transfer Agent will convert the Shares held for the longest period.

Shares acquired by reinvestment of distributions will be exempt from the deferred sales charge in the same manner as the deferred sales charge will also be waived on redemption of Class B or Class T arising out of death or disability of a shareholder or all shareholders (in the case of a joint Shareholding).

The amount of any deferred sales charge is based on the current market value and the purchase price of the Shares being redeemed (or in the case of Class T, the value at the end of the initial subscription period), whichever is lower. For example, when a Share that has appreciated in value is redeemed during the deferred sales charge period, a deferred sales charge is assessed only on its initial purchase price.

In determining whether a deferred sales charge is payable on any redemption, the fund will first redeem Shares not subject to any deferred sales charge and then Shares held longest during the deferred sales charge period. Any deferred sales charge due will be retained by the General Distributor which is entitled to such deferred sales charge.

Switching shares

Also see "Information that Applies to All Transactions Except Transfers" above.

You may switch between funds, share classes, or both, within the SICAV in the following circumstances:

- from Class A to any other fund share class for which the exchange meets the minimum investment requirements of the new fund or class
- for classes B, C, D, E, I, J, P, W, X, or Y from any fund to any other fund, within the same share class.
- for classes R, RA, RY, and SE, a switch may only occur in certain circumstances and at the discretion of the management company
- with the approval of the Board or its delegate, subject to meeting the eligibility requirements of the Partial Prospectus for Switzerland and equal treatment of any shareholders requesting a switch from the same class on the same Valuation Day
- as may otherwise be permitted by the Management Company on a case-by-case basis

All switches are subject to the following conditions:

- you must meet all minimum investment requirements (initial or subsequent, as the case may be) for the share class into which you are switching
- you can only switch into a share class that is offered in your jurisdiction as at the date of the switch
- if you paid no entry fee on the shares being switched, we may charge you up to the full entry fee for the shares into which you are switching; if you did pay a sales charge, we may charge a switch fee of up to 1%.
- Switching fees will be applied to all switches (where applicable) between funds and between classes of Shares within a fund. No switching charges apply to switches into or between funds in the Reserved Funds range.
- we will switch without a currency conversion if possible; otherwise, any necessary currency conversion will be processed on the day the exchange occurs, at that day's applicable rate. The number of Shares will be rounded up or down to the nearest one-hundredth of a Share.
- any exchange that does not leave in the original account that account's minimum holding will be treated as order to close the account
- A switch from a CDSC share class may only be made to the same CDSC share class of another fund, and in the case of the Class T shares, provided that such switch occurs after the end of the respective CDSC period of each fund. Holdings in Class B Shares will automatically convert without any fee into Class A Shares following expiry of the deferred sales charge period applicable to the relevant Shares at the next available monthly cycle.

AMOUNTS TO BE SWITCHED The minimum value of a shareholding in any one fund must amount to the minimum initial investment. Shareholders must therefore switch the appropriate minimum initial investment or, where investing in a fund where they have an existing shareholding, the appropriate minimum subsequent investment. When switching a partial holding, the minimum value of the remaining holding should equate to the minimum initial investment.

PRICE Switching instructions received on a day that the Distributors or the Management Company are open for business before the appropriate dealing cut-off times on a Valuation Day, are dealt with at the Net Asset Value calculated that day for each of the relevant funds. Switching instructions received before the relevant dealing cut-off times on a day which is not a Valuation Day for one or both funds will be executed on the next Valuation Day for that fund. If a shareholder switches from a fund with a 4.00pm Central European Time (3.00 pm UK time) dealing cut-off point into a fund with an earlier cut-off point of 1.00pm Central European Time (12.00 noon UK time), the Buy side of the switch may be dealt with at the Net Asset Value calculated on their respective next following Valuation Day.

Because a switch is considered two separate transactions (a simultaneous redemption and subscription) it may create tax or other implications. The purchase and sale components of an exchange are subject to all terms of each respective transaction.

Selling shares

Also see "Information that Applies to All Transactions Except Transfers" above.

Note that any redemption proceeds will only be paid out once all investor documentation has been received, including any requested in the past that was not adequately provided.

We pay redemption proceeds only to the shareholder(s) identified in the SICAV's register of shareholders, by wire to the bank account details we have on file for the account. If any required information is missing, your request will be held until it arrives and can be properly verified. All payments to you are made at your expense and risk.

Transferring shares

As an alternative to selling, you may transfer ownership of your shares to another investor. Note, however, that all of the ownership eligibility requirements for your shares apply to the new owner (for example, institutional shares cannot be transferred to non-institutional investors) and if a transfer to an ineligible owner occurs, the Management Company will either void the transfer, require a new transfer to an eligible owner, or forcibly redeem the shares.

How We Calculate NAV

Timing and formula

The NAV of each fund and share class is calculated on each Valuation Day, in accordance with the Articles of Incorporation. The NAV of each fund is calculated in the Base Currency of the fund and for each share class its principal dealing currency. NAVs for money market funds are rounded to the nearest four decimal places and are available on a daily basis at **https://www.fidelity.lu/funds/pricing-and-performance**

The NAV per Share of each fund, and, if applicable, of each class of Shares of such fund, is calculated by determining first, if appropriate, the proportion of the net assets of the relevant fund attributable to each class of Shares, where appropriate taking account of any ongoing distribution charge payable.

To calculate NAV for each share class we use the following general formula:

$$\frac{\text{(assets – liabilities) per share class}}{\text{number of outstanding shares}} = \text{NAV}$$

In calculating the NAV appropriate provision is made for charges and fees attributable to each fund and share class.

Asset Valuations

In general, we determine the value of each fund's assets as follows. Note than for any type of security, we may use different value methods in accordance with generally acceptable valuation principles instead of the method stated here (see description following the bullets).

For funds other than Cash funds

- **CASH IN HAND OR ON DEPOSIT, BILLS, DEMAND NOTES, ACCOUNTS RECEIVABLE, PREPAID EXPENSES, AND CASH DIVIDENDS AND INTEREST DECLARED OR ACCRUED BUT NOT YET RECEIVED.** Valued at the full value, unless the same is unlikely to be paid or received in full, in which case the Board or its delegate shall apply such discount as it may consider appropriate to reflect the true value thereof.
- **MONEY MARKET INSTRUMENTS.**
  Non-money market funds Valued as described in the bullet immediately above.
  Money market funds Valued at mark-to-market or, that is not possible, mark-to-model.
- **TRANSFERABLE SECURITIES, MONEY MARKET INSTRUMENTS AND DERIVATIVES THAT ARE TRADED ON AN OFFICIAL STOCK EXCHANGE OR OTHER REGULATED MARKET.** Valued on the basis of the last available price of the relevant stock exchange or market on which these securities are traded. Where such securities or instruments are traded on more than one exchange or market the Board or its delegate shall adopt policies to determine the order of priority of the exchanges or markets that shall be used for valuation.
- **SECURITIES OR INSTRUMENTS WHICH ARE NOT LISTED OR FOR WHICH THEIR LAST AVAILABLE PRICE IS NOT REPRESENTATIVE OF THEIR FAIR MARKET VALUE.** The Board or its delegate shall use the reasonably foreseeable sales price valued with prudence in good faith.
- **SHARES OR UNITS OF UCITS OR UCIs.** Valued at the last available NAV reported by the UCITS/UCI.
- **LIQUID ASSETS AND MONEY MARKET INSTRUMENTS** may be valued at nominal value plus any accrued interest at mark-to-market or mark-to-model, or on an amortised cost basis under certain limited conditions (including for instruments with low residual maturities when deemed allowed to gain an appropriate approximation of the price of the instrument) provided that escalation procedures are in place to ensure corrective actions are promptly taken when the amortised cost no longer provides a reliable approximation of the price of the instrument. All other assets, where practice allows, may be valued in the same manner
- **UNLISTED SECURITIES AND ALL OTHER ASSETS.** Valued in accordance with market practice.

For Cash funds

- **CASH ON HAND OR ON DEPOSIT, BILLS AND DEMAND NOTES AND ACCOUNTS RECEIVABLE, PREPAID EXPENSES, CASH DIVIDENDS AND INTEREST DECLARED OR ACCRUED AS AFORESAID, AND NOT YET RECEIVED.** Valued at the full value, unless the same is unlikely to be paid or received in full, in which case the Board shall apply such discount as it may consider appropriate to reflect the true value thereof;
- **SHARES OR UNITS OF MONEY MARKET FUNDS.** Valued at their last available NAV as reported by such money market funds;
- **LIQUID ASSETS AND MONEY MARKET INSTRUMENTS.** valued at Mark-to-Market or Mark-to-Model where the use of mark-to-market is not possible, or the market data is not of sufficient quality; and
- **ANY ASSETS OR LIABILITIES IN CURRENCIES OTHER THAN THE FUND CURRENCY** will be converted using the relevant spot rate quoted by a bank or other recognised financial institution. If such quotations are not available, the rate of exchange will be determined in good faith by or under procedures established by the Board.

If any of the above valuation principles do not reflect the valuation method commonly used in specific markets or if any the valuation principles do not appear to accurately reflect the value of the SICAV's assets or if extraordinary circumstances render a valuation in accordance with the above guidelines impracticable or inadequate, the Board or its delegate may adopt different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures to achieve what it believes to be a fair valuation in the circumstances. For complete information on how assets are valued, see the articles.

Institutional Reserved Funds – Dilution Levy and Large Deals

The value of the property of a fund may be reduced due to the costs incurred in the dealings in the fund's investments, including stamp duty and any difference between the buying and selling price of such investments. To mitigate against such 'dilution' and consequent potential adverse effect on remaining shareholders, the SICAV has the power to charge a 'dilution levy' when Shares are bought or sold. Any dilution levy must be fair to all shareholders and potential shareholders and the SICAV will operate this measure in a fair and consistent manner to reduce dilution and only for that purpose.

The SICAV reserves the right to impose a dilution levy:

In respect of a 'large deal', i.e. a deal (or series of deals placed on the same day) in respect of Institutional Reserved Fund Shares exceeding Euro 1.5 million in value; or on a shareholder who redeems or switches a shareholding in an Institutional Reserved fund within 30 days of its purchase.

It is not possible to predict accurately whether dilution would occur at any point in time. If an investor's proposed transaction falls within one of the above categories, the investor should check with its usual Distributor or the Management Company as to whether a dilution levy will apply in respect of that transaction before giving instructions for that transaction. In deciding whether to impose a dilution levy, the Board will consider a number of factors including the size of the transaction relative to the overall value of the fund, the level of transaction costs within that particular market, the liquidity of the underlying investments within the fund, the amount of investments to be bought/sold and the likely time that this will take, the likelihood of an adverse impact on the value of investments as a result of the accelerated rate of disposal, and the length of time for which the Shares in question were held.

The SICAV is unlikely to impose a dilution levy unless the dealing costs relating to a shareholder transaction are significant and/or will have a material impact on the value of the fund in question. Dealing costs (stamp duty, broker commissions and buy/sell spreads) will be considered significant if they amount to Euro 300,000 or more. A material impact is defined as impacting the Net Asset Value by 10 basis points or more. On a large redemption, the Fund may require the redeeming shareholder to accept an in kind redemption subject to the conditions set out above under '. Redemption in kind' instead of imposing a dilution levy.

Based on future projections, the levy will be up to 0.80% of the purchase cost or the redemption or switch proceeds. Any dilution levy would be paid to the SICAV and would become part of the property of the relevant fund. On any day where a price adjustment is triggered as further described under '2.4. Price Adjustment Policy (Swing Pricing)' above the dilution levy will not be applied.

Taxes

The following is summary information and is provided for general reference only. Investors should consult their own tax advisors.

Taxes paid from fund assets

The SICAV is subject to the Luxembourg taxe d'abonnement (subscription tax) at the following rates, unless otherwise exempt:

- All share exchange-listed classes of tracking funds): zero.
- All share classes of money market funds (MMFs): 0.01%.
- All other funds, classes R, I, P and S, SE, X: 0.01%.
- All other classes of all other funds: 0.05%.

This tax is calculated and payable quarterly, on the aggregate net asset value of the outstanding shares of the SICAV at the end of each fiscal quarter. Any assets coming from another Luxembourg UCI on which the taxe d'abonnement has already been paid are not subject to further taxe d'abonnement.

The SICAV is not currently subject to any Luxembourg stamp, withholding, municipal business, net worth or estate tax, or taxes on income, profits or capital gains.

To the extent that any country in which a fund invests imposes withholding taxes on income or gains earned in that country, taxes will be paid by the fund in accordance with the relevant laws. Some of these taxes may be recoverable. The fund might also have to pay other taxes on its investments. The effects of taxes will be factored into fund performance calculations. See also "Tax risk" in the "Risk descriptions" section.

While the above tax information is accurate to the best of the Board's knowledge, it is possible that a tax authority may modify existing taxes or impose new ones (including retroactive taxes) or that the Luxembourg tax authorities may determine, for example, that any class currently identified as being subject to the 0.01% taxe d'abonnement should be reclassified as being subject to the 0.05% rate. The latter case could happen for an institutional share class of any fund for any period during which an investor not entitled to hold institutional shares was found to have held such shares.

Taxes you are responsible for paying

TAXES IN YOUR COUNTRY OF TAX RESIDENCE Luxembourg tax residents are generally subject to Luxembourg taxes, such as those mentioned above that do not apply to the SICAV. Shareholders in other jurisdictions are generally not subject to Luxembourg taxes (with some exceptions, such as the gift tax on Luxembourg-notarised gift deeds). However, an investment in a fund may have tax implication in these jurisdictions.

TAX INFORMATION DISCLOSURES

INTERNATIONAL TAX AGREEMENTS Several international tax agreements require the SICAV to report certain information about fund shareholders to the Administration des Contributions Directes in Luxembourg tax authorities every year, and for those authorities to automatically forward that information to other countries, as follows:

- **DIRECTIVE ON ADMINISTRATIVE COOPERATION II (DAC II) AND COMMON REPORTING STANDARD (CRS)** Collected: direct shareholder information such as name, address, date of birth, tax residency, tax identification number and status under the rules. Information collected, along with investment value and payments made to them annually reported, when required, along with, to the Administration des Contributions Directes in Luxembourg who pass this on to relevant tax authorities globally.
- **US FOREIGN ACCOUNT TAX COMPLIANCE ACT (FATCA)** Collected: direct shareholder information as to whether they are a US Person, and where they are a US Person their name, address and US Tax Identification number. US Person information collected along with investment value and payments made to them reported, when required, to the Administration des Contributions Directes in Luxembourg who pass this on to the Internal Revenue Service in the US annually.

Future agreements, or expansions of existing ones, could increase the countries to which shareholder information is communicated. Any shareholder who fails to comply with the SICAV's information or documentation requests may be subject to penalties from their jurisdiction of residence and may be held liable for any penalties imposed on the SICAV that are attributable to the shareholder's failure to provide the documentation.

Measures to Prevent Improper and Illegal Behaviour

Money laundering, terrorism and fraud

To comply with Luxembourg laws, regulations, circulars, aimed at money laundering and terrorism, investors must provide any information and documentation including information about beneficial ownership, source of funds and origins of wealth to demonstrate identity before opening an account

- **natural persons** an identity card or passport copy duly certified by a public authority (such as a notary, police official or ambassador) in his or her country of residence
- **corporations and other entities investing on their own behalf** a certified copy of the entity's incorporation documents or other official statutory document, plus, for the entity's owners or other economic beneficiaries, the identification described above for natural persons
- **financial intermediaries** a certified copy of the entity's incorporation documents or other official statutory document, plus certification that the account owner has obtained necessary documentation for all end investors

We may ask for additional or updated documents at any time if we feel it is necessary, and we may delay or deny the opening or operation of your account and any associated transaction requests (including switches and redemptions) until we receive, and judge to be satisfactory, all requested documents. We may also make comparable requirements to financial intermediaries. We will not be liable for any resulting costs, losses, or lost interest or investment opportunities.

If you have any questions regarding our identification documentation required, contact us (see p. 2).
Fidelity is committed to the fight against financial crime and makes every effort to remain in full compliance with all applicable financial crime related laws, regulations, and standards in all of the jurisdictions in which it operates, including the sanctions regimes issued by the European Union and the United Nations ("Sanctions regimes") which apply directly to the SICAV as a result of its domicile within the European Union. This may result in the SICAV not accepting certain new investors or subscriptions of existing investors if this would lead to breaches to the sanctions regimes. Where required by regulation, the SICAV will enact a freeze of holdings to individuals or entities designated in applicable sanctions lists.
All investors are expected to act in accordance with these sanctions regimes.

Market timing and excessive trading

The SICAV is designed and managed to support longer-term investment and active trading is discouraged. Short-term or excessive trading into and out of the SICAV may harm performance by disrupting portfolio management strategies and by increasing expenses. In accordance with general FIL Group policy and practice and CSSF circular 04/146, the SICAV and the Distributors are committed not to permit transactions which they know to be or have reasons to believe to be related to market timing. Accordingly, the SICAV and the Distributors may refuse to accept applications for or switching of Shares, especially where transactions are deemed disruptive, particularly from market timers or investors who, in the SICAV's or any of the Distributors' opinion, have a pattern of short-term or excessive trading or whose trading has been or may be

disruptive to the SICAV. For these purposes, the SICAV and the Distributors may consider an investor's trading history in a fund or other FIL Group UCIs and accounts under common ownership or control.

Late trading

We take measures to ensure that any request to buy, switch or sell shares that arrives after the cut-off time for a given NAV will not be processed at that NAV.

Privacy of Personal Information

In accordance with the Data Protection Law, the Fund and the Management Company, acting as joint data controllers, hereby informs you (and in case of a legal person, informs the investor's contact person and/or beneficial owner) that certain personal data ("Personal Data") provided to the Fund or its delegates may be collected, recorded, stored, adapted, transferred or otherwise processed for the purposes set out below. Personal Data includes (i) the name, address (postal and/or e-mail), bank details, invested amount and holdings of a shareholder; (ii) for corporate shareholders: the name and address (postal and/or e-mail) of the shareholders' contact persons, signatories, and the beneficial owners; and (iii) any other personal data the processing of which is required in order to comply with regulatory requirements, including tax law and foreign laws. Personal Data supplied by you is processed in order to enter into and execute transactions in Shares of the Fund and for the legitimate interests of the Fund. In particular, legitimate interests include (a) complying with the Fund's accountability, regulatory and legal obligations; as well as in respect of the provision of evidence of a transaction or any commercial communication; (b) exercising the business of the Fund in accordance with reasonable market standards and (c) the processing of Personal Data for the purpose of: (i) maintaining the register of shareholders; (ii) processing transactions in Shares and the payment of dividends; (iii) maintaining controls in respect of late trading and market timing practices; (iv) complying with applicable anti-money laundering rules; (v) marketing and client-related services; (vi) fee administration; and (vii) tax identification under the EU Savings Directive, OECD Common Reporting Standard (the "CRS") and FATCA.

The Fund may, subject to applicable law and regulation, delegate the processing of Personal Data, to other data recipients such as, inter alia, the Management Company, the Investment Managers, the Sub-Investment Managers, the Administrator, the Registrar and Transfer Agent, the Depositary and Paying Agent, the auditor and the legal advisors of the Fund and their service providers and delegates (the "Recipients"). The investor is informed and acknowledges that the Personal Data will be processed in accordance with the privacy statement (the "Privacy Statement") available at **www.fidelityinternational.com**. The Recipients may, under their own responsibility, disclose Personal Data to their agents and/or delegates for the sole purposes of assisting the Recipients to provide services to the Fund and/or to fulfil their own legal obligations. Recipients or their agents or delegates may, process Personal Data as data processors (when processing upon instruction of the Fund), or as data controllers (when processing for their own purposes or to fulfil their own legal obligations). Personal Data may also be transferred to third parties such as governmental or regulatory agencies, including tax authorities, in accordance with applicable law and regulation. In particular, Personal Data may be disclosed to the Luxembourg tax authorities, which in turn may, acting as data controller, disclose the same to foreign tax authorities. In accordance with the conditions laid down by the Data Protection Law, you have the right to:

- request access to the Personal Data
- request the correction of the Personal Data where it is inaccurate or incomplete
- object to the processing of the Personal Data
- request erasure of the Personal Data
- request for restriction of the use of the Personal Data and
- request for Personal Data portability)

You may exercise the above rights by writing to the SICAV or the Management Company (see page 4).

You also have the right to lodge a complaint with the National Commission for Data Protection (the "CNPD") at the following address: 15 boulevard du Jazz, L-4370 Belvaux, Grand Duchy of Luxembourg, or with any competent data protection supervisory authority.

You may, at your discretion, refuse to communicate your Personal Data to the SICAV. In this event, however, the SICAV may reject the request for subscription for Shares and block an account for further transactions. Personal Data shall not be retained for periods longer than those required for the purpose of its processing subject to any limitation periods imposed by applicable law.

Rights We Reserve

Within the limits of the law and the articles of incorporation, we reserve the right to do any of the following at any time so long as it is consistent with the best interests of shareholders:

- **REJECT OR CANCEL ANY APPLICATION TO OPEN AN ACCOUNT OR ANY REQUEST TO SUBSCRIBE FOR SHARES, FOR ANY REASON.** Whether for an initial or additional investment we can reject the entire amount or part of it
- **DECLARE ADDITIONAL DIVIDENDS** or change (temporarily or permanently) the method used for calculating dividends.
- **TAKE APPROPRIATE MEASURES TO PREVENT OR REMEDY IMPROPER OWNERSHIP OF SHARES.** This includes ownership by any investor ineligible to own them or whose ownership might be detrimental to the SICAV or its shareholders. The following examples apply to both existing and prospective shareholders and to both direct and beneficial ownership of shares:
  - requiring investors to provide any information we consider necessary for determining the identity and eligibility of a shareholder
  - forcibly selling (and returning the proceeds in the share class currency) or exchanging, free of any redemption fee, any shares we believe are being held in whole or in part by or for an investor who is, or appears likely to become, ineligible to own those shares, or who has failed to provide any requested information or declaration within one month of being requested to do so, or whose ownership the SICAV has determined might be detrimental to its interests or those of shareholders
  - preventing investors from acquiring shares if we believe it is in the interests of existing shareholders to do so

  We may take any of these measures to ensure the SICAV's compliance with law and regulation; to avoid the adverse regulatory, tax, administrative, or financial consequences for the SICAV (such as tax charges); to remedy the ownership of shares by a US person or any other investor whose ownership of shares is not permitted by the investor's jurisdiction; or for any other reason, including the avoidance of any local registration or filing requirements with which the Management Company or the SICAV would not otherwise be required to comply. The SICAV will not be liable for any gain or loss associated with the above actions.
- **TEMPORARILY SUSPEND THE CALCULATION OF NAVS OR TRANSACTIONS IN A FUND'S SHARES** when any of the following is true:
  - the principal stock exchanges or markets associated with a substantial portion of the fund's investments are closed during a time when they normally would be open, or their trading is restricted or suspended, and we believe these conditions have a material effect on the value of assets the fund holds
  - a disruption of communication systems, normally employed in determining the price of any of the SICAV's investments has made it impractical to value fund assets in a timely and reliable way
  - a state of emergency exists (not created or controllable by the management company) that makes it impracticable to value or liquidate assets
  - any other reason exists to make the fund unable to promptly and accurate obtain prices for any investments to which it is exposed

- the fund is unable to repatriate monies needed to pay out redemption proceeds, or is unable to liquidate assets or exchange monies needed for operations or redemptions at what the Board considers to be a normal price or exchange rate
- circumstances exist under which we believe it would be impractical or unfair to shareholders to continue dealing in fund shares, or would carry undue risk to do so
- the NAV of one or more investment funds in which the fund invests a substantial part of its assets is suspended
- the fund or SICAV is being liquidated or merged

A suspension could apply to any share class and fund, or to all, and to any type of request (buy, switch, sell).

In addition to suspensions at the fund or SICAV level, any distributor of the fund may declare its own suspension of processing of fund shares under similar terms as above.

Any suspension shall be published in such manner as decided by the Board if the Board consider the suspension is likely to exceed one week.

Shareholders who have requested switching or redemption of their Shares or who have made an application to subscribe for Shares will be notified of any such suspension and will be promptly notified upon termination of such suspension.

- **CLOSE A FUND OR SHARE CLASS TO FURTHER INVESTMENT** temporarily or indefinitely, without notice, when the Management Company believes it is in the best interests of shareholders (such as when a fund has reached the size where further growth appears likely to be detrimental to performance). A closure may apply only to new investors or to further investments from existing shareholders as well.
- **PARTIAL CLOSURE** The Board and/or the Management Company may decide to partially close a fund or class of Shares to all buys, subscription or switches in from new investors only, or to totally close a fund or class of Shares to all buys or subscription or switches in (but not, in either of the case of partial or total closure as described, to redemptions or switches out).

Where this occurs, the website **www.fidelityinternational.com** will be amended to indicate the change in status of the applicable fund or class of Shares. Shareholders and potential investors should confirm with the Management Company or the Distributors or check the website for the current status of funds or class of Shares. Once closed, a fund or a class of Shares will not be re-opened until, in the opinion of the Board, the circumstances which required closure no longer prevail.

- **ACCEPT SECURITIES AS PAYMENT FOR SHARES, OR FULFILL REDEMPTION PAYMENTS WITH SECURITIES (IN-KIND PAYMENTS).** If you wish to request a subscription or redemption in kind, you must get advance approval from the management company. These securities will be valued as described in article 22 of the articles, as of the transaction valuation date.

  Any securities accepted as a payment in kind for a subscription of shares must be consistent with the fund's investment policy, and acceptance of these securities must not affect the fund's compliance with the 2010 law. Securities provided in redemptions in kind will be determined on a fair and reasonable basis, without prejudice in favour of the recipient or the remaining shareholders.

  With all in-kind transactions, the shareholder generally must pay the cost of an independent valuation report from the SICAV's auditor and other documentation, and must pay any entry, exit, or other fees in cash.

  If you receive approval for an in-kind redemption, we will seek to provide you with a selection of securities that closely or fully matches the overall composition of the fund's holdings at the time the transaction is processed.
- **REDUCE OR WAIVE ANY STATED SALES CHARGE, OR MINIMUM INVESTMENT AMOUNT, FOR ANY FUND, INVESTOR, OR REQUEST,** especially for investors who are committing to invest a certain amount over time, so long as it is consistent with equal treatment of shareholders. We may also allow distributors to set different minimum investment requirements.
- **RAISE THE ENTRY FEES.** Under the terms of the articles, the initial sales charge (entry fee) may be increased to a maximum of 8% of NAV.

Sent General materials: sent to all shareholders directly registered in the SICAV's shareholder list at the address of record (physically, electronically, or as an emailed link). Investor-specific materials, such as account statements, trade confirmations, and suspensions of requests to exchange or sell an investor's shares: sent to the relevant shareholder(s). Any communications to shareholders will be published on the respective local/country websites and/or may be notified via e-mail, (in the latter case only) where a shareholder has consented and provided an e-mail address to the Management Company for such purposes.

Media Published, as required by law or as determined by the Board, in newspapers or other media, or electronic platforms, such as Bloomberg, as well as the Recueil Electronique des Sociétés et Associations.

Online Posted online on **fidelityinternational.com.**

Office Available free upon request from the registered offices of the management company, and available for inspection at those offices; the KIDs, prospectus, financial reports are available on the same basis from the depositary and local distributors. The core agreements are available on the same basis from the depositary.

Shareholder notices include annual shareholder meetings and notices of prospectus changes, the mergers or closings of funds or share classes (along with the rationale for the decision), and all other items for which notice is required.
Audited annual reports are issued within four months of the end of the financial year. Unaudited semi-annual reports are issued within two months of the end of the period they cover.
Information on past performance, by fund and share class, appears in the applicable KID and on **fidelityinternational.com.**

Financial year 1 May to 30 April

Capital Sum of the net assets of all of the funds

Minimum capital EUR 1,250,000 or equivalent in any other currency

Par value of shares None

Structure and Governing Law

The SICAV qualifies as an UCITS under Part 1 of the 2010 Law and is registered as such with the CSSF. Registration with the CSSF does not constitute an endorsement or any statement about the adequacy or accuracy of a Partial Prospectus for Switzerland. The SICAV functions as an "umbrella fund" under which the funds are created and operate. The assets and liabilities of each fund are segregated from those of other funds; there is no cross-liability, and a creditor of one fund has no recourse to the assets of any other fund.

Disputes arising among the shareholders, the Management Company and the depositary will be settled according to Luxembourg law and subject to the jurisdiction of the District Court of Luxembourg. However, with disputes involving investors who are residents of other countries, or transactions in shares occurring in other countries, the Management Company or the depositary may choose to submit themselves, and the SICAV, to the jurisdiction of courts or laws of those countries. To lodge a complaint, contact the Compliance Department of the Management Company (see contact information on page 3).

The ability for a shareholder to bring a claim against the SICAV expires 5 years after the event on which the claim would be based.

The Board

Jeffrey Lagarce (Non-executive director, Chair)

Anne Richards, CVO, DBE
United Kingdom

Jon Skillman (Independent director)
Luxembourg

FIL Holdings (Luxembourg) S.à r.l.
Represented by Christopher Brealey

The Board is responsible for the overall investment policy, objectives, and management of the SICAV and funds and, as described more fully in the articles, has broad powers to act on behalf of the SICAV and the funds, including:

- appointing and supervising the management company
- setting investment policy and approving the appointment of any investment manager, sub-investment manager, or investment adviser
- making all determinations regarding the launch, modification, merger, split, termination, or discontinuation of funds and share classes, including such matters as timing, pricing, fees, distribution policy and payment of dividends, liquidation of the SICAV, and other conditions
- determining eligibility requirements and ownership restrictions for investors in any fund or share class, and what steps may be taken in the case of any violation
- determining the availability of any share class to any investor or distributor or in any jurisdiction
- determining when and how the SICAV will exercise its rights and will distribute or publicise shareholder communications
- ensuring that the appointments of the Management Company and the depositary are consistent with the 2010 Law and any applicable contracts of the SICAV
- determining whether to list any shares on the Luxembourg Stock Exchange or any other stock exchanges

The Board has delegated the day-to-day management of the SICAV and its funds to the Management Company, which in turn has delegated some or all of its duties to various Investment Managers and other service providers, subject to its overall control and supervision.

The Board is responsible for the information in this Partial Prospectus for Switzerland and has taken all reasonable care to ensure that it is materially accurate, complete, and not misleading. The Partial Prospectus for Switzerland will be updated as required when funds are added or discontinued or when other material changes are made.

[3] Until 12 October 2026: 2a Rue Albert Borschette, BP 2174, L-1246 Luxembourg.

Directors serve until their term ends, they resign, or they are revoked, in accordance with the articles. Any additional directors will be appointed in accordance with the articles and Luxembourg law. Independent directors (directors who are not employees of any FIL Group entity) are entitled to receive compensation for serving on the Board and reimbursement of expenses related to their service as directors.

The Directors shall be indemnified by the SICAV against liability and related expenses in connection with any claim brought against such person by reason of their having been such Director or officer, provided that no indemnity shall be provided against liability to the SICAV or its shareholders by reason of wilful misfeasance, bad faith, negligence or reckless disregard of duties or with respect to any matter as to which they shall have been finally adjudicated not to have acted in good faith in the reasonable belief that their action was in the best interests of the SICAV.

Professional Firms Engaged by the SICAV

The Management Company and various professional firms are engaged by the SICAV through service agreements that extend for an indefinite period. The SICAV may terminate any of these service agreements immediately if it determines it is in the shareholders' interest. Otherwise, a holder of any of these service agreements can resign or be replaced by the SICAV (upon 90 days' notice in case of the depositary). Regardless of the circumstances of termination, any professional firm must cooperate fully with a transition of its duties, consistent with its service agreement, its duties under law, and the instructions of the Board.

Management company

Administrator

FIL Investment Management (Luxembourg) S.à r.l.
Skypark Business Center, 1, Avenue de l'Aéroport, L-1110 Senningerberg, Luxembourg[4]

See "The Management Company" on page 170.

Depositary

Brown Brothers Harriman (Luxembourg) S.C.A.
80 Route d'Esch
L-1470 Luxembourg

The depositary provides such services as:

- safekeeping the assets of the SICAV (custody of assets that can be held in custody and ownership verification and record keeping of other assets)
- fulfilling oversight duties to ensure that the activities defined in the depositary agreement are carried out in accordance with the Board's instructions and, above all, with the 2010 Law and the articles; these activities include the calculation of NAV, the issuing of fund shares, and the timely receipt and allocation of income and revenues to each fund and share class, among others
- cash flow monitoring

The depositary must use reasonable care in exercising its functions and is liable to the SICAV and shareholders for any losses that result from failing to properly perform its duties, as defined in the depositary agreement.

It may entrust some or all of SICAV's assets to third party financial institutions (such as banks or clearinghouses), but this will not affect its liability. The fees of any third-party delegate appointed by the Depositary shall be paid by the SICAV.

Up-to- date information on sub-custodians is available at **bbh.com/luxglobalcustodynetworklist.**

Where the law of a third country requires that certain investments be held in custody by a local entity, but no local entities satisfy the delegation requirement, the depositary may nevertheless delegate to a local entity so long as the SICAV has informed investors and has given the depositary appropriate instructions.

The depositary is not allowed to carry out activities with regard to the SICAV that may create conflicts of interest between the SICAV, the shareholders, and the depositary itself (including its service providers), unless it has properly identified any such potential conflicts of interest, has functionally and hierarchically separated the performance of its depositary tasks from its other potentially conflicting tasks, and the potential conflicts of interest are properly identified, managed, monitored, and disclosed to the SICAV and its shareholders. The depositary's current conflicts of interest policy is available free of charge upon request to the depositary.

Lending agents

National Financial Services LLC
Boston, Massachusetts

Citibank N.A. London Branch
London, UK

The lending agents carry out Securities lending transactions and the management of associated collateral. Neither lending agent is an affiliate of the investment manager.

Auditor

Deloitte Audit S.à r.l.
20, Boulevard de Kockelscheuer
L-1821 Luxembourg

The auditor provides independent review of the financial statements of the SICAV and all funds once a year. The auditor also verifies all performance fee calculations. The appointment is subject to shareholder's approval at each annual general meeting.

Shareholder Meetings and Voting

The annual general meeting is generally held in Luxembourg at 12:00 Noon CET on the first Thursday in October each year, or if that is not a banking day in Luxembourg, then the next day that is. To the extent provided by Luxembourg law, the Board may choose to hold the annual general meeting at a different time, day, or place. Other shareholder meetings may be held at other places and times. All meetings are subject to appropriate approval and notification.

Written notice convening annual general meetings will be provided to shareholders as required by Luxembourg law and the articles.

Resolutions concerning the interests of all shareholders generally will be taken in a general meeting. The shareholders of a fund may hold a general meeting to decide on any matter that relates exclusively to that fund.

The right of a shareholder to attend a general meeting of shareholders and to exercise the voting rights attaching to their shares shall be determined by reference to shares held by this shareholder as at the Record Date. For information on admission and voting at any meeting, refer to the applicable convening notice.

Liquidation or Merger

Any decision of the Board to terminate, merge, split, or liquidate a share class, a fund, or the SICAV will be communicated to shareholders in accordance with Luxembourg law; see the section "Notices, Publications and Other Information".

Liquidation of the SICAV, a fund or share class

The Board may decide to liquidate or divide into two or more funds or classes any share class or fund in the event that:

- the assets of the class or fund have fallen below USD 50 million

[4] Until 12 October 2026: 2a Rue Albert Borschette, BP 2174, L-1246 Luxembourg.

- the Board believes that it is justified either by a change in the economic or political situation relating to the fund or the class or that the interests of shareholders would justify it

The liquidation decision will be published or notified to the shareholders of the relevant fund prior to the effective date of the liquidation and the publication or notification will indicate the reasons and the procedures for the liquidation. Unless the Board otherwise decides in the interests of, or to keep equal treatment between, the shareholders, the shareholders of the fund or the class of shares concerned may continue to request redemption or conversion of their shares.

In all other circumstances or where the Board determines that the decision should be put to shareholders for approval, the decision to liquidate a fund or a class of Shares may be taken at a meeting of shareholders of the fund or class of Shares to be liquidated. At such meeting, no quorum shall be required and the decision to liquidate will be taken by simple majority of the votes cast. The decision of the meeting will be notified and/or published by the SICAV in accordance with applicable laws and regulations.

The Board may also, under the circumstances provided in the first paragraph above, decide upon the reorganisation of any fund by means of a division into two or more separate funds or to consolidate or split any Share classes within a fund. To the extent required by Luxembourg law, such decision will be published or notified, if appropriate, in the same manner as described in the first paragraph of this section. The Board may also decide to submit the question of the consolidation or split of classes of Shares to a meeting of shareholders of such classes. No quorum is required for this meeting and decisions are taken by the simple majority of the votes cast.

The SICAV is established for unlimited duration but may be liquidated at any time by resolution of shareholders in accordance with Luxembourg law. A general meeting of the shareholders will be called to consider the liquidation of the SICAV if the value of the SICAV's net assets should decline to less than two-thirds of the minimum capital required by law. The minimum capital required by Luxembourg law is currently the equivalent of Euro 1,250,000. In the event of any contemplated liquidation of the SICAV, no further issues, switchings, or redemptions of Shares will be permitted after publication of the first notice convening the general meeting of Shareholders for the purpose of winding up the SICAV. All Shares outstanding at the time of such publication will participate in the SICAV's liquidation distribution.

Amounts from liquidation of the SICAV or a fund that cannot be distributed to the shareholders within a period of nine months will be deposited in escrow with the Caisse de Consignation until the statutory period of limitation has elapsed. Amounts unclaimed within 30 years may be forfeited.

If, after the closure or liquidation of a fund, unexpected payments which relate to that specific fund are received by the SICAV and the Board considers that, in consideration of the amounts concerned or the time elapsed since the close of the liquidation, it is not appropriate or operationally justified to revert to former shareholders, these amounts will be retained by the SICAV.

Mergers

Any merger of a fund shall be decided upon by the Board unless the Board decides to submit the decision for a merger to a meeting of shareholders of the fund concerned. No quorum is required for such meeting and decisions are taken by the simple majority of the votes cast. In case of a merger of one or more funds where, as a result, the fund ceases to exist, the merger shall be decided by a meeting of shareholders for which no quorum is required and that may decide with a simple majority of the votes cast. In addition, the provisions on mergers of UCITS set forth in the Law of 2010 and any implementing regulations (relating in particular to the notification to shareholders) shall apply.

Responsibilities and delegation

The Board of the SICAV has appointed the Management Company to perform investment management, administrative (NAV calculation and accounting function and client communication function) and marketing functions. Certain of these activities may, in whole or in part, be performed by the Management Company through its branches.

With the approval of the Board and the CSSF, the Management Company has the option of delegating to qualified third parties some or all of the portfolio management, administration, and marketing functions, so long as it retains

[5] Until 12 October 2026: 2a Rue Albert Borschette, BP 2174, L-1246 Luxembourg.

supervision, implements appropriate controls and procedures, and maintains the Partial Prospectus for Switzerland.

An Investment Manager may in turn appoint one or more investment sub-managers.

The Management Company must require any delegated entity to comply with the Partial Prospectus for Switzerland, articles, 2010 Law and other applicable provisions when acting on behalf of the SICAV. The Management Company must report to the Board quarterly, and the conducting officers must promptly inform the managers of the Management Company and the Board of any materially adverse administrative matters resulting from the actions of the investment manager, the general distributor and the Management Company itself.

The investment managers, investment sub-managers, and all service providers and delegates engaged by the Management Company have agreements to serve for an indefinite period.

The Board or the Management Company may terminate any of these service agreements immediately if it determines it is in the best interests of shareholders. Otherwise, a holder of any of these service agreements can resign or be replaced upon 90 days' notice (under certain circumstances, 30 days for investment management agreements concerning shares authorised for sale in Hong Kong).

Management Company Policies

More information about these and other corporate conduct policies is available either at the links indicated below or as indicated in "Notices, Publications and Other Information" at the end of "Investing in the Funds".

Conflicts of interest

FIL Group is a worldwide full-service provider of investment banking, asset management, and financial services and a major participant in the global financial markets. As such, FIL Group is active in various business activities and may have other direct or indirect interests in the financial markets in which the SICAV invests. The SICAV is not entitled to compensation related to such business activities.

The Management Company, Investment Manager, General Distributor and certain other distributors and service providers or delegates are part of FIL Group. A FIL Group entity could be an issuer or counterparty for a security or derivative a fund is considering buying or selling. In addition, a FIL Group entity that serves the SICAV in a given capacity could serve another SICAV (whether promoted by FIL Group or not) in a similar or different capacity.

In such cases, the Management Company seeks to identify, manage, and, where necessary, prohibit any action or transaction that could pose a conflict between the interests of the FIL Group entities and the SICAV or its investors, for example the SICAV and other clients of FIL Group entities. Where transactions are conducted that might have the potential to be affected by a conflict of interest, such transactions must be conducted on normal commercial terms at arm's length. Any incidents in which conflicts of interest may not have been adequately neutralised, as well as the decisions taken to address such incidents, will be reported to investors in the notes to the SICAV's financial statements.

The management company, along with all other FIL Group entities, strives to manage any conflicts in a manner consistent with the highest standards of integrity and fair dealing. The Management Company conflict of interest policy is available at **fidelityinternational.com.**

Remuneration

The Management Company has implemented a remuneration policy that is designed not to encourage risk-taking inconsistent with the risk profile of the funds while not hindering the Management Company in its duty to act in the best interest of shareholders.

The remuneration policy:

- supports a performance culture that is based on merit
- differentiates and rewards excellent performance, both in the short and long term
- balances fixed and variable compensation to appropriately reflect the value and responsibility of the role performed day to day, and to influence appropriate behaviours and actions
- requires that compensation decisions for employees in independent control functions be determined by a control division's senior management, so that these decisions will be wholly independent of the business areas
- is consistent with, and promotes, effective risk management practices, including Sustainability Risks
- is consistent with the management company's conflict of interest policy and more broadly with its compliance and control culture

The managers of the Management Company are responsible for ensuring that the policy is applied to all Management Company staff and for reviewing the policy every year. The current remuneration policy is available at **www.fil.com**. A paper copy can be obtained, free of charge, upon request, in English at the office of the Management Company.

Best execution

Each Investment Manager and sub-Investment Manager has adopted a best execution policy to implement all reasonable measures to ensure the best possible result for the SICAV, when executing orders. In determining what constitutes best execution, the Investment Manager and/or sub-Investment Manager will consider a range of different factors, such as price, liquidity, speed, and cost, among others, depending on their relative importance based on the various types of orders or financial instrument. Transactions are principally executed via brokers that are selected and monitored on the basis of the criteria of the best execution policy. Connected persons are also considered. To meet its best execution objective, the Investment Manager and/or sub-Investment Manager may choose to use agents (Connected Persons or not) for its order transmission and execution activities.

The Investment Manager, any of its delegates and/or any of their Connected Persons may effect transactions by or through the agency of another person with whom the Investment Manager, any of its delegates and/or any of their Connected Persons have an arrangement under which that party will from time to time provide to or procure for the Investment Manager, any of its delegates and/or any of their Connected Persons goods, services or other benefits (such as research and advisory services, where permitted by regulation only) ("soft dollar arrangements"), the nature of which is such that their provision can reasonably be expected to benefit the SICAV as a whole and may contribute to an improvement in the SICAV's performance and that of the Investment Manager or any of its delegates in providing services to the SICAV and for which no direct payment is made but instead the Investment Manager, any of its delegates and/or any of their Connected Persons undertake to place business with that party. For the avoidance of doubt, such goods and services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payments. Periodic disclosure is made in the annual report of the SICAV in the form of a statement describing the soft dollar policies and practices of the Investment Manager or its delegates, including a description of goods and services received by them and/or any of their Connected Persons.

The Investment Manager, any of its delegates and/or any of their Connected Persons shall not retain the benefit of any cash commission rebate (being cash commission repayment made by a broker or dealer to the Investment Manager, any of its delegates and/or any of their Connected Persons) paid or payable from any such broker or dealer in respect of any business placed with such broker or dealer by the Investment Manager, any of its delegates and/or any of their Connected Persons for or on behalf of the SICAV. Any such cash commission rebate received from any such broker or dealer shall be held by the Investment Manager, any of its delegates and/or any of their Connected Persons for the account of the

SICAV. Brokerage rates will not be excessive of customary institutional full-service brokerage rates. All transactions will be done with best execution. The availability of soft dollar arrangements may not be the sole or primary purpose to perform or arrange transaction with such broker or dealer.

Further information in respect of fees related to investment research, including the maximum that may be charged to a fund is available at the registered office of the SICAV.

Professional Firms Engaged by the Management Company

Investment Manager

FIL Fund Management Limited
Pembroke Hall, 42 Crow Lane
Pembroke HM19, Bermuda

The Investment Manager handles the day-to-day management of each fund it manages in accordance with the stated investment objectives and policies. It is authorized to act on behalf of the SICAV and choose agents, brokers, dealers, and effect securities trades for each fund's portfolio.

The Investment Manager may receive investment advice from, and act upon the advice of, any Connected Person of the Investment Manager or any other third party adviser. Moreover, the Investment Manager may sub-delegate investment management activities to any Connected Person of the Investment Manager or any other eligible entity under applicable regulation. The Investment Manager shall remain responsible for the proper performance by such entity of those responsibilities.

The Investment Manager may sub-delegate Investment management to the following entities (including their branches). The annual and semi-annual reports list all entities having managed assets of each fund over the last six or twelve months.

Geode Capital Management,
LLC 100 Summer Street, 12th Floor
Boston, MA 02110, USA

Geode Capital Management, LLC has been appointed as sub-Investment Manager for Fidelity Funds – Euro 50 Index Fund.

In addition, Geode Capital Management, LLC may also manage any of the assets of the following funds: Fidelity Funds - Absolute Return Multi Strategy Fund, Fidelity Funds - European Multi Asset Income Fund; Fidelity Funds - Global Multi Asset Income Fund; Fidelity Funds – Global Multi Asset Dynamic Fund; Fidelity Funds - Global Multi Asset Growth & Income Fund; Fidelity Funds - Global Multi Asset Defensive Fund; Fidelity Funds - Global Thematic Opportunities Fund, Fidelity Funds – Global Multiple Opportunities Fund; Fidelity Funds - Multi Asset Dynamic Inflation Fund; Fidelity Funds - Fidelity Target™ 2025

Fund; Fidelity Funds – Fidelity Target™ 2030 Fund; Fidelity Funds – Fidelity Target™ 2035 (Euro) Fund; Fidelity Funds – Fidelity Target™ 2040 (Euro) Fund; Fidelity Funds – Fidelity Target™ 2045 (Euro) Fund; Fidelity Funds – Fidelity Target™ 2050 (Euro) Fund; Fidelity Funds – Fidelity Target™ 2055 (Euro) Fund; and Fidelity Funds – Fidelity Target™ 2060 (Euro) Fund. The Investment Manager may decide to allocate to Geode Capital Management, LLC such portion of the assets of these funds as it deems appropriate. The decision to allocate any portion of the assets, as well as the size of such allocation, will be based on a qualitative and quantitative selection process involving various criteria such as portfolio management experience, risk appetite, strategy, style or historical performance as well as suitability with regards to the investment objectives, policies and risk profile of the various funds. In any event, the portion of the funds' assets which may be allocated to Geode Capital Management, LLC shall remain ancillary in respect of all these funds. While the Investment Manager will develop the overall strategy for the relevant funds, including the establishment of appropriate investment guidelines, Geode Capital Management, LLC will be responsible for the day-to-day investment decisions of the assets under its management, in continued compliance with the investment objectives and policies of the relevant funds.

The Investment Manager may supplement, replace or terminate the appointment of Geode Capital Management, LLC from time to time and/or reallocate assets of the funds among sub-investment managers without prior notice to Shareholders in circumstances where the Investment Manager believes that such action is necessary or desirable.

General distributor

FIL Distributors
Pembroke Hall, 42 Crow Lane Pembroke HM19, Bermuda
Phone +1 441 297 7267
Fax +1 441 295 4493

The General Distributor is responsible for marketing, sales or distribution of shares in the SICAV.

Other distributors and agents

The General Distributor may engage FIL Group companies as well as third parties as local distributors, dealing facilities or representatives in certain countries or markets. The Management Company may act as a distributor as well as a dealing agent.

In some countries, use of an agent is mandatory, and the agent may not merely facilitate transactions but may hold shares in its own name on behalf of investors. Distributors can act as nominees, which may affect your rights as an investor.

Appendix to the Partial Prospectus for Switzerland – Information for investors in Switzerland

Representative and paying agent in Switzerland

BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich.

Place where the relevant documents may be obtained

The Partial Prospectus for Switzerland, key information documents, the articles of association as well as the annual and semi-annual reports of the Fund may be obtained free of charge from the Representative.

Publications

Publications in respect of the Fund must be made in Switzetrland on the electronic platform www.fundinfo.com.

The issue and the redemption prices, respectively the Net Asset Value together with a footnote stating "excluding commissions" of all relevant Share classes will be published daily on the electronic platform www.fundinfo.com.

Payment of rebates and retrocessions

In the case of distribution activity in Switzerland, the General Distributor and its agents may, where applicable and upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question.

The payment of rebates, where applicable, is permitted provided that:

- they are paid from fees received by the Investment Manager and therefore do not represent an additional charge on the Fund assets;
- they are granted on the basis of objective criteria;
- all investors who meet these objective criteria and demand rebates are also granted these within the same timeframe and to the same extent.

The objective criteria for the granting of rebates (if applicable) may include the following:

- the value subscribed by the investor or the total volume they hold in the collective investment scheme or, where applicable, in the product range of the promoter;
- the amount of the fees generated by the investor;
- the investment behaviour shown by the investor (e.g. expected investment period);
- the investor's willingness to provide support in the launch phase of a collective investment scheme.

At the request of the investor, the General Distributor and its agents shall disclose the amounts of such rebates (if applicable) free of charge.

The General Distributor and its agents may pay retrocessions as remuneration for distribution activity in respect of the Shares in Switzerland. This remuneration may be deemed payment for distribution services which may include the following (without limitation):

- Keeping a supply of marketing and legal documents;
- Forwarding or providing access to legally required publications and other publications;
- Clarifying and answering specific questions from investors pertaining to the Fund;
- Drawing up fund research material; and
- Client relationship management.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. Disclosure of the receipt of retrocessions is based on the provisions of the Financial Services Act (FinSA).

Place of performance and jurisdiction

In respect of the Shares proposed in Switzerland, the place of performance is the registered office of the Representative while the place of jurisdiction is at the registered office of the Representative or at the seat/domicile of the investor.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - FIRST All Country World Fund

Legal entity identifier:
549300AT2RPDETJ66407

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

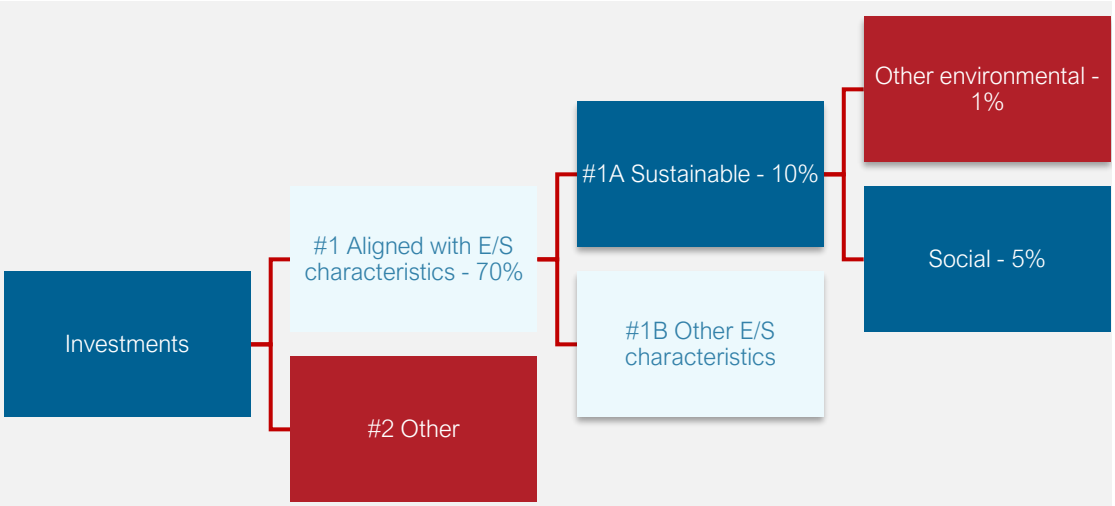

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

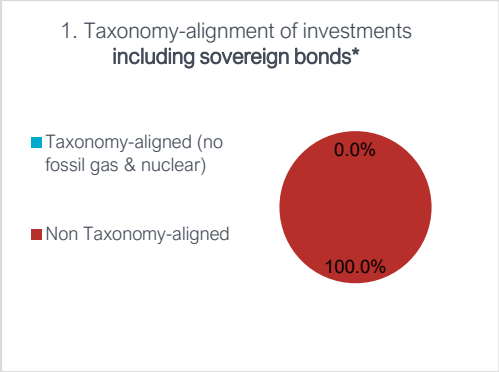

☒ No

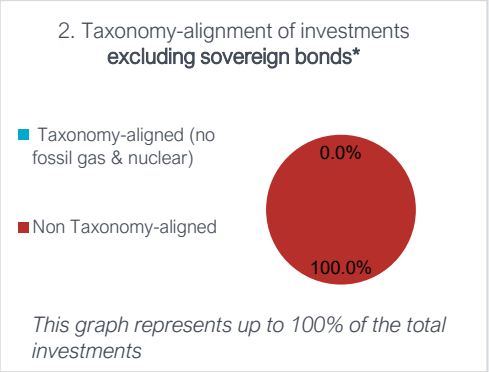

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0267387255/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

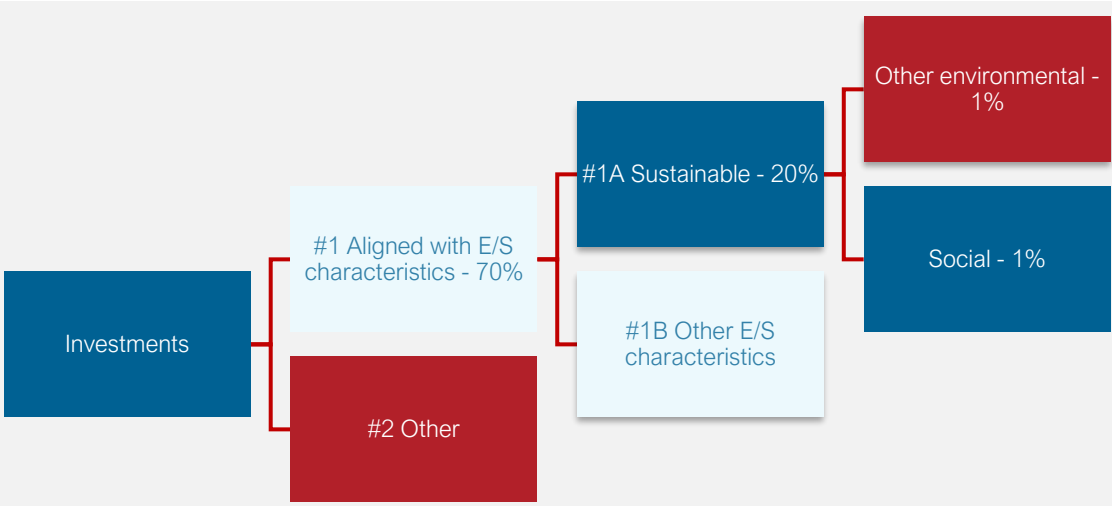

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[2]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

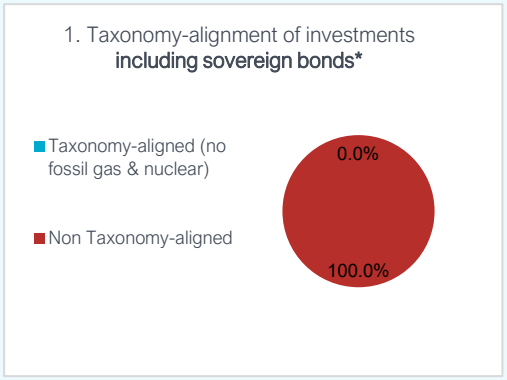

☒ No

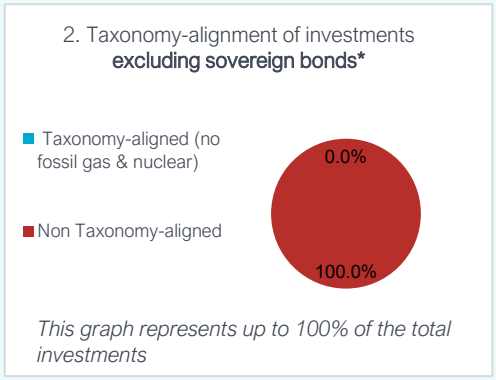

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[2] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1261431768/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Defensive Equity Fund

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

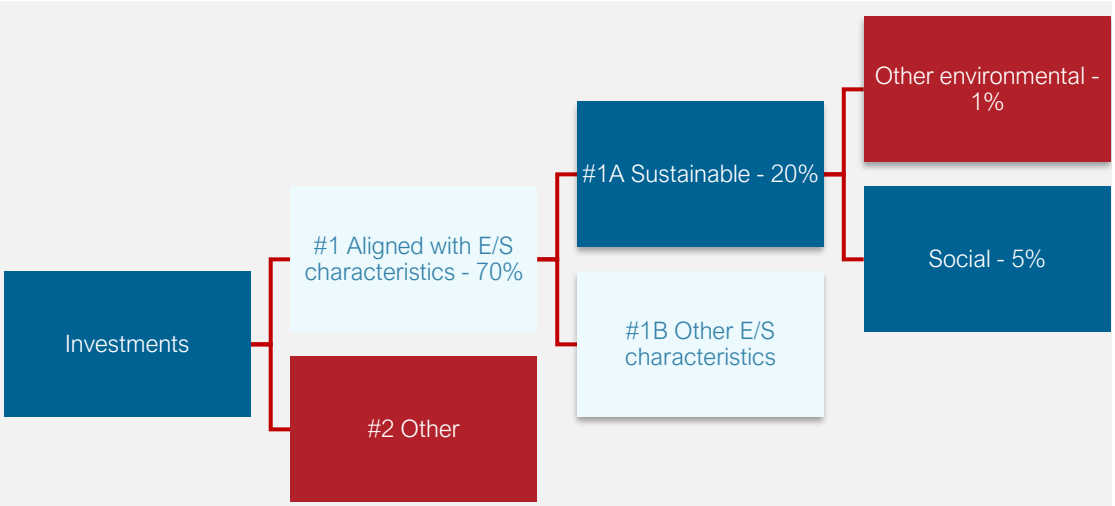

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[3]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

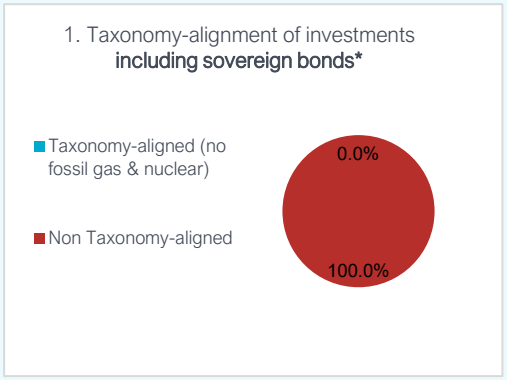

☒ No

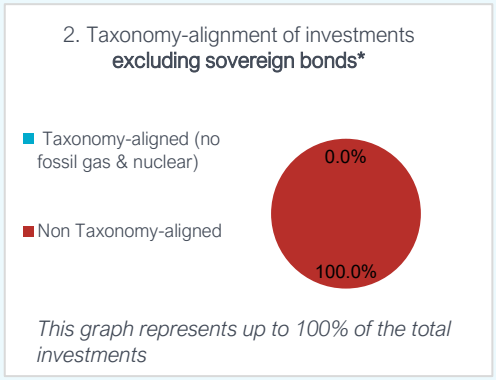

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[3] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1084165130/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments; and
(iv) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,

3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to

help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;

(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 5% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[4]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

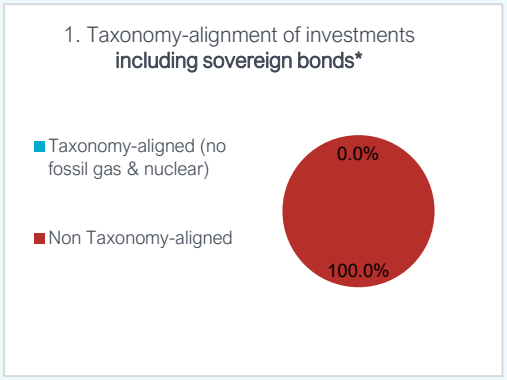

☒ No

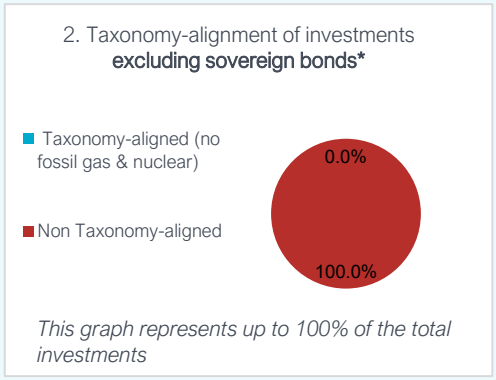

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund does not intend to make sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[4] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1391767586/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Focus Fund

Legal entity identifier:
549300F4JJCOV7BCT788

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

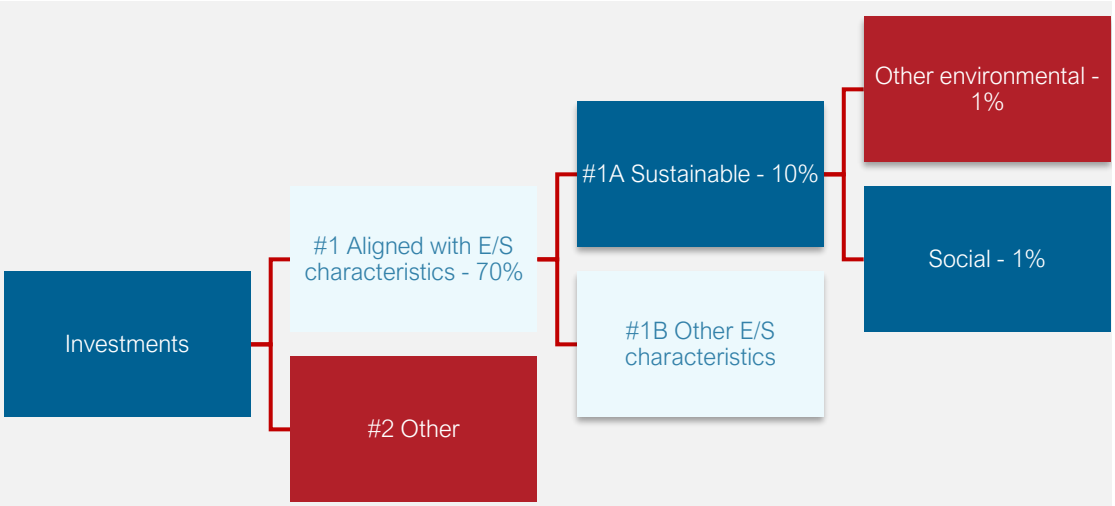

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[5]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

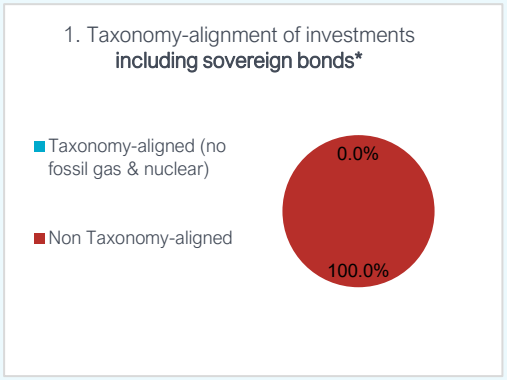

☒ No

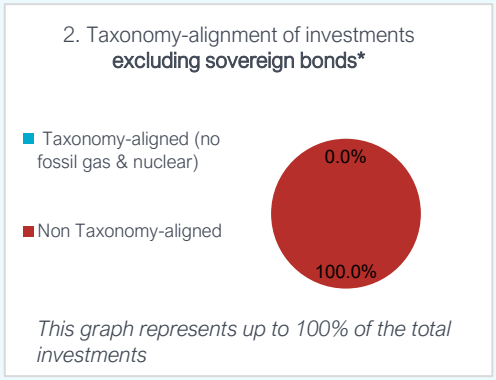

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[5] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1366333091/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Founders Fund

Legal entity identifier:
254900B4R5J7N0865R59

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio better than the ESG score of the fund's investment universe. The investment universe comprises of equities of companies from anywhere in the world, including emerging markets, in which a founder, their family or foundation exerts significant influence by virtue of management or board representation or has an economic interest in the share capital, or where the subsequent management are considered by the Investment Manager to demonstrate the same managerial qualities.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to the Investment Manager's ESG ratings and/or ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation.

The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to achieve a better ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with better ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG research* - The Investment Manager references ESG research which incorporates consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - The Investment Manager uses engagement as a tool to better understand principal adverse impacts.

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

The Investment Manager takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio that is better than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to the ESG Tilt exclusion requirements which incorporate:

1. an exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio better than that of the investment universe.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed may include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression may be included.

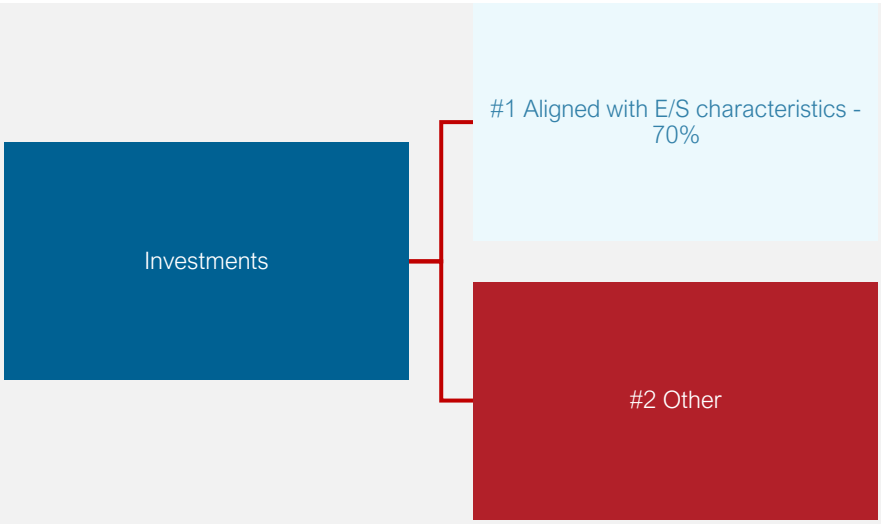

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[6]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

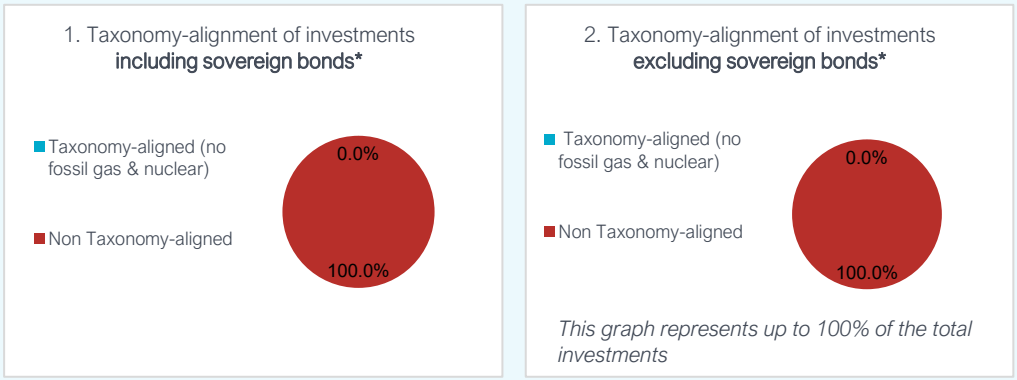

[6] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website:
https://www.fidelity.lu/funds/factsheet/LU3287330560/tab-disclosure#SFDR-disclosure.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Technology Fund

Legal entity identifier:
549300TVS03JI4WXGJ44

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

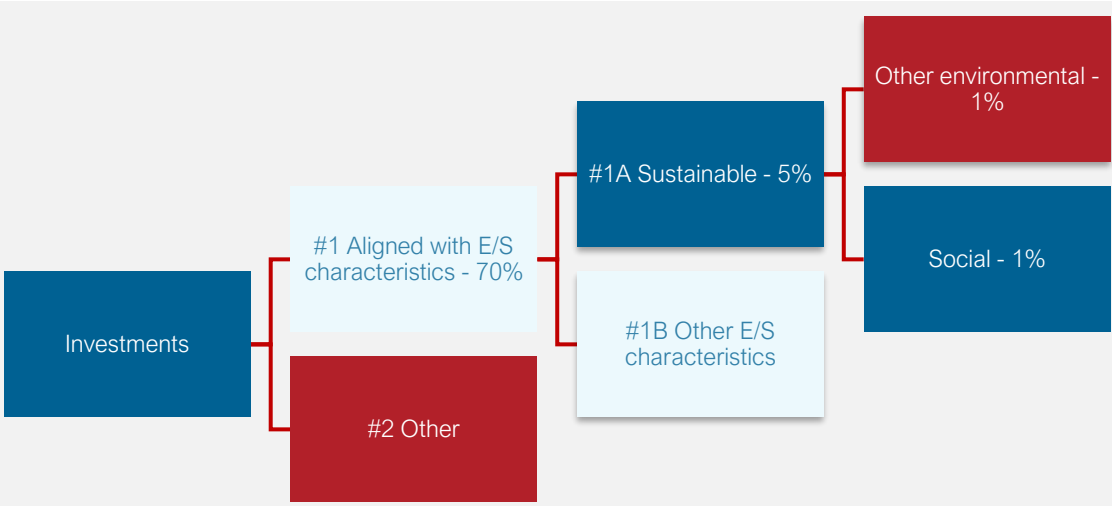

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[7]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

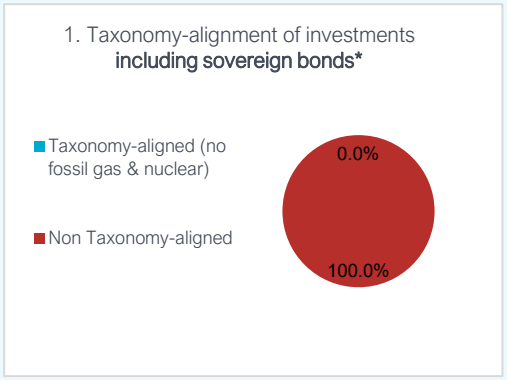

☒ No

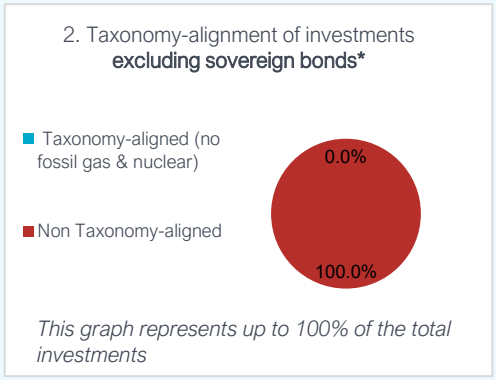

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[7] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1213836080/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Thematic Opportunities Fund

Legal entity identifier:
5493007VVU2XBPB4GZ92

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve long-term capital growth from a portfolio primarily made up of securities of companies throughout the world including emerging markets. The fund aims to invest in multiple long-term market themes by investing in securities that may benefit from structural and/or secular (i.e. long term and not cyclical) changes in economic and social factors, such as disruptive technologies, demographics and climate change. Secular changes generally last for ten years or more and can lead to structural changes.

Disruptive technologies are innovations that meaningfully change consumer, industry or company behaviour. Demographic trends are long-term dynamics including those related to ageing population (including companies relating to healthcare and retirement consumption), growth of the middle class (companies exposed to increased consumption, increasing financial services and urbanization), and population growth (including companies exposed to scarcity of resources and need for improving productivity and automation). The Investment Manager has the discretion on the choice of themes the fund invests in.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C

or above, or a Fidelity ESG rating of C or above;
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 15% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 3% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

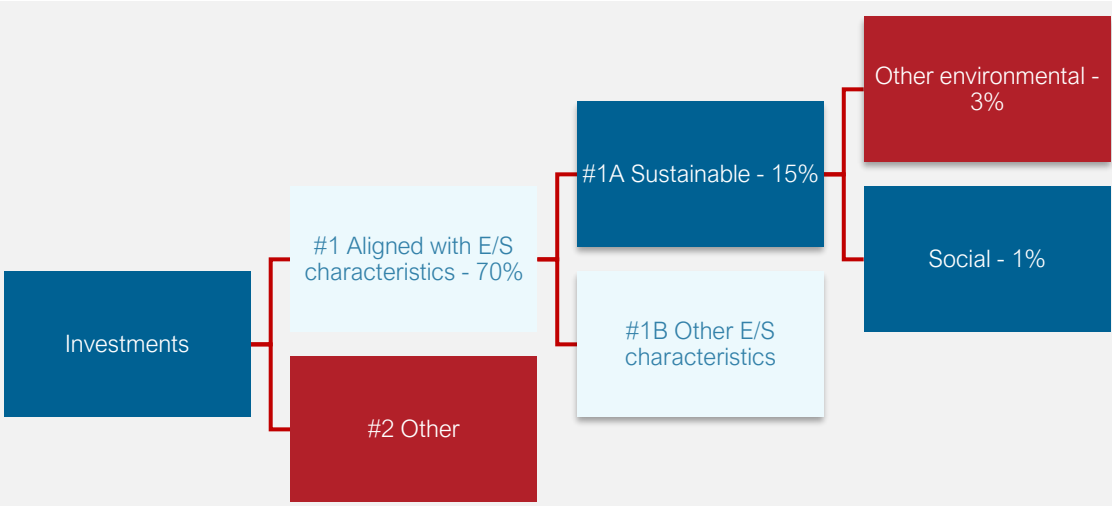

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 15% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 3% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[8]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

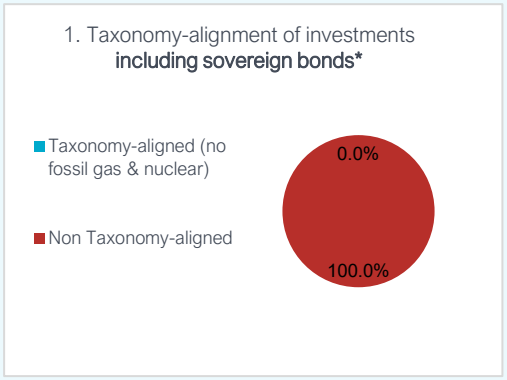

☒ No

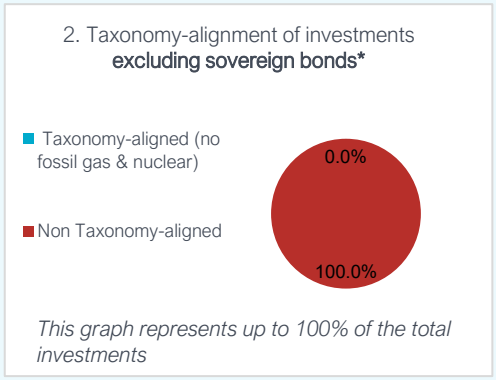

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 3% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[8] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251129895/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Institutional Global Focus Fund

Legal entity identifier:
5493003YW9GXTX4AB509

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

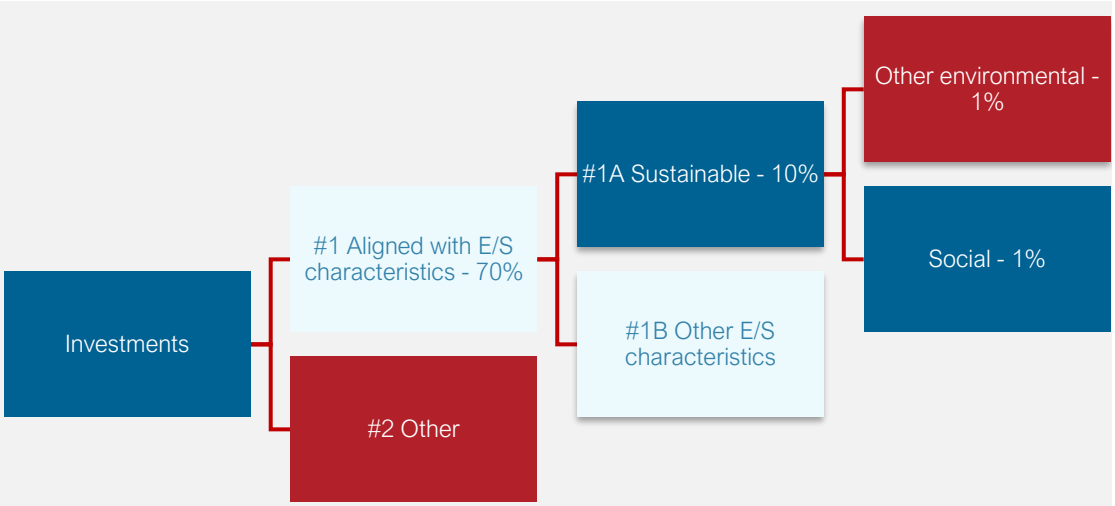

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[9]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

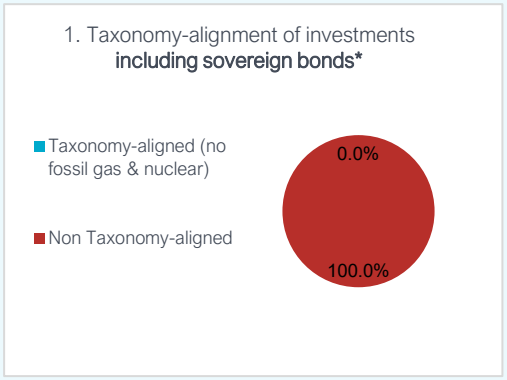

☒ No

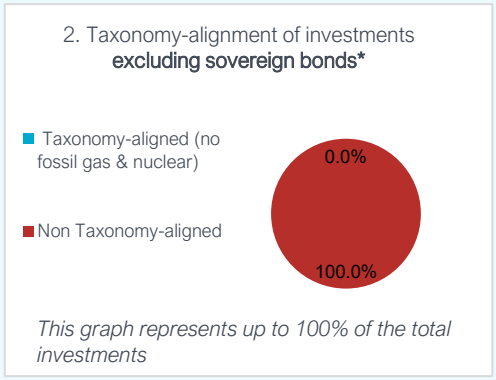

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[9] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0287143605/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in

activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and

corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 30% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

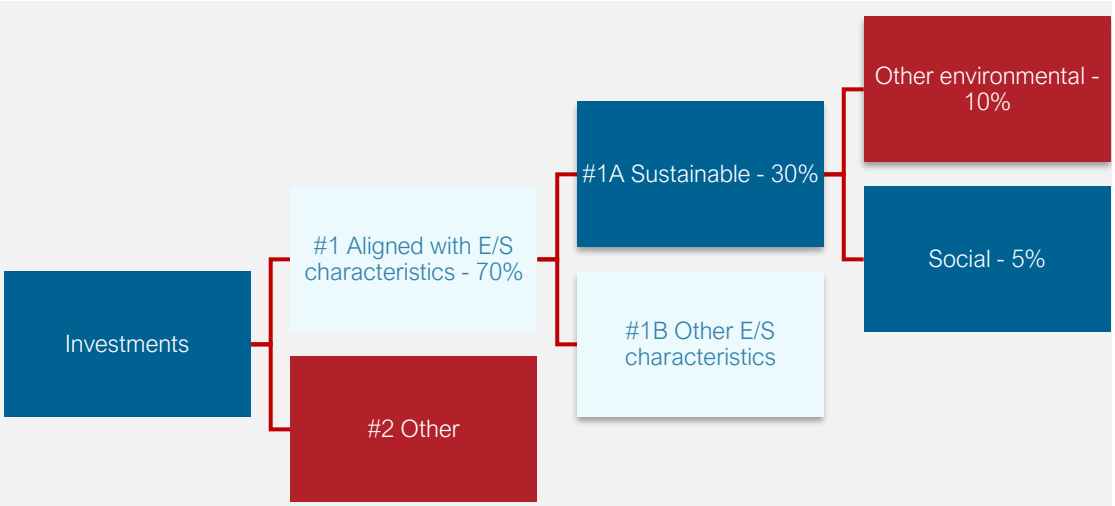

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 30% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[10]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

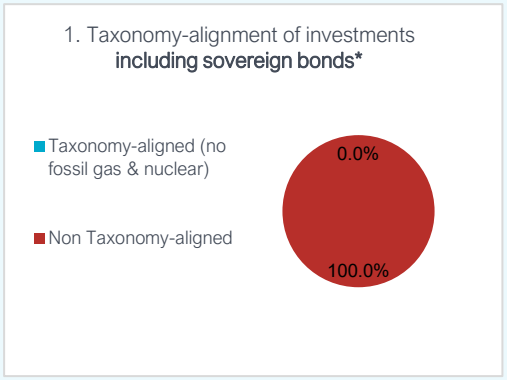

☒ No

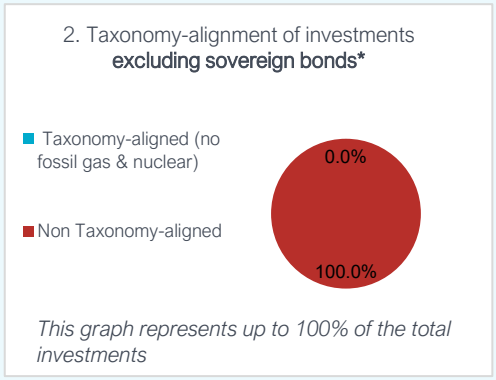

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 10% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[10] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1805238125/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Climate Solutions Fund

Legal entity identifier:
254900B74W1FPUZXHK46

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● [X] **Yes** ●○ [ ] **No**

[X] It will make a minimum of sustainable investments with an environmental objective: 31%

- [X] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[X] It will make a minimum of sustainable investments with a social objective: 3%

[ ] It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promotes E/S characteristics, but will not make sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The fund aims to achieve capital growth over the long term by investing in sustainable investments.

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Fidelity INTERNATIONAL

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No ESG reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

The fund uses the following sustainability indicators in order to measure the sustainable investment objective is met:

(i) the percentage of the fund invested in sustainable investments;
(ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
(iv) the percentage of the fund invested in sustainable investments with a social objective; and
(v) the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions (defined below).

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Norms-based screens are applied - issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve capital growth over the long term by pursuing sustainable investments.

The fund invests at least 70% of its assets in equities of companies. The fund aims to invest in sustainable investments that contribute to environmental or social objectives which are aligned with one or more SDGs. The fund aims to invest in companies which contribute to climate change mitigation and adaptation. This includes companies enabling decarbonisation via technologies and solutions which materially reduce greenhouse gas (CO2 eq) emissions or which contribute to decarbonization through clean energy solutions and other low-carbon technologies, as well as companies that develop products, services, or infrastructure which aim to enhance resilience to climate change impact, such as water management solutions, fire protection and cooling systems.

In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing the ESG profile and SDG alignment fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

The Investment Manager aims to be an active owner and engage with companies held within the fund to influence positive change.

Key components of the investment strategy are:

(i) Sustainable investments; A minimum of 80% of the assets will be sustainable investments.
(ii) Contributing to environmental or social objectives aligned with one or more SDGs; All companies in the fund must have a portion (greater than zero) of business activities which contribute to environmental or social objectives aligned with SDGs.
(iii) Investing in companies which are enabling global decarbonisation via technologies and solutions which materially reduce greenhouse gas (CO2 eq) emissions versus incumbent technologies.
(iv) Do No Significant Harm; The fund applies the "do no significant harm" criteria, as set out above, to all direct investments held within the fund.
(v) Minimum safeguards; The fund excludes direct investments that fail to conduct their business in accordance with accepted international norms, including as set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions.
(vi) Good governance; All investee companies in the fund will be screened for controversies, including tax and bribery and corruption screenings.
(vii) Exclusions; In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

- norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
- negative screening of certain sectors, companies or practices based on specific ESG criteria where revenue thresholds may be applied; and

3. Paris Aligned Benchmark exclusions.

The Investment Manager has discretion to implement additional exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The fund will invest a minimum of 80% of its assets in sustainable investments of which a minimum of 1% have an environmental objective which is aligned with the EU Taxonomy, a minimum of 30% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 3% have a social objective;

provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices.

In attaining the sustainable investment objective, the fund commits to selecting companies whose economic activity contributes to an environmental or social objective as described in the investment strategy section above.

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The fund will systematically apply the Exclusions as described above.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

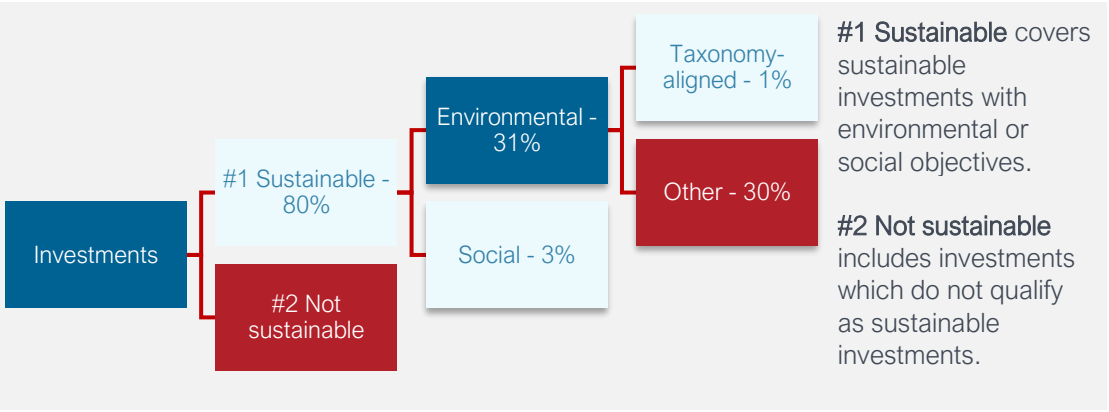

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

(#1 Sustainable) The fund will invest a minimum of 80% of its net assets in sustainable investments of which a minimum of 1% have an environmental objective which is aligned with the EU Taxonomy, a minimum of 30% will have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 3% will have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

How does the use of derivatives attain the sustainable investment objective?

Where the underlying security upon which a derivative is based is deemed to contribute to the sustainable objective of the fund, the exposure of the derivative may be used to contribute to the attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[11]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

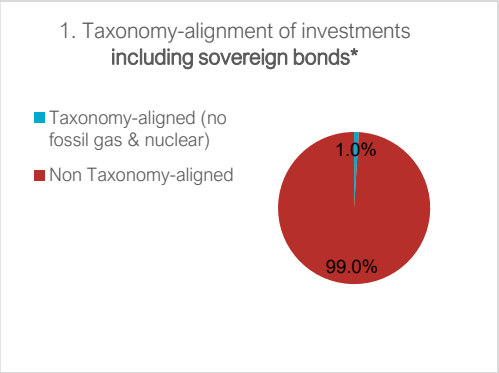

[11] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

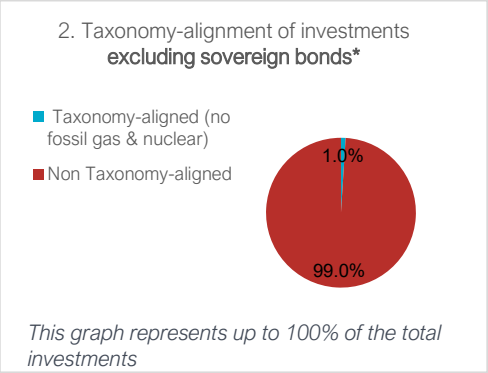

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents up to 100% of the total investments

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 30% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of sustainable investments with a social objective?

The fund invests a minimum of 3% in sustainable investments with a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Investments included under "#2 Not sustainable" may include cash, money market instruments, investments used for hedging and efficient portfolio management purposes.

In addition, all direct investments of the fund must adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and must not affect the delivery of the sustainable investment objective.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No ESG reference benchmark has been designated to meet the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2376061086/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Demographics Fund

Legal entity identifier:
549300RRAN0KBNO4IG54

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings.
ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark. The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund invests in equity securities of companies throughout the world that are able to benefit from demographics changes. Investments will include, but are not limited to, health care and consumer industries companies that stand to benefit from the effects of rising life expectancy, expanding middle class and population growth.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing

norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC.
Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests in companies exposed to demographic trends to drive attractive returns over time. These are rising life expectancy, expanding middle class and population growth. An assessment of companies fundamental and sustainability credentials is conducted as part of the process.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC;
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Climate Transition Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework

(fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 50% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 15% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

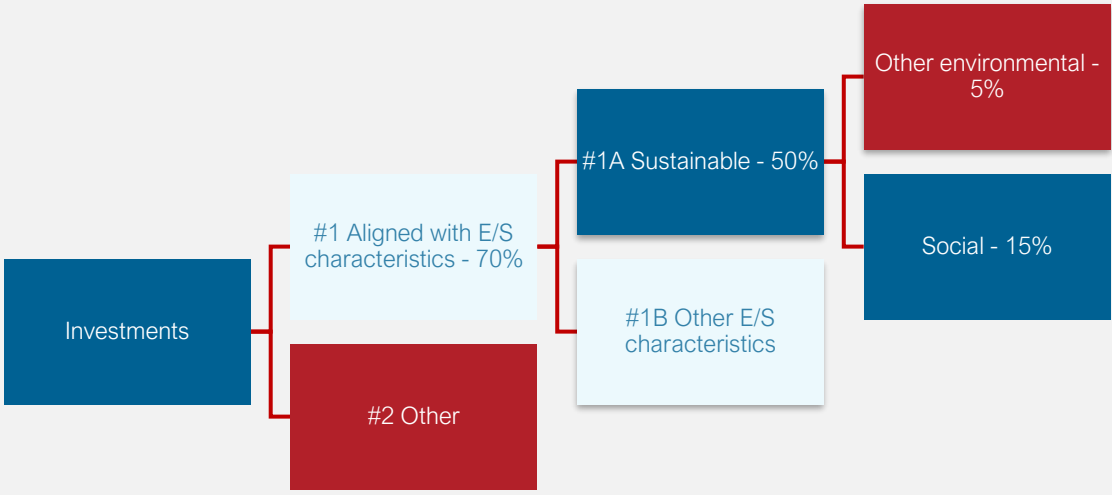

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.
2. a minimum of 50% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 15% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[12]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

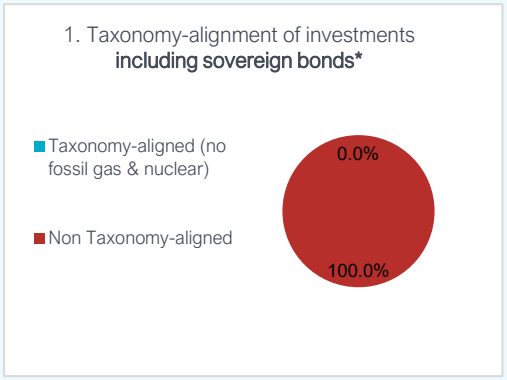

☒ No

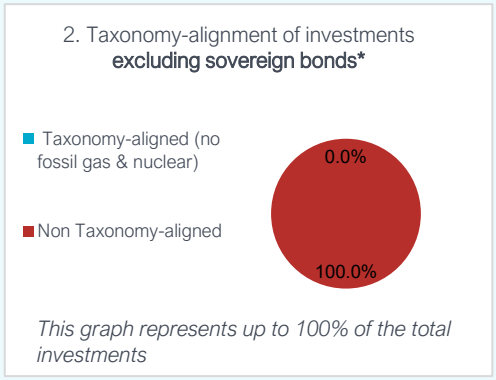

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 15% in sustainable investments with a social objective.

[12] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0528227936/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Technology Opportunities Fund

Legal entity identifier:
2549000BDP4X7X1C9A86

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

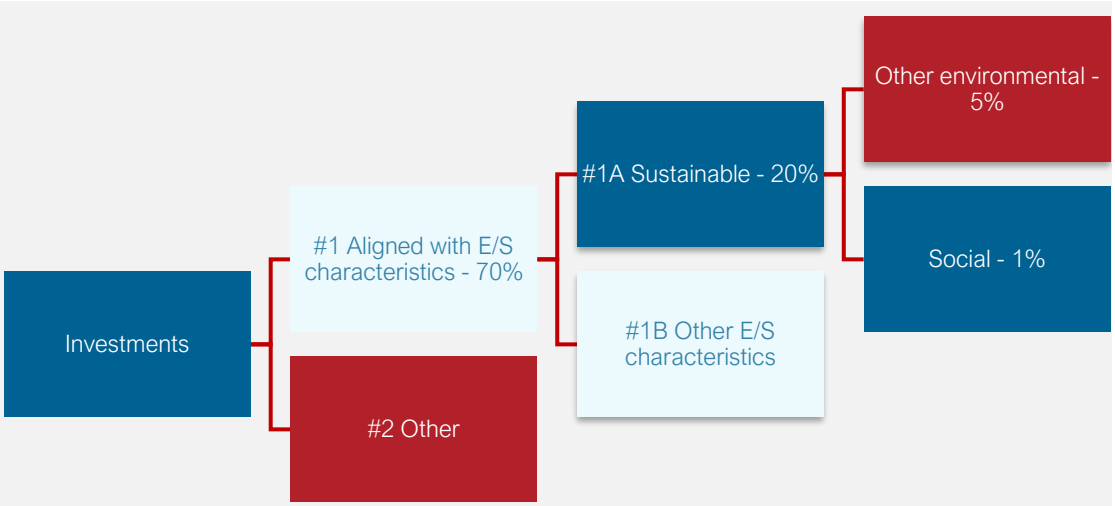

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
2. a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[13]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

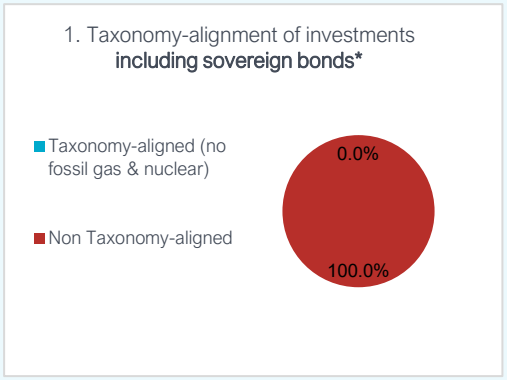

☒ No

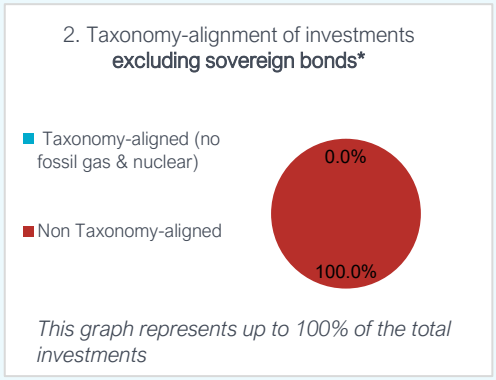

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[13] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1881514001/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Dividend Plus Fund

Legal entity identifier:
549300OZL7XSDZJCL571

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in securities of issuers with high ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics ESG including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund invested in securities of issuers with high ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition maybe updated from time to time.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to invest:

(i) a minimum of 80% of its assets in issuers with high ESG ratings;
(ii) a minimum of 25% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

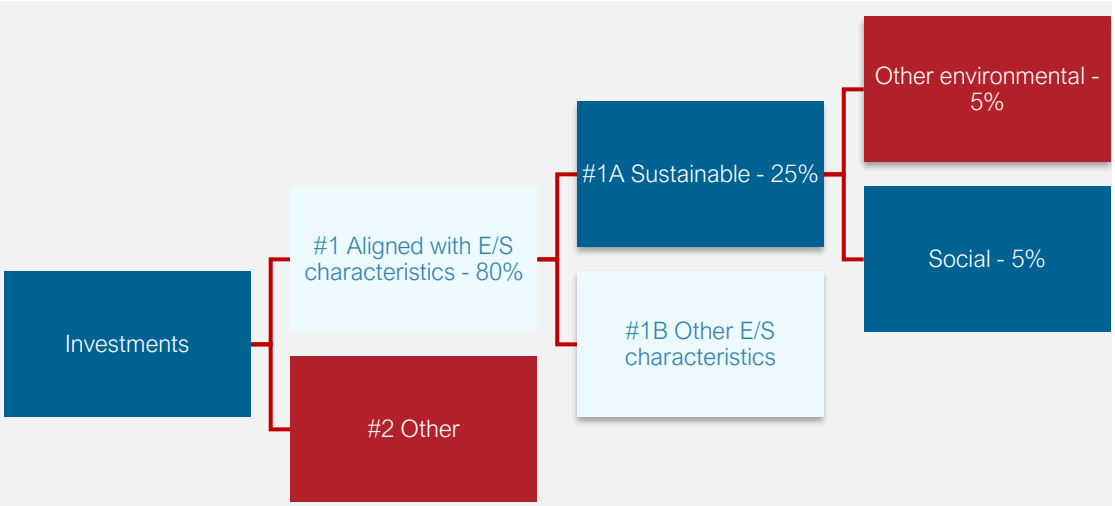

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in securities of issuers with high ESG ratings;
2. a minimum of 25% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[14]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

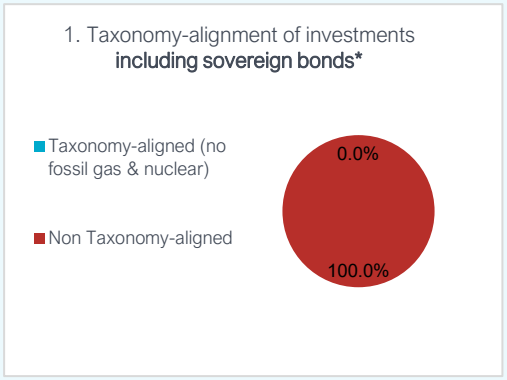

☒ No

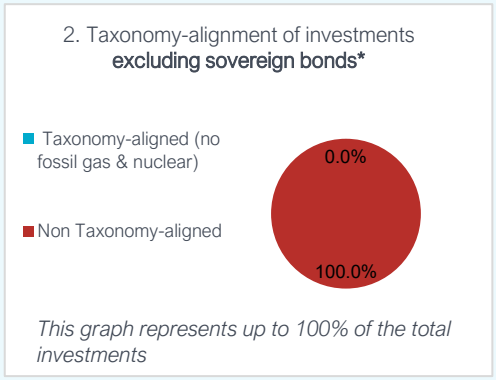

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[14] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261951957/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Structural Growth Fund

Legal entity identifier:
254900ZLPYL62LFL9B37

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve long-term capital growth from a portfolio primarily made up of securities of companies throughout the world including emerging markets. The fund aims to seek exposure to structural growth opportunities, economic or social trends which drive capital growth over the long term.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; or
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to

assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 15% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 3% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

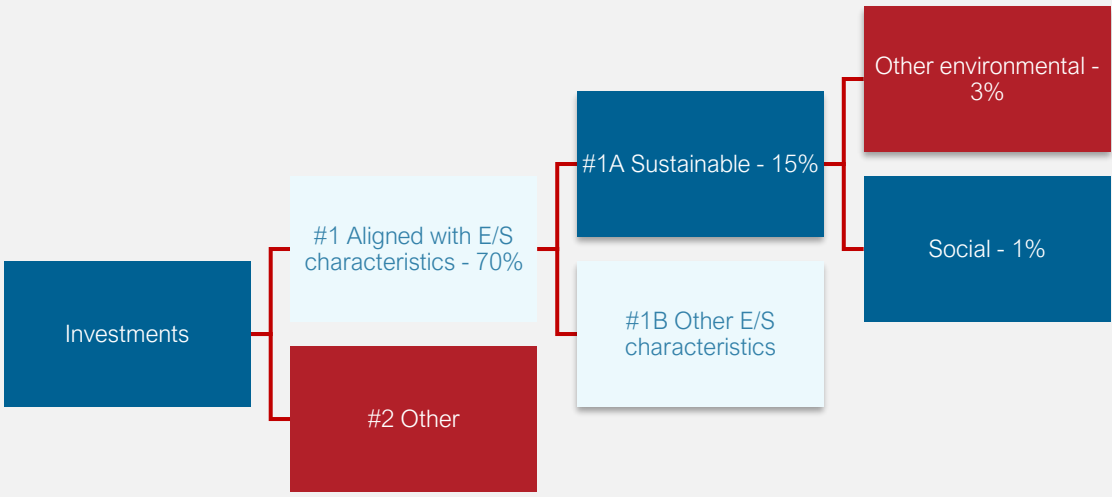

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 15% of its assets in sustainable investments **(#1A sustainable)** of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 3% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[15]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

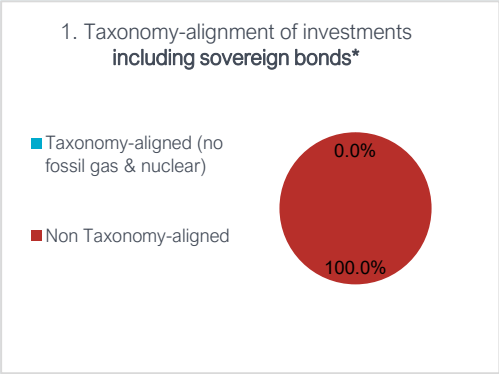

☒ No

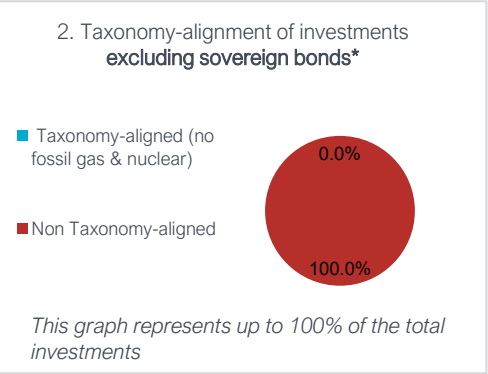

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

[15] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 3% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website:
https://www.fidelity.lu/funds/factsheet/LU3469162229/tab-disclosure#SFDR-disclosure.

Fidelity INTERNATIONAL

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Global Equity Fund

Legal entity identifier:
254900R7XPBV37D85Z68

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● [X] **Yes** ●○ [ ] **No**

[X] It will make a minimum of sustainable investments with an environmental objective: 20%

- [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[X] It will make a minimum of sustainable investments with a social objective: 20%

[ ] It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promotes E/S characteristics, but will not make sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The fund aims to achieve capital growth over the long term by investing in sustainable investments.

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals . Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No ESG reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

The fund uses the following sustainability indicators in order to measure to what extent the sustainable investment objective is met:

(i) the percentage of the fund invested in sustainable investments;
(ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
(iii) the percentage of the fund invested in sustainable investments with a social objective; and
(iv) the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions (defined below).

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Norms-based screens are applied - issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests in companies which contribute to environmental or social objectives aligned with one or more SDGs, do no significant harm, meet minimum safeguards and good governance requirements.

Within this investment universe, the Investment Manager selects stocks through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

Key components of the investment strategy are:

(i) Sustainable investments; A minimum of 80% of these assets will be sustainable investments.
(ii) Contributing to environmental or social objectives aligned with one or more SDGs; All companies in the fund must have a portion (greater than zero) of business activities which contribute to environmental or social objectives aligned with SDGs.
(iii) Do No Significant Harm; The fund applies the "do no significant harm" criteria, as set out above, to all direct investments held within the fund.
(iv) Minimum safeguards; The fund excludes direct investments that fail to conduct their business in accordance with accepted international norms, including as set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions.
(v) Good governance; All investee companies in the fund will be screened for controversies, including tax and bribery and corruption screenings.
(vi) Exclusions; In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
- norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
- negative screening of certain sectors, companies or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The Investment Manager has discretion to implement additional exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The fund will invest a minimum of 80% of its assets in sustainable investments of which a minimum of 0% have an environmental objective which is aligned with the EU Taxonomy, a minimum of 20% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% have a social objective; provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices.

In attaining the sustainable investment objective, the fund commits to selecting companies whose economic activity contributes to an environmental or social objective

aligned with one or more of the SDGs, as described in the investment strategy section above.

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 20% due to the exclusion of issuers on the basis of their ESG characteristics.

The fund will systematically apply the Exclusions as described above.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

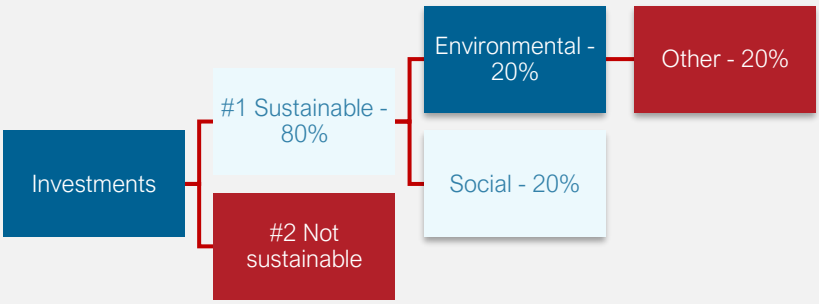

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

(#1 Sustainable) The fund will invest a minimum of 80% of its assets in sustainable investments of which a minimum of 0% will have an environmental objective which is aligned with the EU Taxonomy, a minimum of 20% will have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% will have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

How does the use of derivatives attain the sustainable investment objective?

Where the security underlying a derivative is deemed to contribute to the sustainable objective of the fund, the exposure of the derivative may be used to contribute to the attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[16]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

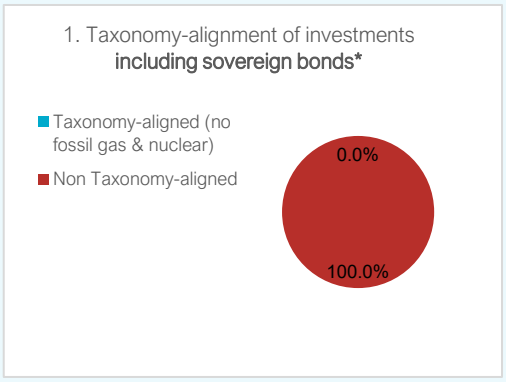

☒ No

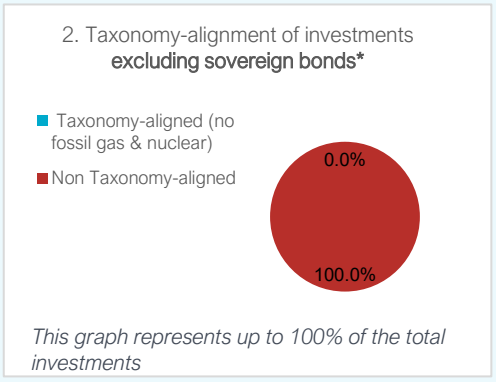

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

This graph represents up to 100% of the total investments

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

[16] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 20% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of sustainable investments with a social objective?

The fund invests a minimum of 20% in sustainable investments with a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Investments included under "#2 Not sustainable" may include cash, investments used for hedging and efficient portfolio management purposes.

In addition, all direct investments of the fund must adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and must not affect the delivery of the sustainable investment objective.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

No ESG reference benchmark has been designated to meet the sustainable investment objective.

How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website:
https://www.fidelity.lu/funds/factsheet/LU2544614741/tab-disclosure#SFDR-disclosure.

Fidelity INTERNATIONAL

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Equity Income ESG Fund

Legal entity identifier:
549300ZTEIN9RSGX1S04

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in securities of issuers with high ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund invested in securities of issuers with high ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition may be updated from time to time.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In addition, the fund aims to have lower carbon footprint compared to that of the benchmark, the MSCI ACWI Index.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC;
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to invest:

(i) a minimum of 80% of its assets in issuers with high ESG ratings;
(ii) a minimum of 25% in sustainable investments of which a minimum of 0% have an

environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

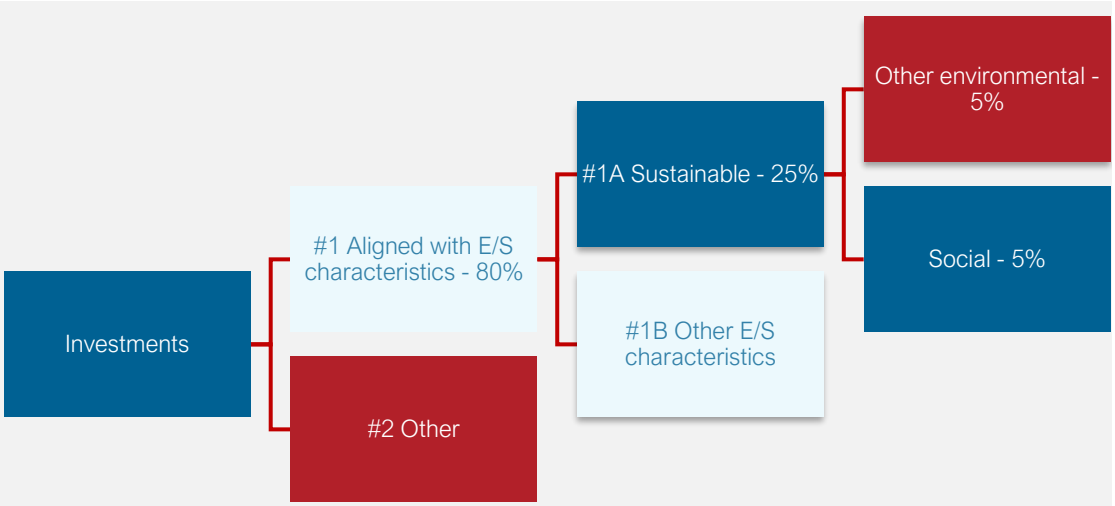

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in securities of issuers with high ESG ratings;
2. a minimum of 25% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[17]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

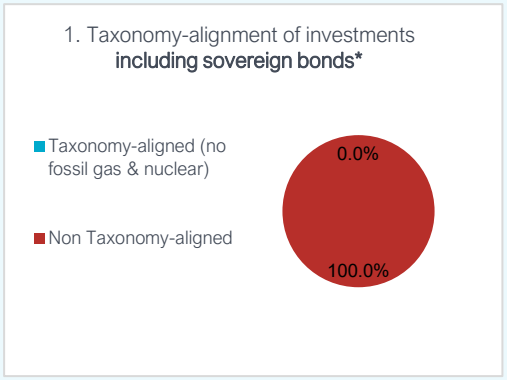

☒ No

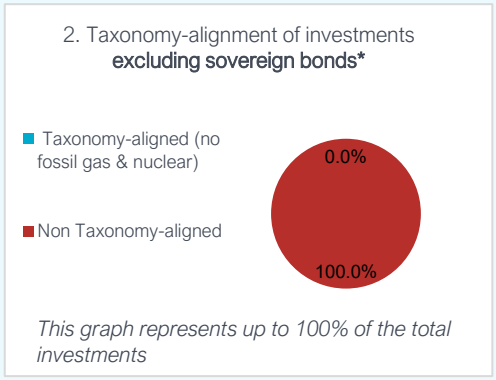

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[17] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1627197004/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 50% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in equities of companies that are involved in the design, manufacture, or sale of products and services used in connection with health care, medicine or biotechnology.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund used to meet the environmental or social characteristics promoted by the fund;
(ii) the percentage of the fund invested in securities of issuers with exposure to the

Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless

Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to

help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund employs a primarily 'thematic' investment strategy to achieve its investment objectives, which includes investing in economic themes that are expected to contribute to a sustainable economy. In addition to theme selection, fundamental research is conducted on individual issuers. As part of the research process, environmental, social and governance characteristics are considered. The factors considered relevant will vary between different issuers and industries and are integrated into investment decisions.

A minimum of 80% of the fund's investments are used to meet the environmental or social characteristics promoted by the fund.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Climate Transition Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
(ii) minimum of 50% in sustainable investments of which a minimum of 50% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
2. a minimum of 50% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 0% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 50% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative is deemed to attain the environmental and social characteristics promoted by the fund, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[18]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

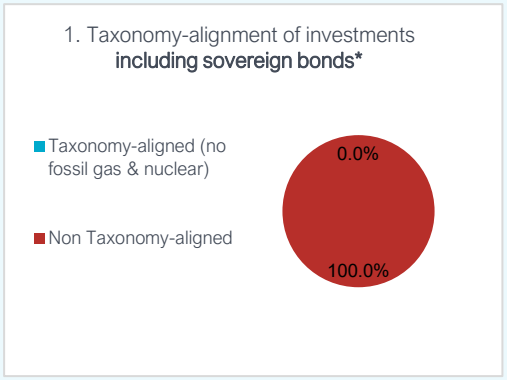

☒ No

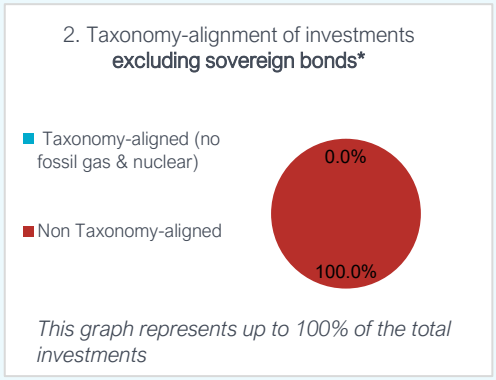

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund does not intend to make sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 50% in sustainable investments with a social objective.

[18] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261952419/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Water & Waste Fund

Legal entity identifier:
254900IZ985QWMGJH651

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 35% of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to make investments in companies that are involved in the design, manufacture, or sale of products and services used in connection with the water and waste themes.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund used to meet the environmental or social characteristics promoted by the fund;
(ii) the percentage of the fund invested in securities of issuers with exposure to the

Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts.

Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund employs a primarily 'thematic' investment strategy to achieve its investment objectives, which includes investing in economic themes that are expected to contribute to a sustainable economy. In addition to theme selection, fundamental research is conducted on individual issuers. As part of the research process, environmental and social governance are considered. The factors considered relevant will vary between different issuers and industries and are integrated into investment decisions.

The water theme includes those companies involved in water production, treatment, purification, transport and dispatching of water, the use of water for power generation, as well as solutions helping to reduce water needs. The waste theme includes those companies involved in the collection, recovery, sorting, disposal and recycling of waste as well as businesses helping to improve efficiency and reduce waste production. The waste theme also includes those companies specialising in the treatment of wastewater, sewage, solid, liquid and chemical waste and any consulting or engineering services in connection with these activities.

A minimum of 80% of the fund's investments are used to meet the environmental or social characteristics promoted by the fund.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers based on their ESG characteristics.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
(ii) a minimum of 35% in sustainable investments of which 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 15% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund's investment universe is reduced by at least 20% due to the exclusion of issuers based on their ESG characteristics.

In addition, the fund will systematically apply the Exclusions to direct investments as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

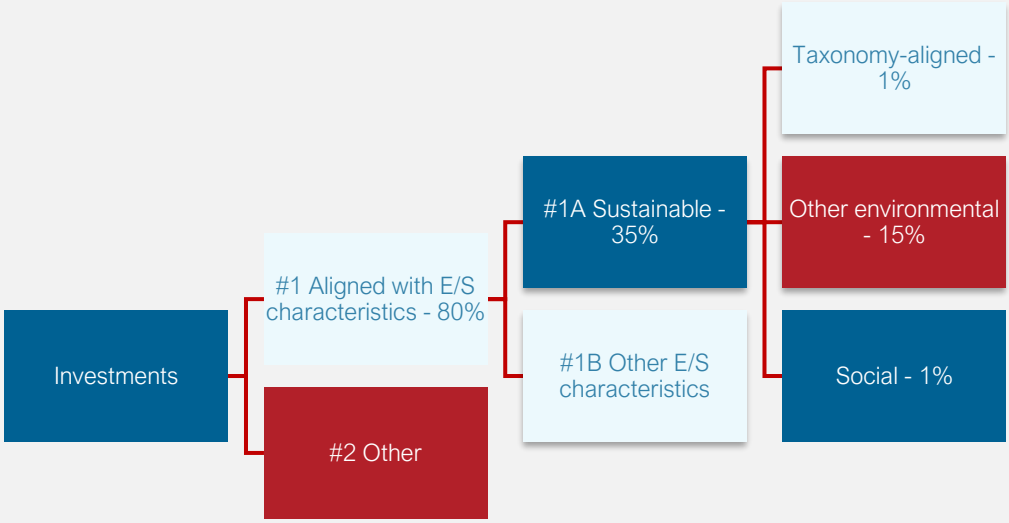

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
2. a minimum of 35% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 15% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

Asset allocation describes the share of investments in specific assets.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative is deemed to attain the environmental and social characteristics promoted by the fund, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[19]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

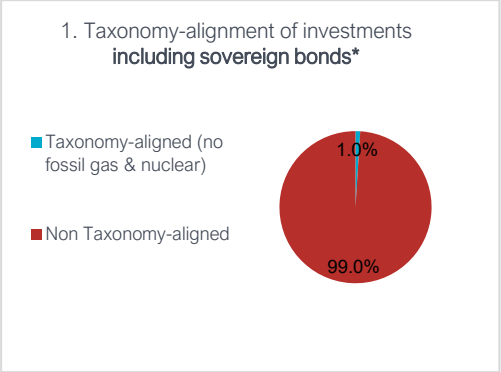

☒ No

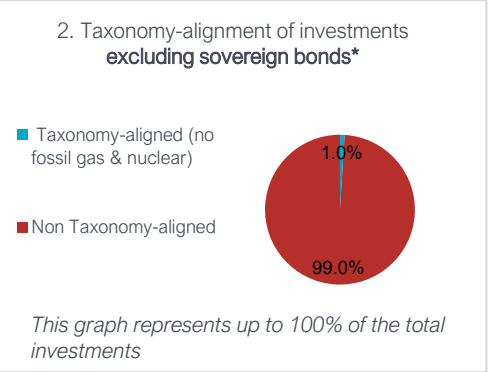

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 15% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[19] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1892829828/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

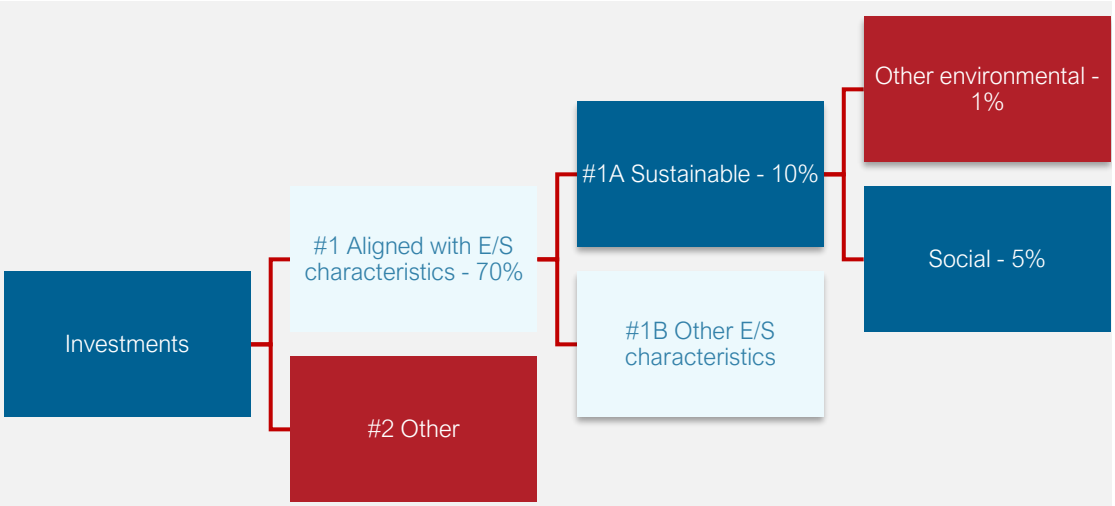

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[20]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

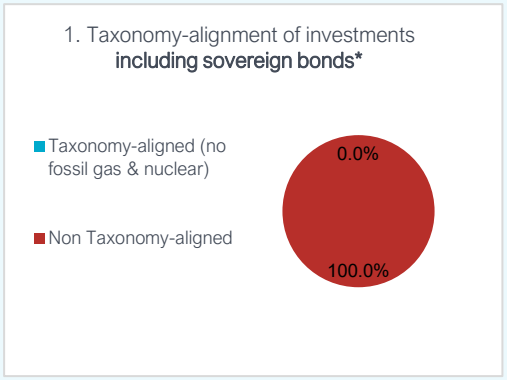

☒ No

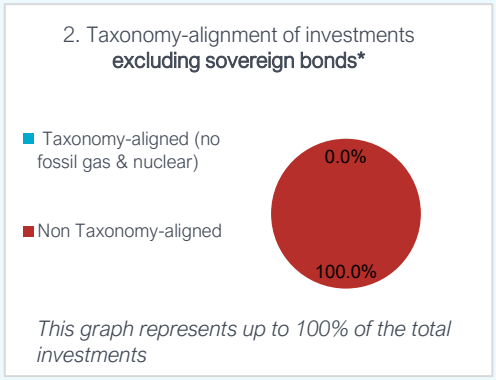

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[20] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1261432659/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

549300V54PMROCISWF43

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

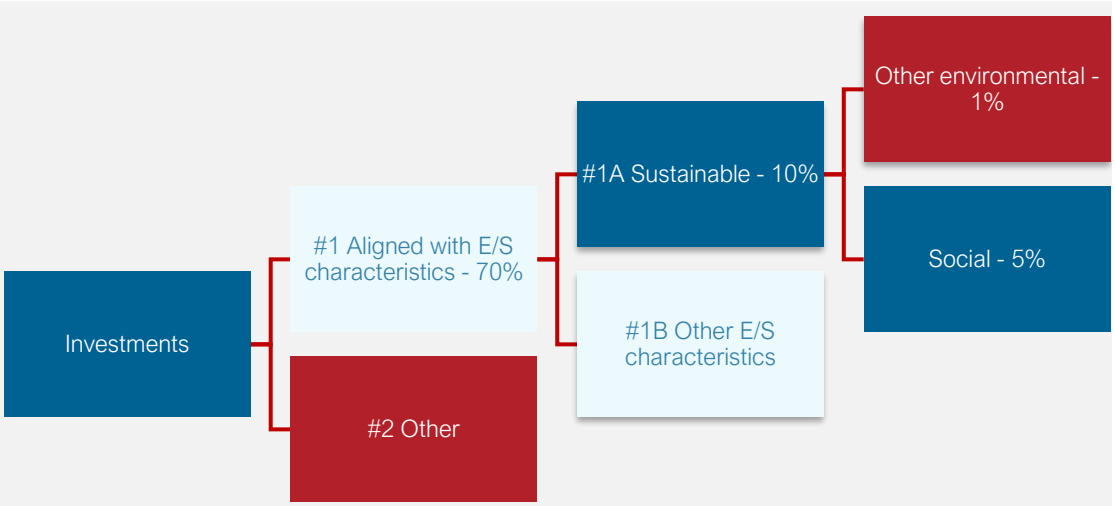

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[21]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

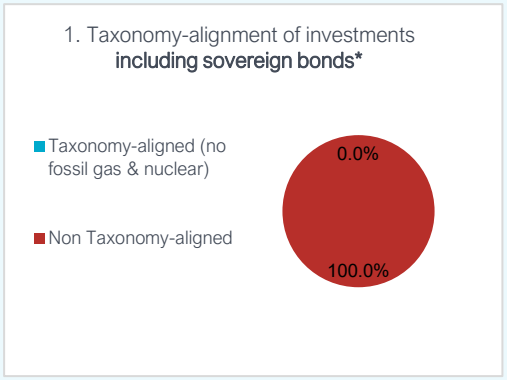

☒ No

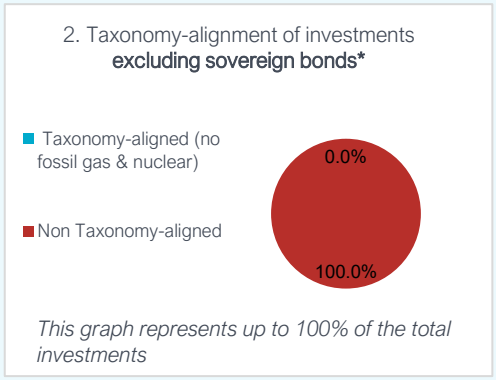

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[21] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251127410/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

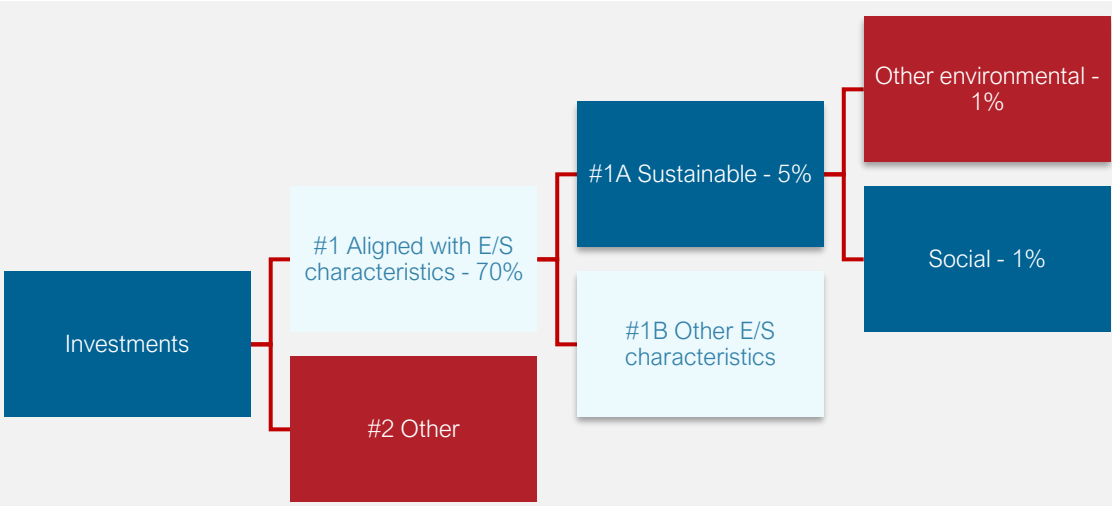

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[22]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

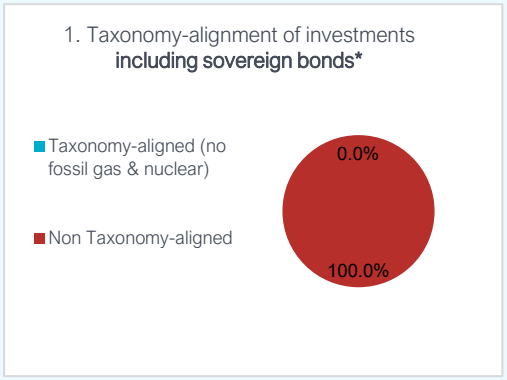

☒ No

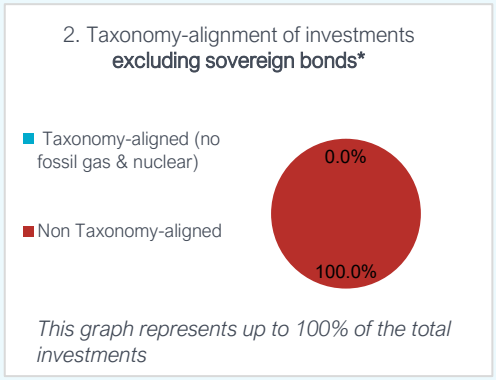

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[22] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0275692696/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Value Fund

Legal entity identifier:
549300J1XTC50ZY0Z742

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

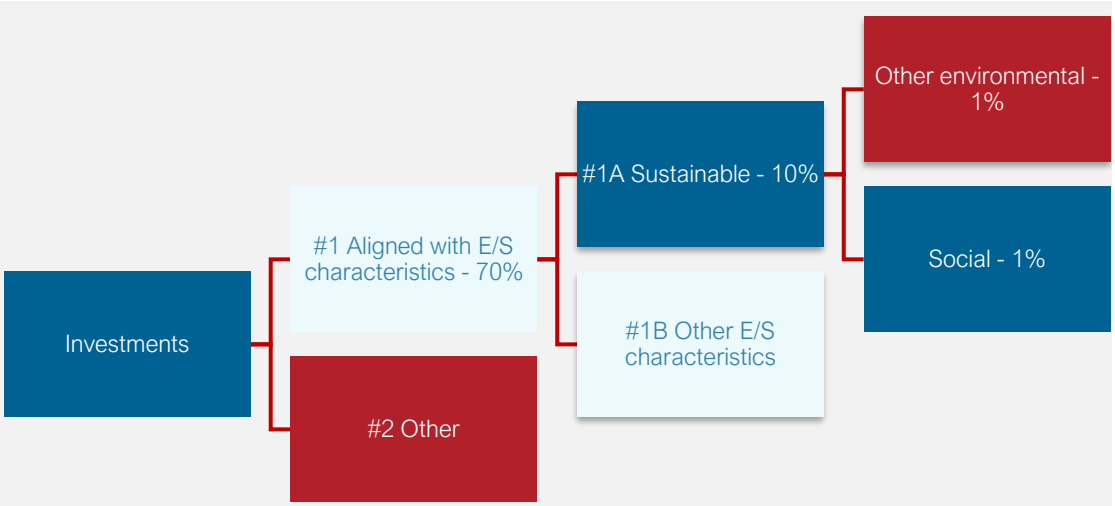

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[23]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

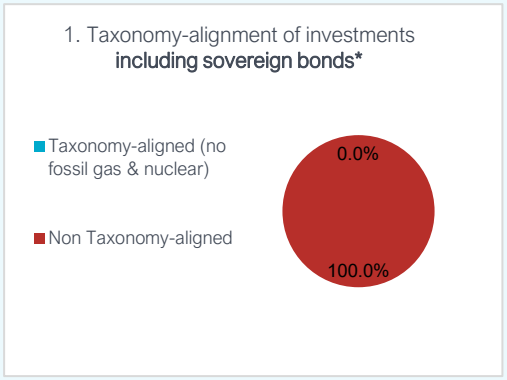

☒ No

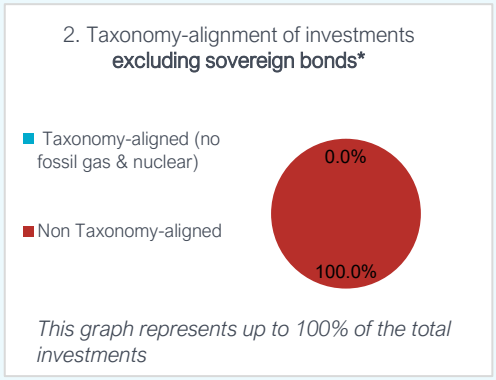

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[23] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261960354/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 25% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

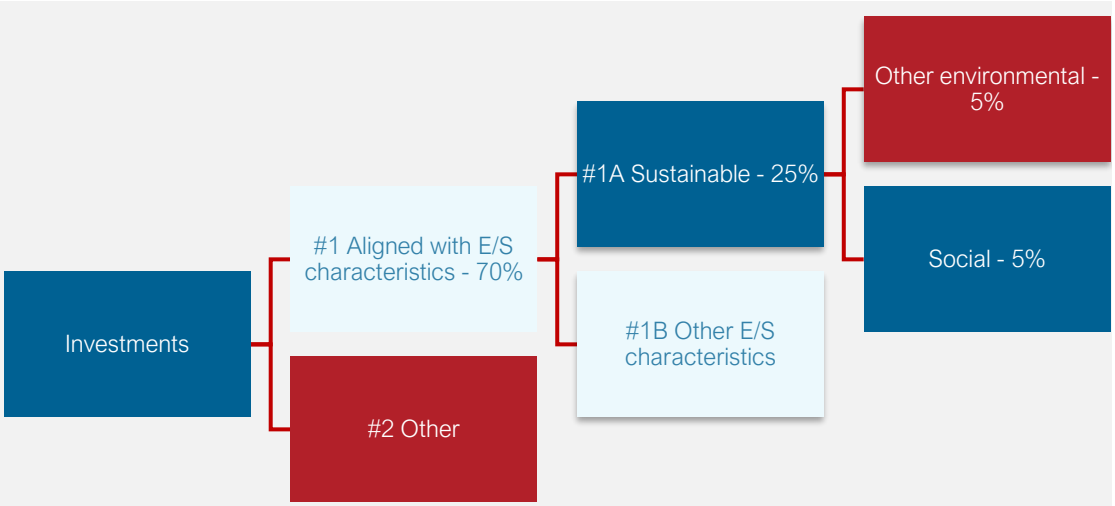

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 25% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[24]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

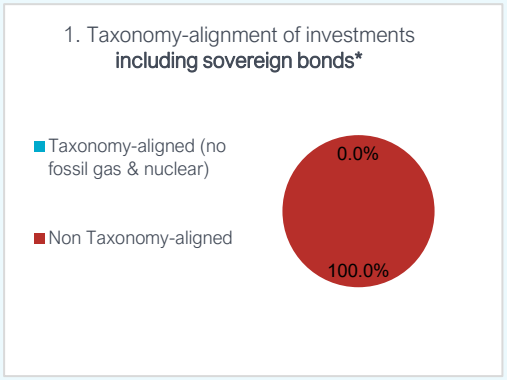

☒ No

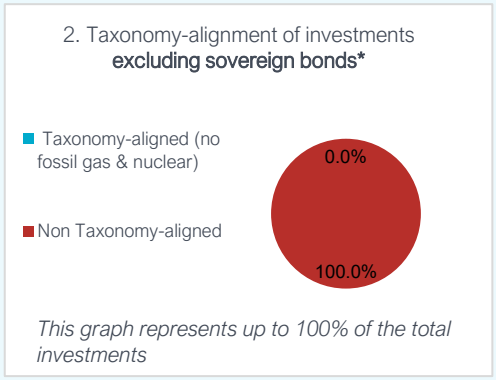

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[24] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0353647737/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Dynamic Growth Fund

Legal entity identifier:
549300YTXDJLTI9R5058

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

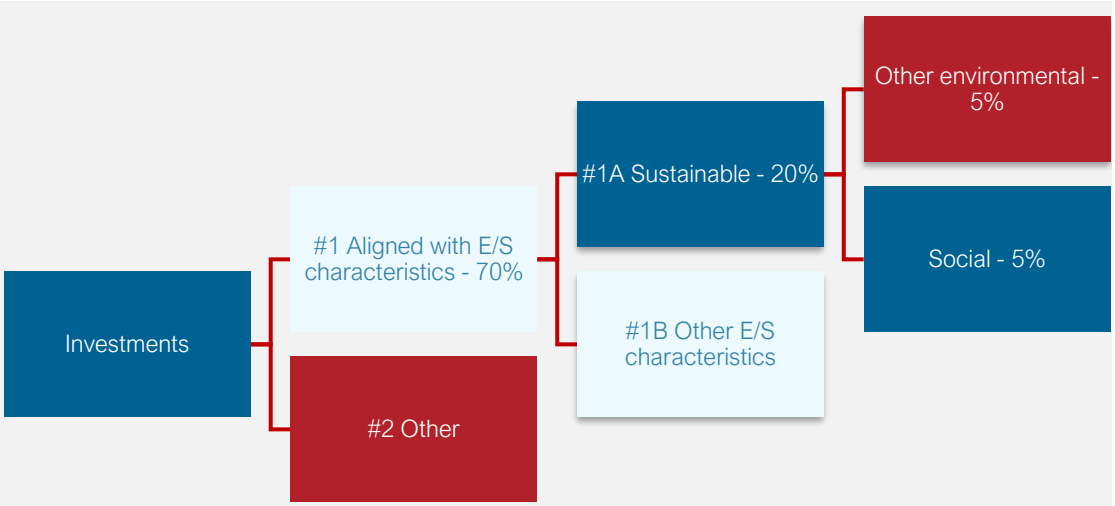

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[25]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

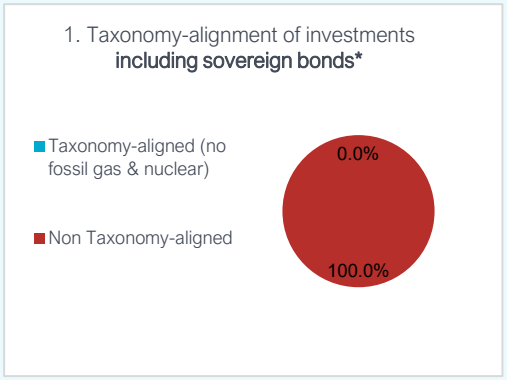

☒ No

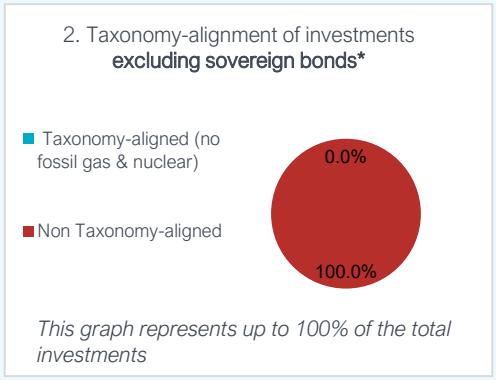

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[25] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261959422/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Growth Fund

Legal entity identifier:
549300G4OINSKM9K3661

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

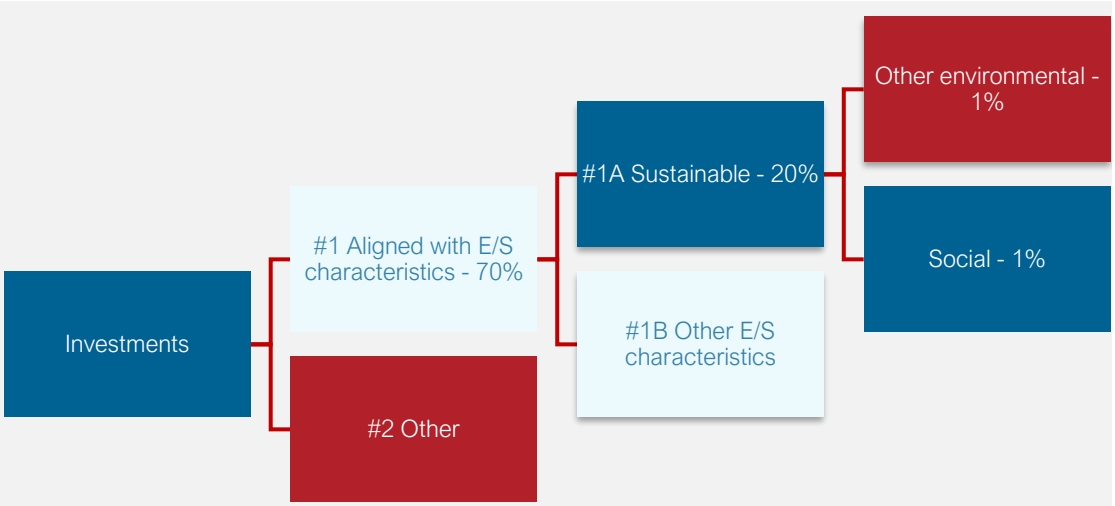

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[26]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

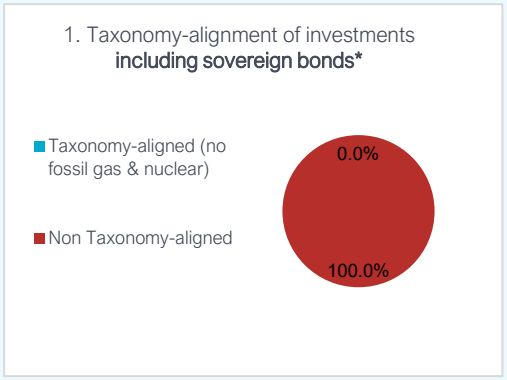

☒ No

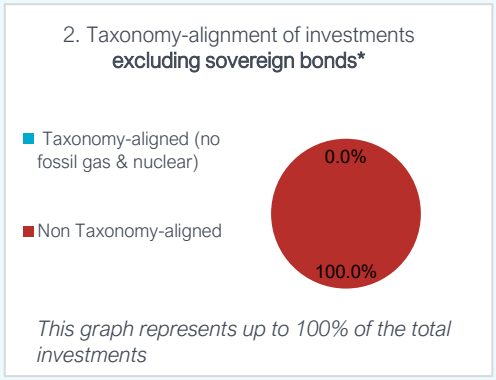

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[26] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0296857971/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Value Fund

Legal entity identifier:
5493001IG3HUGK4JRN48

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

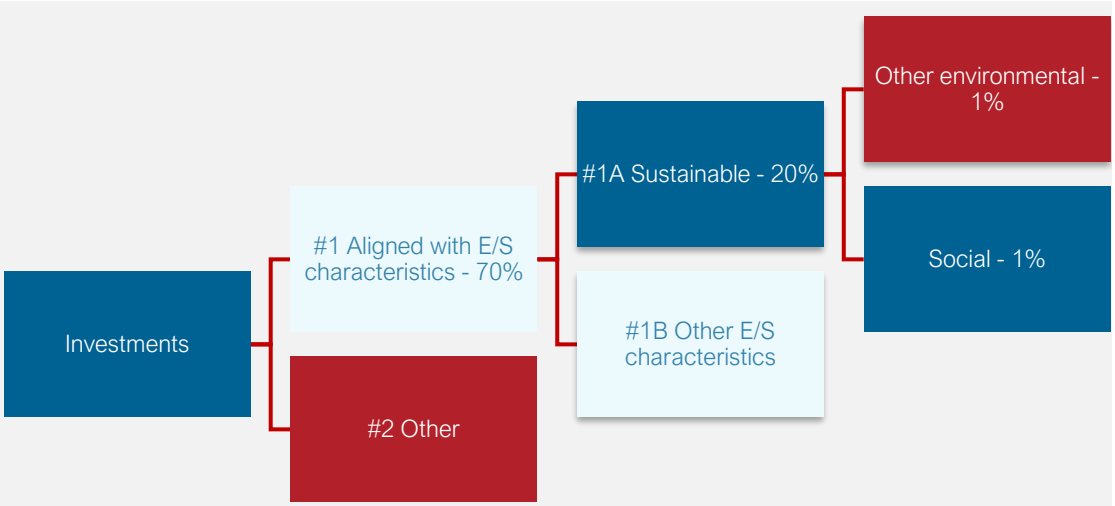

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[27]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

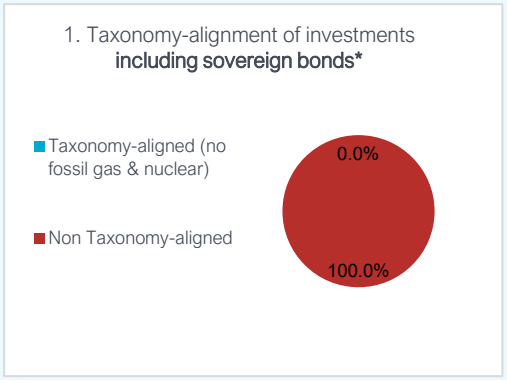

☒ No

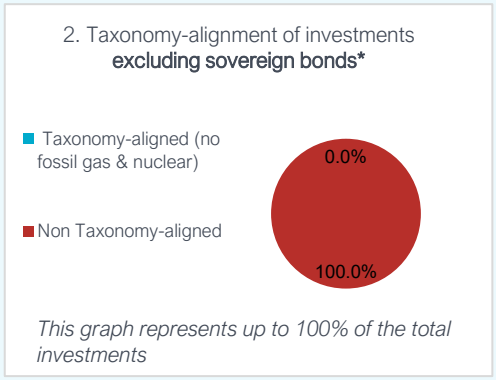

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[27] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251129549/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

549300CW8WK3MAJLQZ86

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

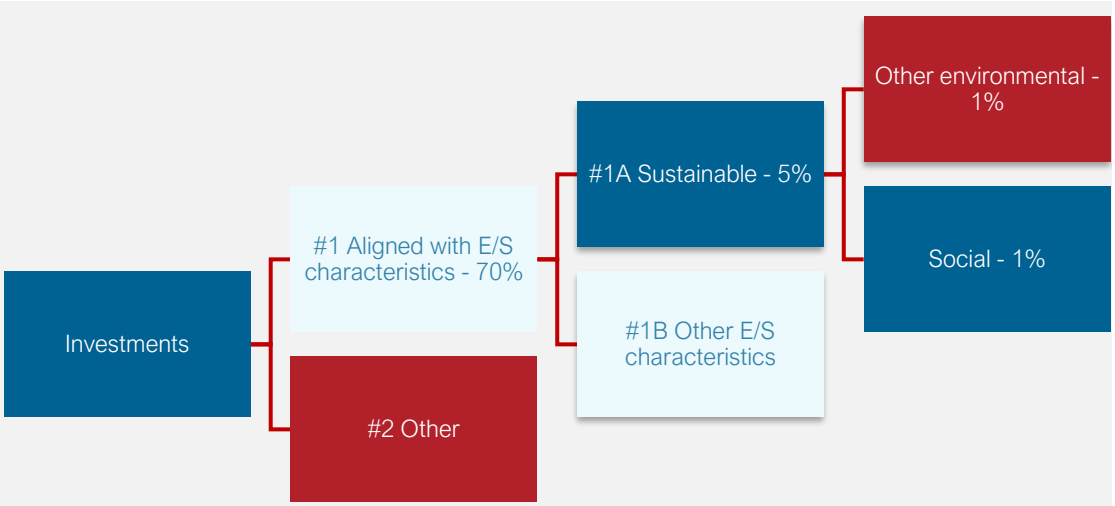

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[28]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

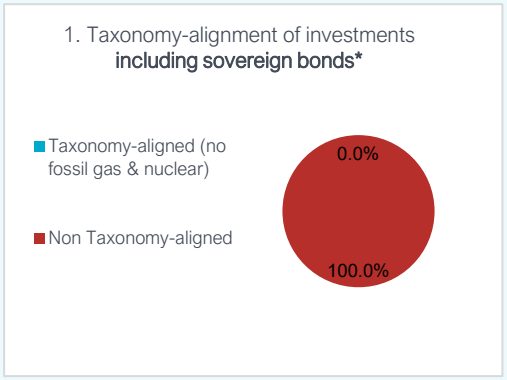

☒ No

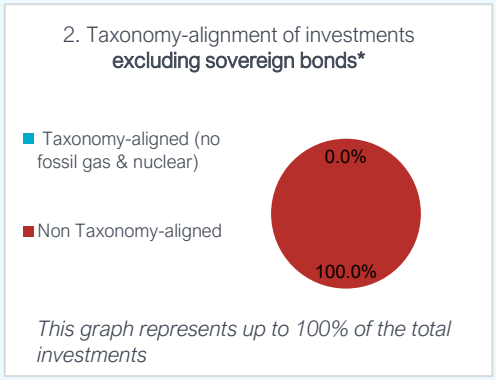

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[28] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261951528/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 33% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 33% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

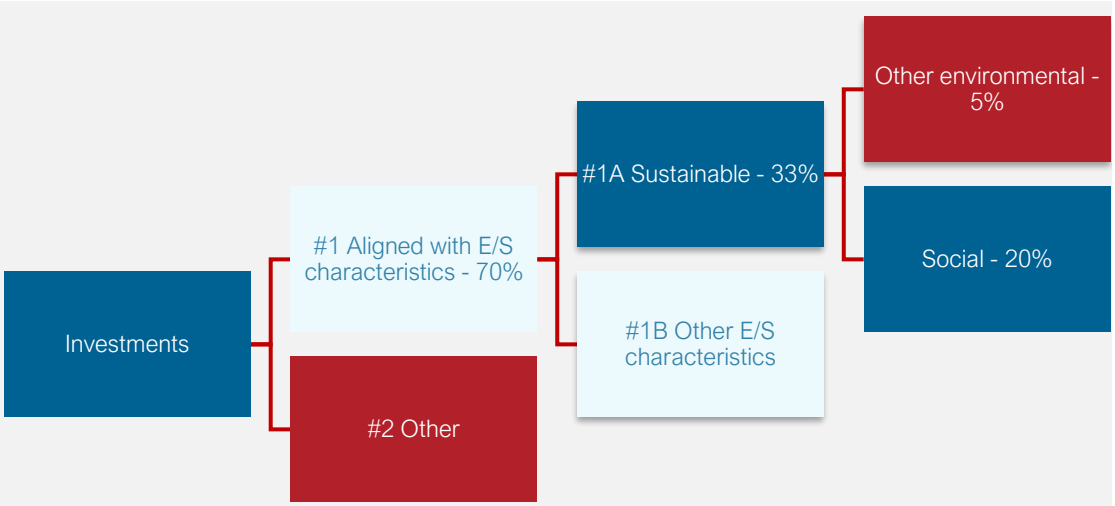

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 33% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[29]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

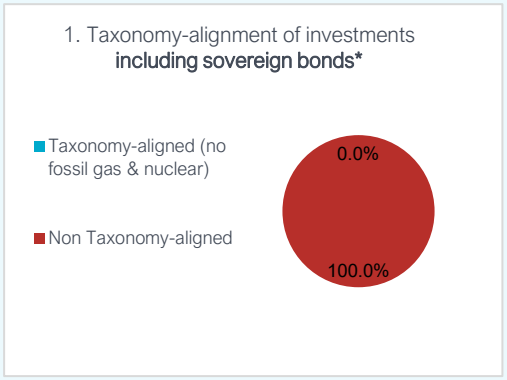

☒ No

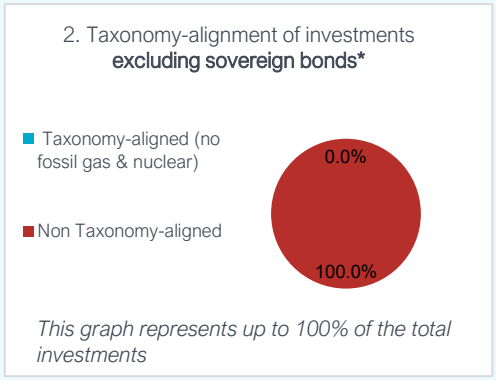

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 20% in sustainable investments with a social objective.

[29] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2346229433/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Iberia Fund

Legal entity identifier:
549300C6GMKNSN647A81

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

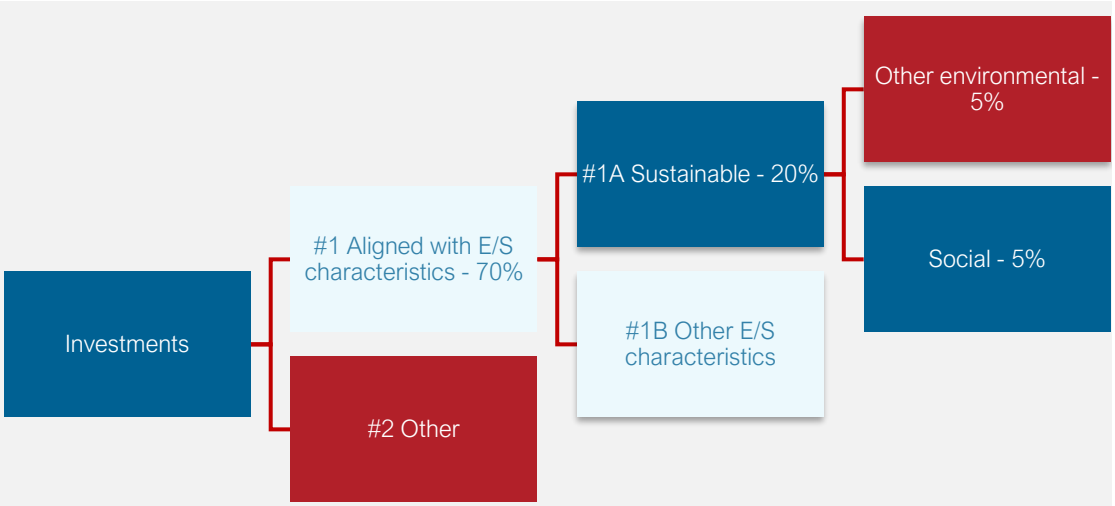

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[30]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

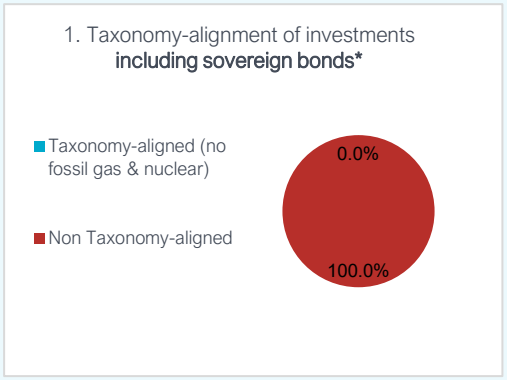

☒ No

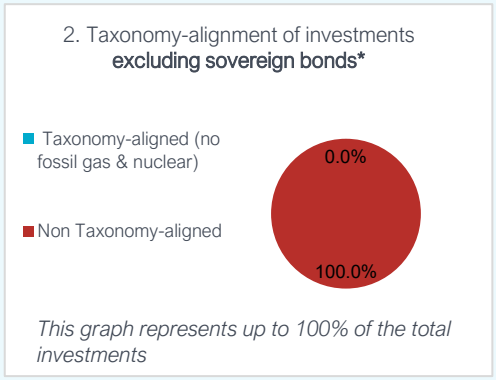

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[30] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261948904/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material

principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

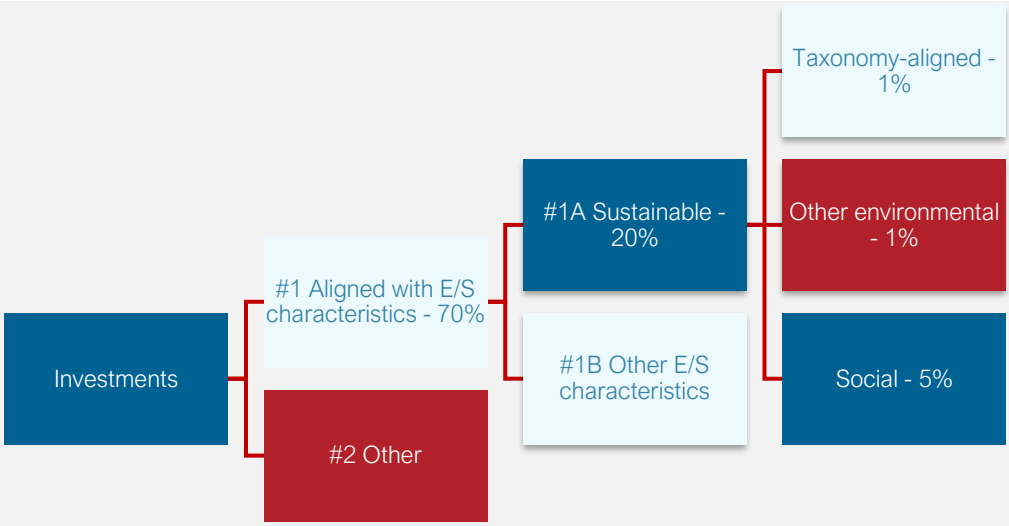

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[31]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

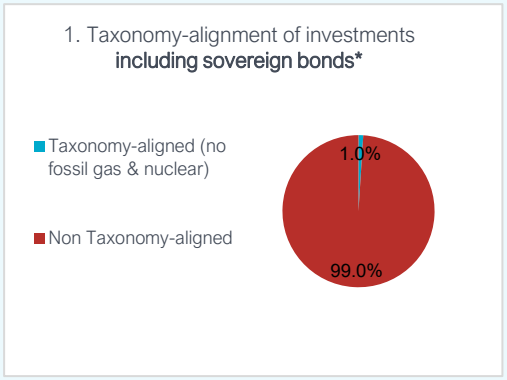

☒ No

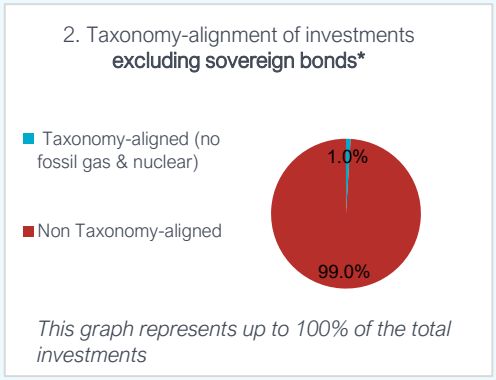

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[31] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0922333322/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Nordic Fund

Legal entity identifier:
549300WNSLR4RK6UO898

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

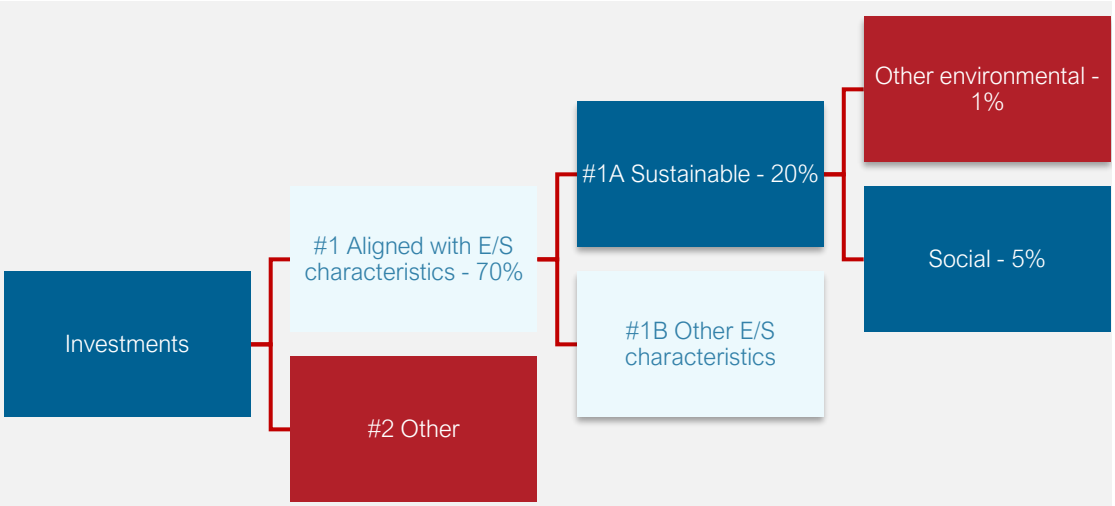

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[32]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

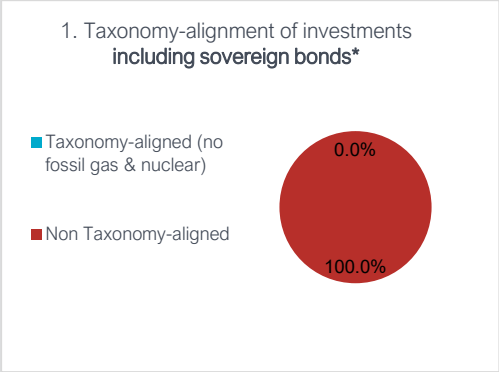

☒ No

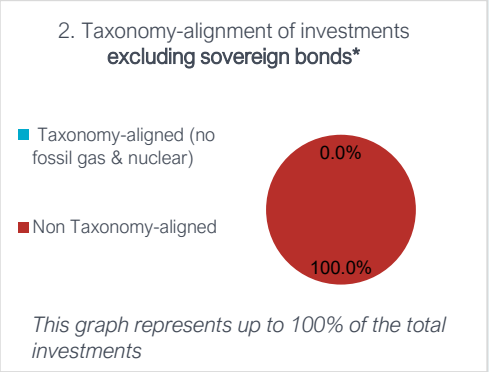

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[32] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0922334643/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Europe Equity ESG Fund

Legal entity identifier:
549300NM9ZITQTY7GU39

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in securities of issuers with high ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund invested in securities of issuers with high ESG ratings ;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts.

Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition may be updated from time to time.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to invest:

(i) a minimum of 80% of its assets in issuers with high ESG ratings,
(ii) a minimum of 40% in sustainable investments of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

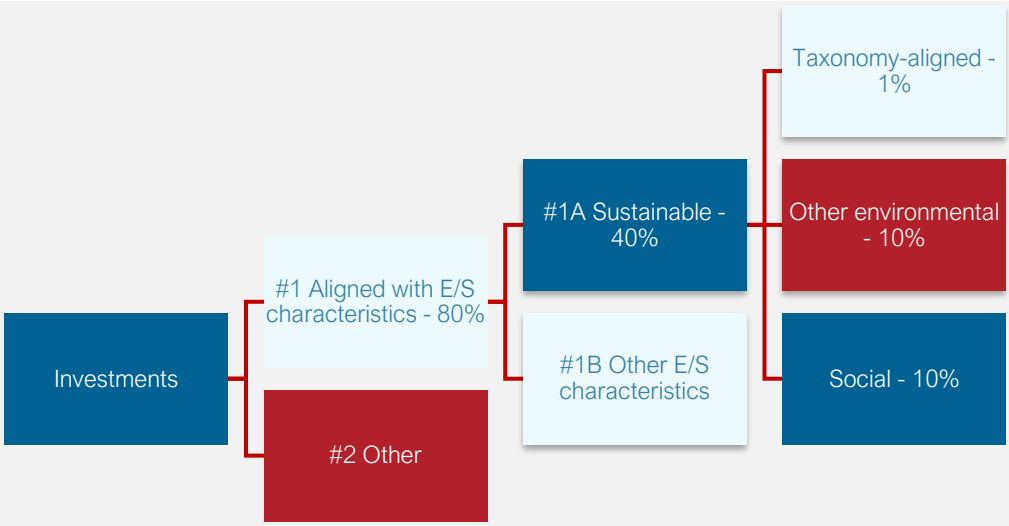

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in securities of issuers with high ESG ratings;
2. a minimum of 40% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[33]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

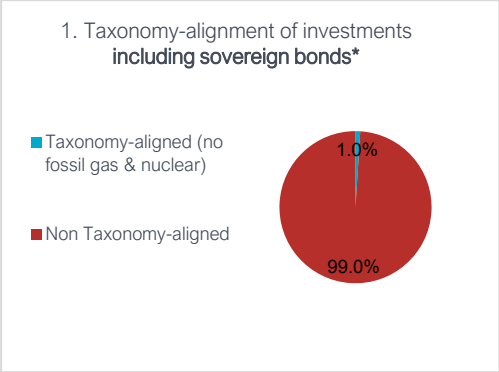

☒ No

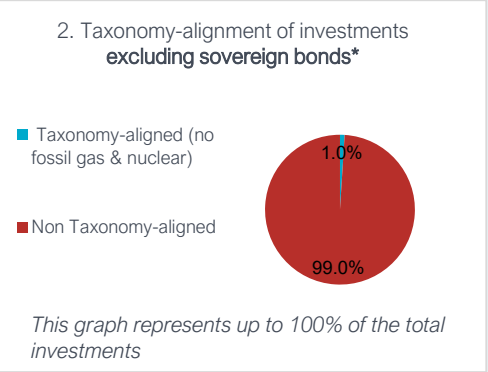

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 10% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 10% in sustainable investments with a social objective.

[33] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251128657/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:
Fidelity Funds - Sustainable Eurozone Equity Fund

Legal entity identifier:
549300BAPCX6D0E0Z219

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● [X] **Yes** ●○ [ ] **No**

[X] It will make a minimum of sustainable investments with an environmental objective: 37.5%

- [X] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [X] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

[X] It will make a minimum of sustainable investments with a social objective: 20%

[ ] It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of __% of sustainable investments

- [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- [ ] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] with a social objective

[ ] It promotes E/S characteristics, but will not make sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What is the sustainable investment objective of this financial product?

The fund aims to achieve capital growth over the long term by investing in sustainable investments.

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

The Investment Manager selects issuers based on the contribution of their economic activities to environmental or social objectives which are aligned with the SDGs.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Fidelity INTERNATIONAL

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and other deprivations must go hand-in-hand with improvements in health and education, economic growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website: https://sdgs.un.org/goals. Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

No ESG reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

The fund uses the following sustainability indicators in order to measure the sustainable investment objective is met:

(i) the percentage of the fund invested in sustainable investments;
(ii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(iii) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy;
(iv) the percentage of the fund invested in sustainable investments with a social objective; and
(v) the percentage of the fund with exposure to investments that undertake activities that are excluded in accordance with the Exclusions (defined below).

How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

As set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Norms-based screens are applied - issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests in companies which contribute to environmental or social objectives, do no significant harm, meet minimum safeguards and good governance requirements.

In actively managing the fund, the Investment Manager identifies investment ideas, relying on a combination of Fidelity's research, third-party research, inputs from quantitative screens and company meetings to help narrow the investment universe. Stock research and selection focuses on assessing the ESG profile, carbon emissions alignment and fundamentals through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

Key components of the investment strategy are:

(i) Sustainable Investments; A minimum of 80% of the fund's assets will be sustainable investments (as defined above).
(ii) Contributing to environmental or social objectives aligned with one or more SDGs; All companies in the fund must have a portion (greater than zero) of business activities which contribute to environmental or social objectives aligned with SDGs.
(iii) Do No Significant Harm; The fund applies the "do no significant harm" criteria, as set out above, to all direct investments held within the fund.
(iv) Minimum safeguards; The fund excludes direct investments that fail to conduct their business in accordance with accepted international norms, including as set out by OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions.
(v) Good governance; All investee companies in the fund will be screened for controversies, including tax and bribery and corruption screenings.
(vi) Exclusions; the Investment Manager will exclude investments in issuers with an MSCI ESG rating below ''BB" and, in respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

- norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
- negative screening of certain sectors, companies or practices based on specific ESG criteria where revenue thresholds may be applied; and

3. Paris Aligned Benchmark exclusions.

The Investment Manager has discretion to implement additional exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

(vii) Carbon footprint: The fund aims to have a lower carbon footprint compared to that of the MSCI EMU Index.
(viii) Hazardous waste footprint: The fund aims to have a lower hazardous waste footprint compared to that of the MSCI EMU Index.

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 30% due to the exclusion of issuers on the basis of their ESG characteristics.

What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?

The fund will invest a minimum of 80% of its assets in sustainable investments of which a minimum of 2.5% have an environmental objective which is aligned with the EU Taxonomy, a minimum of 35% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% have a social objective;
provided that such investments do not significantly harm any of those objectives and that investee companies follow good governance practices.

In attaining the sustainable investment objective, the fund commits to selecting companies whose economic activity contributes to an environmental or social objective aligned with one or more of the SDGs, as described in the investment strategy section above.

In addition to the above, the fund assesses the ESG characteristics of at least 90% of the fund's assets and the fund's investment universe will be reduced by at least 30% due to the exclusion of issuers on the basis of their ESG characteristics.

The fund will systematically apply the Exclusions as described above.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

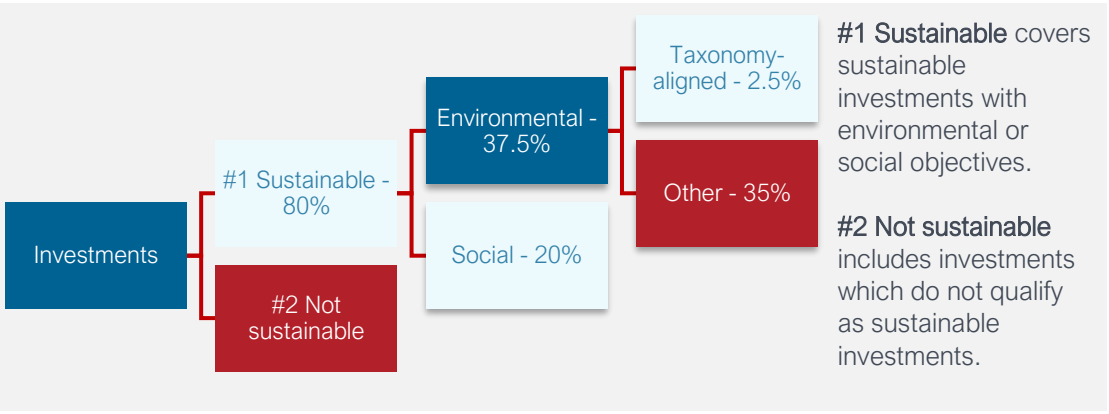

What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

(#1 Sustainable) The fund will invest a minimum of 80% of its assets in sustainable investments of which a minimum of 2.5% will have an environmental objective which is aligned with the EU Taxonomy, a minimum of 35% will have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 20% will have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

How does the use of derivatives attain the sustainable investment objective?

Where the security underlying a derivative is deemed to contribute to the sustainable objective of the fund, the exposure of the derivative may be used to contribute to the attainment of the sustainable investment objective.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 2.5% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[34]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

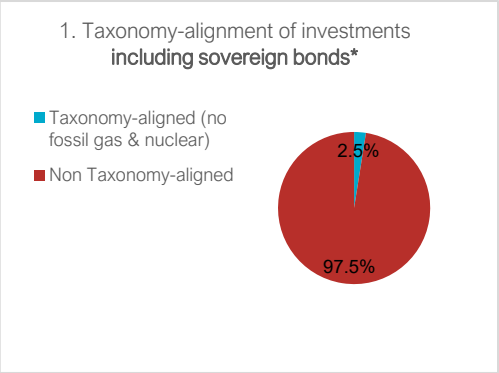

[34] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

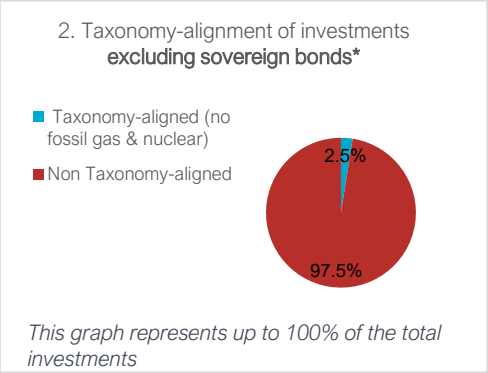

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 35% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of sustainable investments with a social objective?

The fund invests a minimum of 20% in sustainable investments with a social objective.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Investments included under "#2 Not sustainable" may include cash, money market instruments, investments used for hedging and efficient portfolio management purposes.

In addition, all direct investments of the fund must adhere to the Exclusions, do no significant harm to environmental or social objectives, have good governance practices and must not affect the delivery of the sustainable investment objective.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

No ESG reference benchmark has been designated to meet the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0238202427/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Switzerland Fund

Legal entity identifier:
5493001N8Q97TPZUYT12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 30% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 15% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

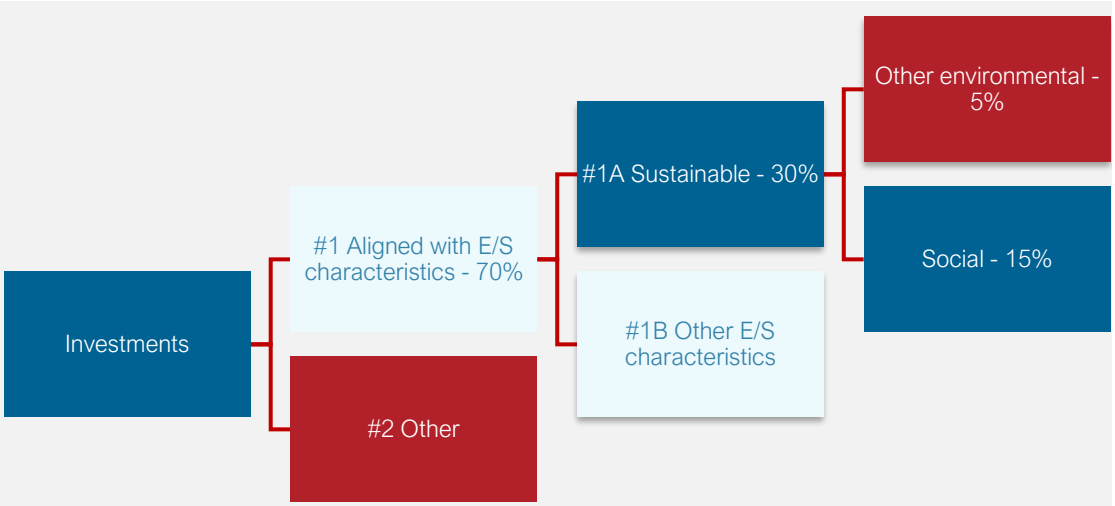

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 30% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 15% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[35]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

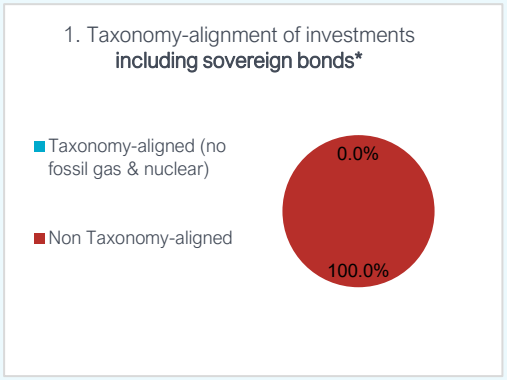

☒ No

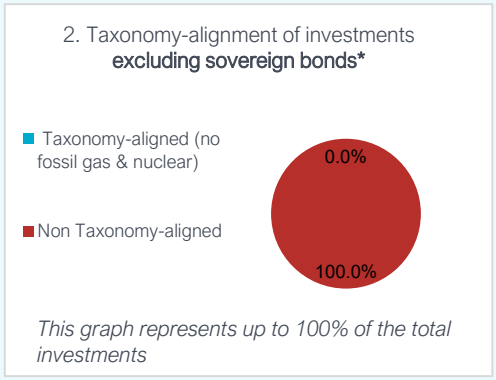

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 15% in sustainable investments with a social objective.

[35] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261951288/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - ASEAN Fund

549300NUQAYRMIJ1DF30

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,

3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to

help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark,

(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 0% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 0% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[36]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

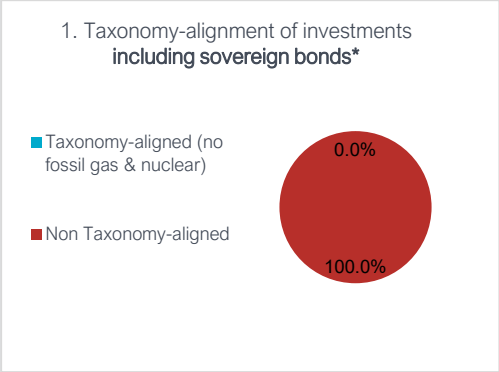

☒ No

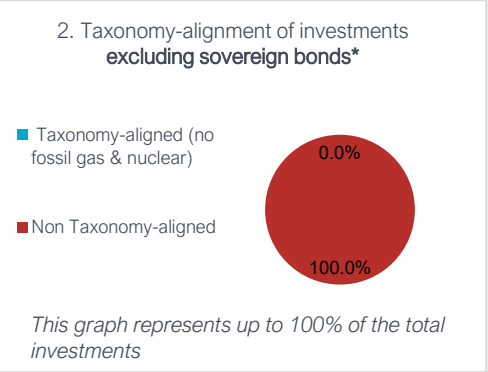

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund does not intend to make sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[36] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0048573645/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

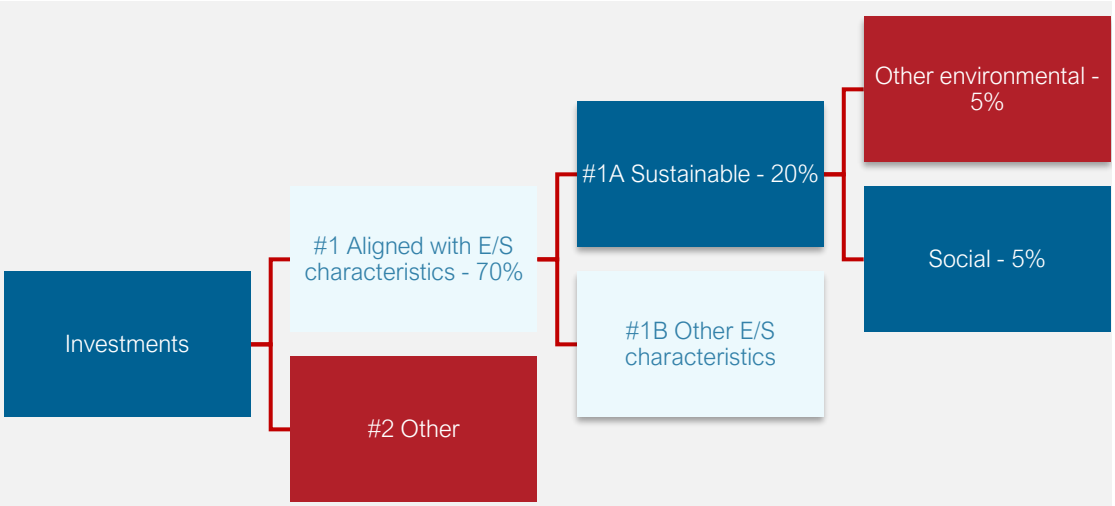

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[37]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

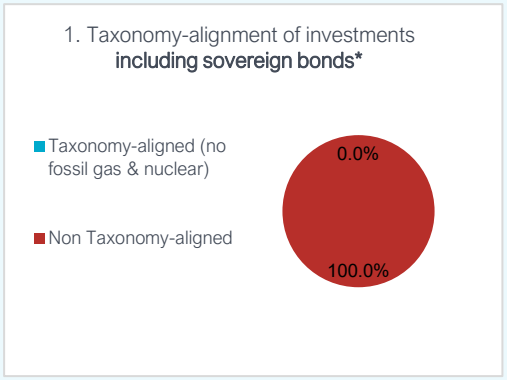

☒ No

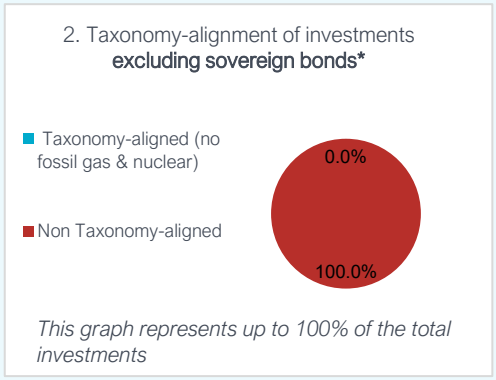

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[37] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0205439572/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Fidelity Funds - Asian Smaller Companies Fund

Legal entity identifier:
549300WPIOCV90YN3U76

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

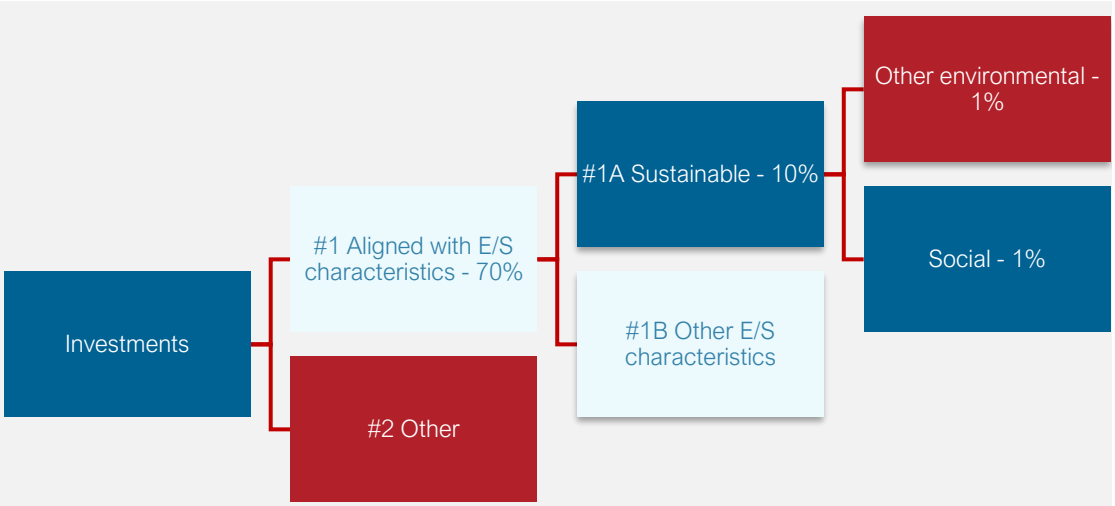

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[38]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

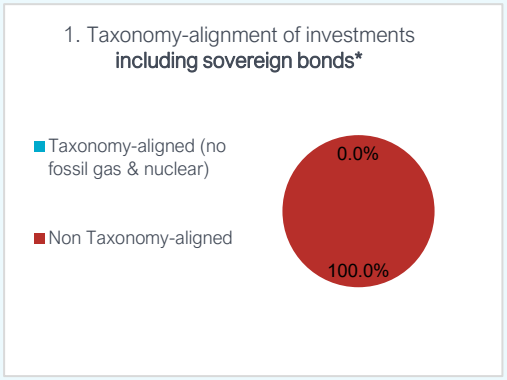

☒ No

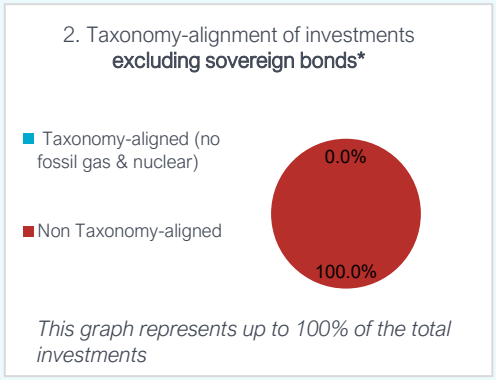

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[38] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0702159772/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 2% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

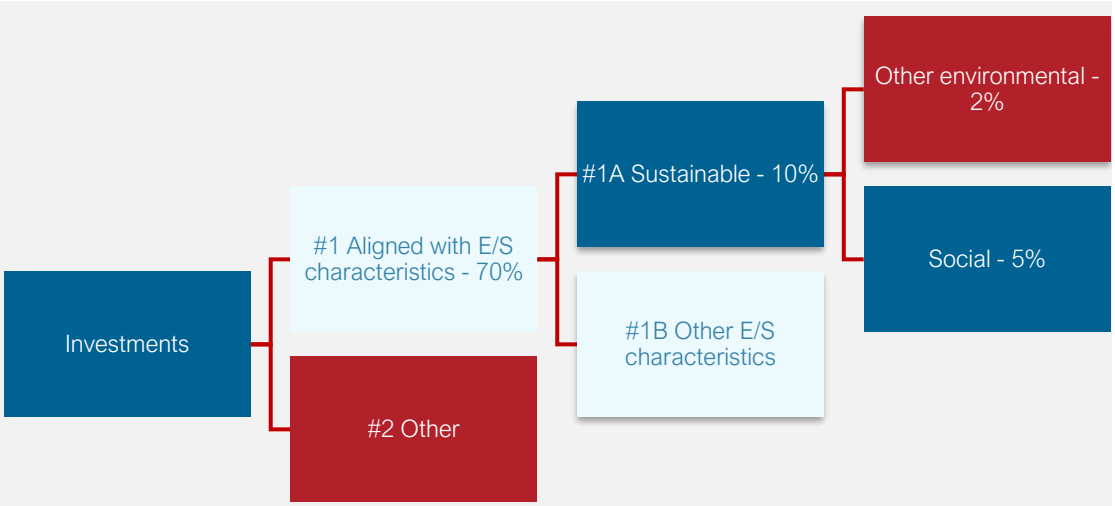

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 2% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[39]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

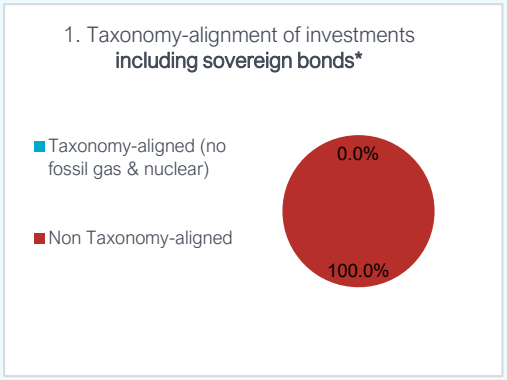

☒ No

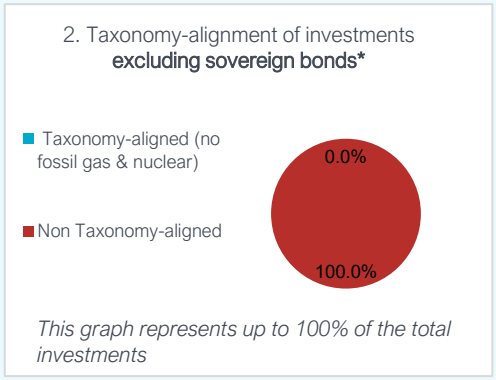

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 2% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[39] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0413542167/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Japan Growth Fund

Legal entity identifier:
549300HZWG6GBKD16L77

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

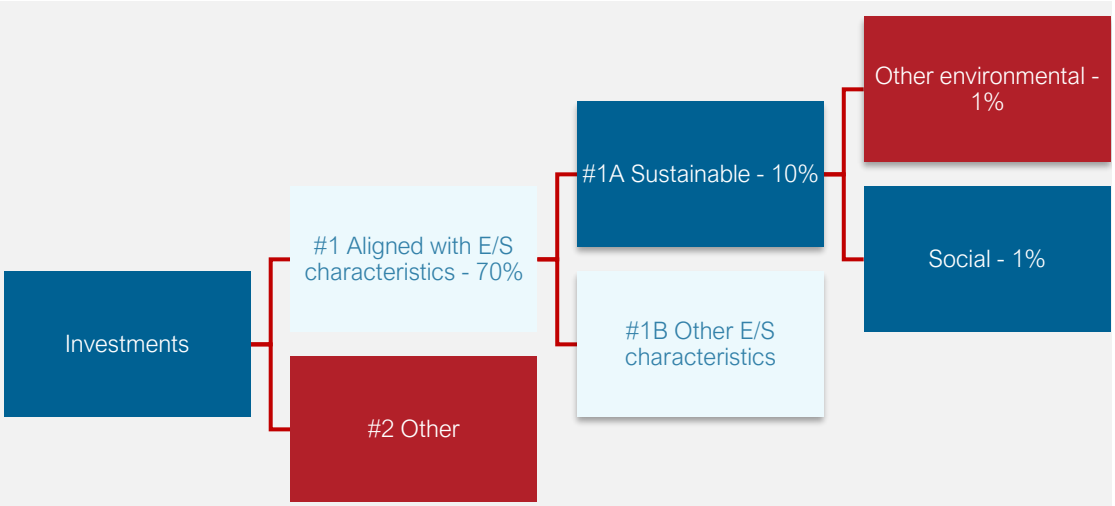

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[40]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

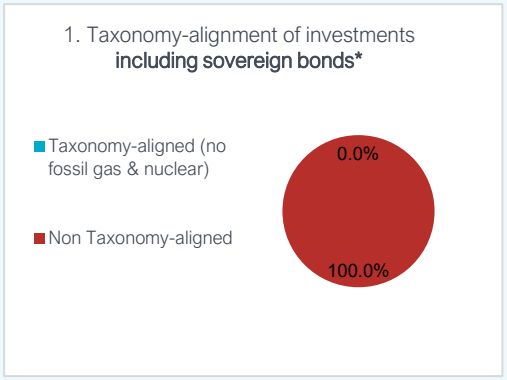

☒ No

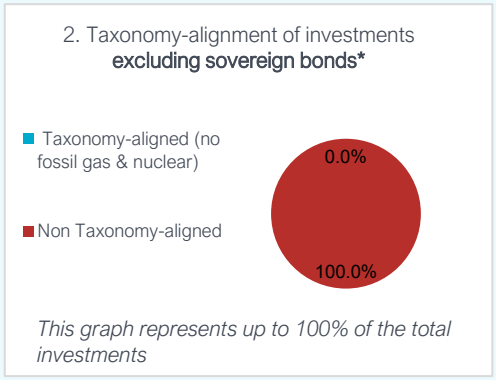

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[40] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1060955314/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

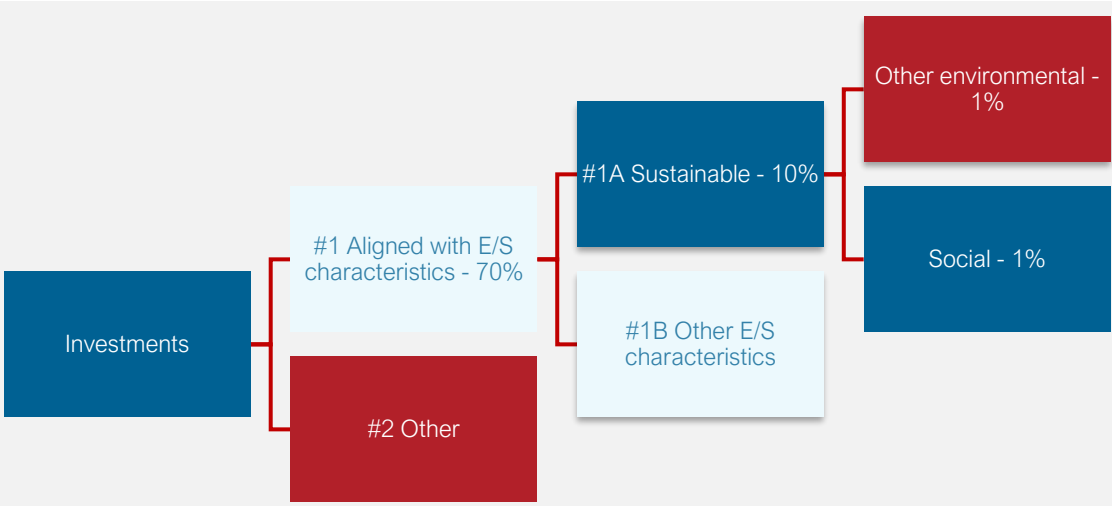

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[41]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

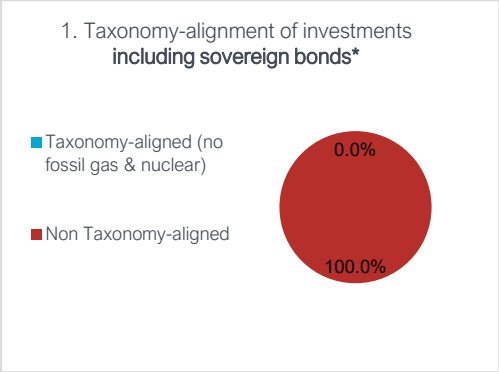

☒ No

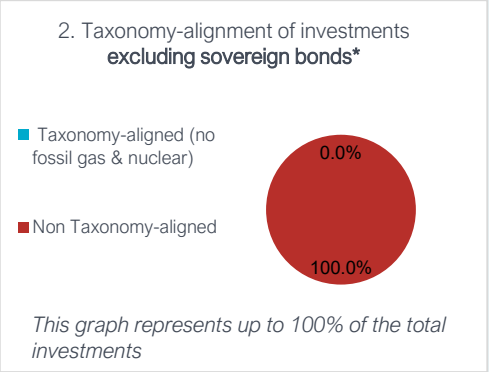

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[41] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0413543058/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Pacific Fund

Legal entity identifier:
549300VW1XD85M3GUB26

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

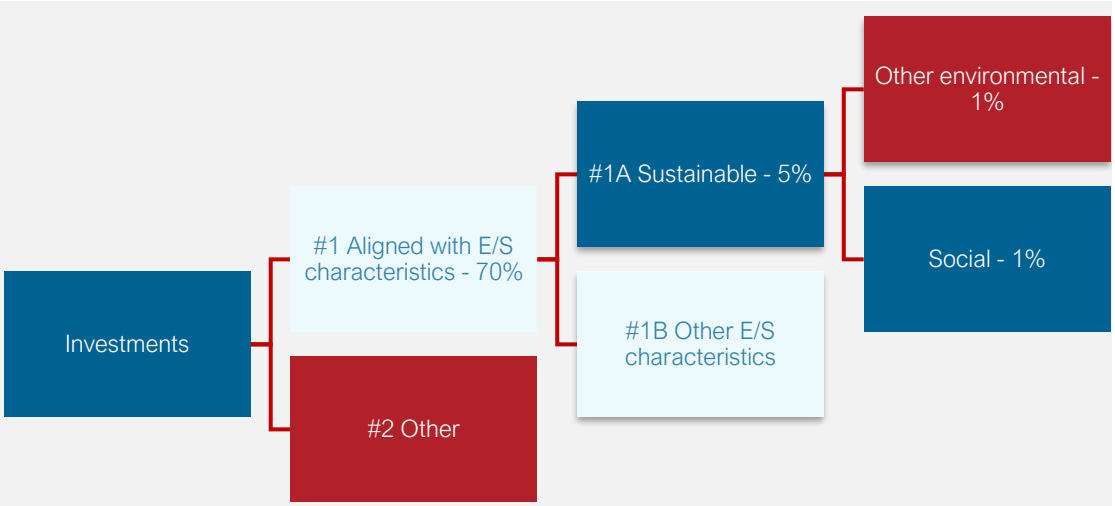

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[42]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

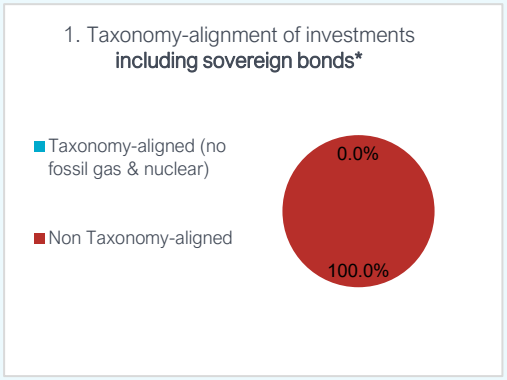

☒ No

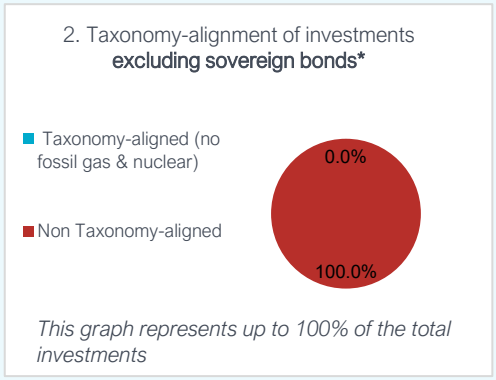

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[42] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0368678339/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Asia Equity ESG Fund

Legal entity identifier:
549300XNOLBE172DCX03

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in securities of issuers with high ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund invested in securities of issuers with high ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition may be updated from time to time.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to invest:

(i) a minimum of 80% of its assets in issuers with high ESG ratings;
(ii) a minimum of 25% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

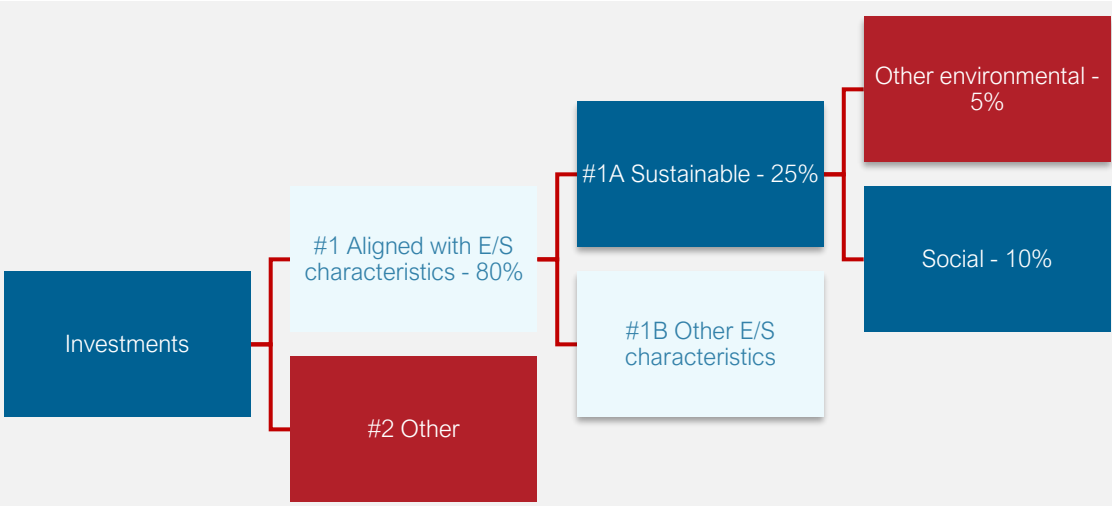

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in securities of issuers with high ESG ratings;
2. a minimum of 25% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[43]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

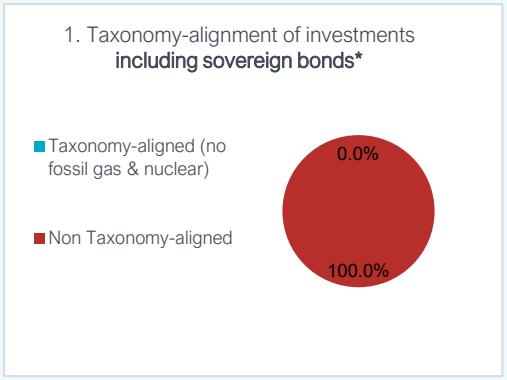

☒ No

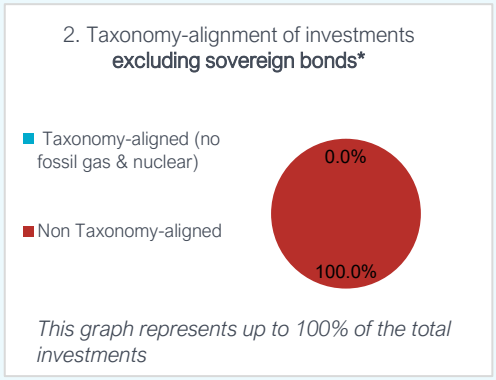

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 10% in sustainable investments with a social objective.

[43] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261946445/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Japan Equity ESG Fund

Legal entity identifier:
549300CGT4V2XYYG0Y90

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 25% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by investing in securities of issuers with high ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund invested in securities of issuers with high ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund invests at least 80% of its assets in securities of issuers with high ESG ratings. The fund may invest in securities of issuers with low but improving ESG characteristics. High ESG ratings are defined as issuers rated by Fidelity ESG ratings as a B or above, or in the absence of a rating from Fidelity, an MSCI ESG rating of A or above. This definition may be updated from time to time.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In addition, the Investment Manager will exclude investment in issuers with a Fidelity ESG ratings of 'C' or below.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to invest:

(i) a minimum of 80% of its assets in issuers with high ESG ratings;
(ii) a minimum of 25% in sustainable investments of which a minimum of 0% have an

environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets. The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

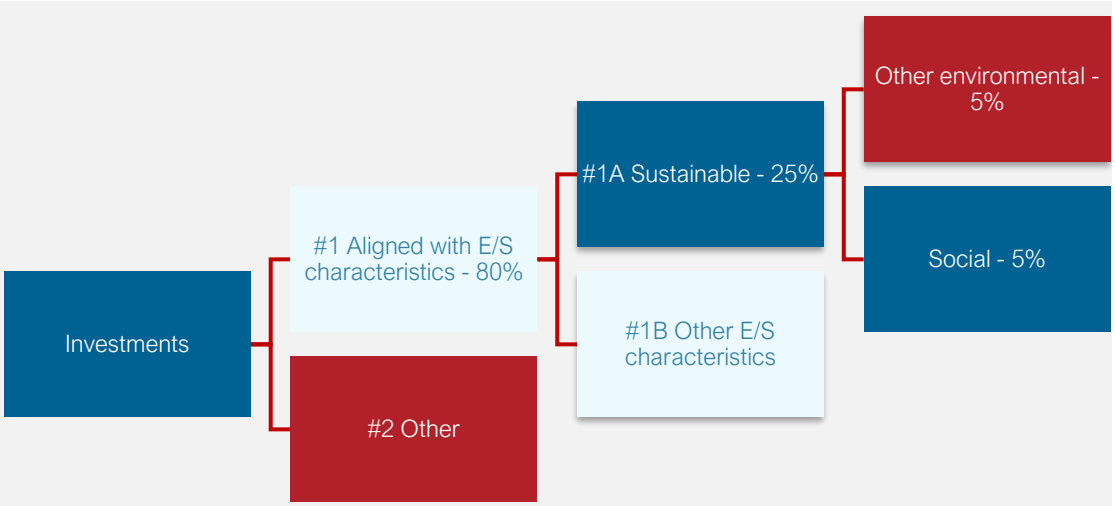

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in securities of issuers with high ESG ratings;
2. a minimum of 25% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[44]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

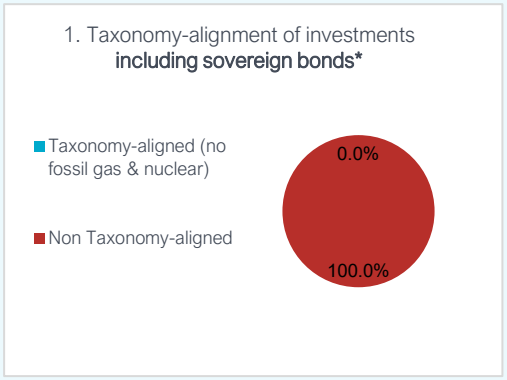

☒ No

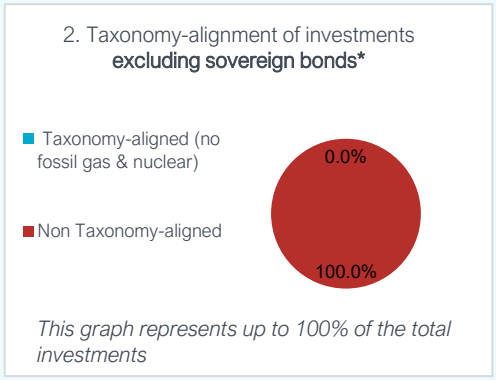

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[44] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251130042/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

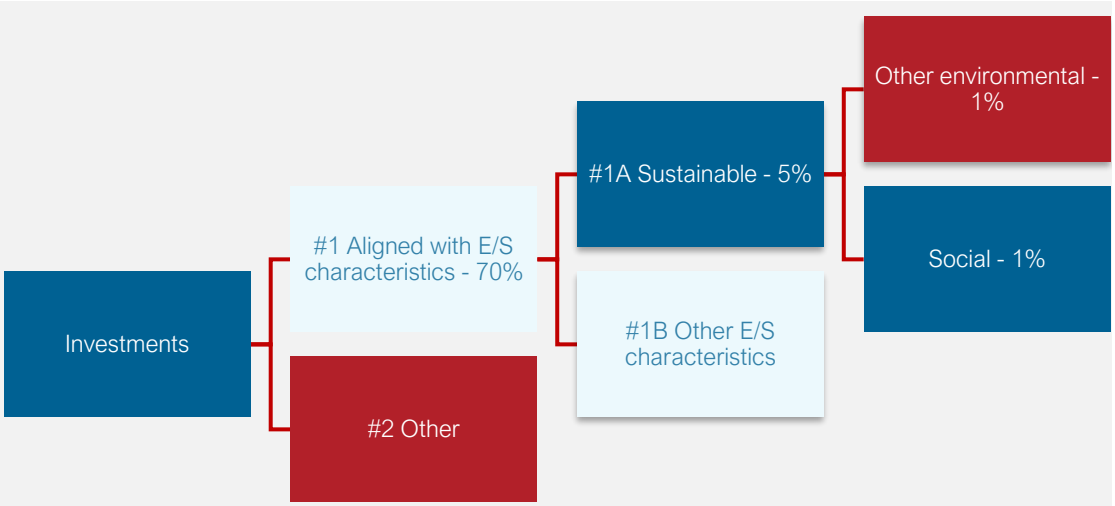

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[45]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

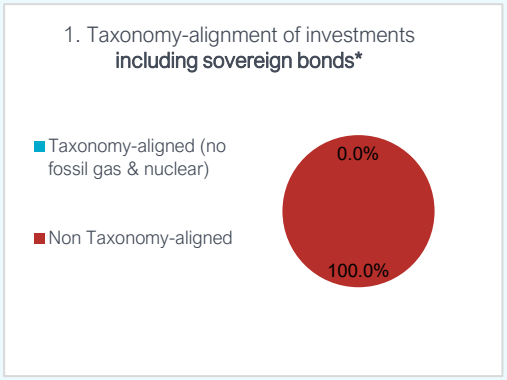

☒ No

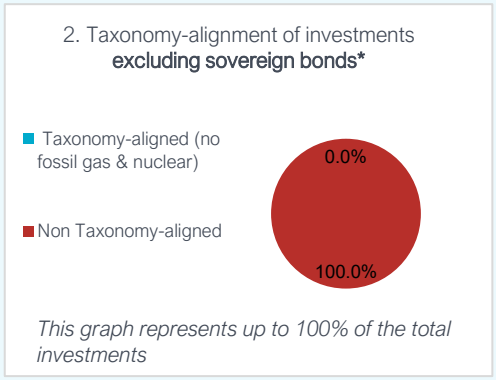

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[45] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0594300096/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Fidelity Funds - China Innovation Fund

Legal entity identifier:
549300IV1SMG8Q6CJU79

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

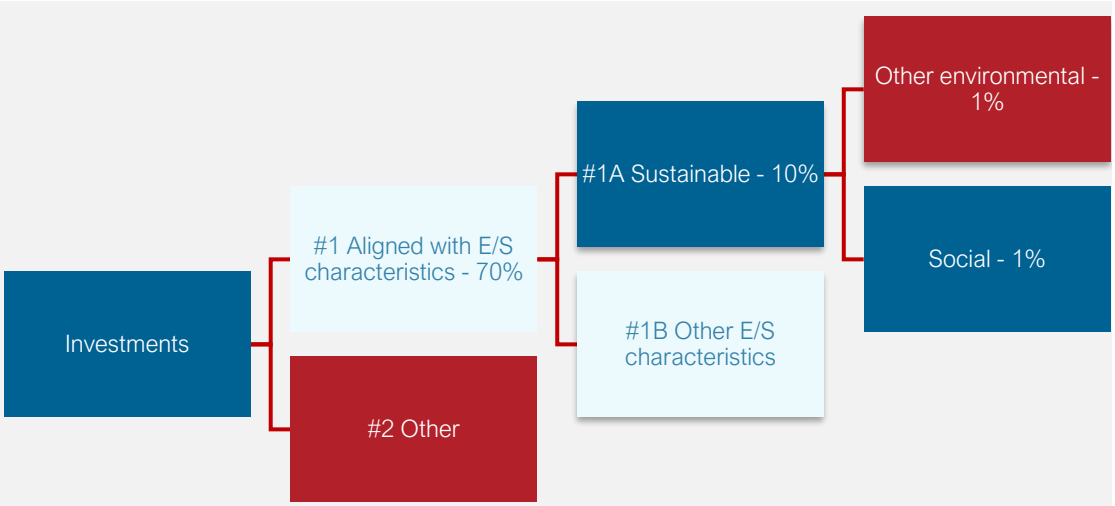

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[46]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

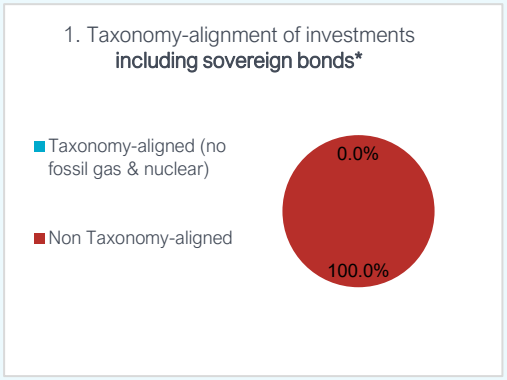

☒ No

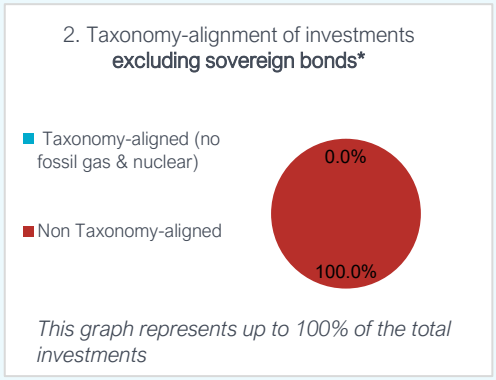

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[46] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0455706654/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

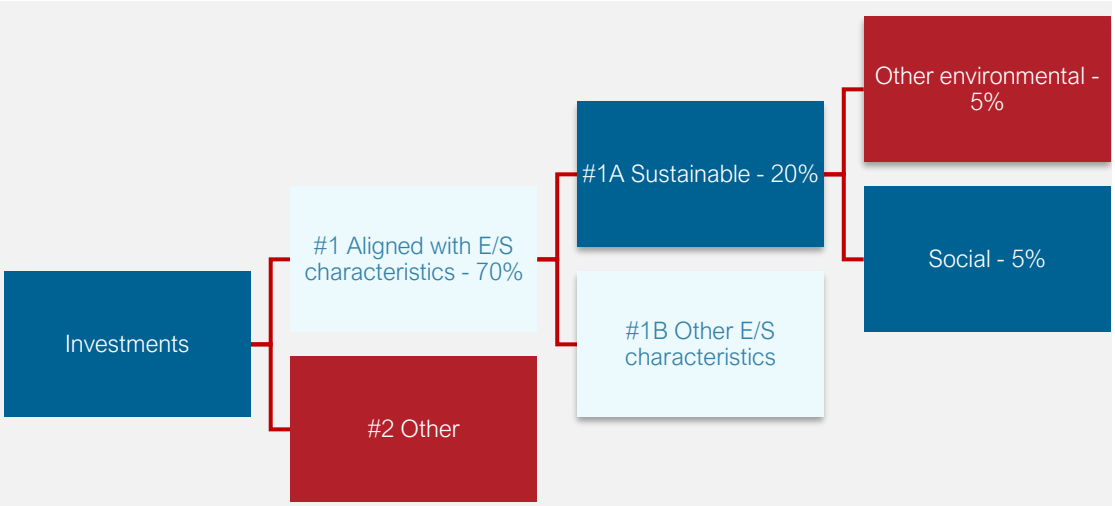

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[47]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

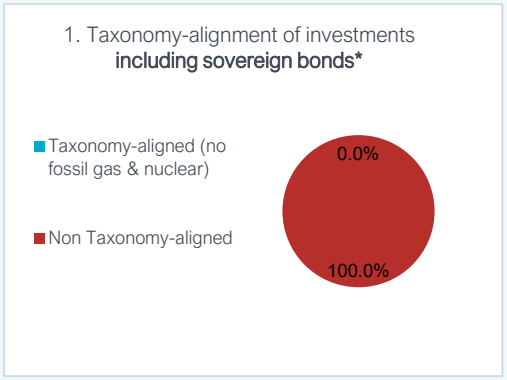

☒ No

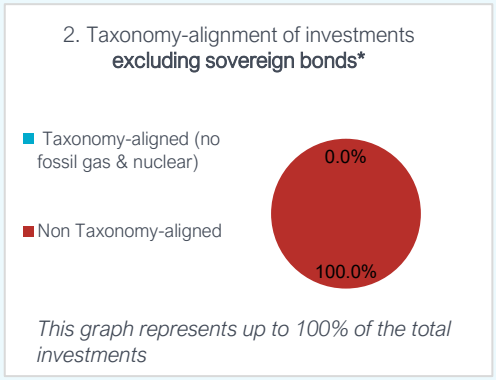

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[47] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1400166911/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Fidelity Funds - Emerging Asia Fund

Legal entity identifier:
549300DFTX1HYCKWAS72

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 3% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 3% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

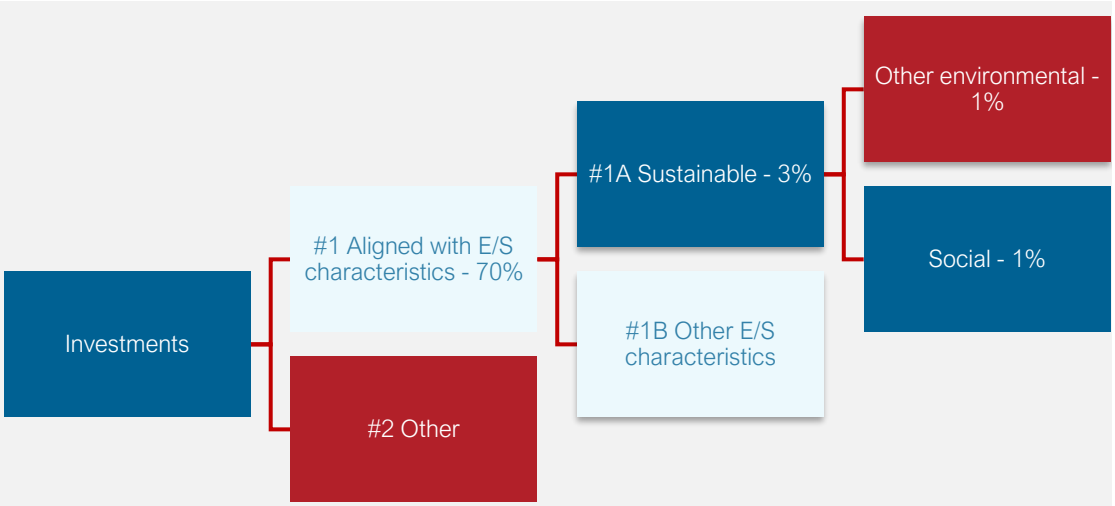

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 3% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[48]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

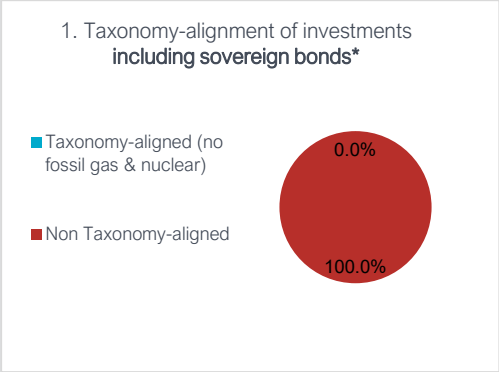

☒ No

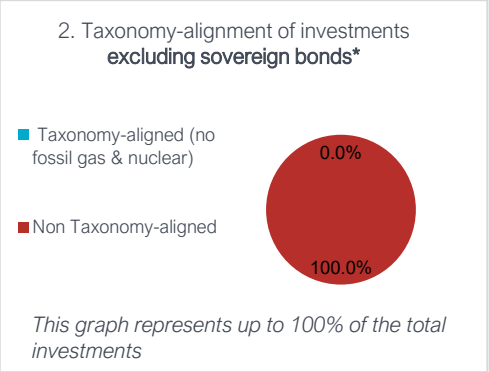

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[48] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0329678410/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

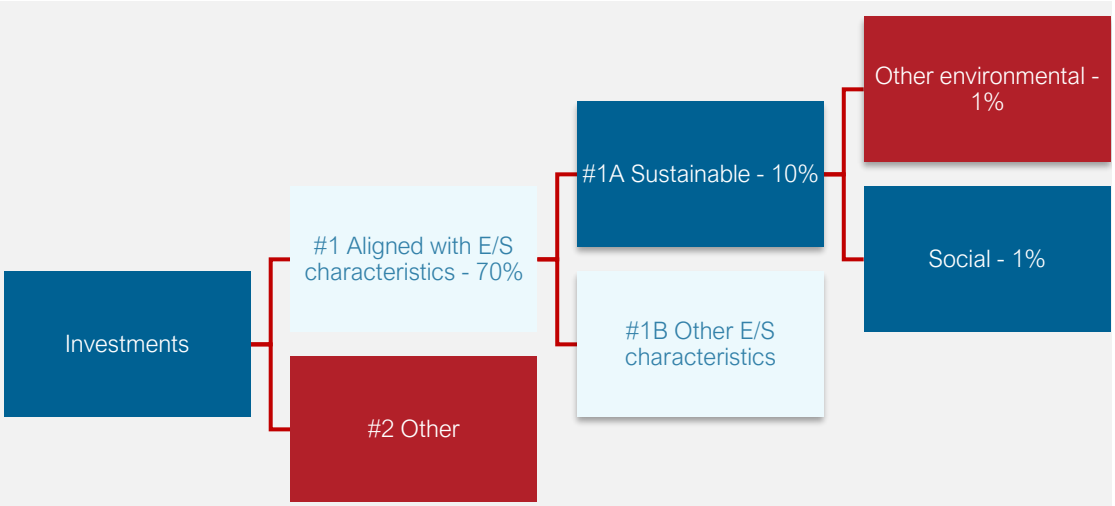

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[49]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

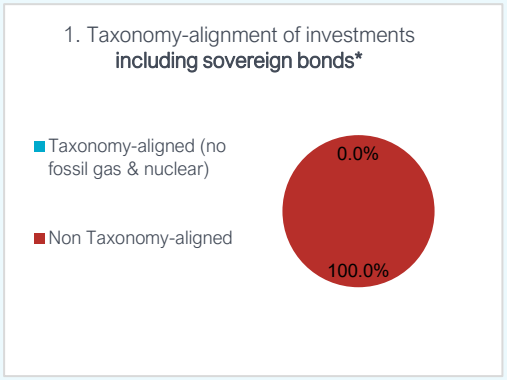

☒ No

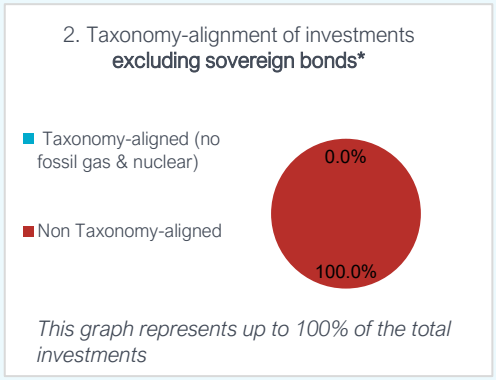

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[49] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1048684796/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

549300APJHM18WNUFH86

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

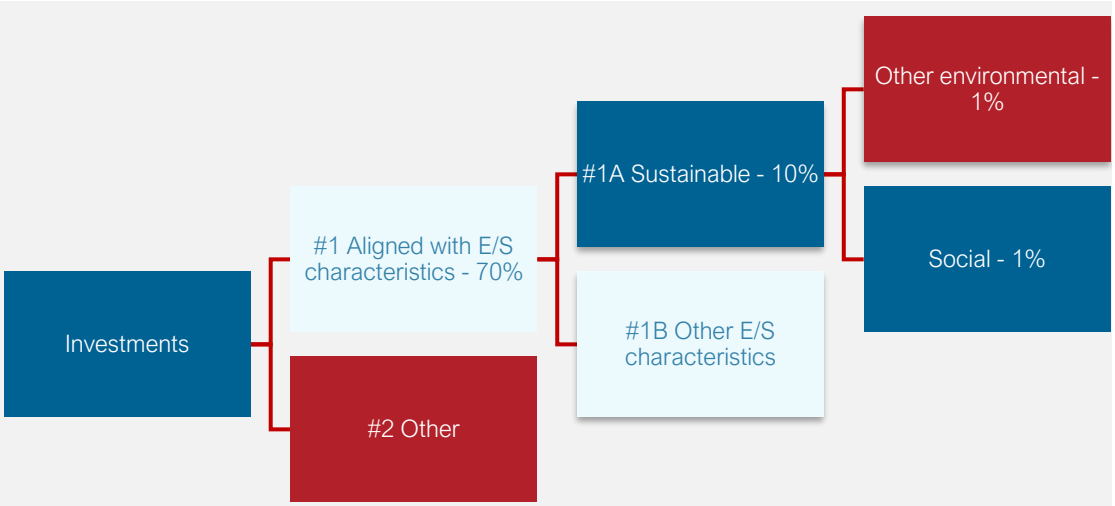

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[50]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

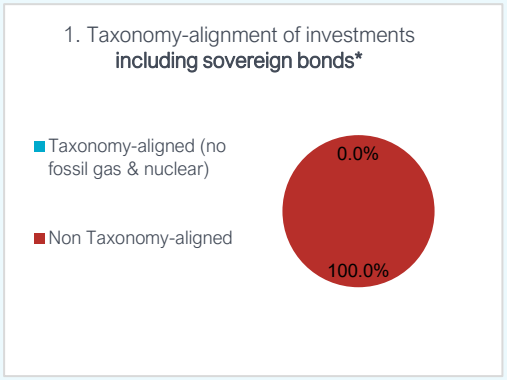

☒ No

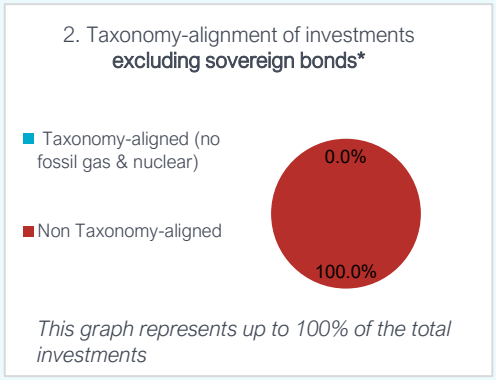

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[50] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261963291/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 20% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

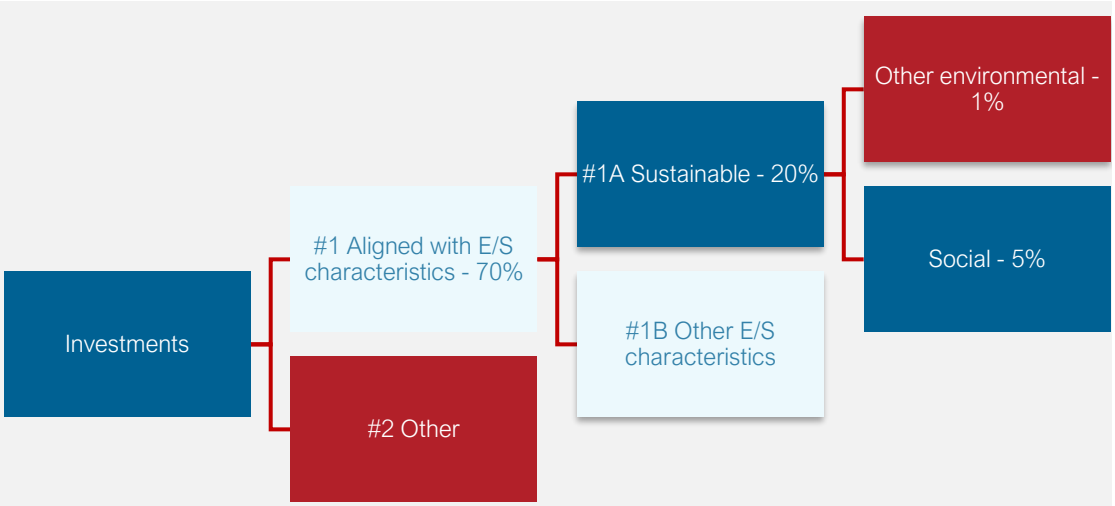

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[51]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

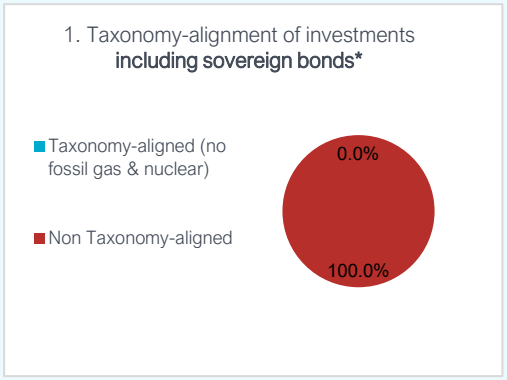

☒ No

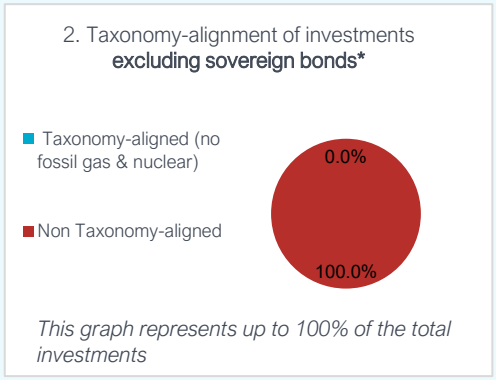

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[51] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1805238398/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Markets Ex China Fund

Legal entity identifier:
2549006CNXYVDUHGWH71

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 15% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 15% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

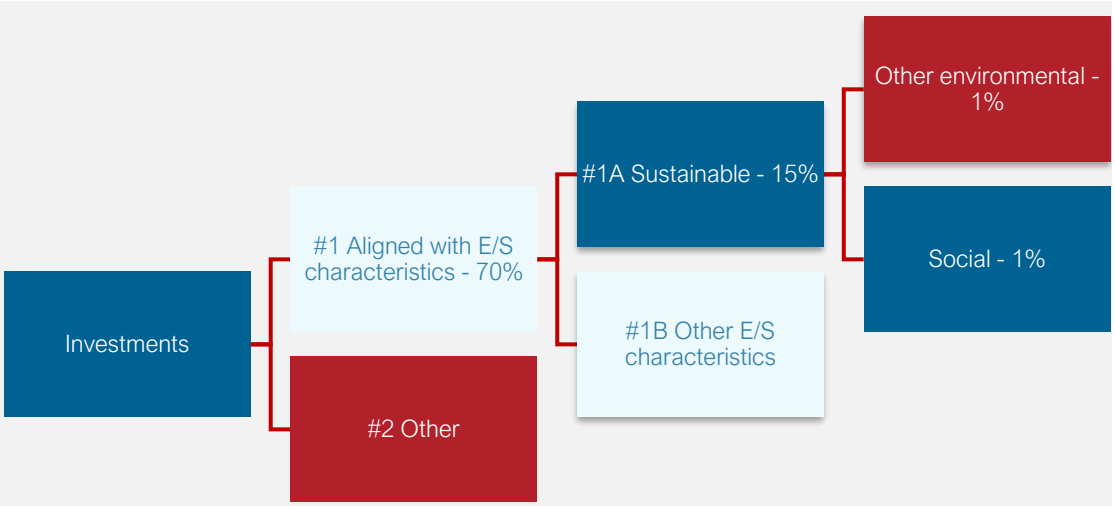

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 15% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[52]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

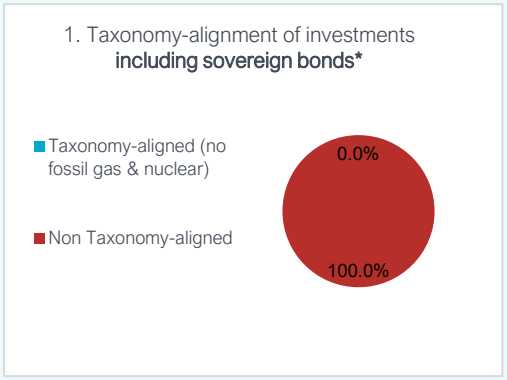

☒ No

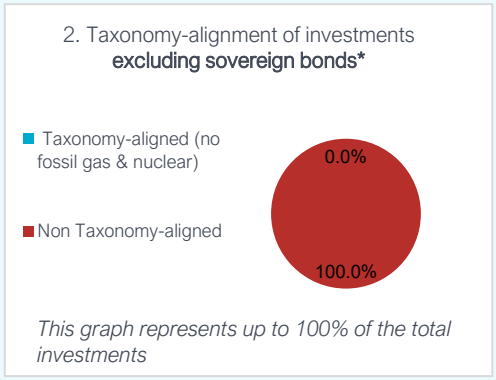

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[52] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2546391173/tab-disclosure#SFDR-disclosure.

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund measured against the ESG score of its benchmark excluding 20% of securities with the lowest ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's norms based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings, by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark. The fund assesses the ESG characteristics of at least 90% of its assets.

The fund may invest in securities of issuers with low but improving ESG characteristics.

Within this investment universe, the Investment Manager selects stocks through rigorous bottom-up financial analysis and valuation to select stocks with strong investment return potential.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework

(fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of securities with the lowest ESG ratings;
(ii) will invest a minimum of 30% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective.

The fund assesses the ESG characteristics of at least 90% of its assets.

In addition, the fund will systematically apply the Exclusions to direct investments as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

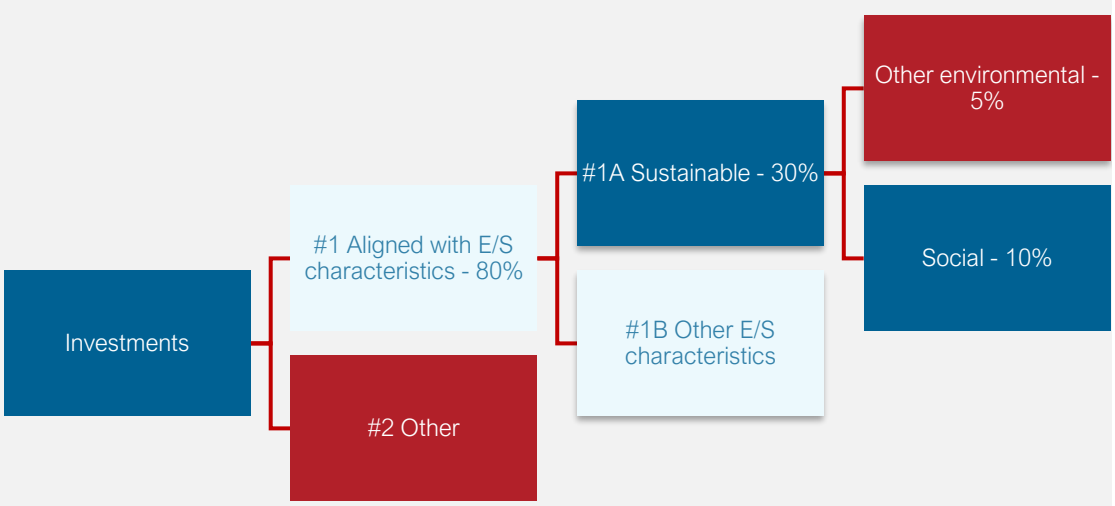

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
2. a minimum of 30% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 5% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 10% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the

environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[53]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

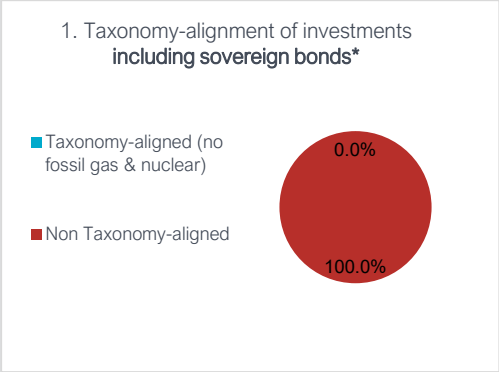

☒ No

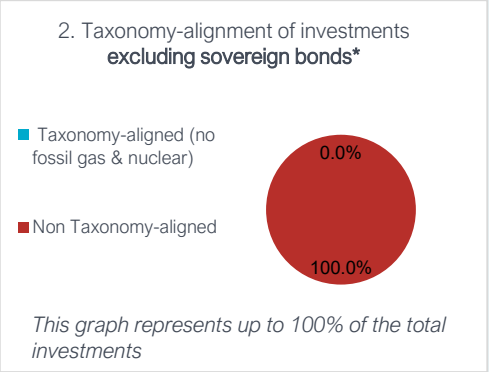

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 5% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 10% in sustainable investments with a social objective.

[53] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in securities of issuers with low ESG ratings that are able to demonstrate that they are on an improving trajectory with respect to their ESG characteristics, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1102505929/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Thailand Fund

Legal entity identifier:
549300KZ6XVPBRK5QV32

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark;
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

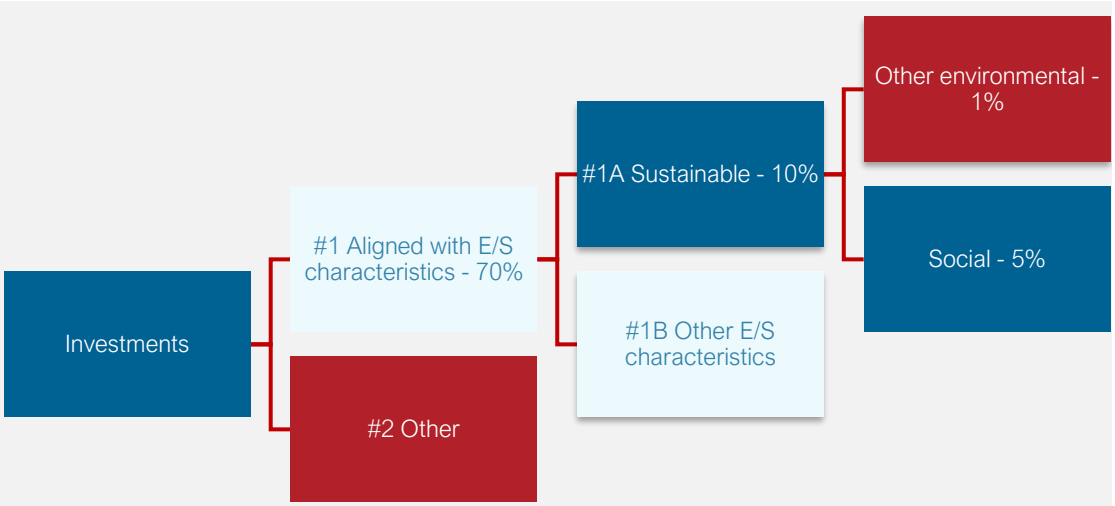

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[54]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

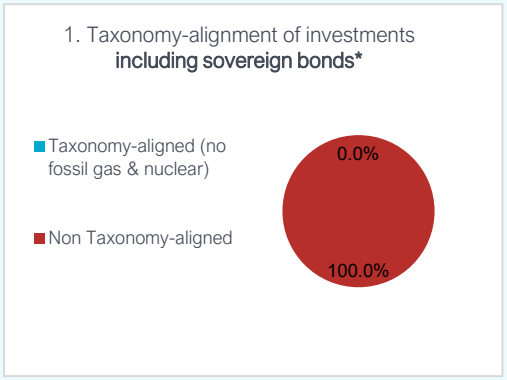

☒ No

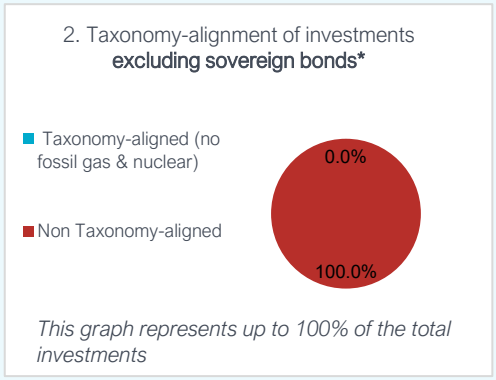

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[54] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG index has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1224710803/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Euro Ultra Short Duration Bond Fund

Legal entity identifier:
Y5GJXJ4DKJON310L3I87

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises euro-denominated debt securities. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In

seeking to exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the fund's investment universe.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

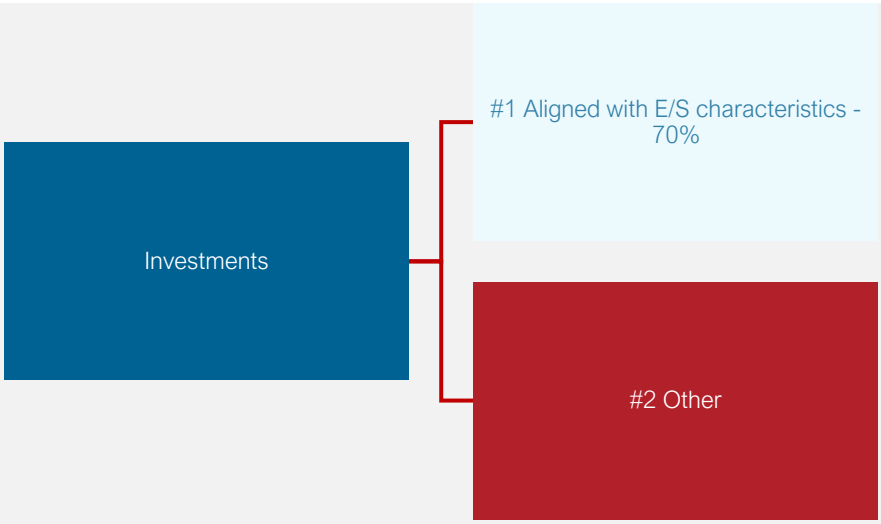

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[55]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

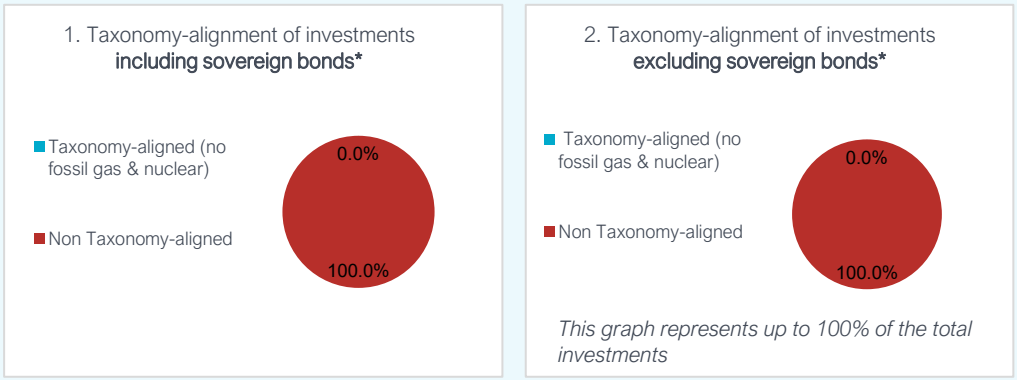

[55] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1345485095/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

GQ0BF6O9W3C24RB7AC25

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2.5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 2.5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

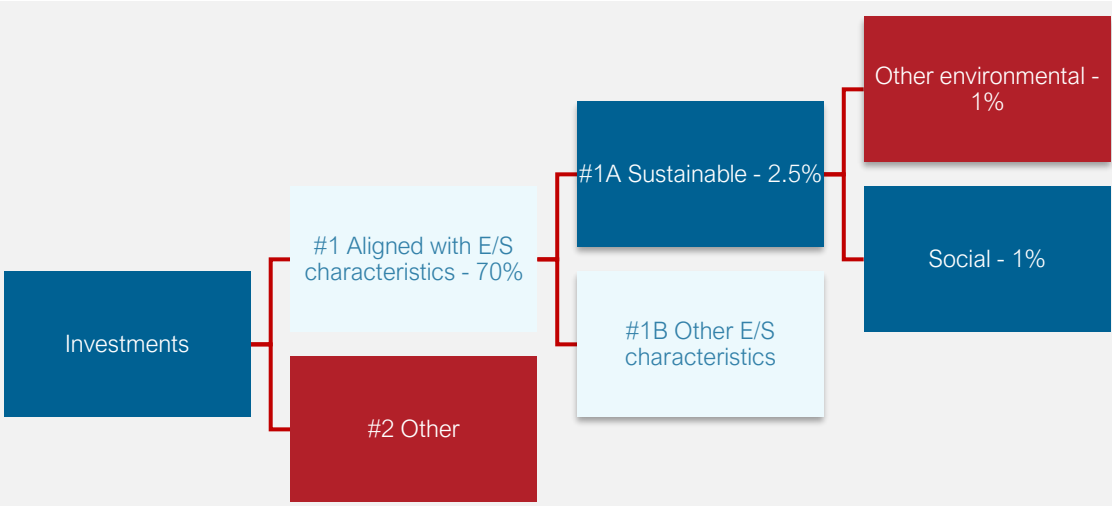

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 2.5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[56]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

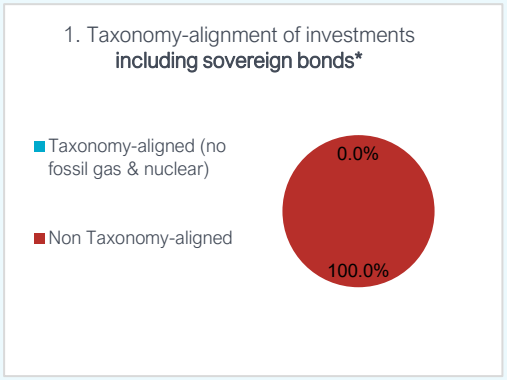

☒ No

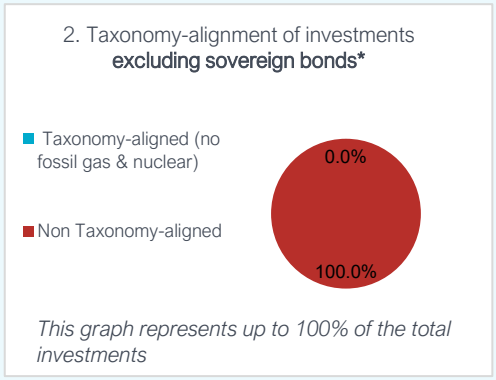

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[56] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261946288/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material

principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0.5% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

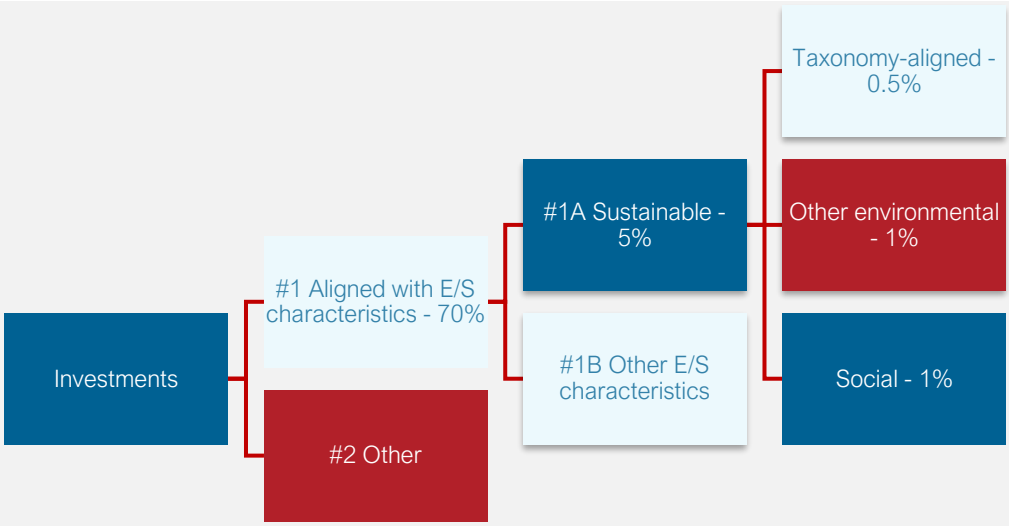

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0.5% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0.5% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[57]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

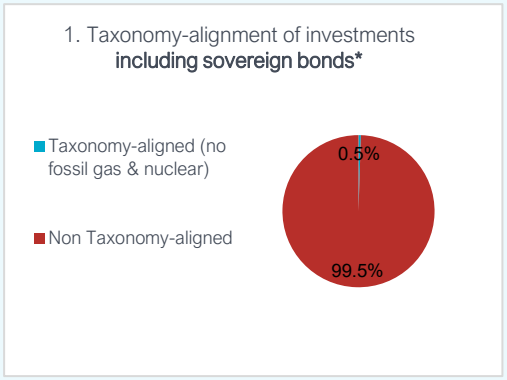

☒ No

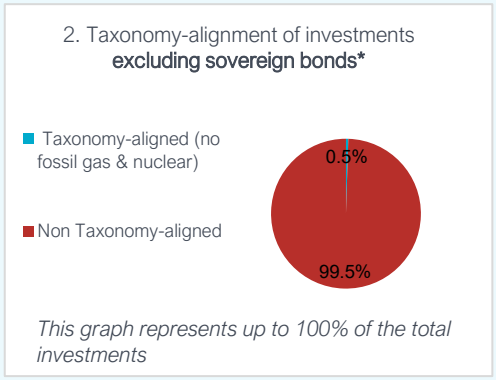

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[57] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0532243267/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Hybrids Bond Fund

Legal entity identifier:
549300BKJXZO8Z8K9S85

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

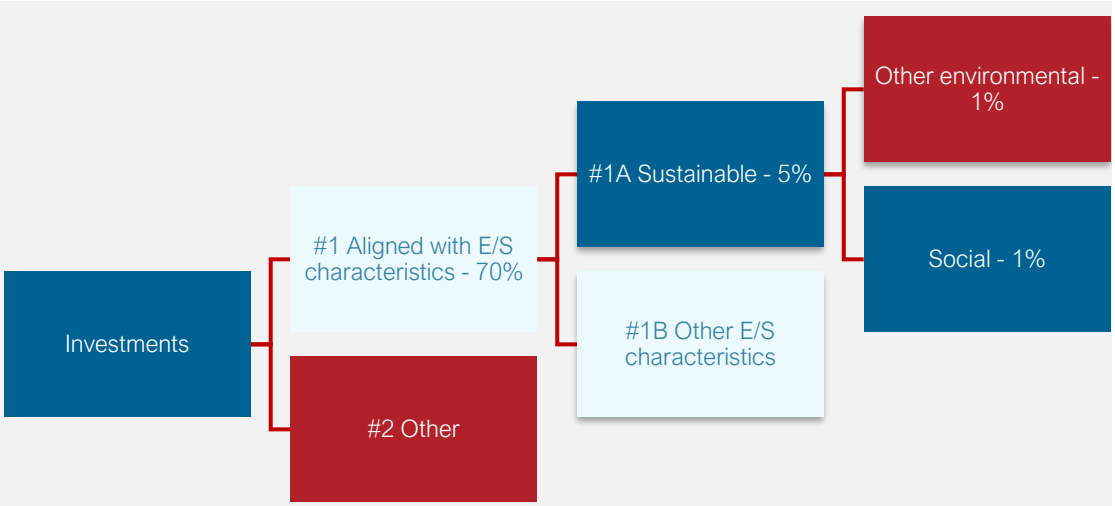

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[58]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

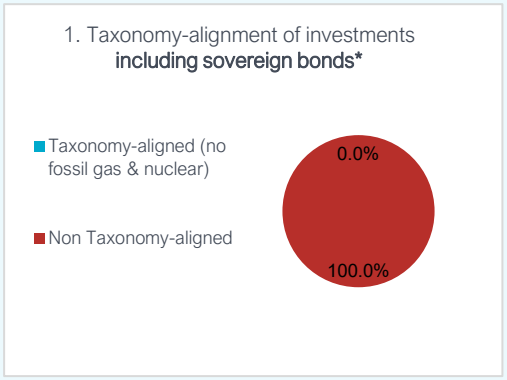

☒ No

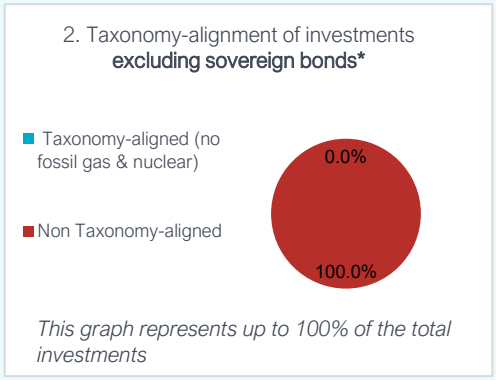

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[58] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2207557542/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

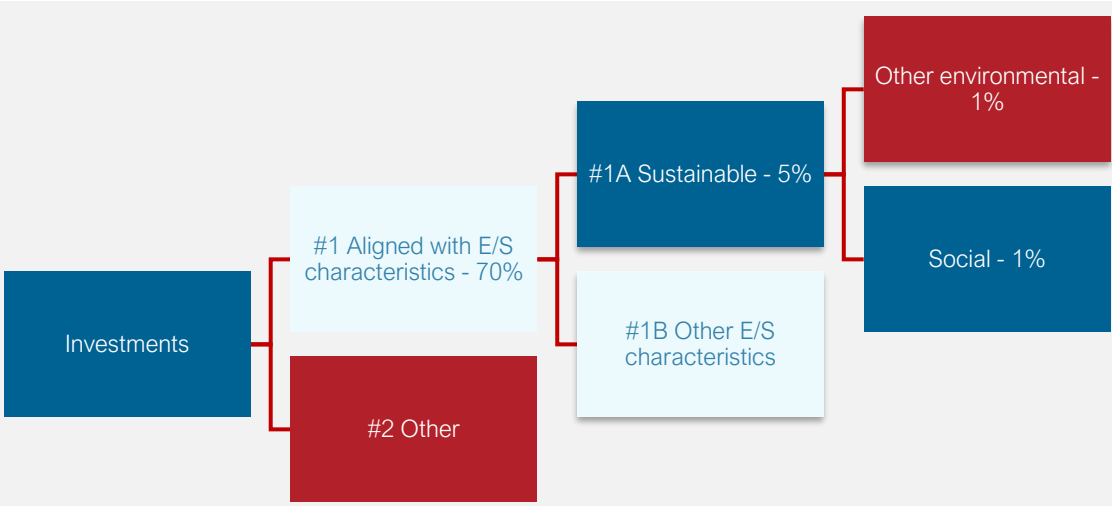

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[59]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

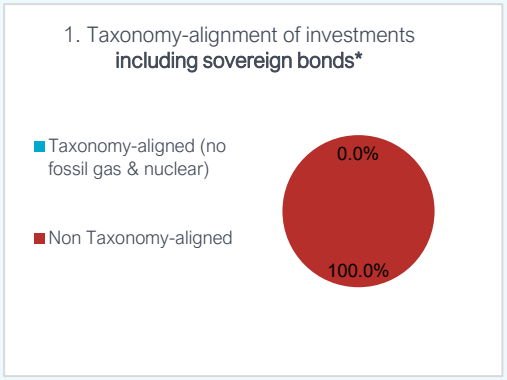

☒ No

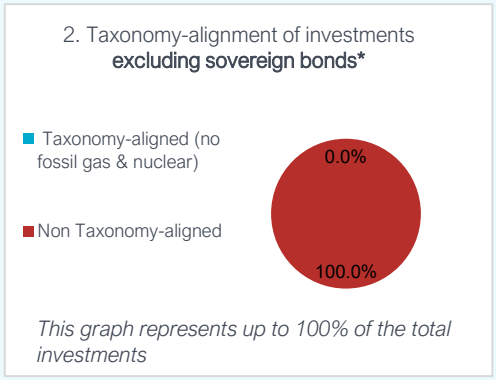

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[59] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0740037022/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Income Fund

Legal entity identifier:
549300Y91PT1E5IZKI34

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises a blend of Global Investment Grade corporate bonds, Global High Yield bonds and Global Emerging Market bonds.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the

fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and any relevant optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material

principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, rating used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the investment universe ;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

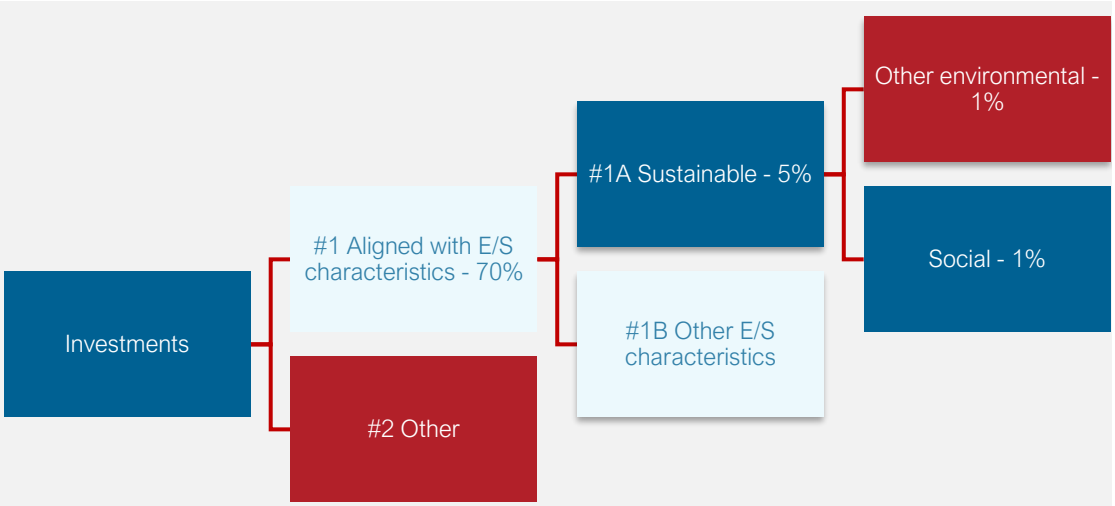

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[60]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

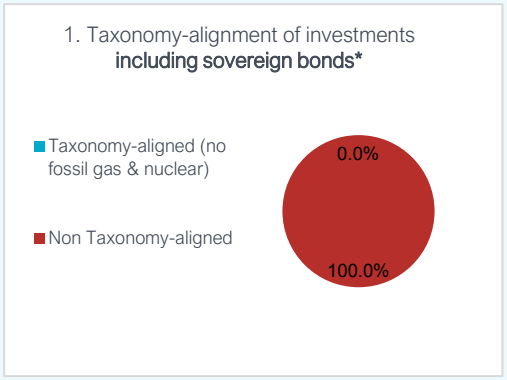

☒ No

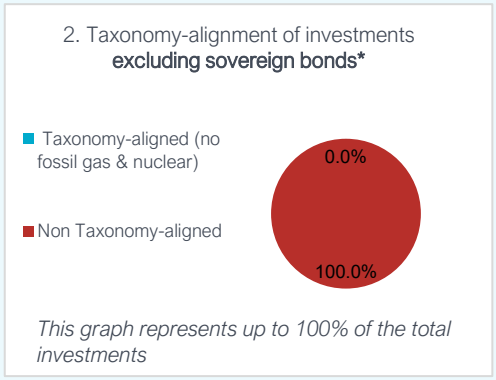

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[60] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0882574303/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Inflation-linked Bond Fund

Legal entity identifier:
78VTRQN40UWE9NYCJW22

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

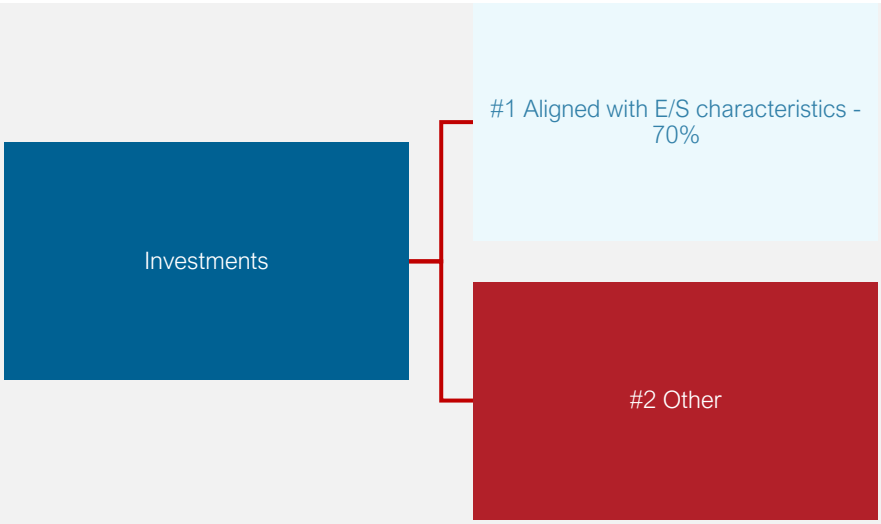

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest a minimum of 70% in assets which contribute to the ESG score of the portfolio. This is used to attain the environmental and social characteristics promoted by the fund.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[61]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

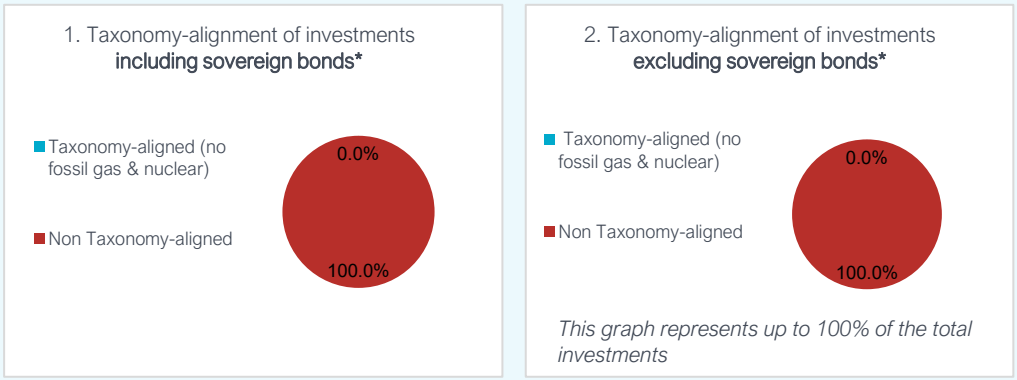

[61] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0353648891/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises a blend of 1-3yr US, UK, European and Asian investment grade corporate bonds, Emerging Market corporate bonds and high yield bonds.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the

fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);

• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and any relevant optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material

principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, rating used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the investment universe ;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

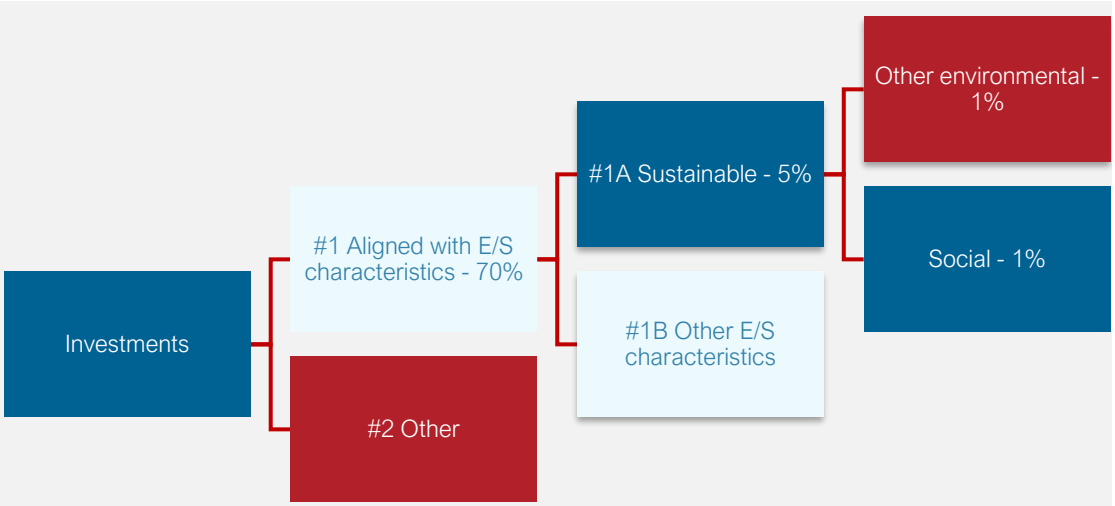

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[62]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

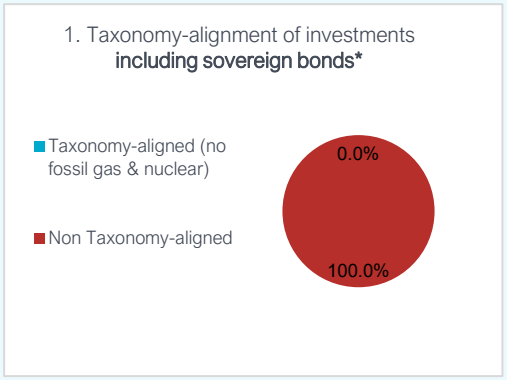

☒ No

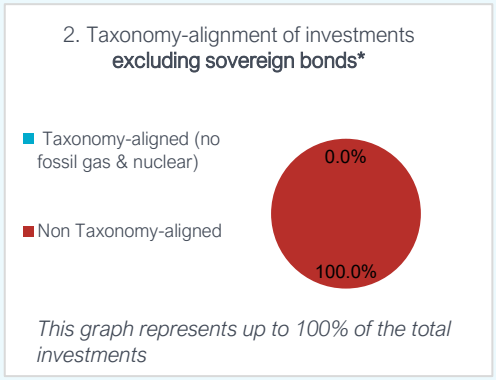

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[62] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0766124712/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Fidelity Funds - Climate Transition Bond Fund

Legal entity identifier:
549300L1AKMJ4PE06T04

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by investing in bonds or bonds of issuers that are supporting the climate transition through investments which
(i) contribute to climate objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs");
(ii) use bond proceeds to finance projects benefiting environmental or climate-related sustainability;
(iii) aim to improve management of climate-related risks and opportunities.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund used to meet the environmental or social characteristics promoted by the fund;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy;
(v) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(vi) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations "SDGs"; or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts.

Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund employs a primarily 'thematic' investment strategy to achieve its investment objectives, which includes investing in economic themes that are expected to contribute to a sustainable economy. In addition to theme selection, fundamental research is conducted on individual issuers. As part of the research process, environmental and social governance are considered. The factors considered relevant will vary between different issuers and industries and are integrated into investment decisions.

The fund invests at least 80% of its assets in bonds or bonds of issuers that support climate transition. These assets are monitored at an investment level to ensure they contribute to a clear and measurable path to environmental transition. These investments will either:
(i) contribute to climate objectives aligned with one or more United Nations Sustainable Development Goals;
(ii) use bond proceeds to finance projects benefiting the climate transition (including green bonds); or
(iii) aim to improve management of climate-related risks and opportunities.

The fund may invest in securities of issuers with low but improving ESG characteristics.

The fund will aim to have a lower carbon footprint compared to that of the broader market.

In respect of direct investments, the fund is subject to:
1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Climate Transition Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information : Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
(ii) a minimum of 20% in sustainable investments of which 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

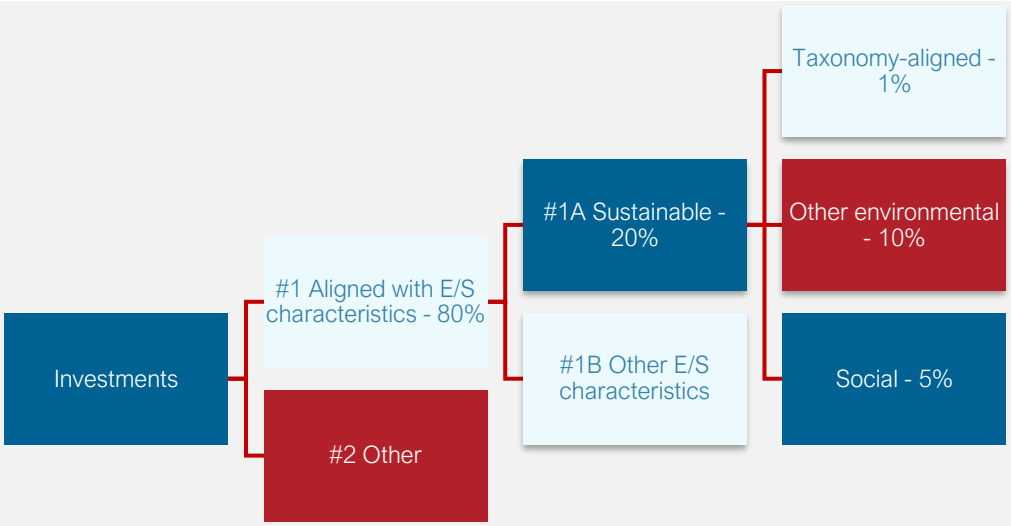

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 80% of its assets in assets used to meet the environmental or social characteristics promoted by the fund;
2. a minimum of 20% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 10% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 5% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers - which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative is deemed to attain the environmental and social characteristics promoted by the fund, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[63]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

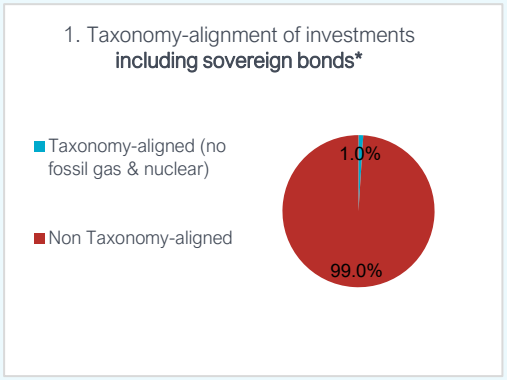

☒ No

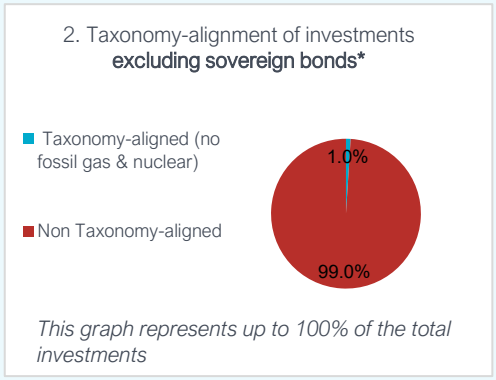

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 10% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 5% in sustainable investments with a social objective.

[63] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2111945882/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

This question is not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

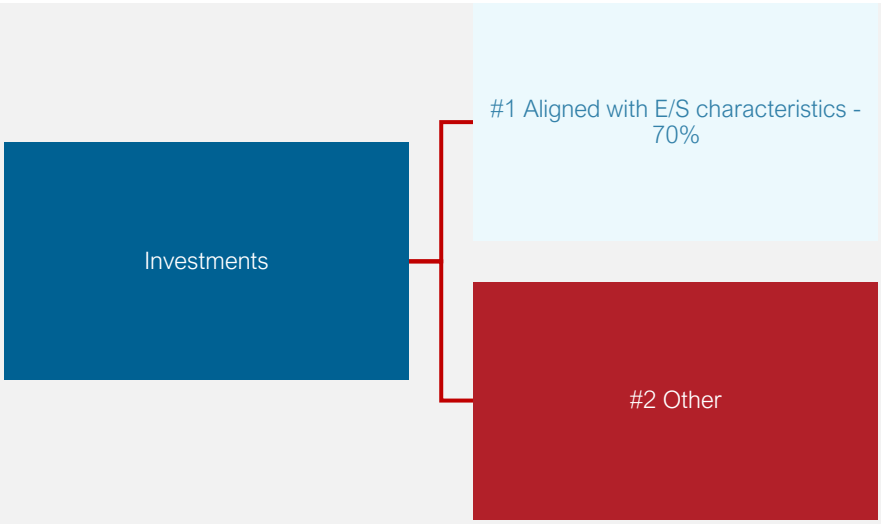

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[64]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

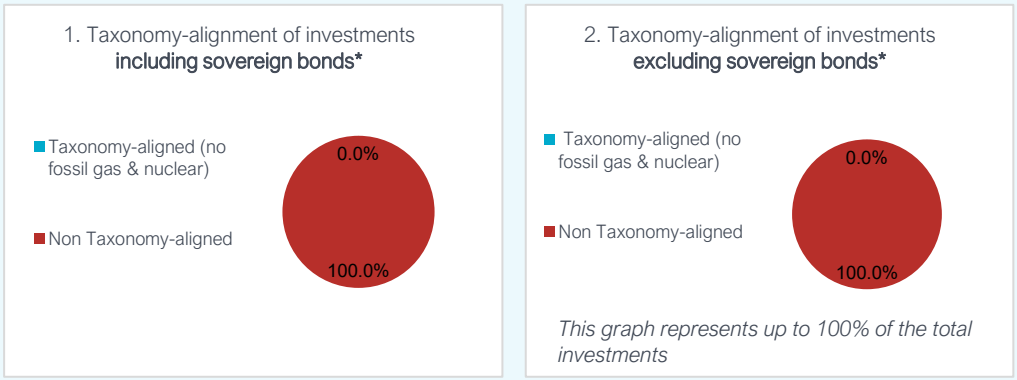

[64] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0594300849/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - US Dollar Bond Fund

Legal entity identifier:
757QSNCIZ38KH0VOQ986

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2.5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 2.5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

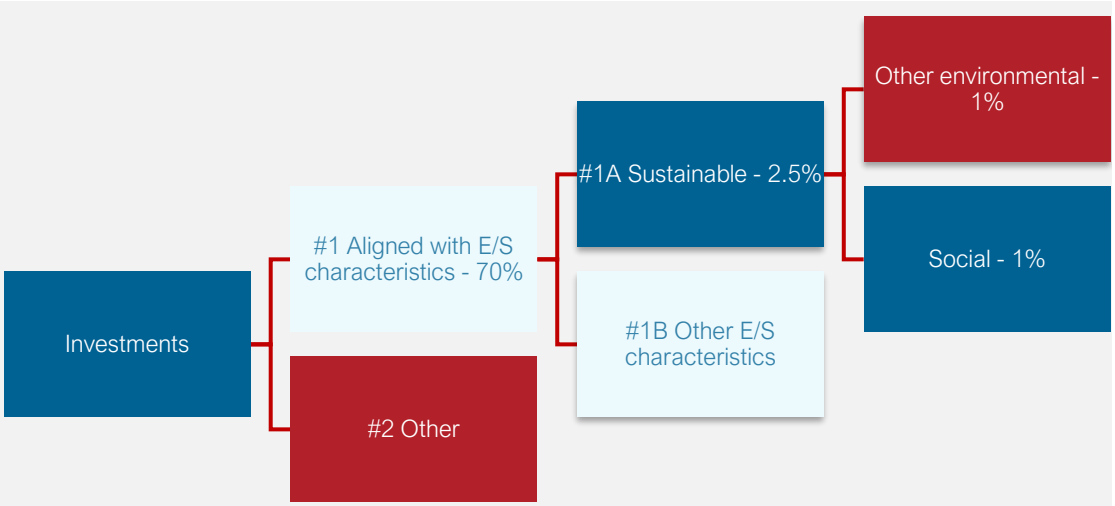

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 2.5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[65]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

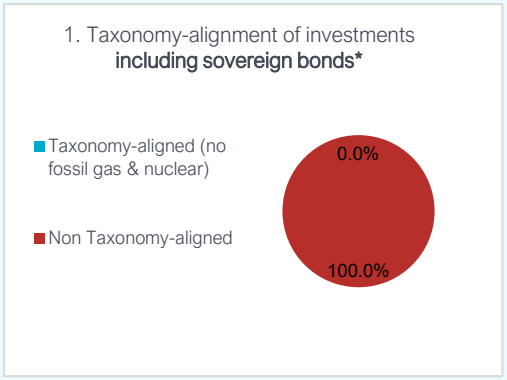

☒ No

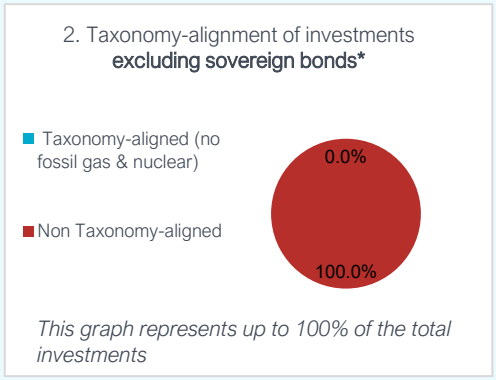

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[65] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261947682/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - US High Yield Fund

Legal entity identifier:
5493009BXYOCIRTXRS63

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

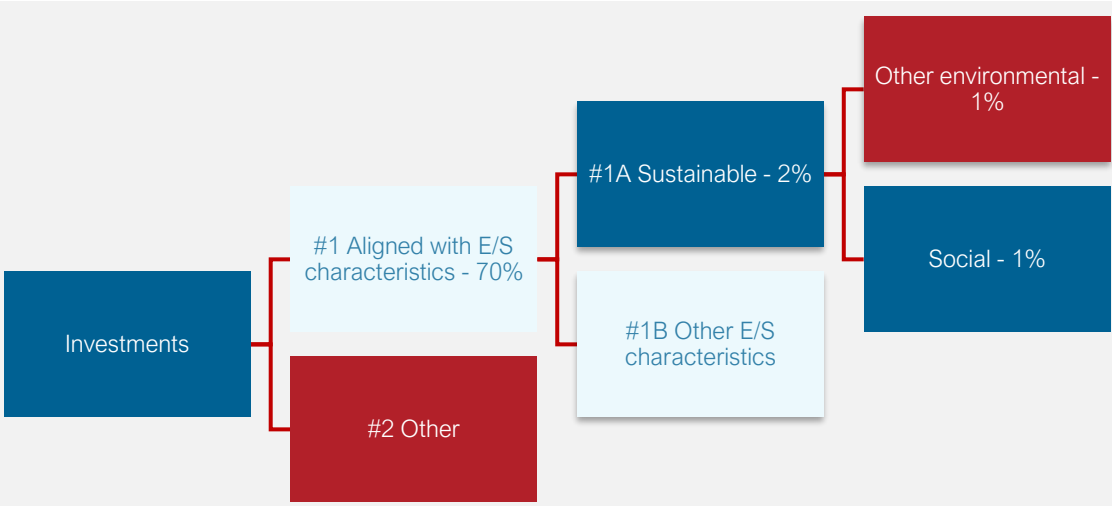

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% in assets which contribute to the ESG score of the portfolio. This is used to attain the environmental and social characteristics promoted by the fund;
(ii) a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[66]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

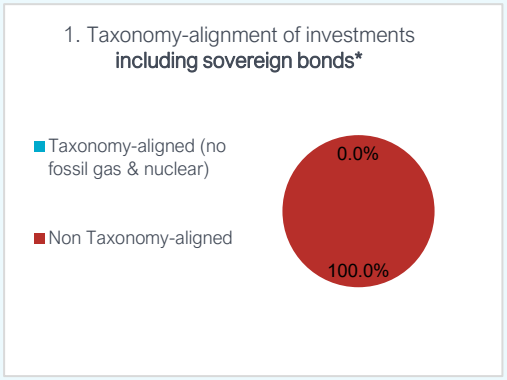

☒ No

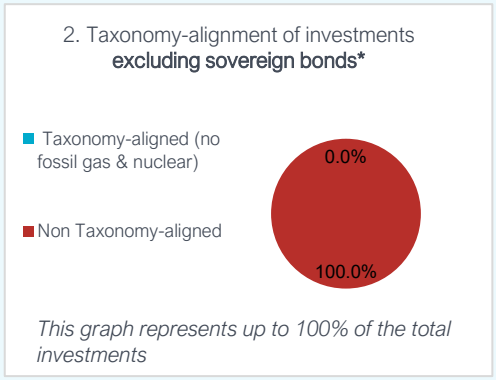

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[66] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0605520377/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2.5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i)*ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii)*Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 2.5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

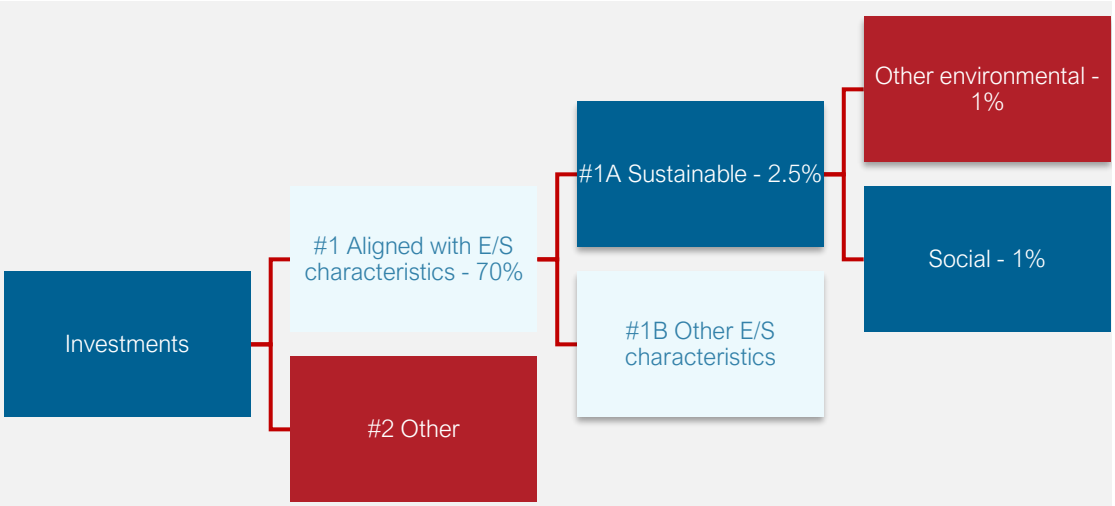

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 2.5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[67]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

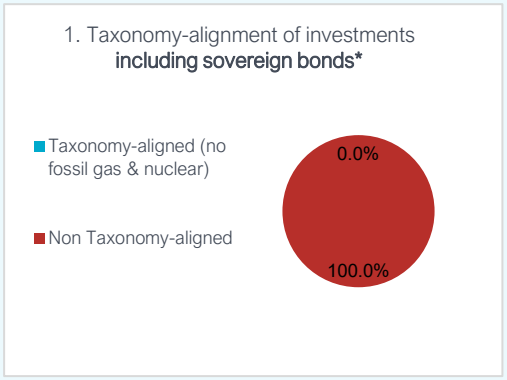

☒ No

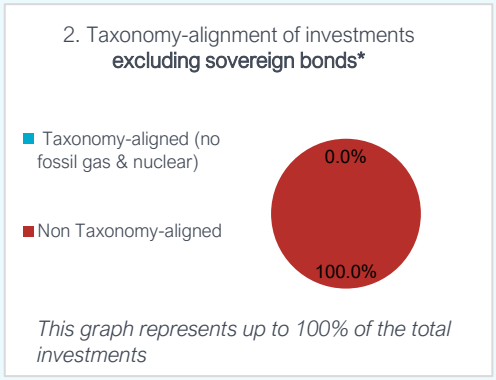

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[67] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251130638/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Euro Corporate Bond Fund

Legal entity identifier:
549300HVFD74DI2L1428

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

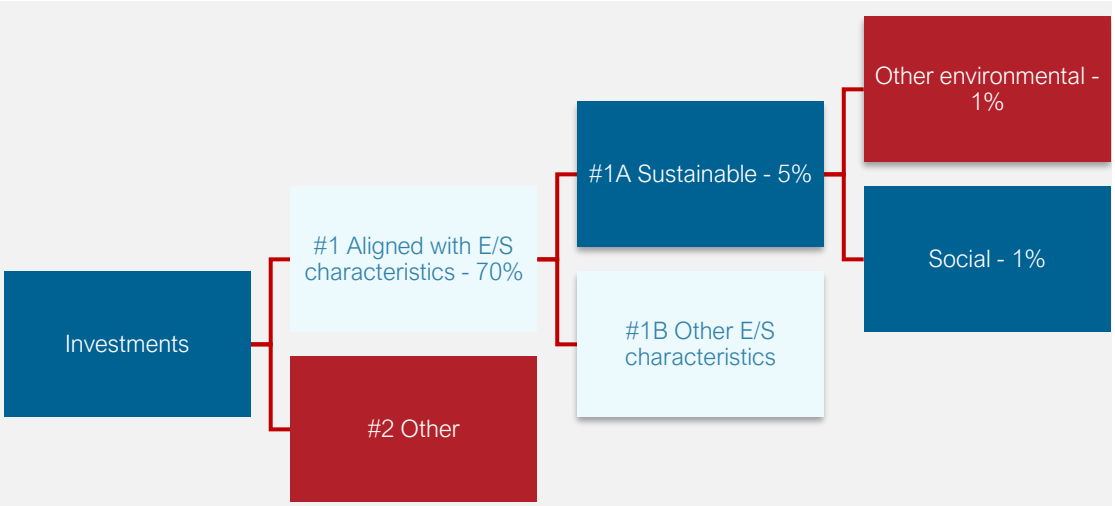

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[68]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

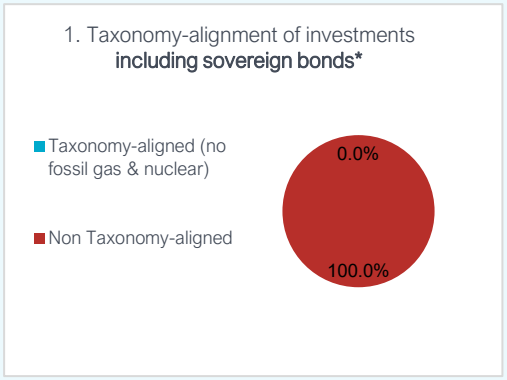

☒ No

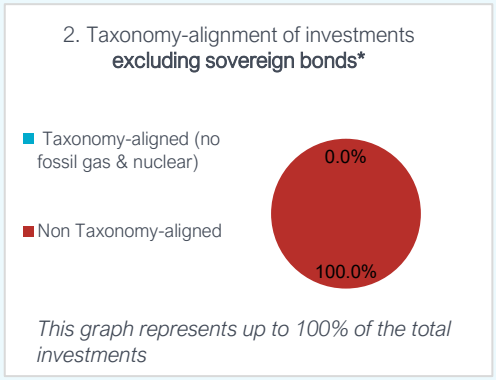

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[68] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0370787193/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

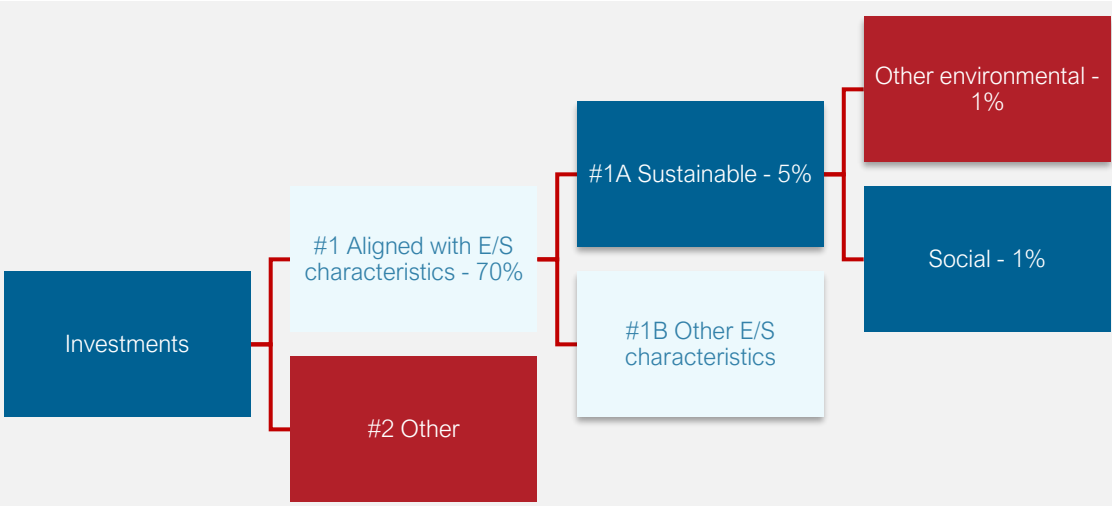

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[69]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

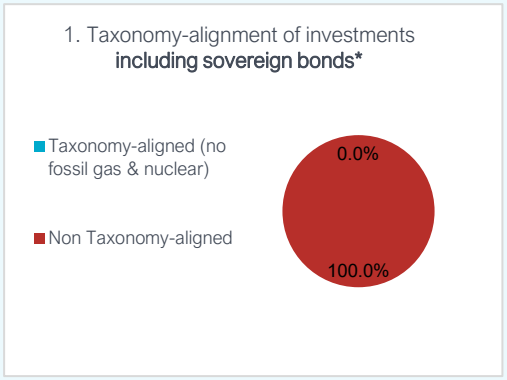

☒ No

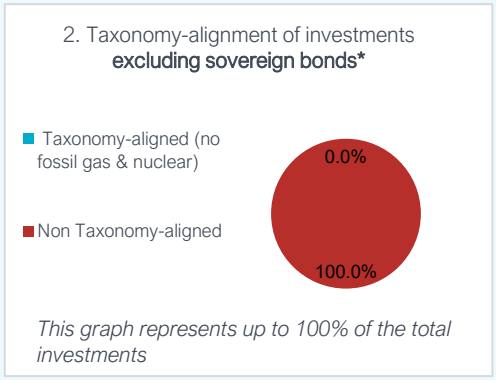

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[69] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251130802/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

3NMLOFBNMWJ7JPIH6S89

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

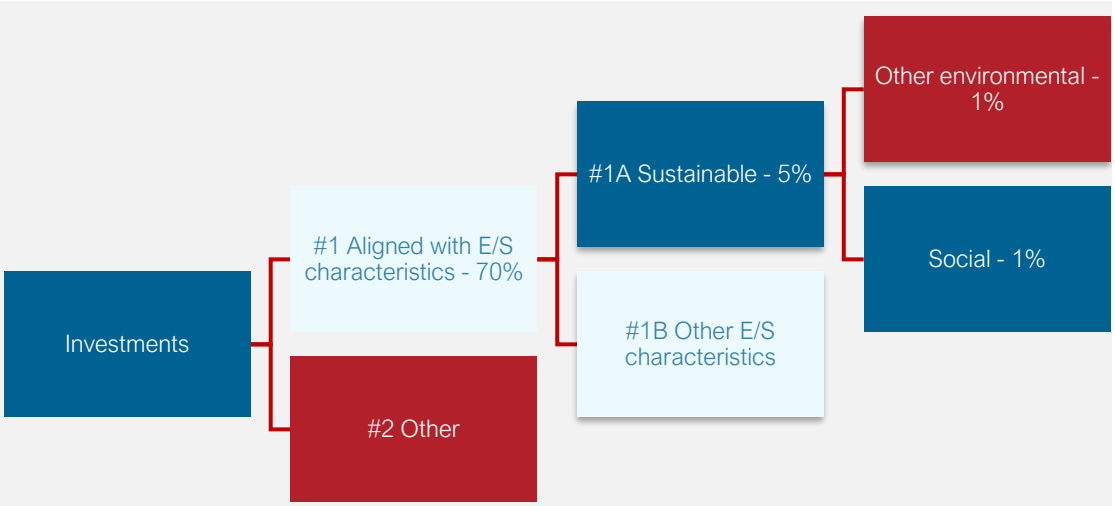

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[70]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

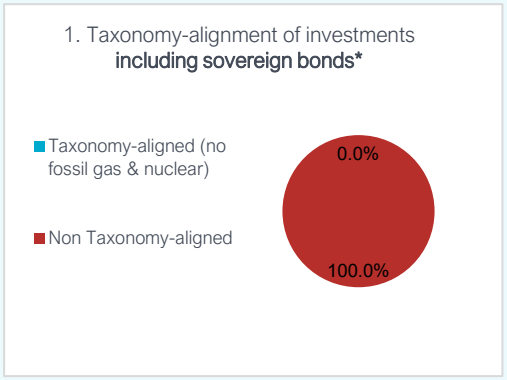

☒ No

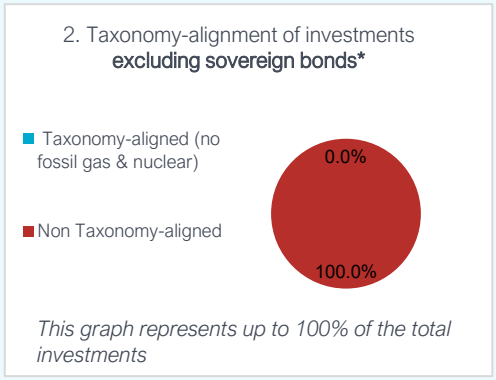

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[70] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0267388220/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

254900PSXCPD7UYZ5904

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. Fixed and floating rate securitised investments backed by a variety of assets such as corporate loans.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to the Investment Manager's ESG ratings and/or ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - The Investment Manager references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - The Investment Manager uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts.

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

The Investment Manager takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. an exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

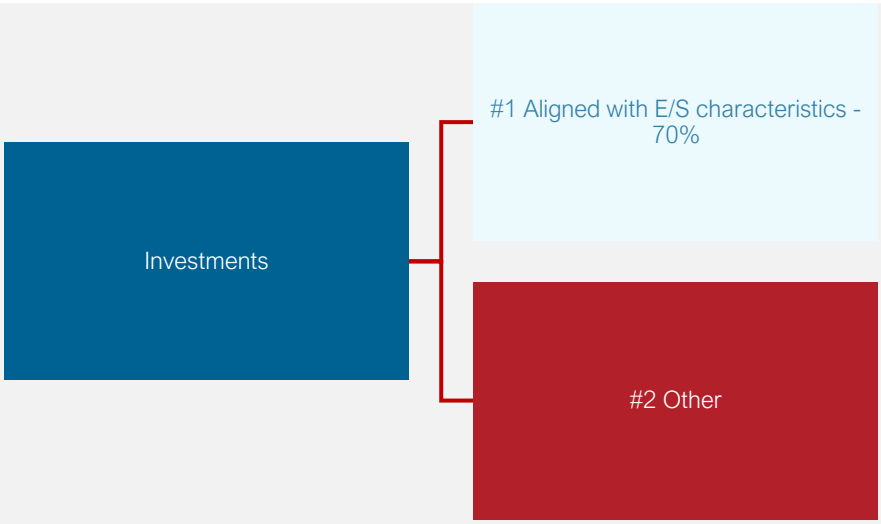

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[71]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

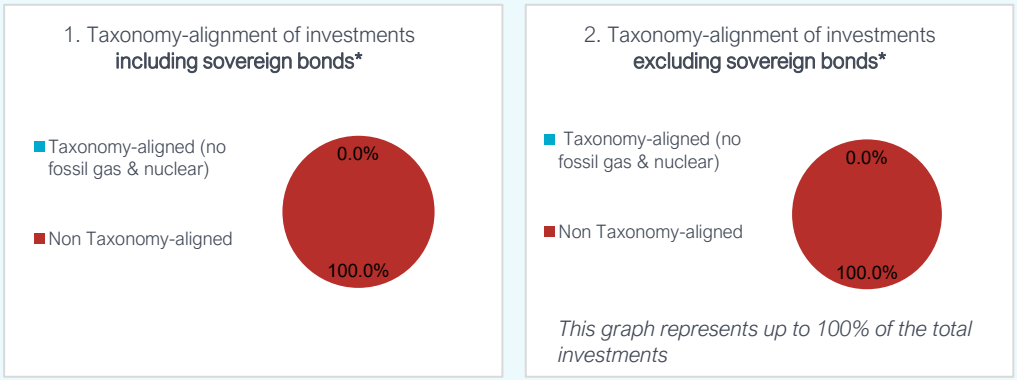

[71] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website:
https://www.fidelity.lu/funds/factsheet/LU2495143062/tab-disclosure#SFDR-disclosure.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Asia Pacific Bond ESG Fund

Legal entity identifier:
25490016JMCH6V9O7111

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund measured against the ESG score of its benchmark excluding 20% of assets with the lowest ESG ratings;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as for performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's norms based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark after the exclusion of 20% of the assets with the lowest ESG ratings, by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark. The fund may invest in securities of issuers with low but improving ESG characteristics.

The fund aims to have a lower carbon footprint compared to that of the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied; and
3. Paris Aligned Benchmark exclusions.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of its benchmark, after excluding 20% of assets with the lowest ESG ratings; and
(ii) will invest a minimum of 10% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

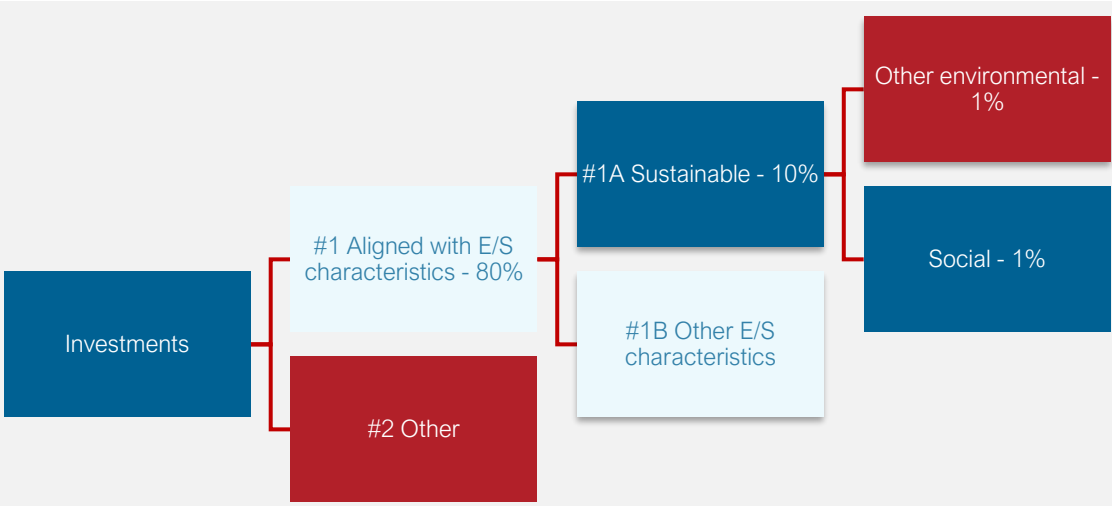

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 80% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 10% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[72]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

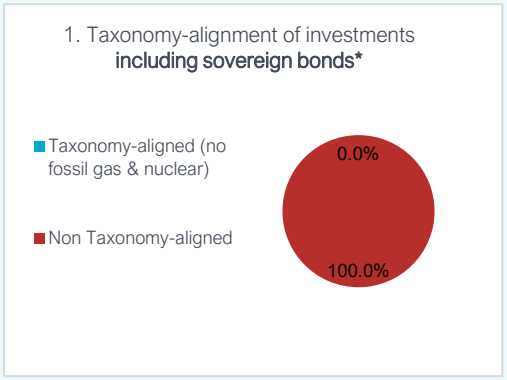

☒ No

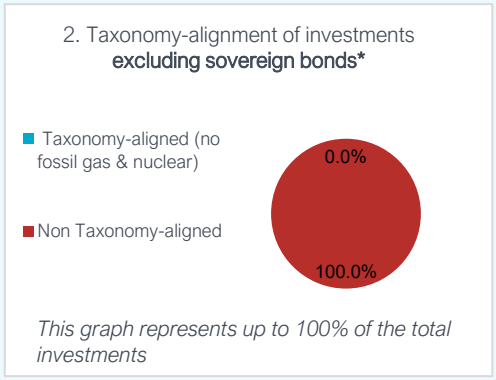

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[72] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund may be invested in assets aligned with the financial objective of the fund, as well as cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2386144906/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

5493005X6HEWY2HZVZ41

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises a blend of the CNHJ Index (ICE BofA China Offshore Broad Market Index), the G0CN Index (ICE BofA China Government Index) and the CN0C Index (ICE BofA China Corporate Index).

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The

Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing

norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and any relevant optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, rating used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the investment universe ;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

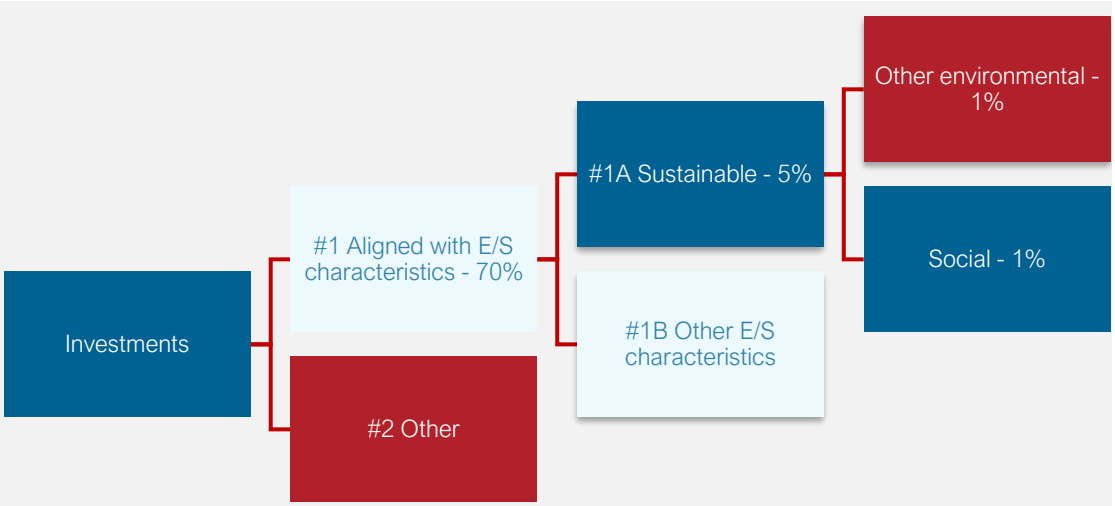

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[73]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

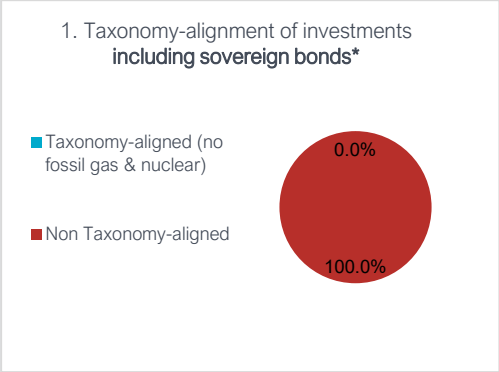

☒ No

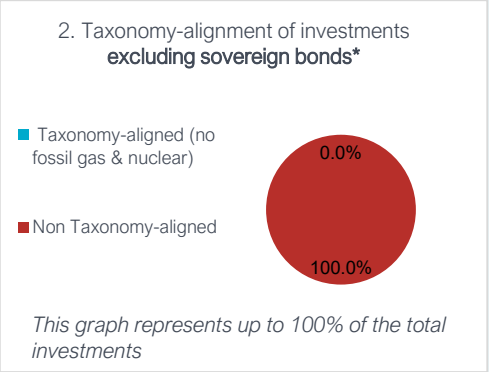

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[73] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0740036131/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Emerging Market Corporate Debt Fund

Legal entity identifier:
549300CUU5R1E8GYA005

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy

screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation to identify issuers with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations

and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund:

(i) aims to achieve an ESG score of its portfolio greater than that of the benchmark;
(ii) will invest a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

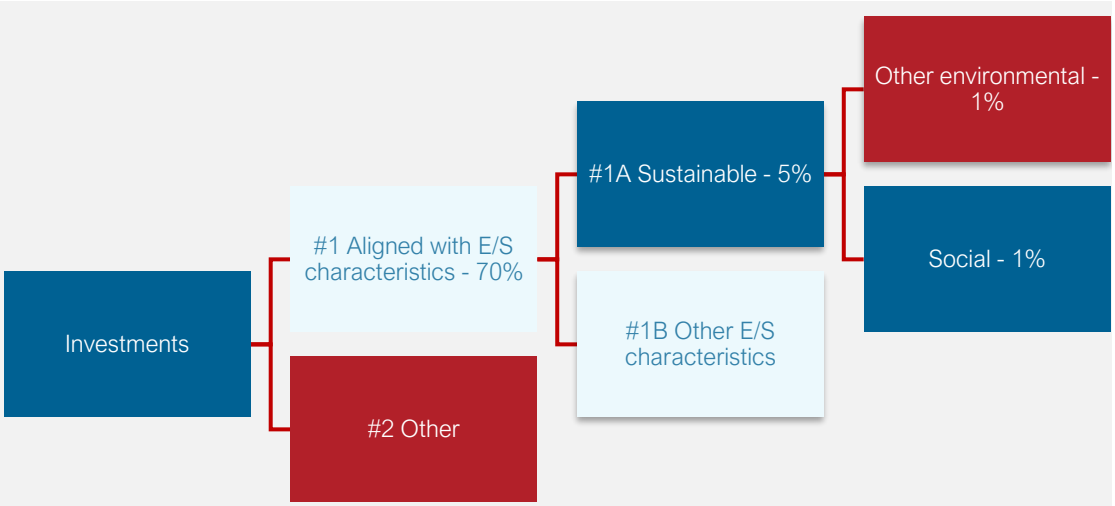

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

(i) a minimum of 70% of the fund's assets in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio;
(ii) a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental or social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[74]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

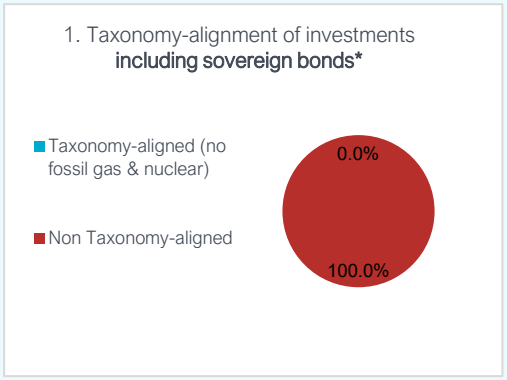

☒ No

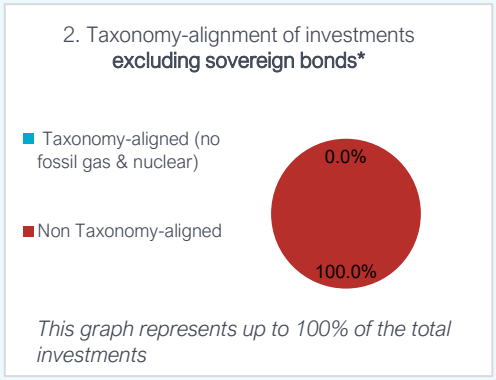

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

[74] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0900495697/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

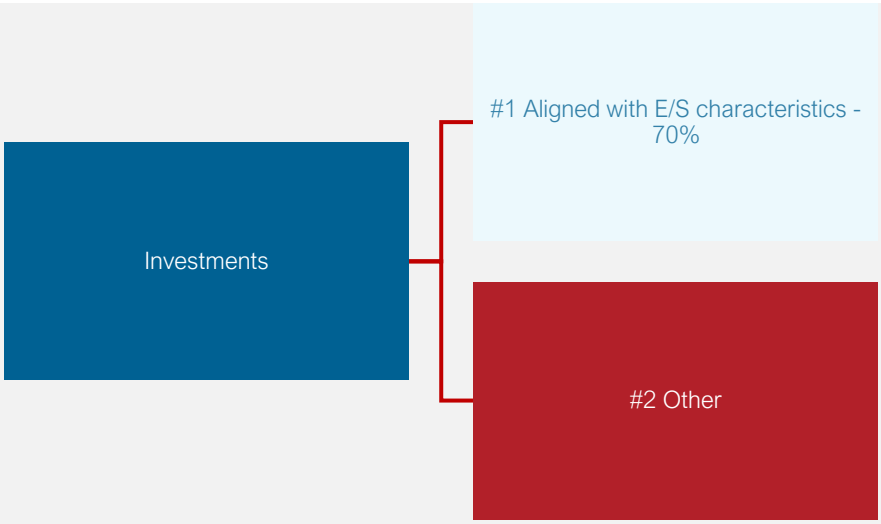

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest a minimum of 70% in assets which contribute to the ESG score of the portfolio. This is used to attain the environmental and social characteristics promoted by the fund.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[75]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

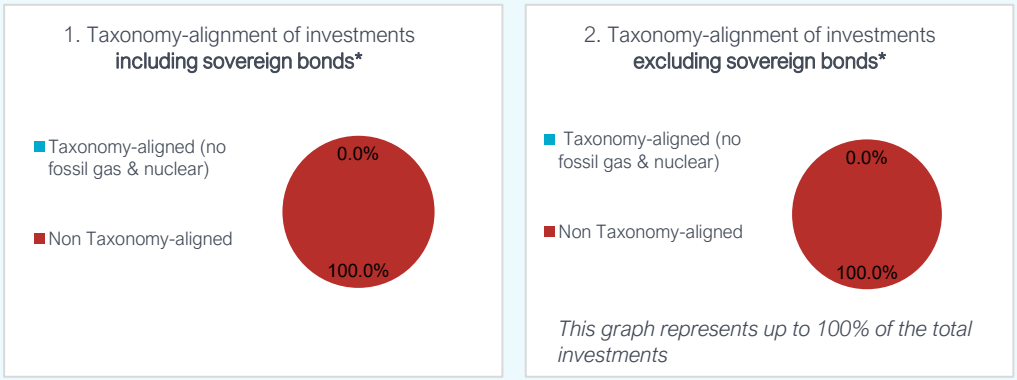

[75] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0238205289/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

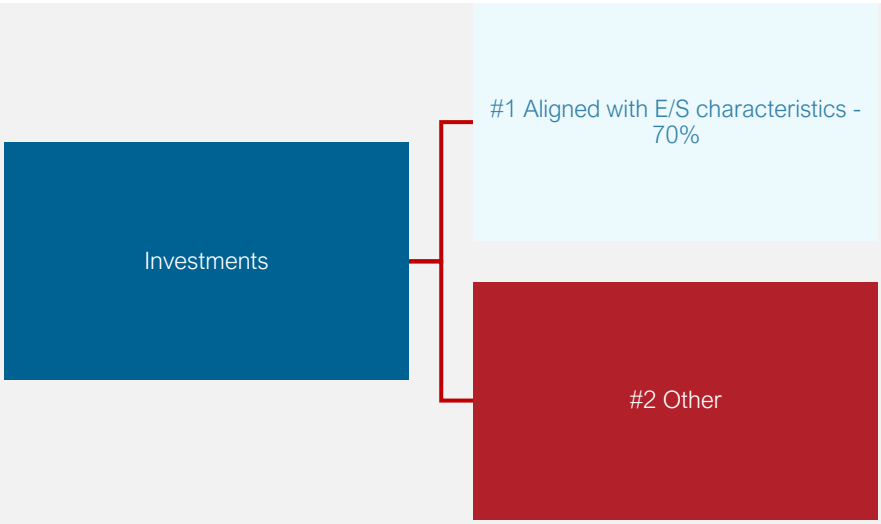

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest a minimum of 70% in assets which contribute to the ESG score of the portfolio. This is used to attain the environmental and social characteristics promoted by the fund.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[76]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

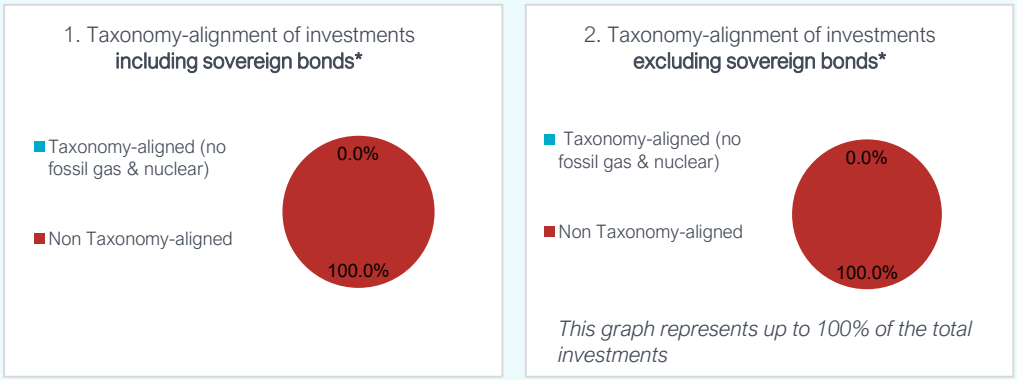

[76] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2219351280/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☒ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of its benchmark. ESG scores are determined by reference to ESG ratings.

ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the benchmark.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the benchmark using either a weighted average or equal weighted method of calculation. Further details on the above calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to exceed the ESG score of the benchmark, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

Fidelity INTERNATIONAL

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of its benchmark; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark by investing in securities of issuers with, on average, better ESG characteristics than those in the benchmark.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines, and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information:Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the benchmark.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

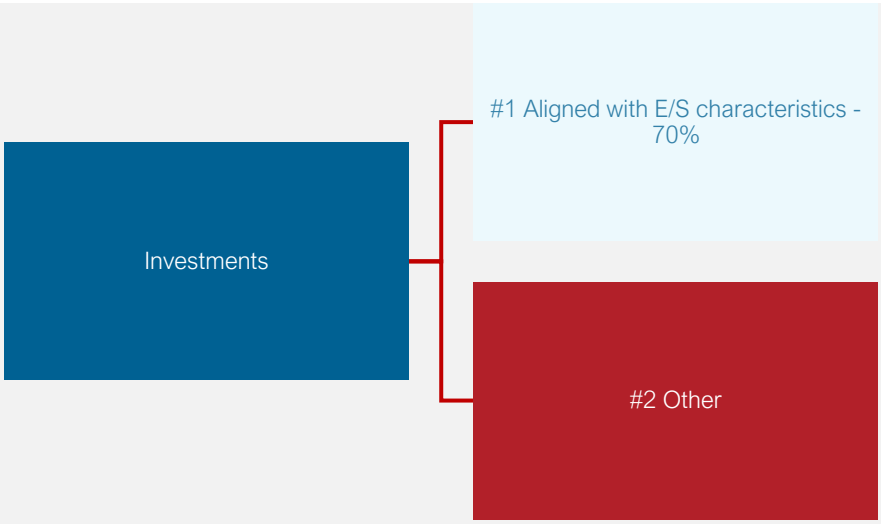

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest a minimum of 70% in assets which contribute to the ESG score of the portfolio. This is used to attain the environmental and social characteristics promoted by the fund.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[77]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

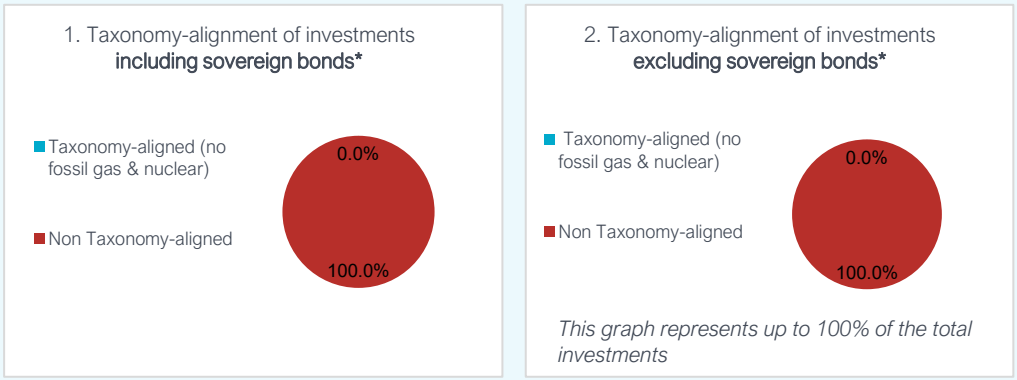

[77] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1830996044/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - European Multi Asset Income Fund

Legal entity identifier:
549300P3VQEECSQRUQ90

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

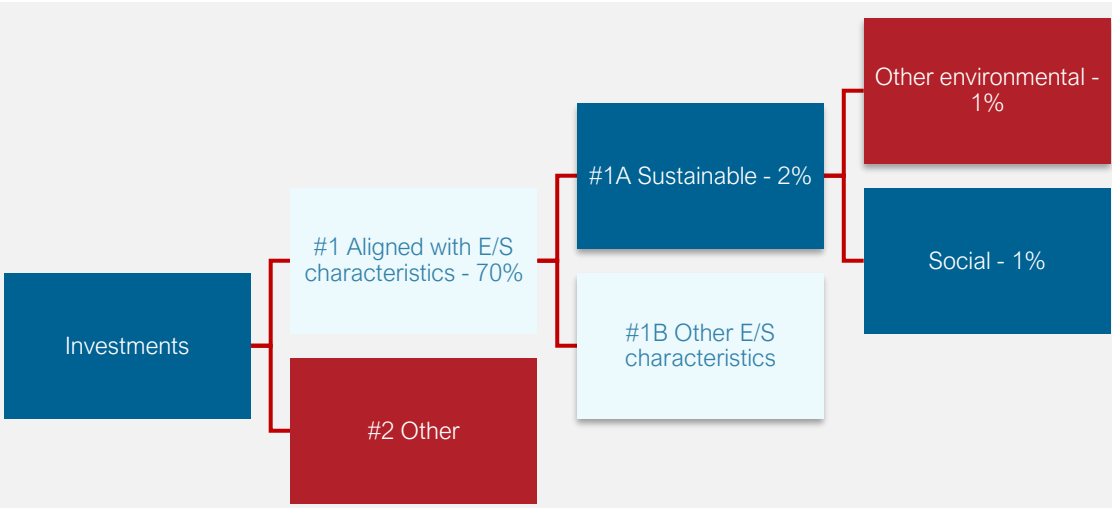

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[78]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

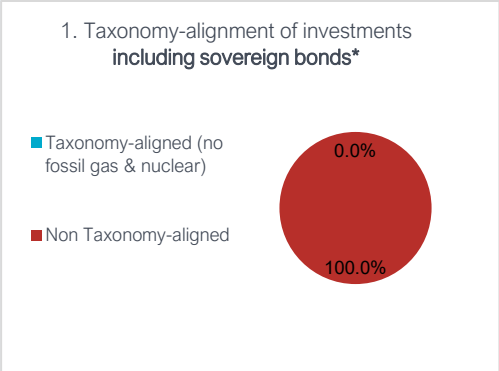

☒ No

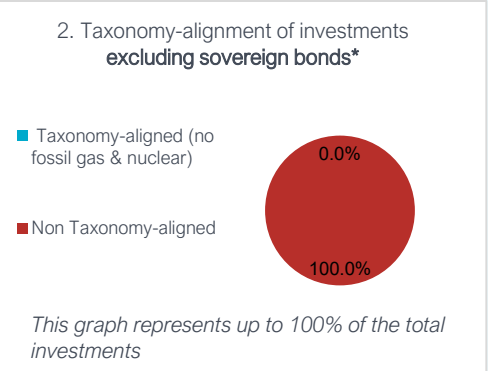

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[78] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261950553/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Multi Asset Growth & Income Fund

Legal entity identifier:
5493008F45JC2MQ5TU47

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

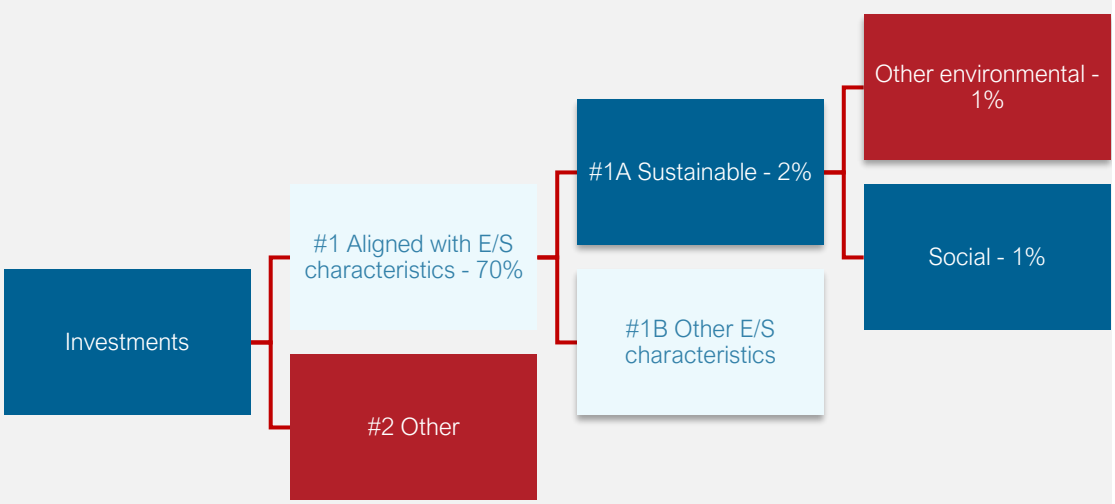

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject

to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[79]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

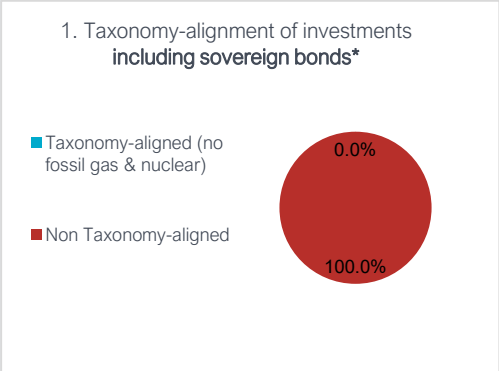

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the

[79] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0267387685/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Multi Asset Income Fund

Legal entity identifier:
549300ISMCTFO21OMK36

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

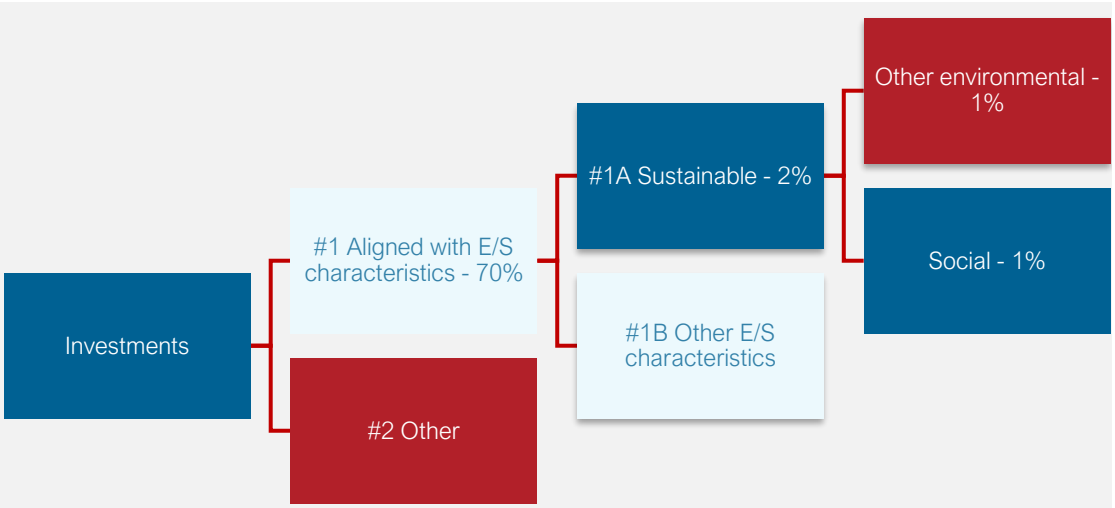

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[80]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

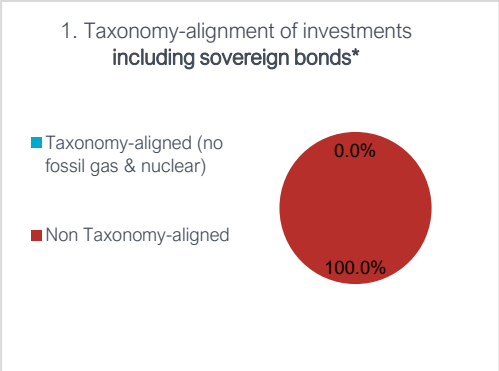

☒ No

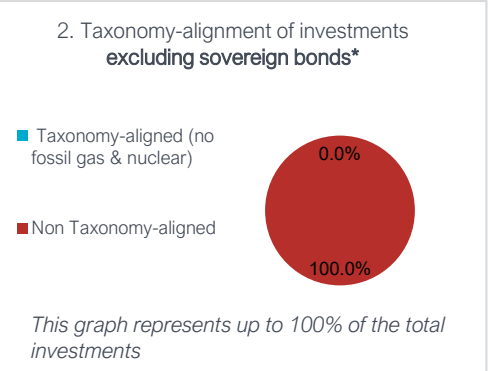

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[80] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1116430247/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Multiple Opportunities Fund

Legal entity identifier:
549300GG6X1NDTLYIF66

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

ESG characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;

2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

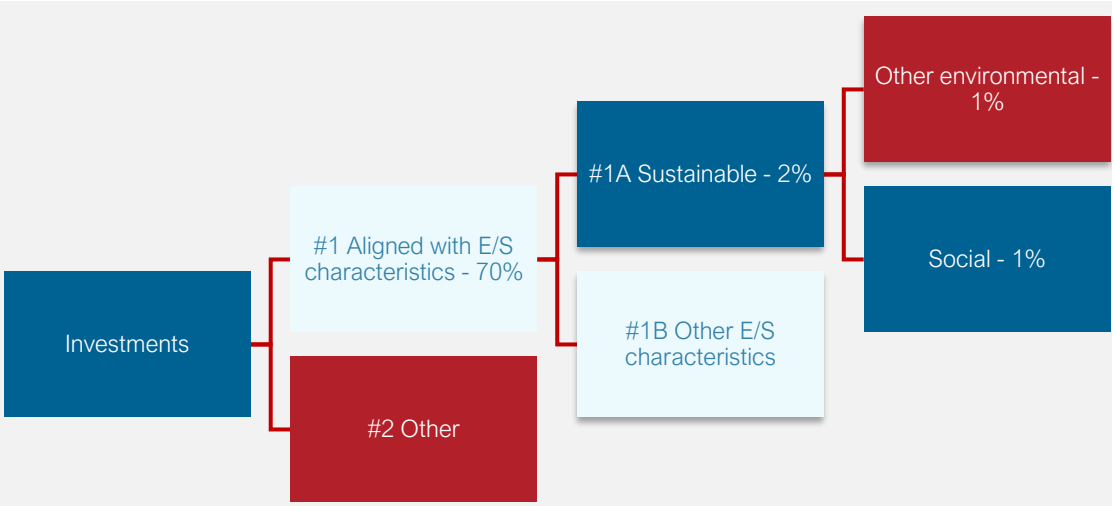

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, in accordance with Fidelity's Sustainable Investing Framework, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[81]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

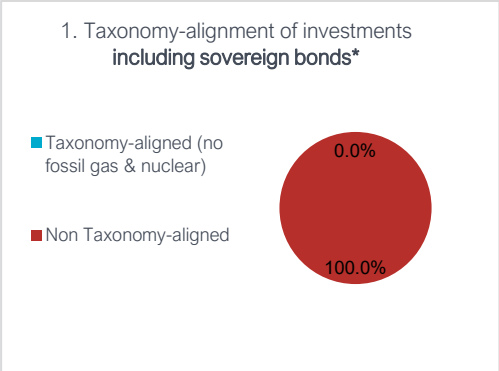

☒ No

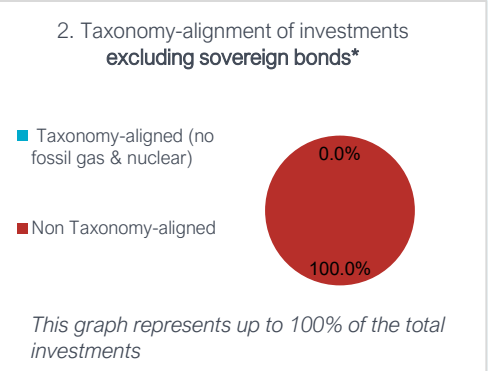

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[81] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0138981039/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Global Multi Asset Defensive Fund

Legal entity identifier:
5493008HJXN8FJHTHL81

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines;

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

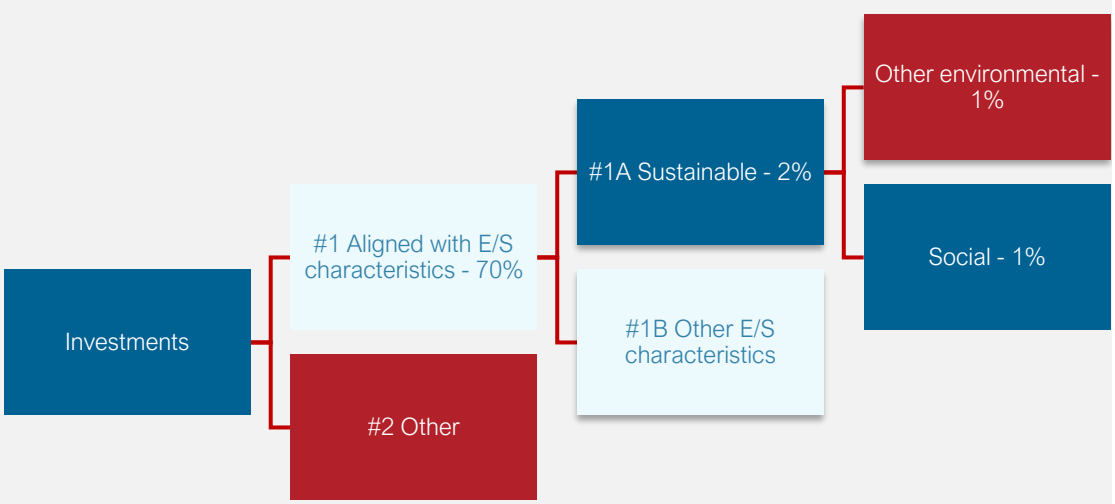

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject

to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[82]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

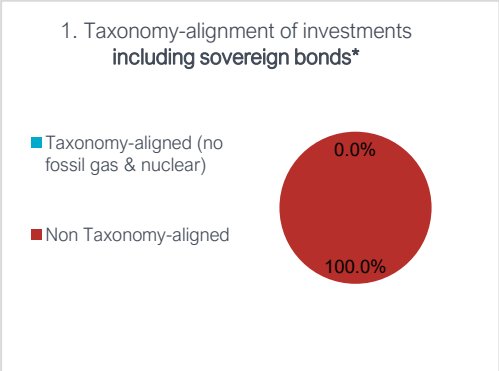

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the

[82] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0393653166/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2025 Fund

549300JQL1HZ76MV0M05

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

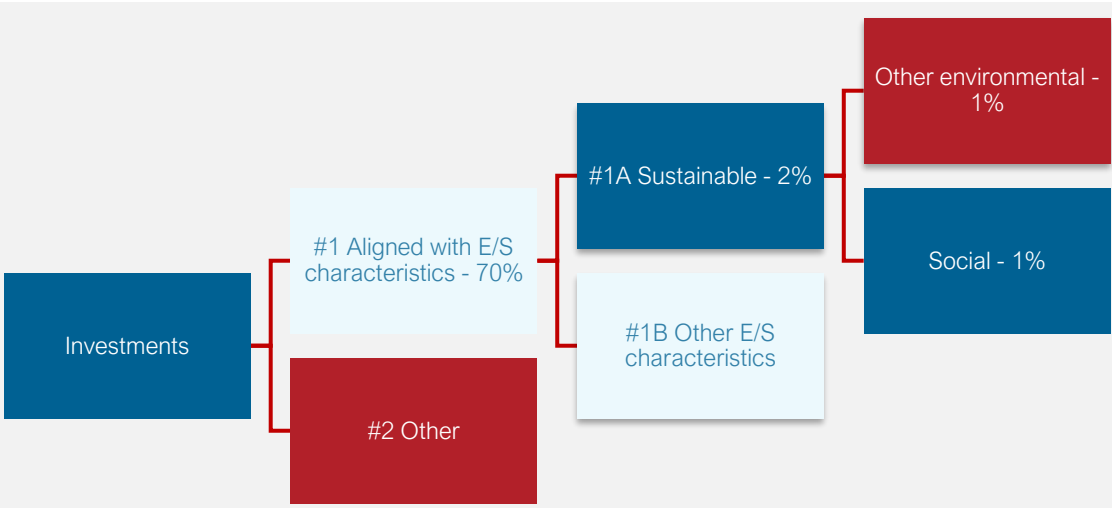

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[83]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

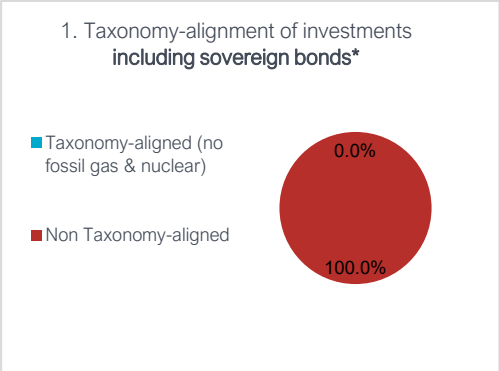

☒ No

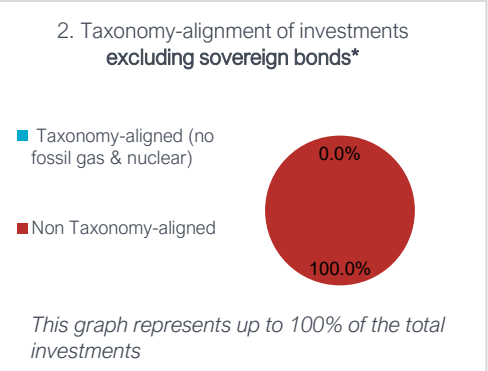

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[83] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251131792/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2030 Fund

Legal entity identifier:
549300D1BVEZ3TH0BG02

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promotes E/S characteristics, but will not make sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

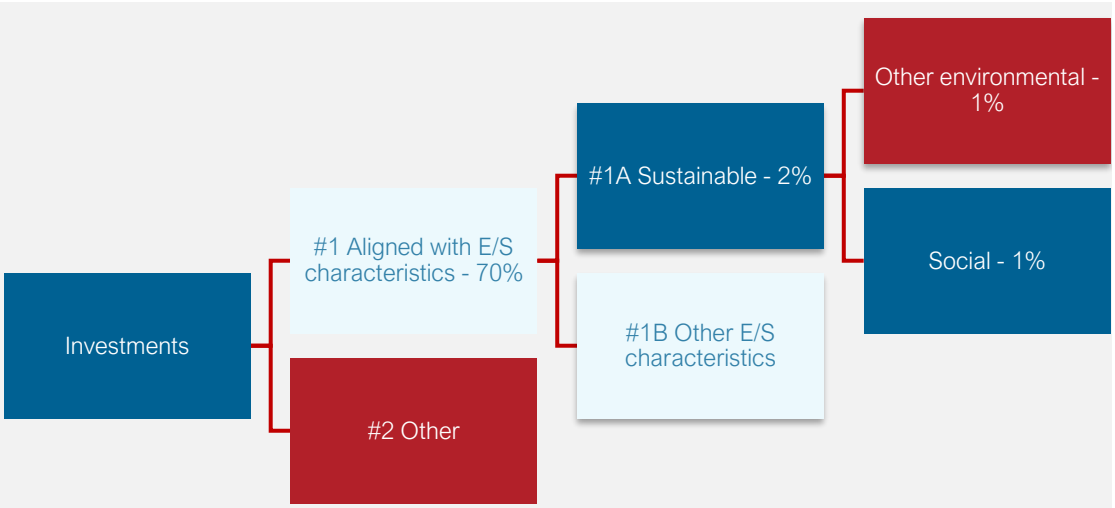

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[84]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

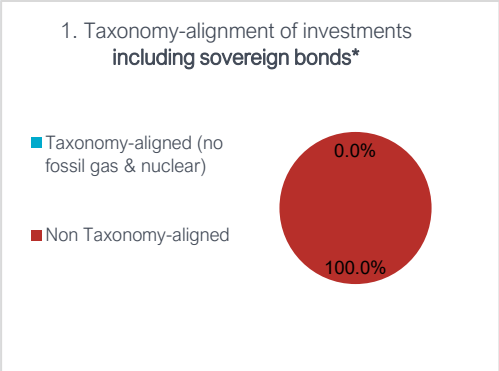

☒ No

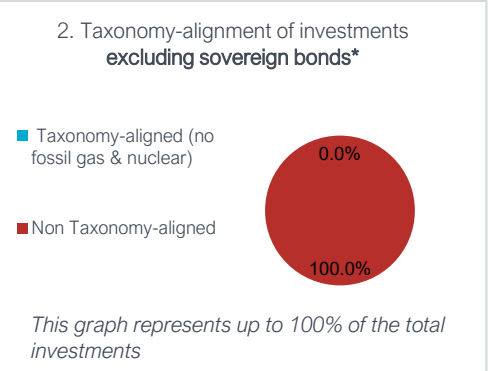

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[84] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251131362/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2035 Fund

Legal entity identifier:
549300XULTNPDTV56Y50

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

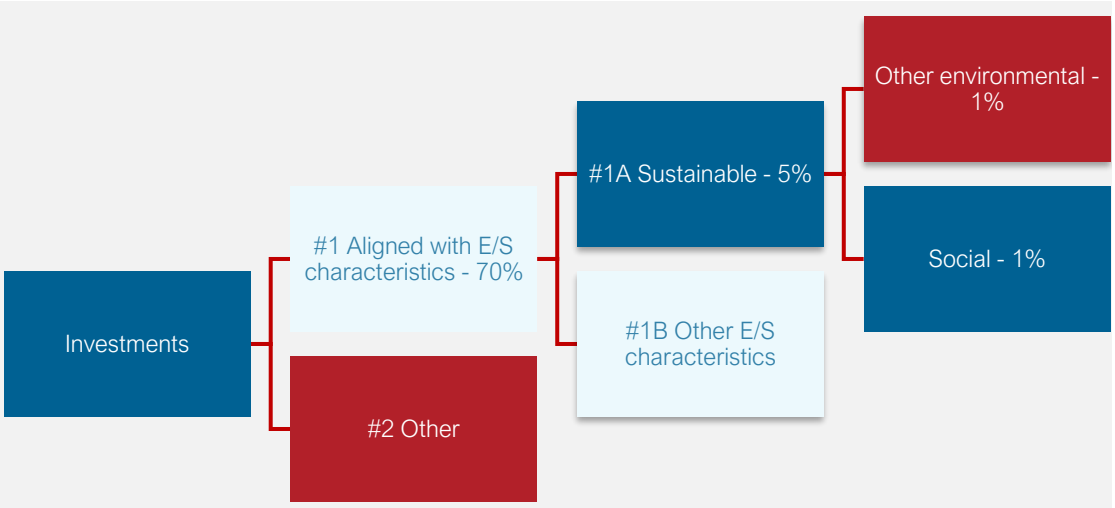

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[85]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

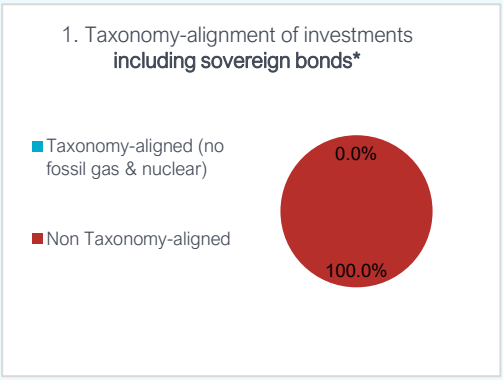

☒ No

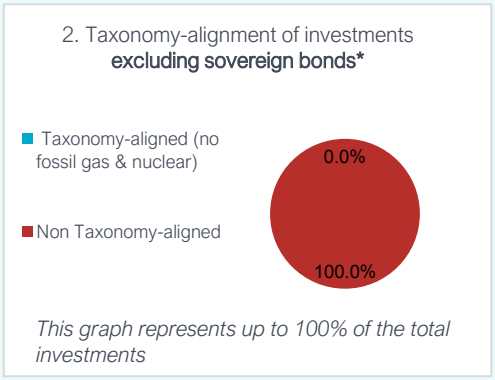

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[85] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251119078/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2040 Fund

Legal entity identifier:
549300CNQ4TMHDVBVK47

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

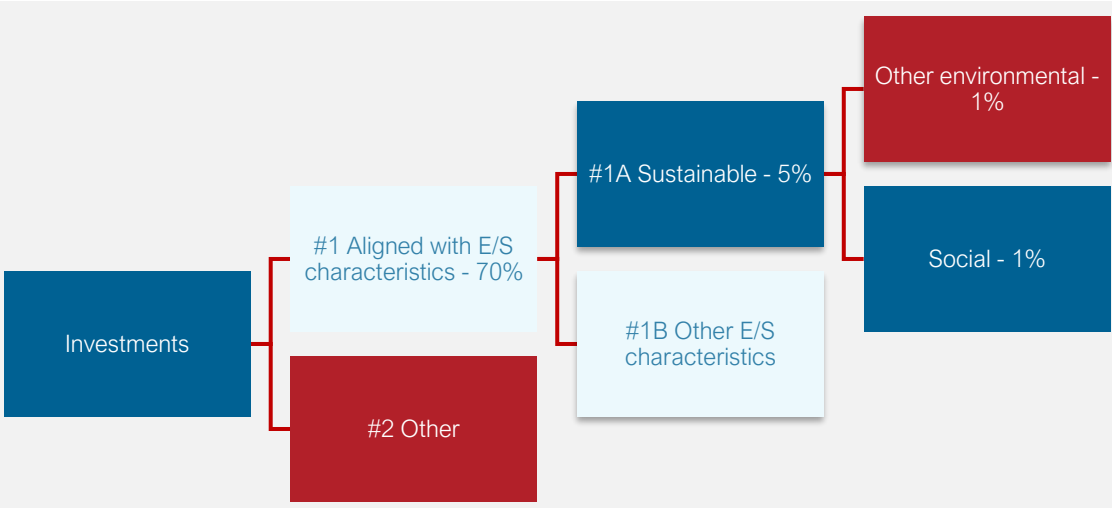

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[86]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

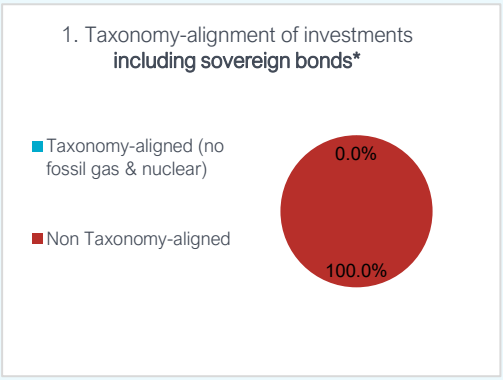

☒ No

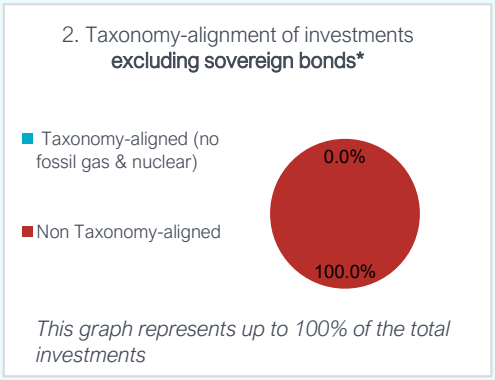

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[86] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0251120084/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2045 Fund

Legal entity identifier:
549300Q8NRARUSN1XS58

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

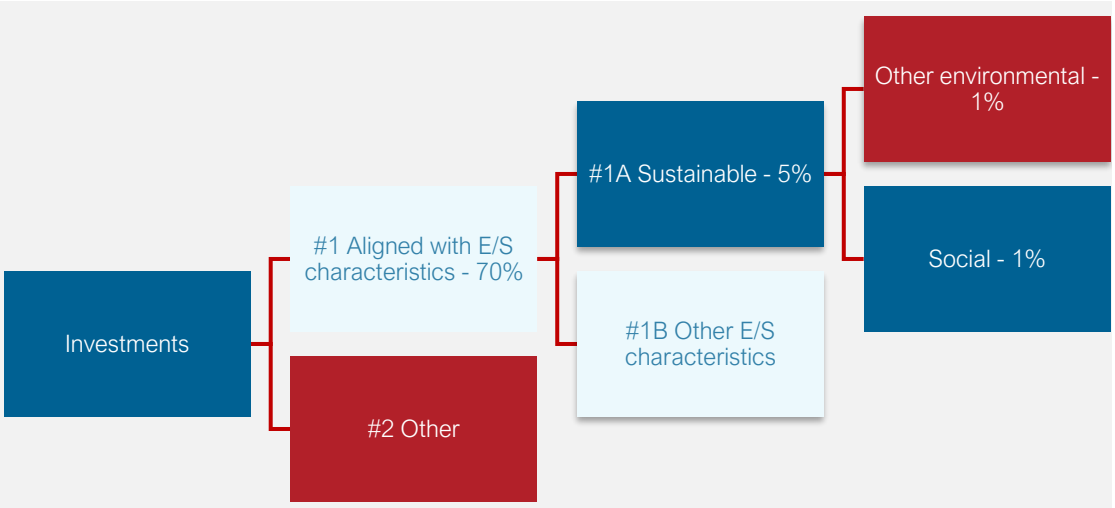

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[87]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

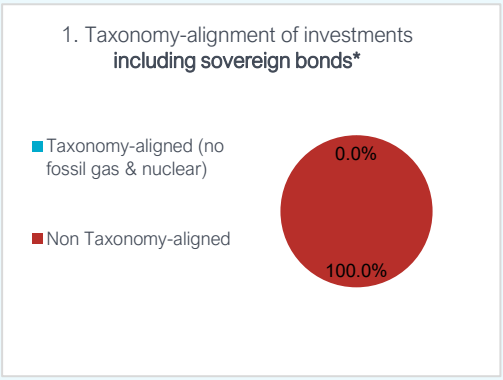

☒ No

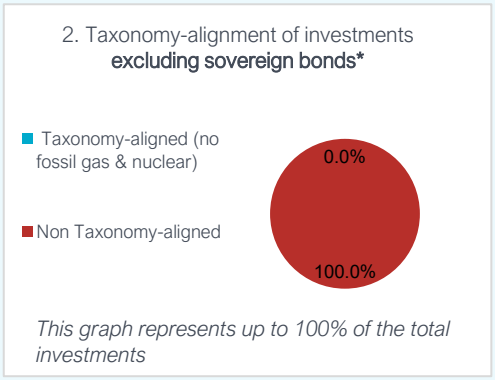

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[87] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1025014389/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2050 Fund

Legal entity identifier:
549300J4YDP2CV913309

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

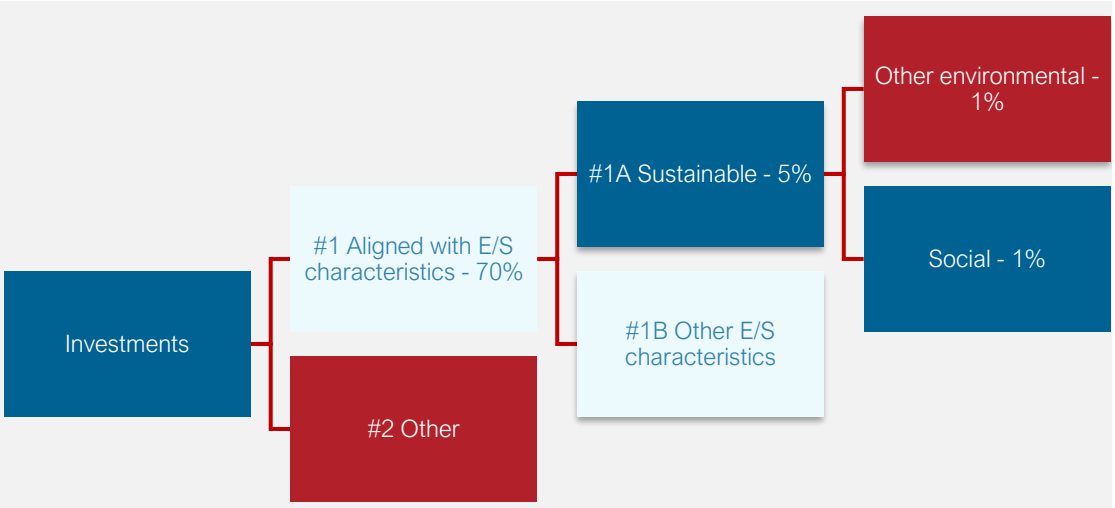

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[88]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

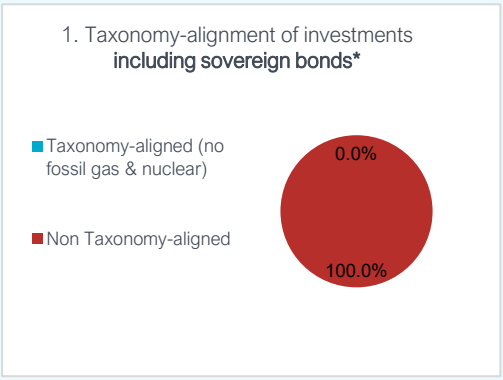

☒ No

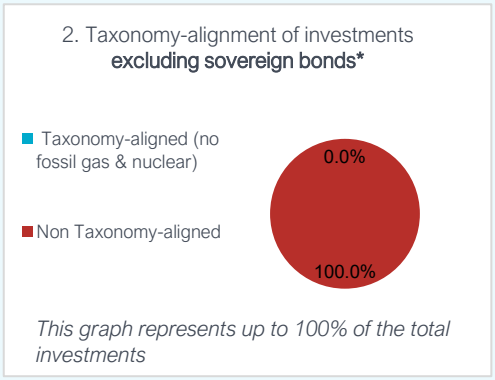

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[88] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU1025014629/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2055 Fund

Legal entity identifier:
254900MPPNN4DLXDKB92

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

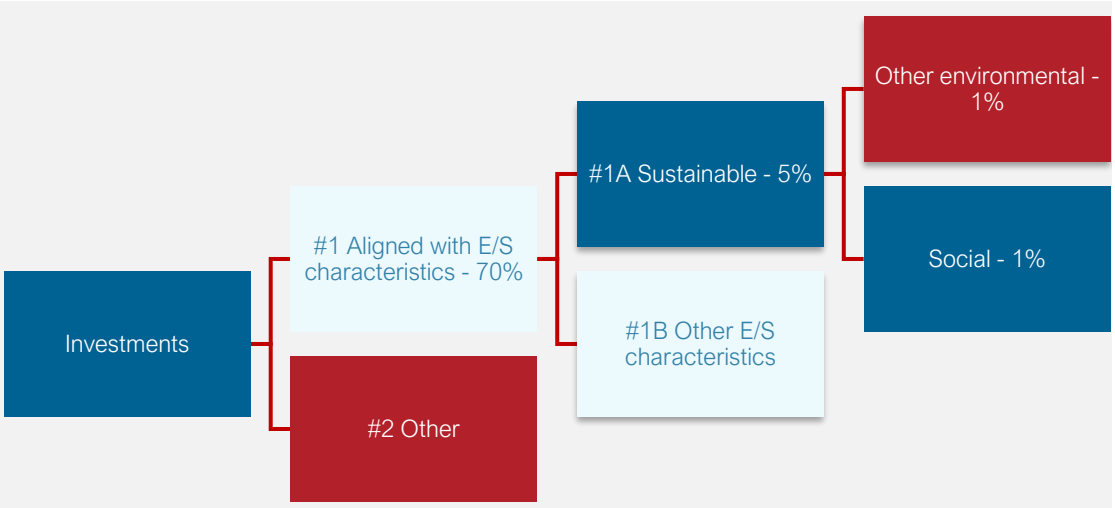

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[89]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

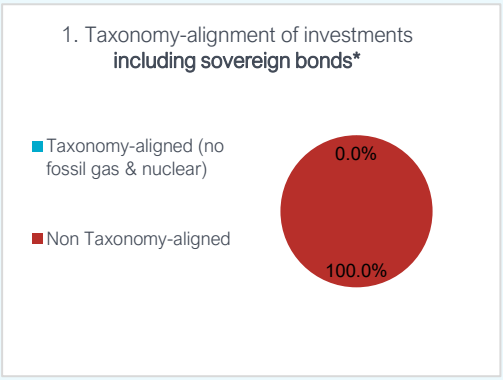

☒ No

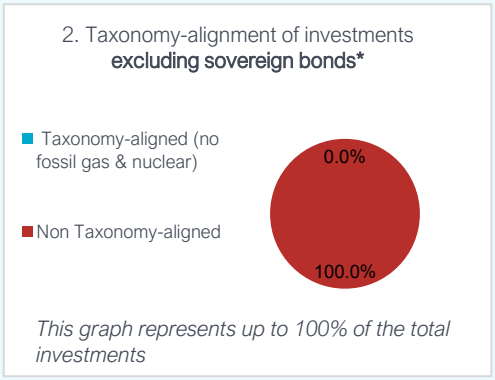

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[89] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2218679988/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Fidelity Target™ 2060 Fund

Legal entity identifier:
2549004RGYR26MYR1T34

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

☐ It will make a minimum of sustainable investments with an environmental objective: __%

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of sustainable investments with a social objective: __%

☒ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
(iii) the percentage of the fund invested in sustainable investments;
(iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy); and
(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in:

(a) securities of issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:
(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or
(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
(b) securities of issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or
(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

• Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);
• Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering
1) environmental issues,
2) human rights and communities,
3) labour rights and supply chain,
4) customers,
5) governance; and
• PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises

and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

• Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
• Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above or that meet Fidelity's ESG Tilt or ESG Target criteria;
• Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above; and
• Sovereign issuers that have been subject to negative screening by the Investment Manager.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines,

and
2. a principle-based screening policy which includes:

(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

(i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
(ii) a minimum of 5% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

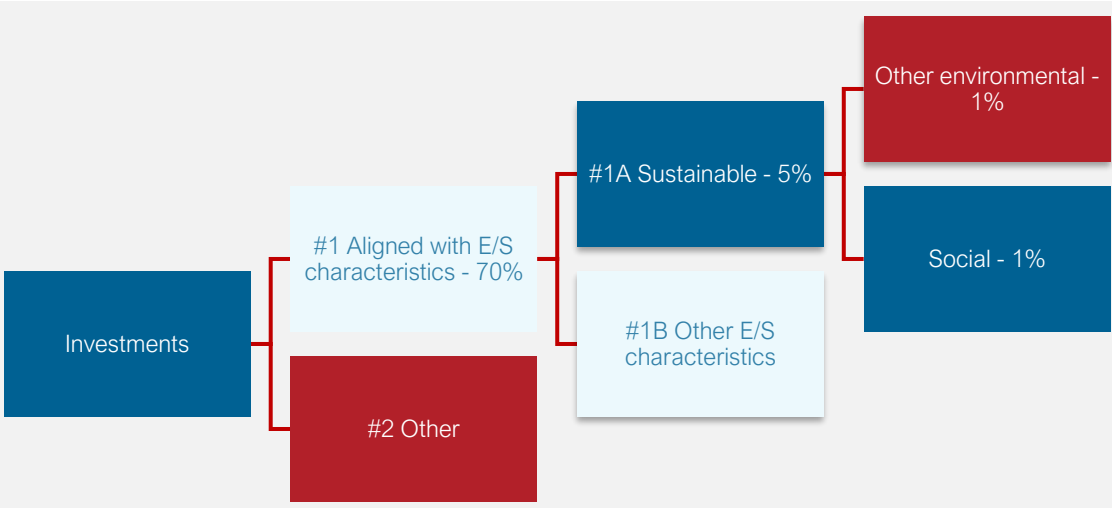

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 5% of its assets in sustainable investments (#1A sustainable) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective. The remaining sustainable investments of the fund may have an environmental or social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[90]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

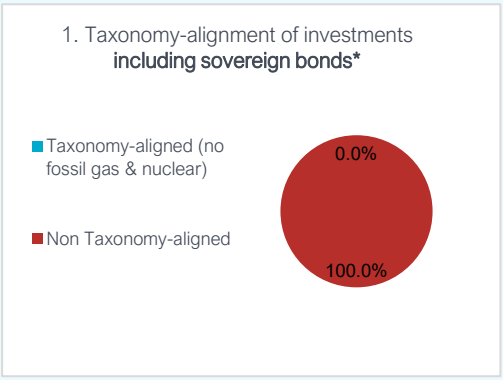

☒ No

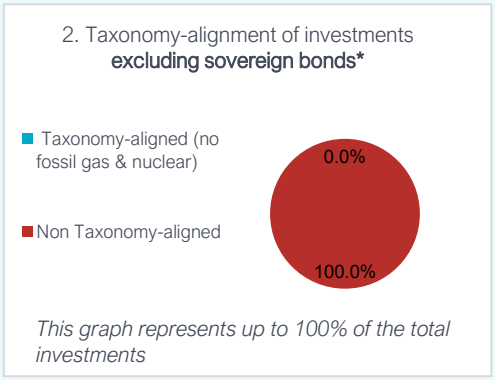

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

[90] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU2218680481/tab-disclosure#SFDR-disclosure.

Further information on the methodologies set out herein is available on the website: Sustainable investing framework (fidelityinternational.com).

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Fidelity Funds - Euro Cash Fund

Legal entity identifier:
54930085GQE5XBYYS267

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It will make a minimum of sustainable investments with an environmental objective: __%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It will make a minimum of sustainable investments with a social objective: __%
- ☐ It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of % of sustainable investments
  - ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☐ with a social objective
- ☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises eligible issuers of short-dated debt.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to

exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel Sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please

refer to the website for further information Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the fund's investment universe.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

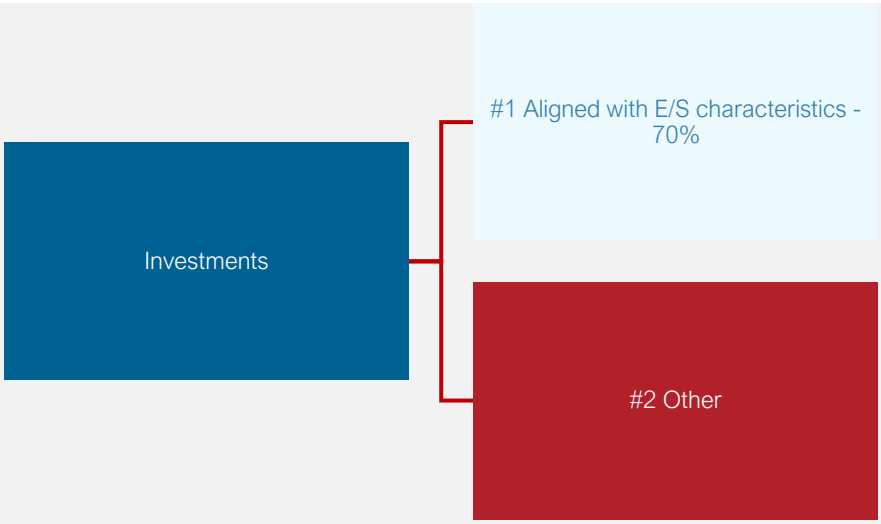

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[91]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

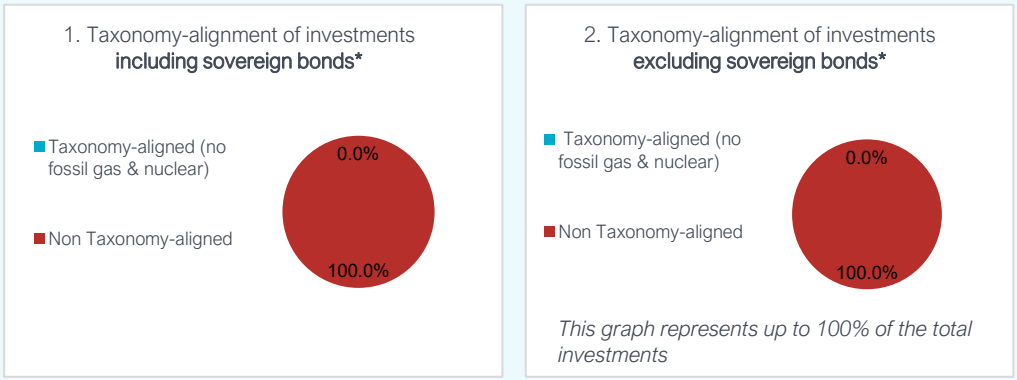

[91] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website: https://www.fidelity.lu/funds/factsheet/LU0261953490/tab-disclosure#SFDR-disclosure.

☒ It promotes E/S characteristics, but will not make sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by aiming to achieve an ESG score of its portfolio greater than the ESG score of the fund's investment universe. The investment universe comprises eligible issuers of short-dated debt.

ESG scores are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

ESG scores of individual securities are established by assigning set numerical values to Fidelity ESG ratings and ESG ratings provided by external agencies. These numerical values are aggregated to determine the average ESG score of the portfolio and that of the investment universe.

The weighted average ESG score of the fund's portfolio is measured against the ESG score of the fund's investment universe using either a weighted average or equal weighted method of calculation. Further details on the calculation methodology are set out at Sustainable investing framework (fidelityinternational.com) and may be updated from time to time. The Investment Manager undertakes monitoring of the fund's ESG score on a periodic basis and the fund aims to achieve its ESG score targets by adjusting its portfolio on an ongoing basis. In seeking to

exceed the ESG score of the investment universe, the Investment Manager aims to invest in securities of issuers with higher ESG characteristics.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

(i) the ESG score of the fund's portfolio measured against the ESG score of the fund's investment universe; and
(ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (as defined below).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

This question is not applicable as the fund does not intend to make sustainable investments.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This question is not applicable as the fund does not intend to make sustainable investments.

How have the indicators for adverse impacts on sustainability factors been taken into account?

This question is not applicable.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

[X] Yes

Yes, Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

[ ] No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The fund aims to achieve an ESG score of its portfolio greater than that of the investment universe by investing in securities of issuers with, on average, better ESG characteristics than those in the investment universe.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:
(i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
(ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please

refer to the website for further information : Sustainable investing framework (fidelityinternational.com).

The Investment Manager also has discretion to implement additional exclusions.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund aims to achieve an ESG score of its portfolio greater than that of the fund's investment universe.

In addition, the fund will systematically apply the Exclusions, as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

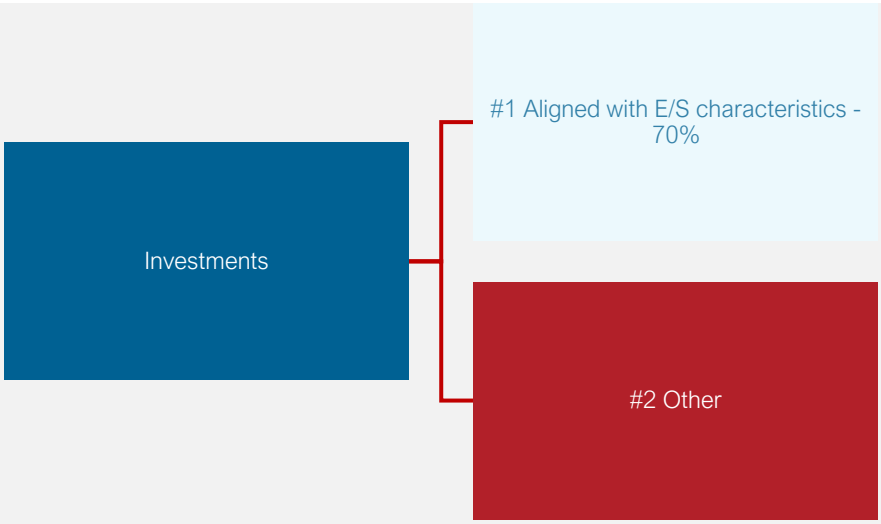

What is the asset allocation planned for this financial product?

(#1 Aligned with E/S characteristics) A minimum of 70% of the fund's assets will be invested in securities with an ESG rating. These securities will contribute to the ESG score of the portfolio.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[92]?

☐ Yes

☐ In fossil gas ☐ In nuclear energy

☒ No

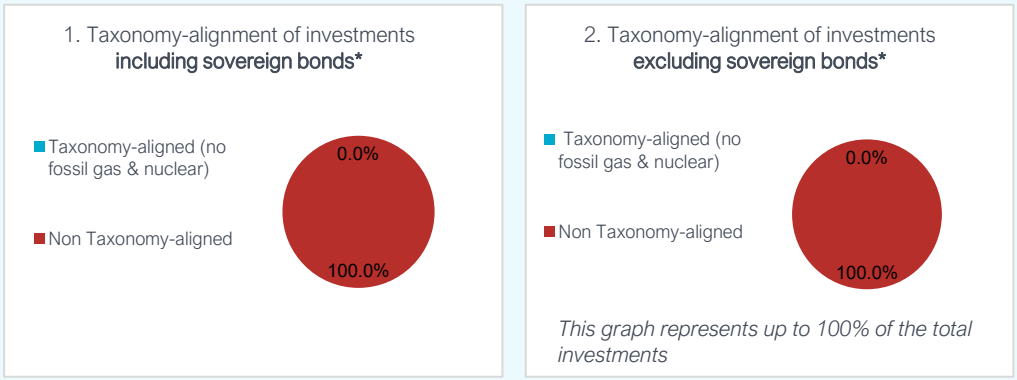

[92] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

This question is not applicable as the fund does not intend to make sustainable investments.

What is the minimum share of socially sustainable investments?

This question is not applicable as the fund does not intend to make sustainable investments.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in assets aligned with the financial objective of the fund, cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As a minimum environmental and social safeguard, the fund will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

Fidelity INTERNATIONAL
